CHAPTER 1 Introduction to long noncoding RNA 1

Pooja Gehlot, Megha Barot, Arpan Modi, Chintan Kapadia, Rahul Dutta, Subhan Danish and Sachidanand Singh

Introduction 1
Epigenetic regulation in long noncoding RNAs and their structure and function 4
Transposable element derived small noncoding RNA in plants 5
Database of plant lncRNA 8
Exploring the future: A glance into ongoing advances 8
References 10

CHAPTER 2 Regulatory mechanisms and mode of action of non-coding RNA 13

Niaz Ahmed, Nazim Hussain, Rana Khalid Iqbal, Diaa Abd El Moneim and Subhan Danish

Introduction 13
Non-coding RNA 13
Distinguished between non-coding and coding RNAs 13
Classification of noncoding RNA 14
Significance of non-coding RNAs (ncRNAs) in cellular regulation of a plant cell 15
Role of regulatory ncRNAs in plant stress responses 15
Role of regulatory ncRNAs in plant growth and development 18
Emerging significance of non-coding RNAs (ncRNAs) in plant development 18
miRNAs: Masters of gene regulation 18
siRNAs: Orchestrators of developmental harmony 18
LncRNAs: Bridging the regulatory abyss 18
CircRNAs: Novel players in the developmental symphony 19
Uncharted territories: Exploring novel ncRNA frontiers 19
Harnessing the regulatory ncRNAs for crop improvement 19
Non-coding RNA 20
MicroRNA (miRNA) 20
Discovery 20
Discovery of plant microRNAs (miRNAs) 20

MieroRNAs (miRNAs) in plant life: Orchestrating growth and responses....21
Organ-specific regulation....22
Environmental adaptation....22
Roles of miRNAs in plant life....22
Biogenesis regulation....22
Types of miRNA biogenesis in plant cell....22
Other methods of processing and noncanonical routes....23
MicroRNA biogenesis: Insights and distinctions....23
MicroRNA transcription....25
Intriguing examples of splicing and miRNA biogenesis....27
Implications of splicing on miRNA biogenesis....27
Plant pri-miRNA processing: Orchestrating accuracy and efficiency....27
Pri-miRNA structural diversity....27
Determinants of Pri-miRNA processing....27
Influential proteins in pri-miRNA processing....27
Modes of pri-miRNA processing....28
Co-transcriptional processing dynamics....28
Pri-miRNA degradation: Efficient clearance mechanisms....29
Regarding the regulation of microRNA 3′-end modification....29
The NEXT complex contributes to the degradation of miRNA precursors....29
Both degradation pathways compete with the microprocessor for pri-miRNAs....29
Degradation of pri-miRNA byproducts....30
miRNA stability....30
RISC formation....31
RISC complex formation....31
AGO1 protein in plants....31
AGO protein's structure....31
Involvement of AGO1 in transcriptional suppression....31
Regulation of miRNA biogenesis....31
Molecular chaperone Hsp90....31
Involvement of SQN in miRNA silencing....31
Importin-β proteins EMA1 and TRN1....32
miRNA export in plants: insights and mechanisms....32
Historical perspective....32
Export mechanisms....32
Regulatory proteins....32

Long-distance regulation....32
Interactions with other organisms....33
Evolutionary conservation....33
Small interfering RNA (siRNA)....33
Overview of siRNA....33
Similarities and differences between miRNA and siRNA....33
Role in gene silencing and RNA interference....34
Long non-coding RNA (lncRNA)....34
Characteristics of lncRNA....34
Functions and mechanisms of action....34
Examples of lncRNA involvement in cellular processes....34
Small nuclear RNA (snRNA) in plant cells....35
Role in RNA splicing....35
Other types of non-coding RNA (ncRNA) in plant cells....35
Piwi-interacting RNA (piRNA)....35
Small nucleolar RNA (snoRNA)....35
Other types of ncRNA....36
Regulatory mechanisms....36
Post-transcriptional regulation by ncRNA in plant cells....36
Interactions of ncRNA with proteins in plant cells....37
Functional significance of ncRNA in plant cells....37
Disease implications of ncRNA dysregulation in plant cells....38
Techniques for studying ncRNA in plant cells....38
Challenges and advancements....39
Future directions in ncRNA research....39
References....40

CHAPTER 3 Bioinformatic database, artificial intelligence and machine learning-based tools for non-coding RNA study....51
Karen Pachchigar, Darshan Dharajiya, Gaurav Dave and Chintan Kapadia

Introduction....51
Database for RNA study....51
Web tool for RNA structure prediction and study:
Unveiling the hidden language of RNA....56
Algorithms for RNA folding....56
Webtools: Democratizing access to computational power....57
RNAfold....60
Integration of AI in RNA structure prediction....61

Role of AI, ML and deep learning with RNA research.....61
Flow art for RNA-based computational study with AI.....64
From prediction to creation: Engineering ncRNAs with AI precision.....65
Unveiling hidden networks: Demystifying ncRNA interactions with AI.....67
Bridging the gap: From bench to bedside with AI-driven ncRNA therapeutics and diagnostics.....67
Future of RNA-based computational biology with artificial intelligence.....68
Design with precision: Engineering ncRNAs for tailored functionality.....69
Unveiling hidden networks: Demystifying ncRNA interactions with AI.....69
From petri dish to patient: Charting the AI-driven ncRNA therapeutics and diagnostics.....69
Unlocking the secrets of disease: Precision diagnostics with ncRNA fingerprints.....69
Tailoring treatment: Targeting diseases with AI-designed ncRNA therapeutics.....70
Navigating the labyrinth: AI as a map to ncRNA function.....70
Optimizing safety: Overcoming hurdles with AI-powered design.....70
Exploring the future: A glimpse into ongoing advances.....70
References.....71

CHAPTER 4 Fertilizer-responsive non-coding RNA and their significance.....77
Subhan Danish, Uzma Younis, Niaz Ahmed, Khurram Shahzad, Rahul Dutta and Sachidanand Singh
Introduction to fertilizer-responsive non-coding RNA.....77
Importance of fertilizer responsiveness.....77
Role of non-coding RNA in fertilizer response.....79
Mechanisms of non-coding RNA action.....80
Types of fertilizer-responsive non-coding RNA.....82
Regulatory networks and signaling pathways.....83
Fertilizer-induced regulatory networks.....83
Non-coding RNA as molecular signals.....83
Impact on agricultural practices.....84
Precision nutrient management.....85
Crop improvement and genetic engineering.....85

Sustainable agriculture and environmental conservation 85
Innovative biotechnological applications.....85
Shaping future agricultural paradigms.....85
Biotechnological applications and innovations.....86
Non-coding RNA in biotechnology.....86
Engineering fertilizer-responsive RNA constructs.....87
Challenges and limitations 88
Unexplored frontiers in RNA-mediated responses.....88
Addressing technological and practical constraints 88
Future directions in research.....88
Conclusion 89
References.....90

CHAPTER 5 Role of non-coding RNA in plant architecture.....99
Noopur Khare, Pragati Khare, Megha Barot, Arpan Modi, Tanvi Jain, Shrisendu Mitra, Adarsh Kumar Shukla and Sachidanand Singh

Introduction.....99
Types and classification of non-coding RNAs.....100
microRNAs (miRNAs).....100
Small interfering RNAs (siRNAs).....102
Long non-coding RNAs (lncRNAs).....103
Regulatory mechanisms of ncRNA in plant architecture.....105
Regulation of gene expression using ncRNA-mediated mechanisms.....105
Interactions between ncRNAs and target genes.....106
Signaling networks and pathways involving ncRNAs in shaping plant structure.....106
Functional roles of ncRNA in plant growth and development.....107
Influence of ncRNAs on shoot and root development.....107
Modulation of branching patterns and leaf morphology.....108
Impact of ncRNAs on flower and fruit development.....109
Experimental techniques and tools for studying ncRNA in plant architecture.....109
Transcriptomic and bioinformatic approaches.....109
CRISPR/Cas9-based methods for ncRNA functional analysis.....110
Imaging and visualization techniques for ncRNA localization.....111
Emerging trends and future directions.....111

Potential applications in crop improvement and breeding..... 111
Unexplored areas and research gaps in understanding ncRNA-mediated plant architecture 113
Technological advancements and their impact on studying ncRNA functions..... 113
Conclusion 114
References..... 115

CHAPTER 6 Non-coding RNA and its significance to virus resistance in plants 121
Rutvik Joshi, Simranjot Kaur, Ruchi Bishnoi and Y.K.V. Naveen

Introduction..... 121
Plant-virus interactions 122
Plant defense system against viral pathogen 122
Non-coding RNAs (ncRNAs)..... 124
Identification of ncRNAs..... 124
Long non-coding RNAs (lncRNAs): Masters of cellular regulation..... 125
Deciphering mode of action and genetic regulation for immunity by lncRNAs..... 127
Role of non-coding RNA to virus resistance in plants 128
siRNAs..... 128
miRNAs..... 129
LncRNAs..... 130
Challenges..... 132
Future thrust..... 133
Conclusion 134
References..... 135
Further reading..... 139

CHAPTER 7 Unveiling the role of non-coding RNAs in abiotic stress adaptation 141
Akula Dinesh, Kommineni Jagadeesh, Jwala Pranati, Krishnappa Suma, Varsha Kundu and K.B Eswari

Introduction..... 141
Classification and biosynthesis of non-coding RNA..... 143
Role of non-coding RNA in gene regulation..... 144
Role of non-coding RNA in abiotic stress responses 145
Cereals 145
Pulses..... 146
Oil seeds..... 148

Millets 148
Online database for exploring ncRNAs 148
Bioinformatic tools for exploring ncRNAs 152
Conclusion and future perspectives 154
References 155

CHAPTER 8 Transposable element derived non-coding RNA and its significance 163
Sourav Majhi, Debasmita Sarma Chaudhuri, Satish Rajpurohit, Anwesha Roy, Anuvab Dey and Subhrojyoti Ghosh

Introduction 163
Biogenesis 164
Transposable element derived small noncoding RNA in plants 164
Transposable element derived long noncoding RNA in plants 165
Classification of transposable element-derived small noncoding RNAs 166
Heterochromatic siRNA generated from transposable elements that act in trans 167
Epigenetically active siRNA generated from transposable elements that act in trans 168
Classification of transposable element-derived long noncoding RNAs 169
LncRNAs from TEs as sources of RNA and regulators of protein 171
LncRNAs from TEs as possible controllers of chromatin conformation 172
Significance of transposable element-derived non-coding RNA 173
In-plant gene regulation 173
In plants reproduction and hybridization 174
In the modulation and stress response management in 2plants 176
Future prospects 177
Conclusion 178
References 179

CHAPTER 9 Role of non coding RNA in effector trigger immunity 187
Noopur Khare, Pragati Khare, Adarsh Kumar Shukla, Sachidanand Singh, Tanvi Jain and Megha Barot
Introduction 187
Types of ncRNA involved in ETI 188
microRNAs (miRNAs) 189
Long non-coding RNAs (lncRNAs) 190
Small interfering RNAs (siRNAs) 191
Mechanisms of ncRNA-mediated regulation in ETI 192
Targeting of mRNAs encoding immune regulators 193
Epigenetic modulation of gene expression 193
Crosstalk with other immune signaling pathways 194
Experimental evidence supporting the involvement of ncRNAs in ETI 194
Transcriptomic analysis of ncRNA expression during ETI 195
Functional studies using ncRNA mutants or knockdowns 195
Cross-species comparisons revealing conservation of ncRNA-mediated ETI mechanisms 196
Future perspectives and challenges 196
Potential therapeutic applications targeting ncRNA in ETI modulation 196
Technological advancements needed for elucidating ncRNA functions in ETI 197
Limitations and gaps in current understanding 198
Conclusion 198
References 199

CHAPTER 10 Noncoding RNAs properties and biological functions in plant development and abiotic stress response 203
Aiswarya Rajasekharan
Introduction 203
Classification of ncRNAs and their properties 204
Circular ncRNAs (circRNAs) 205
Linear ncRNAs 205
Interactions and networks of non-coding RNAs in plants 207
Functional roles of ncRNAs in plant abiotic stress 208
Extreme temperatures 208
Salinity 210

Metal toxicity 210
Water scarcity 211
Functional role of ncRNAs in plant development 211
Vernalization 211
Photomorphogenesis 211
Anther, pollen and seed development 212
Root organogenesis, node formation and fiber development ... 212
Phosphate homeostasis, plant regeneration and immunity 212
Applications of non-coding RNAs 213
References 213

CHAPTER 11 Noncoding RNA and its significance in fungal and bacterial resistance 217
Parul Johri, Mala Trivedi and Nazleen Jahan

Introduction 217
Significant roles of ncRNAs in different biotic stress reactions 218
Significance of non-coding RNAs as a defense against fungal infection 219
Significance of non-coding RNAs as a defense against bacterial infection 220
Conclusion 221
References 222

CHAPTER 12 Non-coding RNA and hormonal regulation in plants 225
Vidyut Balar, Parth Bagadiya, Rutvik Joshi, Sunil Patel, Ankit Yadav and Dimple Gor

Introduction 225
Non-coding RNAs 226
Long non-coding RNAs 226
Biogenesis of lncRNAs 227
Types of lncRNAs 228
lncRNAs regulate plant physiological processes by mediating phytohormone signaling 228
Auxin 228
Cytokinin 233
Gibberellin 234
Ethylene 235
Abscisic acid 236
Jasmonic acid 239
Salicylic acid 240

Brassinosteroids 241
Conclusion 242
Future perspectives 243
References 243

CHAPTER 13 Fruits ripening and maturity: Role of non-coding RNA 249
Mathiyazhagan Narayanan

Introduction 249
Climate-related and non-climatic ripening 250
Common genetic regulatory processes control the ripening of fruits 251
Fruit ripening controlled by molecular/hormonal signals 252
Non-coding RNAs that regulate fruit ripening 253
The physiological as well as biochemical factors that influence fruit ripening: Controlled genes 254
Non coding RNA in fruit ripening 255
Noncoding RNAs regulatory networks 255
Non coding RNA: Ethylene regulatory activity 256
Non coding RNA: Fruit coloring 257
Non coding RNA: Fruit flavor 258
Non coding RNA: Fruit texture 258
Conclusion and future perspectives 259
Acknowledgments 260
References 260

CHAPTER 14 Non-coding RNA as a regulator for developmental processes in plants 265
Kuldeep Akbari, Sunil Patel, Dimple Gor, Vidyut Balar, Hardik Patel and Parth Bagadiya

Introduction 265
The integral role of miRNAs in plant development 267
siRNA in plant development 270
lncRNAs are involved in vegetative growth 272
Root growth and development 273
Leaf development 274
Photomorphogenesis 275
Phytohormone regulation 275
Concluding remarks 275
References 277

CHAPTER 15 Modulation of non-coding RNA at the reproductive stage of plants 285
Helly Shah, Nirali Desai, Anil Patani and Sachidanand Singh
Introduction 285
Non-coding RNA modulation and regulatory roles across plant reproductive stages 286
Gamete formation 286
Pollination 287
Fertilization and seed germination 288
Floral development 289
Conclusion and future prospect 290
References 290

CHAPTER 16 Cross kingdom application of noncoding RNA 295
Chintan Kapadia, Rahul Datta and Sachidanand Singh
Introduction 295
Natural cross kingdom RNA transfer 296
Extracellular vesicles and small RNA transport 300
Spray induced gene silencing or exogenous RNA application 301
Host induced gene silencing as a proof of concepts 302
Conclusion 312
References 312

CHAPTER 17 Advantages and limitations of exogenously supplied non-coding RNA in plants 319
Saptarshi Bhattacharyya, Saptaki De, Sohini Ganguli Gupta and Sayak Ganguli
Introduction 319
MicroRNAs (miRNAs) 319
Small interfering RNAs (siRNAs) 319
Long non-coding RNAs (lncRNAs) 320
Concept of environmental RNAi 320
Evidences of natural exogenous non coding RNA uptake in plants 322
Impact of exogenously supplied ncRNAs in abiotic stress 324
Impact of exogenously supplied ncRNAs in biotic stress 325
Crop improvement strategies using exogenously supplied small RNAs 326
Conclusion 329
References 329

CHAPTER 18 Epigenetic modulation of plant developmental pathways by non-coding RNA 333
Tanvi Jain, Arpita Singh, Praneta Yadav, Palak Singh and Sachidanand Singh

Introduction 333
Mechanisms of plant epigenetic regulation 333
DNA methylation (DM) 334
Histone methylation (HiM) 334
RNA-mediated silencing of genes (RMSG) 336
Chromatin remodeling complexes (CRCs) 336
Applications of non coding RNA in plants 338
Photosensitive male sterility (PSMS) 339
Vernalization 340
Photomorphogenesis 340
Formation of nodules 340
Phosphate absorption 340
Biosynthesis of secondary plant products 341
Biotic and abiotic stresses 341
Processed fruit ripening 342
Databases for identifying plants non coding RNA 342
lncRNA INVESTMENT 342
Investigation of miRNAs 345
Investigation of circRNA 346
Challenges and conclusion 347
References 348
Further reading 351
