Section 1
Lipids in different aspects of biology

1. Membrane expansion

Jawad Muayad

Introduction 3
Membrane composition and structure 3
Mechanisms of membrane expansion 6
Role of membrane expansion in health and disease 8
References 10

2. Contribution of lipids toward membrane curvature

Charles Yaros, Emily Gonzalez, Maria D. Cabrera Gonzalez, Nicole Ramones and Elisabeth Paskali

Introduction 11
Conclusion 18
References 19

3. Lipid–protein interactions and molecular dynamics simulation

Sukriti Sacher, Sadiyah Afroz, Arvinpreet Kaur and Arjun Ray

Introduction 23
The world of MD simulations 26
Studying lipid–protein interaction through atomistic MD simulation 26
Studying lipid–protein interaction through coarse-grained MD simulation 30
Conclusion 31
References 32

4. Lipid droplet biology in health and disease

Rebecca N. Lees, Stephanie How, Susan Quilez, Shayir Landers, Sofia A. Rodriguez, Angela E. Bernasconi, Joshua J. Ostler and Anh H. Pham

Introduction 37
Structure 37
Life cycle 39
Lipid droplet organelle interaction 44
Implications in disease 46
Conclusion 49
References 49

5. Lysosome and lipid metabolism

Sumedha Sengupta and Bhashkar Paul

Introduction 55
The lysosome 55
Lipid homeostasis and the lysosome 59
Lysosomal contact with other organelles: Impacts on lipid homeostasis 64
Lysosomal storage disorders 66
References 70

6. Mitochondrial and cardiolipin biology

Ainsley Verkaik, Samyak Jain and Divya Dave

Introduction 77
Mitochondria 77
Cardiolipin 80
Discussion 82
Barth syndrome 82
Conclusion 83
References 83

7. Cholesterol transport by various lipoproteins

Aishwarya Sudam Bhale and Krishnan Venkataraman

Abbreviations 85
Introduction 85

Lipids 86
Lipoproteins 88
Importance of lipoprotein variation in medicine 89
Chylomicrons (CM) 91
VLDL 94
IDL 94
LDL 95
HDL 96
Lp(a) 98
Summary 100
Funding 100
Acknowledgments 100
References 101

8. Lipids mediators in viral infection and immunity

Keerthi Palagati and Atinderpal S. Kainth

Abbreviations 105
Introduction 105
Lipid mediators: Overview and classification 105
Interaction of lipid mediators with viral infections 106
Additional insights from recent research 107
Therapeutic targeting of lipid mediators 108
Lipidomics in viral infections 109
Clinical implications and therapeutic potential 109
Conclusion 110
References 110

9. Gender differences in lipid metabolism

Jonathan Giang, Louay Saem Aldaher and Henrique C. Ferreira

Abbreviations 113
Overview of lipid metabolism in physiological and pathological conditions 114
Gender differences in body composition 116
Gender differences in lipid metabolism 117
Estrogens 118
Gender differences in cholesterol metabolism 120
Differences between sex chromosomes in adiposity 121
Sex differences in cardiometabolic disorders 121
Summary 123
Declaration of competing interest 123
References 124

Section 2
Analytical technologies

10. Analyses of different aspects of lipids: General methods

Nicole Ramones and Elisabeth Paskali

Introduction 129
References 143

11. Current LC-MS/MS methods in lipidomics

Isabella Moceri, Emily Gonzalez and Jaden Autar

Introduction 149
Mass spectrometry analytical techniques in lipidomics 151
Liquid chromatography high-resolution tandem mass spectrometry 151
Comparison of LC-MS/MS and direct infusion techniques 154
Data processing and software availability 154
Conclusion 155
References 155

12. Gas chromatography-mass spectrometry analysis and applications in lipidomics

Carolina Cruz-Wegener

Abbreviations 157
Introduction 158
GC/MS fundamentals and mechanisms 160
Lipid analysis and profiling with GC/MS 162
Advantages of GC-MS versus alternative techniques for lipidomics 165
Challenges and limitations of GC-MS 166
Biomedical applications of lipidomic analysis with GC-MS 166
Future directions of lipidomics and GC-MS 170
Supplementary materials 170
References 171

13. Rapid and unbiased screening of serum lipid ratios using AP/MALDI-HRMS

Dharmeshkumar Parmar, Yalamanchili Venkata Subrahmanyam, Harish Ranjani, Sangeetha Vadivel, Chinnasamy Thirumoorthy, Nivedita Bhattacharya, Ranjit Mohan Anjana, Dandamudi Usharani, Anu Raghunathan, Viswanathan Mohan, Venkateswarlu Panchagnula and Kuppan Gokulakrishnan

Introduction 175
Materials and methods 176
Sample preparation 176
AP/MALDI-HRMS 177
LC-HRMS validation, estimation of lipid ratios, and statistical analysis 177
Results 177
Identification of altered lipid ratios in the study participants 180
Discussion 183
Conclusion 185
Acknowledgments 185
References 186

14. Studies of nuclear magnetic resonance (NMR) spectroscopy

Vageesh Nanduri, Rao Nanduri and Sanjoy K. Bhattacharya

Introduction 189
NMR spectroscopy 189
Lipid profiling 191
NMR studies in lipidomics 191
Lipid signaling pathways 192
In-cell NMR 193
Lipid nanoparticles and drug delivery 194
Lipids in neurodegenerative diseases 197
NMR studies in lipid droplets 199
References 199

15. The statistical analysis of 'Omics datasets: Challenges, pitfalls, and tips

Anderson B. Mayfield

Introduction 203
Data analysis goals 206
Data formatting 206
Data standardization 207
Data normalization 207
Missing data 208
Outliers 209
Multivariate analyses 210
Biomarker discovery via response screening 214
Enrichment (or lack thereof) 214
Predictive modeling 216
Acknowledgments 219
References 219

16. Differences in lipidomic analysis using different bioinformatics software

Michael Coronado, Xing Du, Guoqiang Zhu and Sanjoy K. Bhattacharya

Introduction 221
Materials 223
Methods 223
Results 227
Discussion 228
Conclusion 231
References 231

17. Metabolomics tools for the analysis of phospholipids as potential markers to decipher the molecular mechanisms behind diseases

Álvaro González-Domínguez, Lucía Jurado-Sumariva, Ana Sayago, Mónica Schwarz, Ángeles Fernández-Recamales, Enrique Durán-Guerrero and Raúl González-Domínguez

Abbreviations 233
Introduction to metabolomics and phospholipids 234
Metabolomics tools for the analysis of phospholipids 235
The bottleneck of annotating phospholipids 237
Phospholipids and Alzheimer's disease 238
Concluding remarks 239
Acknowledgments 239
References 240

18. Lipid imaging: Microscopy-based techniques for lipid membrane characterization

Sofia Yarosh, Sofia Parellada and Sean Meehan

Fluorescence microscopy 243
Live cell imaging 246
Superresolution techniques 247
Label-free imaging 248
Conclusion 250
References 250

Section 3
Lipids in laboratory and investigational medicine

19. Multiomics biomarkers of health and disease

Bjoern Titz and Nikolai V. Ivanov

Introduction 255
Robust bioanalytical analyses toward robust multiomics datasets 256

Robust computational approaches toward robust conclusions from multiomics datasets 256
The broad range of multiomics studies 259
Lipidomics in multiomics studies 259
Conclusions 262
Acknowledgments 263
References 263

20. The multifactorial pathobiology of lipidic quorum signaling molecules of *Pseudomonas aeruginosa*

Priyakshi Gogoi, Ambalika Roy, Pallavi Lahiri and Dipankar Ghosh

Abbreviations 267
Summary 267
The human microbiota and the pedagogy of cross-kingdom signaling by lipid mediators 267
The quorum signaling system of *P. aeruginosa* 268
The N-acyl homoserine lactones 268
The alkyl quinolones 271
Conclusion 275
References 275

21. Modulating intestinal lipid metabolism: The role of fatty acid-binding proteins in managing obesity

Sanjay Kottekad, Venkat Prashanth, Anant Bakshi, Raja Naryanasamy, Madan Kumar Perumal and Dandamudi Usharani

Introduction 279
Dietary lipids and pathophysiology 281
Intracellular fatty acid transport 282
Regulation of lipid metabolism in enterocytes 284
Structural and functional insights of FABPs 285
Therapeutic implications of FABP2 288
Conclusion 289
Funding 289
Acknowledgments 290
References 290

22. Lipoprotein metabolism and female fertility

Alejandra Hernandez

Lipoproteins: HDL and LDL 293
HDL 293
LDL 295
HDL function in female steroidogenic tissues 296
Polycystic ovarian syndrome (PCOS) 297
Race/ethnic disparities 298
Treatments 298
Future directions 298
Conclusion 298
References 299
Further reading 300

23. The role of maternal omega-3 supplementation in shaping offspring skeletal health

Anusha Chakraborty, Dandamudi Usharani and Kunal Sharan

Introduction 301
Omega-3 fatty acids 302
Bone physiology 303
Maternal nutrition and bone health 304
Maternal omega-3 and offspring bone health 304
Conclusion 306
References 306

24. Impact of Oxidized Lipids in the pathogenic mechanism of Age-Related Macular Degeneration

Narayanasamy Angayarkanni, Kannadasan Anand Babu, Raman Rajiv and Jyotirmay Biswas

Retina 311
Age-related macular degeneration 311
AMD pathogenesis 312
Implication of lipids and oxidized lipids in AMD pathogenic mechanism 316
Role of antioxidants in AMD 319
Association of serum lipids in AMD 319
LDL oxidation (oxLDL) 321
Genes related to lipid metabolism 322
Role of RPE and macrophages in oxLDL uptake under prooxidant conditions: In vitro studies in ARPE-19 and THP-1 macrophages 324
Conclusion 332
References 333

25. Lipidomics of human aqueous humor

Joanna Godzien, Joanna Konopinska, Karolina Pietrowska, Adam Kretowski, Michal Ciborowski and Diana Anna Dmuchowska

The role and composition of aqueous humor in ocular health 343
Aqueous humor lipidomics: Methodologies and techniques 345
Clinical implications of AH lipidomics 348

General comments 352
References 353

26. Drug delivery systems involving lipids

Henrique Ferreira, Anddre Osmar Valdivia and Sanjoy K. Bhattacharya

Introduction 357
Lipid solutions 357
Nanostructured assembled colloids 357
Hybrid drug delivery systems 365
References 365

Section 4
Lipids in clinical medicine

27. Apolipoproteins and cardiovascular diseases

Arvinpreet Kaur, Shubham Saha, Rajat Ujjainiya, Arjun Ray, Trayambak Basak and Shantanu Sengupta

Introduction 371
References 397

28. Cholesterol and sphingolipids in Alzheimer's disease

Sabrina Cajuste, Daniella Devaney, Valentina Farr and Sanjoy K. Bhattacharya

Introduction 407
Cholesterol 407
Cholesterol esters 408
Oxysterols 409
Influence of cholesterol on amyloid precursor protein metabolism 409
Cholesterol metabolism in Alzheimer's disease 410
Apolipoprotein E 411
ATP-binding cassette transporters 411
Lipid rafts 412
Sphingolipids 413
Gangliosides 414
Conclusion 414
References 415

29. Cardiac lipotoxicity in diabetes and obesity

Gianluca Iacobellis and Ayse Canturk

Physiological pathways of myocardial metabolism 419
Pathological pathways of myocardial metabolism in diabetes and obesity 420
Epicardial fat lipotoxicity 421
Conclusion 423
References 423
Further reading 425

30. Lipid metabolism in type 1 diabetes initiation and progression to vascular disease

Nicholas Borowsky, Rodney Michel, Khemraj Hirani and Francesco Vendrame

Introduction 427
Lipid metabolism in the pathogenesis of T1D 428
Lipid metabolism and CVD in T1D 434
Lipidomic studies and CVD in T1D 438
Conclusions 438
References 438

31. Role of the gut microbiome in lipid metabolism and type 1 diabetes

Rahul Mittal, Jhanvi Doshi, Carlos E. Blaschke and Khemraj Hirani

Introduction 445
Gut microbiota and bile acid metabolism 445
Gut microbiota-derived short-chain fatty acids (SCFAs) 447
Microbiota modulation of lipid transport and storage 448
Gut dysbiosis and disrupted lipid metabolism in T1D 448
Future directions and research gaps 450
Conclusions 451
Funding 451
References 452

32. Elevated low-density lipoprotein and lung cancer

Anindita Bhattacharya, Palash Paul, Poulami Chakraborty and Koel Chaudhury

Introduction 455
Lung cancer and its subtypes 455
Metabolism of LDL 456
LDL and lung cancer 457
Conclusion and future scope 468
References 468

33. Pathophysiology and clinical medicine of dyslipidemia after spinal cord injury

Gary J. Farkas, Gregory E. Bigford and Mark S. Nash

Introduction 475
Pathophysiology of disordered lipid metabolism 476
Dyslipidemia after SCI 477
Comprehensive care management of lipid disorders after SCI 479
Conclusions 483
References 484

34. Targeting transcription control of lipid biogenesis to tune intraocular pressure

Avinash Soundararajan, Gregory Rognon, Ting Wang and Padmanabhan Paranji Pattabiraman

Introduction 493
Lipid species in ocular tissues 494
Transcriptional control of lipid biogenesis 496
Mechanisms linking lipid biogenesis to intraocular pressure 497
Therapeutic potential of targeting lipid biogenesis 498
Challenges and future directions 499
Conclusion 499
Acknowledgments 500
References 500

35. Inflammatory bowel disease

Drew Christopher Gende

Abbreviations 505
Introduction 505
Crohn's disease and ulcerative colitis 506
Irritable bowel syndrome, IBD, and the gut-brain axis 509
Diagnosing and treating IBD with lipids 509
Conclusion and future directives 511
References 511

36. Atherosclerosis and inflammation

Amr Almobayed, Emily Dorairaj, Sabrina Mas and Mustafa Alkhawam

Abbreviations 513
Introduction 514
Pathophysiology of atherosclerosis 514
Molecular mechanisms connecting lipids and inflammation 515
Clinical relevance of inflammation in atherosclerosis 516
Dual benefits of lipid-lowering medications 517
Novel therapeutic targets 518
Conclusion 520
References 520
Further reading 525

37. Lipidomics in skeletal muscle: Unveiling the roles of lipid mediators in muscle biology

Aubrey Dang, Baylie Subjeck, Yunlong Liu, T.M. O'Connell, Lynda Bonewald, Marco Brotto and Kamal Awad

Introduction: Lipids in skeletal muscles 527
Overview of lipidomics approaches for muscle research 528
Lipid mediators in skeletal muscle development and regeneration 529
Roles of oxylipins, endocannabinoids, and sphingolipids 531
Lipid droplets in myogenesis and muscle stem cell regulation 531
Dysregulated lipid metabolism in cachectic muscle wasting 532
Lipid droplet dynamics and fuel utilization 532
Lipid metabolism and muscle energy homeostasis 533
Lipid mediators in insulin sensitivity and metabolic flexibility 534
Integration of lipidomics in muscle research and clinical practice 534
Genomic technology integration into lipidomic research 535
Current and ongoing aging studies and lipidomics applications 535
Conclusions and future directions 536
Acknowledgments 536
References 536

38. Lipidomics in skeletal muscle: Unveiling the roles of lipid mediators in muscle pathophysiology

Bianca Chavez, Ahmed S. Yacoub, Aubrey Dang, Akhilla Kumar, Rajendiran Karthikraj, Venu Varanasi, Fred Ko, Christopher P. Cardozo, Kamal Awad and Marco Brotto

Lipid mediators in muscle inflammation and injury 541
Specialized pro-resolving mediators and inflammatory resolution 541

Lipid signaling in muscle damage, repair, and adaptation 543
Lipidomics in muscle wasting disorders 543
Lipid alterations in sarcopenia, cachexia, and muscular dystrophies 544
Potential lipid biomarkers and therapeutic targets 545
Skeletal muscle lipidomics in metabolic diseases 545
Lipotoxicity and ectopic lipid deposition in muscle 546
Lipid-based therapeutic strategies for muscle disorders 547
Conclusions 548
Acknowledgments 548
References 548

39. Lipidomics in bone: Unveiling the roles of lipid mediators in bone biology and pathophysiology

Ahmed S. Yacoub, Bianca Chavez, Marco Brotto, Venu Varanasi and Kamal Awad

Introduction 553
Lipidomics techniques in bone research 553
Lipid classes associated with bone metabolism 555
Lipid mediators in bone biology 556
Factors influencing bone lipid metabolism 558
Potential biomarkers and therapeutic targets 559
Conclusion and future directions 560
Acknowledgments 561
References 561

40. Associations of lipids with diseases in large cohort studies and randomized trials

Ruminder Preet Kaur and Keerthi Palagati

Introduction 565
Lipids and nutrition 566
Lipids and lipid storage disorders 579
Lipids and cardiovascular health 580
Lipids in liver disorders 589
Lipid profiles and respiratory conditions 593
Lipid profiles and dermatological conditions 595
Lipid profiles and ophthalmological conditions 597
Conclusion 601
References 601

Index 611
