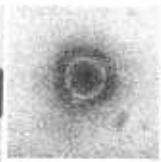
Learning 3

0.1 How to Study 3
0.2 Using Your Textbook 6
0.3 Using Your Textbook's Internet Resources 8
0.4 Online Labs 9

Putting What You Learn to Work 10

0.5 Science Is a Way of Thinking 10
0.6 How to Read a Graph 12

Part 1
The Study of Life



National Institute of Allergy and Infectious Diseases (NIAID)

1 The Science of Biology 16

Biology and the Living World 18

1.1 The Diversity of Life 18
1.2 Properties of Life 19
1.3 The Organization of Life 20
1.4 Biological Themes 22

The Scientific Process 24

1.5 Stages of a Scientific Investigation 24
1.6 Theory and Certainty 26

Core Ideas of Biology 28

1.7 Four Theories Unify Biology as a Science 28

Part 2
The Living Cell

Herbert Spichtinger/ Image Source

2 The Chemistry of Life 34

Some Simple Chemistry 36

2.1 Atoms 36
2.2 Ions and Isotopes 38
2.3 Molecules 39

Water: Cradle of Life 42

2.4 Unique Properties of Water 42
2.5 Water Ionizes 44

3 Molecules of Life 48

Forming Macromolecules 50

3.1 Building Big Molecules 50

Types of Macromolecules 52

3.2 Proteins 52
3.3 Nucleic Acids 56
3.4 Carbohydrates 59
3.5 Lipids 61

4 Cells 64

The World of Cells 66

4.1 Cells 66

Kinds of Cells 69

4.2 Prokaryotic Cells 69
4.3 Eukaryotic Cells 70

Tour of a Eukaryotic Cell 72

4.4 The Plasma Membrane 72
4.5 The Nucleus: The Cell's Control Center 74
4.6 The Endomembrane System 76
4.7 Organelles that Harvest Energy 78
4.8 The Cytoskeleton: Interior Framework of the Cell 80

Transport Across Plasma Membranes 82

4.9 Diffusion and Osmosis 82
4.10 Bulk Passage into and out of Cells 84
4.11 Transport through Proteins 85

5 Energy and Life 90

Cells and Energy 92

5.1 The Flow of Energy in Living Things 92
5.2 The Laws of Energy 92

Cell Chemistry 94

5.3 Chemical Reactions 94

Enzymes 95

5.4 How Enzymes Work 95
5.5 How Cells Regulate Enzymes 96

How Cells Use Energy 99

5.6 ATP: The Energy Currency of the Cell 99

6 Photosynthesis: Acquiring Energy from the Sun 104

Photosynthesis 106

6.1 An Overview of Photosynthesis 106
6.2 How Plants Convert Sunlight to Chemical Energy 110
6.3 Building New Molecules 113

Photorespiration 115

6.4 Photorespiration: Putting the Brakes on Photosynthesis 115

7 How Cells Harvest Energy from Food 118

An Overview of Cellular Respiration 120

7.1 Where Is the Energy in Food? 120

Respiration Without Oxygen: Glycolysis 122

7.2 Using Coupled Reactions to Make ATP 122

Respiration with Oxygen: The Krebs Cycle 123

7.3 Harvesting Electrons from Chemical Bonds 123
7.4 Using the Electrons to Make ATP 125

Harvesting Electrons Without Oxygen: Fermentation 128

7.5 Cells Can Metabolize Food Without Oxygen 128

Other Sources of Energy 129

7.6 Glucose Is Not the Only Food Molecule 129

Part 3 The Continuity of Life

Andrew Fox/Alamy Stock Photo

8 Mitosis 134

Cell Division 136

8.1 Prokaryotes Have a Simple Cell Cycle 136
8.2 Eukaryotic Cell Cycle 137
8.3 Chromosomes 138
8.4 Cell Division 141

Cancer and the Cell Cycle 143

8.5 What Is Cancer? 143

9 Meiosis 152

Meiosis 154

9.1 Discovery of Meiosis 154
9.2 The Sexual Life Cycle 155
9.3 The Stages of Meiosis 157

Comparing Meiosis and Mitosis 160

9.4 How Meiosis Differs from Mitosis 160
9.5 Evolutionary Consequences of Sex 162

10 Foundations of Genetics 166

Mendel 168

10.1 Mendel and the Garden Pea 168
10.2 What Mendel Observed 170
10.3 Mendel Proposes a Theory 172
10.4 Mendel's Laws 175

From Genotype to Phenotype 176

10.5 How Genes Influence Traits 176
10.6 Why Some Traits Don't Show Mendelian Inheritance 178

Chromosomes and Heredity 181

10.7 Human Chromosomes 181
10.8 The Role of Mutations in Human Heredity 184

11 DNA: The Genetic Material 190

Genes Are Made of DNA 192

11.1 Discovering the Structure of DNA 192

DNA Replication 194

11.2 How DNA Copies Itself 194

Altering the Genetic Message 196

11.3 Mutation 196

Editing Genes 200

11.4 Gene Editing with CRISPR 200
11.5 Gene Drives 203

12 How Genes Work 208

From Gene to Protein 210

12.1 The Central Dogma 210
12.2 From DNA to RNA: Transcription 211
12.3 From RNA to Protein: Translation 212
12.4 Gene Expression 215

Regulating Gene Expression 218

12.5 Transcriptional Control in Prokaryotes 218
12.6 Transcriptional Control in Eukaryotes 219
12.7 RNA-Level Control: Silencing Genes 221

13 The New Biology 226

Genomics 228

13.1 The Human Genome 228

Genetic Engineering 230

13.2 A Scientific Revolution 230
13.3 Genetic Engineering and Medicine 234
13.4 Genetic Engineering and Agriculture 238

The Revolution in Cell Technology 242

13.5 Reproductive Cloning 242
13.6 Stem Cell Therapy 244
13.7 Gene Therapy 246

Part 4
The Evolution and Diversity of Life

Eric Isselee/ Shutterstock

14 Evolution and Natural Selection 250

Evolution 252

14.1 Darwin's Voyage on HMS *Beagle* 252
14.2 Darwin's Evidence 254
14.3 The Theory of Natural Selection 255

The Theory of Evolution 257

14.4 The Evidence for Evolution 257
14.5 Evolution's Critics 261

How Populations Evolve 263

14.6 Genetic Change in Populations 263
14.7 Agents of Evolution 264

Adaptation Within Populations 269

14.8 Sickle-Cell Disease 269
14.9 Peppered Moths and Industrial Melanism 271

How Species Form 273

14.10 The Biological Species Concept 273
14.11 Isolating Mechanisms 274

15 Exploring Biological Diversity 278

The Classification of Organisms 280

15.1 The Invention of the Linnaean System 280
15.2 Species Names 281
15.3 Higher Categories 282
15.4 What Is a Species? 283

Inferring Phylogeny 284

15.5 How to Build a Family Tree 284

Kingdoms and Domains 288

15.6 The Kingdoms of Life 288
15.7 Domain: A Higher Level of Classification 290

16 Evolution of Microbial Life 294

Origin of Life 296

16.1 How Cells Arose 296

Prokaryotes 300

16.2 The Simplest Organisms 300

Viruses 304

16.3 Structure of Viruses 304
16.4 How Viruses Infect Organisms 307

Protists 311

16.5 General Biology of Protists 311
16.6 Kinds of Protists 313

Fungi 315

16.7 A Fungus Is Not a Plant 315
16.8 Kinds of Fungi 318

17 Evolution of Plants 322

Plants 324

17.1 Adapting to Terrestrial Living 324
17.2 Plant Evolution 326

Seedless Plants 328

17.3 Nonvascular Plants 328
17.4 The Evolution of Vascular Tissue 329
17.5 Seedless Vascular Plants 330

The Advent of Seeds 332

17.6 Evolution of Seed Plants 332
17.7 Gymnosperms 334

The Evolution of Flowers 336

17.8 Rise of the Angiosperms 336

18 Evolution of Animals 342

Introduction to the Animals 344

18.1 General Features of Animals 344
18.2 Six Key Transitions in Body Plan 346

Evolution of the Animal Phyla 348

18.3 The Simplest Animals 348
18.4 Advent of Bilateral Symmetry 351
18.5 Changes in the Body Cavity 354
18.6 Redesigning the Embryo 363

The Parade of Vertebrates 368

18.7 Overview of Vertebrate Evolution 368
18.8 Fishes Dominate the Sea 371
18.9 Amphibians and Reptiles Invade the Land 373
18.10 Birds Master the Air 376
18.11 Mammals Adapt to Colder Times 377
18.12 Human Evolution 378

Part 5
The Living Environment

Darwin Dale/age fotostock

19 Populations and Communities 382

Ecology 384

19.1 What Is Ecology? 384

Populations 385

19.2 Population Growth 385
19.3 The Influence of Population Density 388
19.4 Life History Adaptations 389
19.5 Population Demography 390

How Competition Shapes Communities 391

19.6 Communities 391
19.7 The Niche and Competition 392

Species Interact in Many Ways 394

19.8 Coevolution and Symbiosis 394
19.9 Predation 396

Community Stability 398

19.10 Ecological Succession 398

20 Ecosystems 402

The Energy in Ecosystems 404

20.1 Ecosystems 404
20.2 Ecological Pyramids 409

Materials Cycle Within Ecosystems 410

20.3 The Water Cycle 410
20.4 The Carbon Cycle 412
20.5 The Nitrogen and Phosphorus Cycles 413

How Weather Shapes Ecosystems 415

20.6 The Sun and Atmospheric Circulation 415
20.7 Latitude and Elevation 417

Major Kinds of Ecosystems 418

20.8 Ocean Ecosystems 418
20.9 Freshwater Ecosystems 420
20.10 Land Ecosystems 422

21 Behavior and the Environment 428

The Study of Behavior 430

21.1 Instinctive Behavioral Patterns 430
21.2 Genetic Effects on Behavior 431

Behavior Can Be Influenced by Learning 432

21.3 How Animals Learn 432
21.4 Animal Cognition 433

Evolutionary Forces Shape Behavior 434

21.5 A Cost-Benefit Analysis of Behavior 434
21.6 Migratory Behavior 436

Social Behavior 438

21.7 Animal Societies 438
21.8 Human Social Behavior 439

22 Human Influences on the Living World 442

Global Change 444

22.1 Pollution 444
22.2 Global Warming 445
22.3 Loss of Biodiversity 449

Saving Our Environment 451

22.4 Preserving Nonreplaceable Resources 451
22.5 Curbing Population Growth 453

Solving Environmental Problems 454

22.6 Preserving Endangered Species 454
22.7 Individuals Can Make the Difference 457

Part 6
Animal Life

Professor Pietro M. Motta/Science Source

23 The Animal Body and How It Moves 460

The Animal Body Plan 462

23.1 Organization of the Vertebrate Body 462

Tissues of the Vertebrate Body 464

23.2 Epithelium Is Protective Tissue 464
23.3 Connective Tissue Carries Out Various Functions 465
23.4 Muscle Tissue Lets the Body Move 467
23.5 Nerve Tissue Conducts Signals Rapidly 468

The Skeletal and Muscular Systems 469

23.6 Types of Skeletons 469
23.7 Muscles and How They Work 471

24 Circulation and Respiration 476

Circulation 478

24.1 Open and Closed Circulatory Systems 478
24.2 Architecture of the Vertebrate Circulatory System 480
24.3 Blood 483
24.4 Human Circulatory System 485

Respiration 488

24.5 Types of Respiratory Systems 488
24.6 The Human Respiratory System 490
24.7 How Respiration Works: Gas Exchange 492

25 The Path of Food Through the Animal Body 496

Food Energy and Essential Nutrients 498

25.1 Food for Energy and Growth 498

Digestion 501

25.2 Types of Digestive Systems 501
25.3 The Human Digestive System 502
25.4 The Mouth and Teeth 503
25.5 The Esophagus and Stomach 505
25.6 The Small and Large Intestines 507
25.7 Accessory Digestive Organs 509

26 Maintaining the Internal Environment 514

Homeostasis 516

26.1 How the Animal Body Maintains Homeostasis 516

Osmoregulation 518

26.2 Regulating the Body's Water Content 518
26.3 Eliminating Nitrogenous Wastes 521

27 How the Animal Body Defends Itself 524

Three Lines of Defense 526

27.1 Skin: The First Line of Defense 526
27.2 Cellular Counterattack: The Second Line of Defense 528
27.3 Specific Immunity: The Third Line of Defense 530

The Immune Response 532

27.4 Initiating the Immune Response 532
27.5 T Cells: The Cellular Response 532
27.6 B Cells: The Humoral Response 534
27.7 Active Immunity Through Clonal Selection 536
27.8 Vaccination 539
27.9 Antibodies in Medical Diagnosis 541

Defeat of the Immune System 542

27.10 Overactive Immune System 542
27.11 AIDS: Immune System Collapse 543

28 The Nervous System 546

Neurons and How They Work 548

28.1 The Nervous System 548
28.2 Nerve Impulses 549
28.3 The Synapse 551

The Central Nervous System 553

28.4 How the Brain Works 553
28.5 The Spinal Cord 557

The Peripheral Nervous System 558

28.6 The Voluntary and Autonomic Nervous Systems 558

The Sensory Nervous System 560

28.7 Sensing the Internal Environment 560
28.8 Sensing Gravity and Motion 561
28.9 Sensing Chemicals: Taste and Smell 564
28.10 Sensing Sounds: Hearing 565
28.11 Sensing Light: Vision 566

29 Chemical Signaling Within the Animal Body 572

The Endocrine System 574

29.1 Hormones 574
29.2 How Hormones Target Cells 576

The Major Endocrine Glands 579

29.3 The Pituitary 579
29.4 The Pancreas 581
29.5 The Thyroid, Parathyroid, and Adrenal Glands 582

30 Reproduction and Development 586

Modes of Reproduction 588

30.1 Asexual and Sexual Reproduction 588

The Human Reproductive System 590

30.2 Males 590
30.3 Females 592
30.4 Hormones Coordinate the Reproductive Cycle 594

The Course of Development 596

30.5 Embryonic Development 596
30.6 Fetal Development 600

Birth Control and Sexually Transmitted Infections 602

30.7 Contraception and Sexually Transmitted Infections 602

Part 7 Plant Life

Judy Freilicher/Alamy Stock Photo

31 Plant Form and Function 606

Structure and Function of Plant Tissues 608

31.1 Organization of a Vascular Plant 608
31.2 Plant Tissue Types 609

The Plant Body 613

31.3 Roots 613
31.4 Stems 615
31.5 Leaves 617

Plant Transport and Nutrition 620

31.6 Water Movement 620
31.7 Carbohydrate Transport 623

32 Plant Reproduction and Growth 626

Flowering Plant Reproduction 628

32.1 Angiosperm Reproduction 628
32.2 Seeds 631
32.3 Fruit 632
32.4 Germination 633

Regulating Plant Growth 634

32.5 Plant Hormones 634
32.6 Auxin 635

Plant Responses to Environmental Stimuli 636

32.7 Photoperiodism and Dormancy 636
32.8 Tropisms 637

Glossary 640

Index 654
