Preface xi
Béatrice CLOUET-D'ORVAL, Bruno FRANZETTI and Philippe OGER

Chapter 1. Replication of Archaeal Chromosomes 1
Ghislaine HENNEKE, Roxane LESTINI, Marc NADAL and Didier FLAMENT

1.1. Replication initiation 2
1.1.1. Identifying the origins of replication. 2
1.1.2. Recognizing the origins of replication. 3
1.1.3. Pre-initiation complex formation. 6
1.1.4. Primer synthesis. 7
1.2. The elongation phase of replication 8
1.3. Okazaki fragment maturation 10
1.3.1. Removal of ribonucleotides by RNase HII 11
1.3.2. Removal of oligonucleotides by FEN1 11
1.3.3. DNA fragment assembly by DNA ligase 13
1.4. Restarting replication forks 15
1.5. Replication termination. 18
1.6. Chromosome segregation and decatenation 18
1.7. References 19

Chapter 2. Archaeal DNA Repair 25
Caroline L'HERMITTE-STEAD, Anaïs BAYARD, Alexey ALEKSANDROV, Roxane LESTINI and Hannu MYLLYKALLIO

2.1. General introduction 25
2.2. Several different types of DNA damages occur in archaea 28
2.2.1. The archaeal replisome as the intrinsic source of replication errors and DNA damage 28
2.2.2. Chemical and physical factors threaten the integrity of archaeal genomes 29
2.3. Different archaeal DNA repair pathways 31
2.3.1. DNA mismatches threaten genome integrity in all domains of life 31
2.3.2. Archaeal NER 33
2.3.3. BER in archaea 35
2.3.4. Archaeal RER 37
2.3.5. Double-strand break repair in archaea 37
2.4. Coordination of the different pathways by the replication clamp 40
2.5. Summary and conclusion 42
2.6. References 43

Chapter 3. Transcription in Archaea 45
Thomas FOUQUEAU, Duy KHANH PHUNG and Ludovic SAUGUET

3.1. RNA polymerase 47
3.1.1. RNA polymerase architecture in archaea 47
3.1.2. A highly preserved catalytic core 50
3.1.3. Anatomy of the active site of an RNA polymerase 50
3.2. The three stages of transcription 51
3.2.1. Transcription initiation 52
3.2.2. Elongation 55
3.2.3. Termination 61
3.3. Transcription regulation 64
3.4. References 66

Chapter 4. RNA Classes and Their Maturation and Degradation Enzymes 77
Manon BATISTA, Béatrice CLOUET-D'ORVAL and Marie BOUVIER

4.1. Introduction 77
4.2. RNA classes in archaea 79

4.2.1. Messenger RNA 79
4.2.2. Transfer RNA 81
4.2.3. Ribosomal RNA 81
4.2.4. Box C/D and H/ACA guide RNA 83
4.2.5. Small regulatory RNA 83
4.2.6. CRISPR RNA 84
4.3. Ribonuclease families in archaea 84
4.3.1. Ubiquitous endoribonucleases in archaea 86
4.3.2. 3′–5′ exoribonucleases 90
4.3.3. The β-CASP ribonuclease and 5′–3′ exoribonuclease families are widespread in archaea 93
4.4. Ubiquitous RNA-binding proteins in archaea 95
4.4.1. Sm-like proteins 96
4.4.2. The ribosomal protein L7Ae 96
4.4.3. Helicases of the SF2 superfamily 97
4.5. Conclusion 100
4.6. References 100

Chapter 5. Ribosome and Transfer RNA Biogenesis 115
Tamara BASTA and Sébastien FERREIRA-CERCA

5.1. Ribosome biogenesis 116
5.1.1. Ribosome composition 116
5.1.2. Ribosome biogenesis in a nutshell 122
5.1.3. Synthesis of the ribosomal constituents 123
5.1.4. Ribosome biogenesis process 125
5.2. Synthesis and maturation of tRNAs 133
5.2.1. tRNA structure 133
5.2.2. Diversity of tRNA genes 135
5.2.3. Transcript processing 137
5.2.4. Nucleotide modifications 145
5.2.5. Aminoacylation of tRNAs 151
5.3. Methodical toolboxes 156
5.4. References 158

Chapter 6. The Diversity and Function of Noncoding RNAs in Archaea 167
Hubert F. BECKER and Christine GASPIN

6.1. Introduction 167
6.2. Noncoding RNA diversity 168

6.2.1. ncRNA modification guides. 169
6.2.2. ncRNAs as regulators of gene expression. 172
6.2.3. CRISPR ncRNA. 173
6.2.4. Small RNAs derived from tRNAs (tsRNAs) 175
6.2.5. Noncoding RNA introns in archaea 177
6.3. ncRNA identification 178
6.3.1. Experimental approaches 178
6.3.2. Bioinformatics approaches 180
6.4. Circularization of noncoding RNAs 182
6.4.1. Overview of circRNAs. 182
6.4.2. Biogenesis of circRNAs 183
6.5. Conclusion 185
6.6. References 186

Chapter 7. Translation in Archaea 193
Emmanuelle SCHMITT and Yves MECHULAM

7.1. Initiating the translation 195
7.1.1. aIF2 and the ternary complex aIF2:GTP:Met-tRNAiMet 198
7.1.2. The 30S initiation complex in Pyrococcus abyssi 201
7.1.3. Comparison with eukaryotic eIF1, eIF1A and eIF2 factors 204
7.1.4. The different patterns of mRNA recruitment in archaea 204
7.1.5. Assembly with the large subunit and formation of the elongation-competent ribosome 205
7.2. Elongation peptide synthesis. 206
7.2.1. Recruitment of aminoacylated tRNA to site A 209
7.2.2. The special case of the SelB factor. 209
7.2.3. Translocation 210
7.2.4. EF-P-e/aIF5A 211
7.2.5. GTPase recruitment platform 212
7.2.6. Localized translation at the membrane 213
7.3. Translation termination and ribosome recycling 214
7.3.1. The class 1 factor, aRF1 215
7.3.2. The class 2 archaeal factor, aEF1A 215
7.3.3. The ABCE1 factor 217
7.3.4. The special case of abnormal terminations 218
7.3.5. Ribosome recycling after abnormal termination 219
7.4. Conclusion 219
7.5. References 220

List of Authors 233
