Contents

Contributors ix
Preface xiii

1 **Genetics of Morphogenesis and Pathogenic Development of *Ustilago maydis*** 1
Steven J. Klosterman, Michael H. Perlin, Maria Garcia-Pedrajas, Sarah F. Covert, and Scott E. Gold

I. Introduction 3
II. Mating 4
III. Dimorphism 12
IV. Cell Cycle and Cytoskeletal Regulation 17
V. Pathogenesis 21
VI. Genome-Wide Approaches for the Study of *U. maydis* 27
VII. The Plant Side of the Disease Equation 36
VIII. Conclusion 38
References 38

2 **Enabling a Community to Dissect an Organism: Overview of the Neurospora Functional Genomics Project** 49
Jay C. Dunlap, Katherine A. Borkovich, Matthew R. Henn, Gloria E. Turner, Matthew S. Sachs, N. Louise Glass, Kevin McCluskey, Michael Plamann, James E. Galagan, Bruce W. Birren, Richard L. Weiss, Jeffrey P. Townsend, Jennifer J. Loros, Mary Anne Nelson, Randy Lambreghts, Hildur V. Colot, Gyungsoon Park, Patrick Collopy, Carol Ringelberg, Christopher Crew, Liubov Litvinkova, Dave DeCaprio, Heather M. Hood, Susan Curilla, Mi Shi, Matthew Crawford, Michael Koerhsen, Phil Montgomery, Lisa Larson, Matthew Pearson, Takao Kasuga, Chaoguang Tian, Meray Baştürkmen, Lorena Altamirano, and Junhuan Xu

I. Introduction 51
II. Project 1: Systematic Gene Knockouts 56

III. Project 2: Genome Informatics and Functional Annotation Studies 71
IV. Project 3: Profiling Transcription in *Neurospora* 78
V. Project 4: cDNA Libraries and the Generation of a High-Density SNP Map 85
VI. Conclusions 93
References 93

3 Genomics of the Plant Pathogenic Oomycete *Phytophthora*: Insights into Biology and Evolution 97
Howard S. Judelson

I. Introduction 98
II. Advances in Structural Genomics 100
III. Organization of *Phytophthora* Genomes 104
IV. Other Genetic Elements 114
V. Tools for Functional Genomics 115
VI. Selected Areas of *Phytophthora* Research 118
VII. Conclusions and Prospects 131
References 132

4 Sex and Virulence of Human Pathogenic Fungi 143
Kirsten Nielsen and Joseph Heitman

I. The Predominant Human Pathogenic Fungi 144
II. Sex in Fungal Pathogens: Cost Versus Benefit 146
III. Mating-Type Loci Are the Sex-Determining Regions in Fungi 148
IV. Sex in *Cryptococcus* 149
V. The Unusual *Cryptococcus* Mating-Type Locus 153
VI. Genome Sequencing Identified Mating-Type Locus in the "Asexual" *C. albicans* and Led to the Discovery of Mating 153
VII. Mating-Type Locus in *A. fumigatus* 157
VIII. Mating-Type Loci in Other Human Pathogenic Fungi 157
IX. Population Genetic Studies in "Asexual" Fungi Reveal Evidence of Sex 159
X. The Role of Sex in Pathogenesis 162
XI. Concluding Remarks 165
References 166

5 **From Genes to Genomes: A New Paradigm for Studying Fungal Pathogenesis in *Magnaporthe oryzae*** 175
Jin-Rong Xu, Xinhua Zhao, and Ralph A. Dean

I. Introduction 176
II. Attachment and Appressorium Morphogenesis 177
III. Mechanisms of Penetration 187
IV. Invasive Growth and Host–Pathogen Interactions 190
V. Genes and Genome Features 195
VI. Functional Genomics 204
VII. Concluding Remarks 208
References 209

6 **Genetic and Genomic Dissection of the *Cochliobolus heterostrophus Tox1* Locus Controlling Biosynthesis of the Polyketide Virulence Factor T-toxin** 219
B. Gillian Turgeon and Scott E. Baker

I. Introduction 220
II. Tools for Genetic Analysis 228
III. *C. heterostrophus* and SCLB 233
IV. The Genetics of T-Toxin Production 235
V. Genomic Analysis of the *Tox1* Locus 242
VI. The PM-Toxin Gene Cluster 247
VII. Are Additional *Tox* Loci Involved in T-Toxin Production? 249
VIII. Model for Biosynthesis of T-Toxin 250
IX. The Evolution of Polyketide-Mediated Fungal Specificity for T-Cytoplasm Corn 252
X. Conclusions 254
References 255

7 **Fungal Genomics: A Tool to Explore Central Metabolism of *Aspergillus fumigatus* and Its Role in Virulence** 263
Taylor Schoberle and Gregory S. May

I. Introduction 264
II. Nutritional Auxotrophy and Fungal Genetics 265
III. Regulation of Amino Acid Biosynthesis 268

IV. Regulation of Ambient pH Response 272
V. Regulation of Nitrogen Response Pathways 275
VI. Regulation of Carbon Response Pathways 277
VII. Concluding Remarks 281
References 281
