Table of Contents

Preface IX

Chapter 1 **Ex vivo evolution of human antibodies by CRISPR-X: from a naive B cell repertoire to affinity matured antibodies** 1
Marie-Claire Devilder, Melinda Moyon, Laetitia Gautreau-Rolland, Benjamin Navet, Jeanne Perroteau, Florent Delbos, Marie-Claude Gesnel, Richard Breathnach and Xavier Saulquin

Chapter 2 **A simple method for in vitro preparation of natural killer cells from cord blood** 14
Yong Xu Mu, Yu Xia Zhao, Bing Yao Li, Hong Jing Bao, Hui Jiang, Xiao Lei Qi, Li Yun Bai, Yun Hong Wang, Zhi Jie Ma and Xiao Yun Wu

Chapter 3 **Establishment of an erythroid progenitor cell line capable of enucleation achieved with an inducible c-Myc vector** 22
Steven Mayers, Pablo DiegoMoço, Talha Maqbool, Pamuditha N. Silva, Dawn M. Kilkenny and Julie Audet

Chapter 4 **Integrating vectors for genetic studies in the rare Actinomycete *Amycolatopsis marina*** 35
Hong Gao, Buvani Murugesan, Janina Hoßbach, Stephanie K. Evans, W. Marshall Stark and Margaret C. M. Smith

Chapter 5 **Genome-wide sequencing and metabolic annotation of *Pythium irregulare* CBS 494.86: understanding Eicosapentaenoic acid production** 45
Bruna S. Fernandes, Oscar Dias, Gisela Costa, Antonio A. Kaupert Neto, Tiago F. C. Resende, Juliana V. C. Oliveira, Diego M. Riaño-Pachón, Marcelo Zaiat, José G. C. Pradella and Isabel Rocha

Chapter 6 ***Nicotiana benthamiana* is a suitable transient system for high-level expression of an active inhibitor of cotton boll weevil α-amylase** 62
Guilherme Souza Prado, Pingdwende Kader Aziz Bamogo, Joel Antônio Cordeiro de Abreu, François-Xavier Gillet, Vanessa Olinto dos Santos, Maria Cristina Mattar Silva, Jean-Paul Brizard, Marcelo Porto Bemquerer, Martine Bangratz, Christophe Brugidou, Drissa Sérémé, Maria Fatima Grossi-de-Sa and Séverine Lacombe

Chapter 7 **Sustained transgene expression from sleeping beauty DNA transposons containing a core fragment of the *HNRPA2B1-CBX3* ubiquitous chromatin opening element (UCOE)** 75
Kristian Alsbjerg Skipper, Anne Kruse Hollensen, Michael N. Antoniou and Jacob Giehm Mikkelsen

Chapter 8 **Investigation of cell culture conditions for optimal foot-and-mouth disease virus production** 86
Veronika Dill, Aline Zimmer, Martin Beer and Michael Eschbaumer

Chapter 9 **A new method for quantitative detection of Lactobacillus casei based on casx gene and its application** 96
Xiaoyang Pang, Ziyang Jia, Jing Lu, Shuwen Zhang, Cai Zhang, Min Zhang and Jiaping Lv

Chapter 10 **Mucosal delivery of *Lactococcus lactis* carrying an anti-TNF scFv expression vector ameliorates experimental colitis in mice** 104
Maria José Chiabai, Juliana Franco Almeida, Mariana Gabriela Dantas de Azevedo, Suelen Soares Fernandes, Vanessa Bastos Pereira, Raffael Júnio Araújo de Castro, Márcio Sousa Jerônimo, Isabel Garcia Sousa, Leonora Maciel de Souza Vianna, Anderson Miyoshi, Anamelia Lorenzetti Bocca, Andrea Queiroz Maranhão and Marcelo Macedo Brigido

Chapter 11 **A new prokaryotic expression vector for the expression of antimicrobial peptide abaecin using SUMO fusion tag** 116
Da Sol Kim, Seon Woong Kim, Jae Min Song, Soon Young Kim and Kwang-Chul Kwon

Chapter 12 **Improvement and use of CRISPR/Cas9 to engineer a sperm-marking strain for the invasive fruit pest *Drosophila suzukii*** 128
Hassan M. M. Ahmed, Luisa Hildebrand and Ernst A. Wimmer

Chapter 13 **Surface patches on recombinant erythropoietin predict protein solubility: engineering proteins to minimise aggregation** 141
M. Alejandro Carballo-Amador, Edward A. McKenzie, Alan J. Dickson and Jim Warwicker

Chapter 14 **Formulation and evaluation of norcanthridin nanoemulsions against the *Plutella xylostella* (Lepidotera: Plutellidae)** 151
Liya Zeng, Yongchang Liu, Jun Pan and Xiaowen Liu

Chapter 15 **Improved CRISPR/Cas9 gene editing by fluorescence activated cell sorting of green fluorescence protein tagged protoplasts** 162
Bent Larsen Petersen, Svenning Rune Möller, Jozef Mravec, Bodil Jørgensen, Mikkel Christensen, Ying Liu, Hans H. Wandall, Eric Paul Bennett and Zhang Yang

Chapter 16 **Efficient gene transfer into T lymphocytes by fiber-modified human adenovirus 5** 174
Yun Lv, Feng-Jun Xiao, Yi Wang, Xiao-Hui Zou, Hua Wang, Hai-Yan Wang, Li-Sheng Wang and Zhuo-Zhuang Lu

Chapter 17 **Purification of the recombinant green fluorescent protein from tobacco plants using alcohol/salt aqueous two-phase system and hydrophobic interaction chromatography** 186
Jie Dong, Xiangzhen Ding and Sheng Wang

Chapter 18 **Fecal DNA isolation and degradation in clam *Cyclina sinensis*: noninvasive DNA isolation for conservation and genetic assessment** 194
Min Zhang, Min Wei, Zhiguo Dong, Haibao Duan, Shuang Mao, Senlei Feng, Wenqian Li, Zepeng Sun, Jiawei Li, Kanglu Yan, Hao Liu, Xueping Meng and Hongxing Ge

Chapter 19 **Simultaneous hydrolysis with lipase and fermentation of rapeseed cake for iturin A production by *Bacillus amyloliquefaciens* CX-20** 202
Wenchao Chen, Xuan Li, Xuli Ma, Shouwen Chen, Yanping Kang, Minmin Yang, Fenghong Huang and Xia Wan

Chapter 20 **Optimized production of a biologically active *Clostridium perfringens* glycosyl hydrolase phage endolysin PlyCP41 in plants using virus-based systemic expression** 212
Rosemarie W. Hammond, Steven M. Swift, Juli A. Foster-Frey, Natalia Y. Kovalskaya and David M. Donovan

Chapter 21 **Identification and characterization of an Endo-glucanase secreted from cellulolytic *Escherichia coli* ZH-4** 222
Jian Pang, Junshu Wang, Zhanying Liu, Qiancheng Zhang and Qingsheng Qi
