Contents

Contributors *xiii*
Preface *xix*

1 **Discovery and Background of GABA in Plants** *1*
Gubbi Vani Ishika, Deepthi Puttegowda, Ranjith Raj, Manjunath Dammalli, and Ramith Ramu
Abbreviations *1*
Introduction *1*
History *2*
Background *3*
The GABA Metabolic Pathway in Plants *4*
Structure and Conformation of GABA *6*
Roles and Functions of GABA *7*
Plant Development *8*
Carbon and Nitrogen Metabolic Balance *8*
Enhancement of Storage Quality and Shelf Life *9*
pH Regulation *9*
Compatible Osmolyte *10*
Biotic and Abiotic Stress *10*
Temperature Stress *11*
Low Temperature *11*
High Temperature *11*
Drought *12*
Heavy Metals *12*
ROS *12*
Salt *13*
Conclusion *14*
What People Will Learn by Reading This Chapter *14*
How This Chapter Helps People Due to its Collective Content *15*
References *15*

2 GABA Biosynthesis Pathways and its Signaling in Plants *19*
Nader Adamipour, Farzad Nazari, and Jaime A. Teixeira da Silva
GABA Production and Degradation Pathway *19*
Is GABA Only a Metabolite? *21*
Role of GABA in Signaling between Eukaryotes and Bacteria *22*
The Role of GABA Signaling in Regulating Pollen Tube Growth *23*
The Role of GABA Signaling in Regulating Stomatal Aperture *23*
Role of the GABA Shunt in Plants *24*
The Effect of GABA on Plant Growth *24*
The Effect of GABA on the Regulation of C:N Metabolism *25*
The Role of GABA in Improving Shelf Life and the Storage Quality of Products *26*
Role of GABA in Cytosolic pH Homeostasis *28*
The Impact of GABA on ROS *28*
Crosstalk of GABA with Other Signaling Molecules *29*
Abscisic Acid *29*
Ethylene *29*
Auxins *30*
Cytokinins *30*
Gibberellins *31*
Interaction of GABA, PAs, NO, and H_2O_2 *31*
GABA and Proline Interaction *32*
Conclusion and Future Prospects *32*
References *33*

3 GABA and Its Crosstalk with Other Metabolites in Relation to Abiotic Stress Responses in Plants *43*
Akhilesh Kumar Pandey and Nishtha Srivastava
Introduction *43*
Enzymes in GABA Metabolic Pathways *44*
Role of GABA Under Stressful Conditions in Plants *45*
GABA and Salt Stress *46*
GABA and Drought Stress *46*
GABA and Chilling Stress *48*
Crosstalk of GABA with Other Metabolites and Chemicals *48*
GABA with H_2O_2 *49*
GABA with Nitric Oxide (NO) *50*
GABA with Calcium *50*
Interplay of GABA with Plant Hormones *51*
GABA with Auxin *51*
GABA with Abscisic Acid *51*
GABA with Ethylene *52*
Mechanisms of Action of GABA in Plants Under Stress *52*
Conclusions and Future Perspectives *54*
References *54*

4 GABA as a Signaling Molecule in Plants *65*
Navya Sreepathi, Deepthi Puttegowda, Nagma Firdose, Bhavya Somaplara Gangadharappa, V B Chandana Kumari, and Ramith Ramu
Abbreviations *65*
Introduction *66*
GABA in Plants as a Stress Response *67*
GABA as a Drought-Induced Stress Response in Plants *68*
GABA as a Stress Response in Plants Induced by Salinity *70*
GABA as a Temperature-Induced Stress Response in Plants *73*
GABA's Role in Mediating Oxidative Stress-Induced Responses in Plants *74*
GABA's Role in Mediating Pathogen and Herbivore Attack Stress-Induced Responses in Plants *76*
GABA Signaling in attKLM Operon (Bacteria) *76*
GABA Signaling Against Viruses, Fungi, and Insect Attack *77*
GABA Signaling in Plant Growth and Development *78*
GABA Signaling in Seed Germination *79*
GABA in ABA (Abscisic Acid) Signaling Pathway *80*
GABA Signaling for Auxin Biosynthesis for Plant Growth Under Fe Deficiency *81*
GABA in Root and Shoot Development *81*
GABA Influence in Pollen Tube Elongation *83*
GABA in Flowering, Fruit Development, and Ripening *83*
GABA-Mediated Regulation of Stomatal Aperture in Plants *85*
GABA Regulation in Stomatal Closure *85*
GABA Signaling for GORK Channels Under Hypoxia *86*
GABA in Ion-Exchange Regulation *86*
GABA's Interplay with Diverse Signaling Pathways in Plants *88*
Conclusion and Future Prospectives *89*
References *90*

5 GABA and Drought Stress *97*
Petronia Carillo and Andrea Carra
Introduction *97*
GABA Shunt in Plants *99*
GABA Accumulates in Plants Under Drought Stress *99*
GABA Accumulation Increases Drought Tolerance *100*
GABA Signaling and the Regulation of Stomatal Opening *102*
Conclusion *105*
References *105*

6 The Role of GABA on Programmed Cell Death and Senescence in Plants *111*
Fazilet Özlem Albayrak, Filiz Vardar, and Nihal Gören-Sağlam
Introduction *111*
GABA Pathways *112*
The Roles of GABA under Stress Conditions *113*

GABA as a Signal Molecule *115*
GABA-Mediated Avoidance from PCD *116*
The Role of GABA on Leaf Senescence *118*
Conclusions *121*
References *121*

7 GABA and Nodulation in Plants *129*
Shubhra Khare, Ajey Singh, Km Niharika, Nimisha Amist, Zeba Azim, Rangoli Krishna, Nishtha Srivastava, and Narsingh Bahadur Singh
Introduction *129*
Nodulation in Leguminous Plants *130*
Functioning of γ-Aminobutyric Acid in Plants *132*
Functioning of GABA in Nodulation *134*
Conclusions and Future Prospects *136*
References *137*

8 GABA and Wounding Stress in Plants *143*
Neeraj Kumar Dubey, Vijay Bahadur Yadav, Kunwar Deelip Singh, Satyendra Kumar Yadav, Ran Vijay Singh, Amarjeet Singh, and Jogeswar Panigrahi
Introduction *143*
GABA: An Important Molecule for Plant *144*
GABA and Abiotic Stress *145*
Biotic Stress and Wound-Mediated GABA Fluctuation *146*
Transgenic Plants Expressing GABA and Effect on Herbivorous Performance *147*
References *148*

9 GABA in Plant Stress Response and Tolerance Mechanisms *155*
Şerife Palabıyık, İrem Çetinkaya, Tülay Öztürk, and Melike Bor
Introduction *155*
Abiotic Stress and GABA *158*
Salt Stress and GABA *159*
Drought and GABA *161*
High Temperature and GABA *162*
Cold Stress and GABA *163*
Heavy Metal Stress and GABA *164*
Biotic Stress and GABA *165*
Conclusion and Future Prospects *166*
References *166*

10 GABA Priming Induced Modulations in the Redox Homeostasis of Plants under Osmotic Stress *173*
Kakkuzhiyulla Parambath Raj Aswathi, Kolothodi Chandran Jisha, Mathew Veena, Akhila Sen, Nair Gopalakrishnan Sarath, and Jos Thomas Puthur
Introduction *173*
Role of GABA in Plants *174*
GABA Priming and Oxidative Stress Mitigation *174*
Morphological Response *176*

Physiological Response: With Special Emphasis on ROS and Antioxidant Machinery *176*
Molecular Response *180*
Stress Signaling Cross-Talk *181*
Conclusion and Future Prospects *182*
Acknowledgments *182*
References *182*

11 Gamma-Aminobutyric acid-Mediated Heavy Metal Stress Tolerance in Plants *189*
Srijita Ghosh and Aryadeep Roychoudhury
Introduction *189*
Health Benefits of GABA *191*
Biosynthesis of GABA *191*
GABA Transport in Plants *192*
Role of GABA in Abiotic Stress Tolerance *194*
GABA and Drought Stress *194*
GABA and Polyamines in Drought Stress *197*
GABA and Salt Stress *198*
GABA and Heat Stress *199*
GABA and Cold Stress *200*
GABA and Heavy Metal Stress *200*
Conclusion *202*
Acknowledgments *202*
References *203*

12 GABA and Heat Stress *211*
Zeba Azim, Shubhra Khare, Narsingh Bahadur Singh, Km Niharika, Ajey Singh, Ravi Kumar Yadav, and Nimisha Amist
Introduction *211*
GABA-Biosynthesis and Transport/Pathways in Plant *213*
GABA Morphological and Physiological Functions within Plants *213*
GABA and Abiotic Stress *214*
GABA and Heat Stress *215*
Conclusion *217*
References *218*

13 GABA and Oxidative Stress and the Regulation of Antioxidants *225*
Somayeh Rastegar and Pegah Sayyad-Amin
Introduction *225*
Types and Characteristics of ROS *226*
ROS Generation in Plants under Normal and Stress Conditions *227*
The Importance of ROS Compartmentation for Plant Stress Adaptation *228*
Antioxidant Defense System in Plants *229*
Nonenzymatic Antioxidants *229*
Enzymatic Antioxidants *231*
Relationships of GABA Shunt and ROS during Stress Conditions *233*

The Response of GABA under Abiotic Stress Conditions 235
Synthesis of Ascorbic Acid (AsA) 235
Synthesis of Phenolic Compounds 236
Conclusion 237
References 238

14 GABA in Relation to Cold and Chilling Stress 243
Somayeh Rastegar and Emad Hamdy Khedr
Introduction 243
Plant Strategies to Overcome Cold Stress 245
γ-Aminobutyric Acid (GABA) 247
GABA Biosynthesis in Plants 247
Response Strategies of GABA in Cold Stress Tolerance 248
Mitigating ROS Generation and Improving Antioxidant Systems During Cold Stress in Plants 248
GABA Improves Nonenzyme Antioxidant System 250
Regulating Phenol Metabolism 250
Regulating Ascorbic Acid Metabolism 251
Promoting Polyamine Synthesis 252
Protecting Chloroplast Integrity 253
Maintaining Higher ATP Content and Energy Charge 254
Future Perspectives, Challenges, and Conclusion 256
Future Perspectives 256
Challenges 256
Conclusion 256
References 257

15 Role of GABA Under Bacterial Stress in Plants 263
Kuldeep Lahry, Akhilesh Kumar Pandey, and Sudhir Singh
Introduction 263
GABA and Biotic Stress in Plants 266
GABA and Bacterial Stress Response in Plants 267
Molecular Basis of GABA Accumulation in Response to Bacterial Pathogens 269
Glu-dependent Accumulation of GABA 269
Glu-independent Accumulation of GABA 270
The Involvement of GABA in the Interaction of Microbes with Plants 270
Ralstonia solanacearum 270
Pseudomonas syringae pv. *tabaci* 271
Conclusions and Future Perspectives 272
References 273

16 GABA-Mediated Salt Stress Tolerance Through Physiological and Molecular Mechanisms 287
Riya Johnson, Joy Mulakkal Joel, Koravantakomparambil Sulaiman Anjitha, Louis Noble, Parammal Faseela, and Jos Thomas Puthur
Introduction 287

Concept of Salt Stress to Plants *288*
Salt Stress and Related Metabolic Changes *289*
GABA and Salinity Stress Tolerance *290*
GABA Improves Photosynthesis and Chlorophyll Fluorescence Parameters Under Salt Stress *291*
GABA Alleviates Oxidative Injury Induced by Salt Stress via Accumulation of the Osmolytes in Plants *295*
Molecular Changes Associated with GABA-Induced Salinity Stress Tolerance *298*
Conclusion *299*
Acknowledgments *299*
References *299*

17 GABA and Nutrient Deficiency *305*
Km Niharika, Shubhra Khare, Ajey Singh, Zeba Azim, Nimisha Amist, and Narsingh Bahadur Singh
Introduction *305*
An Overview of GABA *306*
Role of GABA in Plant Development *306*
Role of GABA in Different Stress Tolerance *307*
Different Mineral Nutrients and Their Role in Plant Development *308*
Different Nutrient Deficiencies in Plants *310*
Role of GABA in Nutrient Deficiency *311*
Concluding Remarks *315*
References *315*

18 GABA and Plant-Derived Therapeutics *321*
Lakshmi Jayaram, Deepthi Puttegowda, V. H. Pushpa, Shashank M. Patil, and Ramith Ramu
List of Abbreviations *321*
Introduction *322*
The Mechanism of GABA in Action: Neurotransmission and Its Effect on Neurons *322*
Plants with Reported GABAergic Activity: A Novel Source of Therapeutics *325*
Passiflora incarnata (Passion Flower) *327*
Piper methysticum (Kava) *328*
Withania somnifera (Ashwagandha, Indian Ginseng, Winter Cherry) *328*
Valeriana officinalis, (Valeriana) *329*
Scutellaria lateriflora, (Scullcap, Blue Skullcap) *330*
Melissa officinalis, (Lemon Balm) *330*
Ginkgo biloba, (Maiden Hair) *330*
Humulus lupulus, (Hops) *331*
Matricaria recutita, (True Chamomile) *331*
Centella asiatica, (Gotu Kola) *332*
Conclusion and Future Perspective *332*
References *333*

Index *343*
