Chapter 1 **Introduction** 1
Germaine Cornelissen, Kuniaki Otsuka and Tsuyoshi Hirota

References 5

Part I: Basic Principles of Chronobiology

Chapter 2 **Circadian Clocks in Mammals: General Aspects of Oscillating Systems and Roles in Medicine** 15
Ken-ichi Honma

2.1 Endogenous Nature of Circadian Rhythms 15
2.1.1 Circadian Period 15
2.1.2 Entrainability 16
2.1.3 E and M Oscillator Hypothesis — Clock for All Seasons 18
2.1.4 Two-oscillator Hypothesis Explains the Aftereffects of Prior Entrainment and Re-entrainment to Shifted LD Cycles 19
2.2 Molecular Mechanisms of Clock Works 20
2.2.1 Autoregulatory Feedback Loop 20
2.2.2 Input and Output of TTFL 21
2.2.3 Clock Gene Mutations 24
2.3 Biological Clock: A Hierarchical Multi-oscillator System 27
2.3.1 Clock in the SCN 27
2.3.2 Clocks in Peripheral Organs 28

Chemical Biology No. 23
Chronobiology and Chronomedicine: From Molecular and Cellular Mechanisms to Whole Body Interdigitating Networks
Edited by Germaine Cornelissen and Tsuyoshi Hirota

© The Royal Society of Chemistry 2024

Published by the Royal Society of Chemistry, www.rsc.org

2.3.3 Central and Peripheral Clocks in Humans 30
2.4 Circadian Rhythms in Susceptibility and Responsiveness: Implication for Screening, Diagnosis and Treatment 33
2.4.1 Principle of Timed Chemotherapy for the Treatment of Malignant Tumours 33
2.4.2 Tumour Response and Patient Survival 34
2.4.3 New Frontiers for Cancer Treatment 34
References 34

Chapter 3 Synchronizers of Circadian Rhythms **41**
Yu Tahara and Shigenobu Shibata

3.1 Introduction 41
3.2 Light Entrainment in the Central Clock 42
3.2.1 Photoreception in the Retina 42
3.2.2 Phase-response Curve (PRC) and Phase Transition Curve (PTC) 44
3.2.3 SCN Sub-regions and Retinal Inputs 45
3.2.4 Circadian Light Entrainment in Humans 48
3.3 Non-photic Entrainment in the Central Clock 48
3.3.1 Exercise and Arousal 48
3.3.2 NPY/GABA 49
3.3.3 Serotonin, Dopamine, and Melatonin 50
3.4 Food Entrainment in the Peripheral Clocks 51
3.4.1 Signalling Pathway 51
3.4.2 Functional Foods 54
3.5 Physical Activity and Stress Entrainment in Peripheral Clocks 56
3.5.1 Signalling Pathways 56
3.6 Interaction of Synchronizers with Physiological Functions 59
3.6.1 Impact of Timing of Food Intake on Metabolism 59
3.6.2 Impact of Timing of Exercise on Metabolism 59
3.7 Conclusion 60
Abbreviations 60
Acknowledgements 61
References 62

Chapter 4 Inter-modulating Multi-frequency Rhythms 71
Kuniaki Otsuka, Larry A. Beaty and Germaine Cornelissen

4.1 Introduction 71
4.2 Characterization of Rhythms 72
4.2.1 Definitions 72
4.2.2 Ultradian Rhythms 74
4.2.3 Circadian Rhythms 78
4.2.4 Infradian Rhythms 78
4.3 Reference Values in Health 81
4.3.1 Endpoints of Heart Rate Variability 81
4.3.2 Blood Pressure Variability 82
4.4 Circadian Disruption 85
4.4.1 Social Jetlag 85
4.4.2 Ageing 86
4.5 Principles of Chronodiagnosis 86
4.5.1 Chronodiagnosis Involving Rhythms Other Than Circadian 87
4.5.2 Chronodiagnosis Related to Circadian Rhythms 88
4.6 Principles of Chronotherapy 90
4.6.1 Chronotherapy Involving Rhythms Other Than Circadian 90
4.6.2 Chronotherapy Involving Circadian Rhythms 92
4.6.3 Toward Personalized Chronotherapy 92
4.7 Inter-modulations Among Multi-frequency Rhythms and Chronomics Medicine 93
Abbreviations 95
References 96

Part II: Systems Approach to Chronopharmaceutics and Chronotheranostics

Chapter 5 The Nervous System 109
Sato Honma

5.1 Mammalian Circadian System in the Central Nervous Sytem 109
5.1.1 The Circadian System Composed of a Master Clock and Peripheral Clocks 109
5.1.2 Multiple Brain Clocks Regulating Behaviour and Physiology 110

5.2 Suprachiasmatic Nucleus: The Master Clock 111
5.2.1 Identification of the SCN as the Master Clock 111
5.2.2 Functional Anatomy and Histochemistry 111
5.2.3 Molecular Mechanisms in the SCN 114
5.2.4 Multi-oscillator Structure and Networks 116
5.2.5 Roles of SCN Glia in the Central Clock 117
5.3 Input to the SCN 118
5.3.1 Photic System 118
5.3.2 Non-photic Inputs to the SCN 120
5.4 Output from the SCN 120
5.4.1 Autonomic Regulation of Peripheral Clocks 121
5.4.2 Endocrine Regulation of Peripheral Clocks 122
5.4.3 Glymphatic System and Cerebrospinal Fluid 124
5.4.4 Sleep–Wake System 124
5.5 Conclusion 125
Acknowledgements 126
References 126

Chapter 6 The Circadian–Hypoxia Link **136**
Yoshimasa Oyama, Lori A. Walker and Tobias Eckle

6.1 The Circadian–Hypoxia Link 136
6.1.1 Oxygen-sensing Pathways: Hypoxia Inducible Factor 137
6.1.2 PAS Domains: An Evolutionary Link between Circadian and Hypoxia Pathways 137
6.1.3 PER2-HIF1A Interconnection in Cardioprotection from Myocardial Ischaemia 139
6.2 Circadian Entrainment and Amplitude Enhancement 141
6.2.1 Intense Light in Circadian Amplitude Enhancement and Cardioprotection 144
6.3 Light as Circadian Rhythm Targetting Therapy in Humans 146
6.3.1 Light in the Regulation of Circadian MicroRNAs in Humans 147
6.3.2 Intense Light as Anticoagulant Therapy in Humans 148
6.4 Intense Light Mimicking Drugs 149
6.5 Circadian Rhythms in the Cardiovascular System 149
References 152

Chapter 7 The Respiratory System **160**
Colleen M. Bartman and Y. S. Prakash

7.1 Circadian Rhythm in Respiratory Physiology 160
7.1.1 History of Rhythms in the Lung 160
7.1.2 Functional Rhythms 161
7.1.3 Clinical Presentations of Circadian Component of Respiratory Disease 163
7.2 Peripheral Molecular Clocks in the Lung 167
7.2.1 Environmental or Genetic Circadian Disruption in Allergic and Immune Response 167
7.2.2 Cigarette Smoke and COPD 173
7.2.3 Bleomycin Model of Fibrotic Lung Disease and the Clock 173
7.2.4 Pneumonia and Sepsis 174
7.2.5 Lung Cancer 175
7.2.6 Early Exposures, Aging, and Airway Disease Later in Life 175
7.2.7 Sexual Dimorphism 177
7.3 Chronotherapy and Chronotherapeutics in Lung Disease 177
7.3.1 Targeting the Clock and Implications for the Clinic 177
7.3.2 Chronotherapy in Asthma 177
7.3.3 Chronotherapy in COPD 183
7.3.4 Goals for Chronotherapy in Airway Disease 183
7.4 Conclusion 184
Abbreviations 185
Acknowledgements 185
References 186

Chapter 8 Chronobiology and the Kidney **192**
Martin S. Knapp

8.1 Nephron Function in Health and Chronobiology 192
8.2 Renal Function in Clinical Disorders and Chronobiology 194
8.2.1 Enuresis 194
8.2.2 Nocturia 195
8.2.3 Nocturia and Glucocorticoids 197
8.2.4 Nocturia, Congestive Cardiac Failure (CCF) and Other Systemic Conditions 199

8.2.5 Nocturia and Lower Urinary Tract Syndromes (LUTSs) 199
8.3 Hypertension and Chronobiology 200
8.3.1 Blood Pressure and Chronobiology 200
8.3.2 Blood Pressure and Evening *vs.* Morning Dosing 202
8.4 Chronic Kidney Disease, Chronobiology and Chronodisruption 204
8.4.1 Chronic Renal Failure and Chronobiology 204
8.4.2 Chronodisruption in Chronic Renal Failure 205
8.4.3 End-stage Chronic Renal Failure (ESCRF) 207
8.5 Renal Transplantation and Chronobiology 209
8.5.1 Renal Transplantation and Immunosuppression 209
8.5.2 Renal Transplantation and Disturbed Circadian Rhythms of Urinary Excretion 211
8.6 Transfer of Renal Chronobiology Into Clinical Practice 211
Abbreviations 212
Acknowledgements 213
References 214

Chapter 9 Circadian Rhythms and the Gastrointestinal System 222
Vincent M. Cassone

9.1 Biological Clocks and the Gastrointestinal System 222
9.1.1 Expression of Daily Gastrointestinal Rhythms in Humans 224
9.1.2 Expression of Gastrointestinal Rhythms in Animal Models 225
9.1.3 Mechanisms of Circadian Clock Function 228
9.2 Microbiome 232
9.2.1 Description of the Gastrointestinal Microbiome 232
9.2.2 Circadian Changes in the Microbiome 233
9.2.3 *Klebsiella* (Formerly Named *Enterobacter*) *Aerogenes* 234
9.2.4 *Bacillus Subtilis* 235
9.3 Effects of Gastrointestinal Rhythmicity on Overt Circadian Organization 235
9.4 Disease Conditions Associated with Altered Clock Function 237

9.4.1 Ageing 237
9.4.2 Colorectal Cancer 238
9.4.3 Inflammatory Bowel Disease 239
9.5 Conclusion 240
Acknowledgements 241
References 241

Chapter 10 Circadian Clock Signals in Endocrine Glands 246
Keiko Tominaga and Hitoshi Okamura

10.1 Mammalian Circadian System and the Endocrine Regulation 246
10.2 Pineal Melatonin as an Endocrine Signal Regulated by Sympathetic Nerves Carrying SCN Signals 249
10.3 Adrenal Glucocorticoids as Endocrine Signals to the Whole Body Integrating Sympathetic and Neuroendocrine Signals 253
10.4 Adrenal Mineralocorticoids: Renin-Angiotensin-Aldosterone System Meets the Local Clock in the Zona Glomerulosa and Regulates Blood Pressure 259
10.5 Conclusion 263
References 263

Chapter 11 Clock Proteins and Circadian Rhythms in Immunity 270
Annie M. Curtis and Martin S. Knapp

11.1 Overview of the Immune System and its Cellular Components 270
11.2 Innate *Versus* Adaptive Immunity and its Cellular Components 271
11.3 Historical Perspective on Circadian Immunology 274
11.4 Overview of the Circuitry Imparting Rhythmic Control on Immunity 275
11.5 Clocks within Myeloid Cells 279
11.5.1 Monocytes and Macrophages 279
11.5.2 Dendritic Cells 282
11.5.3 Neutrophils 282
11.5.4 Eosinophils 283
11.5.5 Mast Cells and Basophils 284
11.5.6 Natural Killer Cells 284

11.6 Clock Function within Cells of the Adaptive Immune System 285
11.6.1 T Cells 285
11.6.2 CD4+ T Cells and Subtypes 286
11.6.3 CD8+ T Cells 287
11.6.4 B Cells 287
11.6.5 Other Immune Cells and Immune Modulation 288
11.7 Importance of Circadian Immunology in Health and Disease and Potential for Therapeutic Approaches 289
11.7.1 Musculoskeletal Disease 289
11.7.2 Autoimmune Disease 291
11.7.3 Infectious Disease 291
11.7.4 Vaccination 292
11.8 Final Discussion and Future Directions 292
Acknowledgements 293
References 293

Chapter 12 The Haematopoietic System **304**
Ole D. Laerum

12.1 Introduction 304
12.2 Haematopoiesis: A Large Organ and a Generalized System All Over the Body 304
12.3 Some Historical Remarks 305
12.4 General Outline of Haematopoiesis, from Stem and Progenitor Cells to Mature Blood Cells 307
12.5 Complexity of the Progeny 308
12.6 Chronobiology of Erythrocytes 309
12.7 Chronobiological Aspects of Peripheral Blood Cells 309
12.8 Precursor Cells 311
12.8.1 Human Experiments and General Considerations 311
12.8.2 Proliferative Parameters 311
12.9 Stem and Progenitor Cells 312
12.9.1 Some General Aspects 312
12.9.2 Circadian Variations of Stem and Progenitor Cells 313

12.10 Clock Genes in Haematopoiesis 314
12.10.1 General Aspects 314
12.10.2 A Universal System in Haematopoietic Cells 315
12.11 Regulatory Aspects 315
12.12 Implications for Chemotherapy of Malignant Tumours 318
12.13 General Conclusions 319
References 319

Chapter 13 How Do Skeletal Tissues Keep Time? Circadian Rhythms in Cartilage and Bone 323
Cátia F. Gonçalves and Qing-Jun Meng

13.1 Introduction 323
13.2 The Skeletal System (Cartilage and Bone): Development and Maturation 324
13.3 The Mammalian Circadian System: A Multitude of Oscillators 326
13.4 Circadian Rhythms in Skeletal Physiology 327
13.5 What Do Skeletal Tissues Use Circadian Timing For? 328
13.6 Roles of Circadian Clocks in the Skeletal System: Evidence from Mouse Studies 329
13.6.1 Cartilage 329
13.6.2 Bone 331
13.7 Circadian Rhythm Disruption and Skeletal Disease: Clocking in on Novel Therapies 333
13.8 Concluding Remarks 335
References 336

Chapter 14 Circadian Aspects of Skeletal Muscle Biology 345
Julien Delezie and Katja Lamia

14.1 Introduction 345
14.2 Molecular Orchestration of the Skeletal Muscle Circadian Symphony 346
14.2.1 The Molecular Circadian Clockwork 346
14.2.2 Circadian Rhythms in Muscle Gene Expression 347
14.3 Circadian Aspects of Muscle Growth and Repair 350
14.3.1 A Functional Clock in Satellite Cells 350

14.3.2 Circadian Clock Disruption and Muscle Development 350
14.3.3 Influence of the Circadian Clock on Muscle Regeneration 352
14.4 Circadian Aspects of Muscle Metabolism 353
14.4.1 Glucose and Lipid Metabolism 353
14.4.2 Mitochondrial Dynamics and Bioenergetics 355
14.5 Time, Exercise, and the Muscle-intrinsic Clock 356
14.5.1 Circadian Aspects of Muscle Performance 356
14.5.2 Zeitgeber Properties of Exercise 357
14.5.3 Therapeutic Potential of Timed Exercise 359
14.6 Conclusion 360
Acknowledgements 361
References 361

Chapter 15 Integumentary System 374
Germaine Cornelissen and Kuniaki Otsuka

15.1 Introduction 374
15.2 Some 24-hour Rhythms Characterizing Skin at the Organismic Level 375
15.2.1 Animal Experiments 376
15.2.2 Human Studies 377
15.3 Some Aspects of the Cutaneous Circadian Clock System 378
15.3.1 Interfollicular Epidermal Clock 379
15.3.2 Hair Follicle Clock 379
15.3.3 Dermal and Adipose Clocks 381
15.3.4 Immune, Vascular, and Neuronal Clocks 381
15.3.5 Circadian Clock in Melanocytes 382
15.3.6 Circadian Cell Cycle Gating in Skin 382
15.4 Circadian Rhythms and Skin Diseases 383
15.4.1 Skin Cancer 383
15.4.2 Skin Infection 384
15.4.3 Inflammatory Skin Diseases 385
15.4.4 Wound Healing 386
15.5 Concluding Remarks 387
References 388

Chapter 16 The Interplay Between Female Reproductive Function and the Circadian System 397
Takahiro J. Nakamura, Nana N. Takasu, Germaine Cornelissen, Kuniaki Otsuka and Wataru Nakamura

16.1 Introduction 397
16.2 Circadian Timekeeping Mechanism in Mammals 398
16.3 Effects of the Oestrous Cycle on Circadian Rhythms 399
16.3.1 Variations in Locomotor Activity Throughout the Oestrous Cycle 399
16.3.2 Effects of the Oestrous Cycle on the Expression Rhythm of Clock Genes 400
16.4 Effects of the Circadian Rhythm on Female Reproductive Functions 403
16.4.1 Circadian Regulation in Oestrous Cycles: A Concept of Daily "Timing Signals" 403
16.4.2 Maintenance of Oestrous Cycles by the Master Circadian Clock 405
16.4.3 Dysfunction of the Female Reproductive System Caused by Dissociation of the Circadian Clock from the External Environment 406
16.4.4 "Social Jet Lag" Causes Female Reproductive Dysfunction 406
16.4.5 Mechanism of Female Reproductive Dysfunction Caused by Dissociation of the Circadian Clock from the External Environment 409
16.5 Conclusions 409
16.6 Appendix 410
16.6.1 Circadian Disruption and Reproductive Function 410
16.6.2 Circadian Rhythm Involvement in Reproduction 410
16.6.3 Role of Oestrogens 412
16.6.4 Role of Core Clock Genes 414
16.6.5 Concluding Remarks 419
Acknowledgements 419
References 420

Part III: Chronopharmaceutics and Chronotheranostics Relevant to Biological Processes

Chapter 17 Growth: Emergence of the Circadian Clock 431
Yoshiki Tsuchiya and Kazuhiro Yagita

17.1 Introduction 431
17.2 Emergence of the Circadian Clock 432
17.2.1 Maternal Influence on Foetal Circadian Rhythms 432
17.2.2 Emergence of the Circadian Clock in Prenatal Development 433
17.2.3 Differentiation-coupled Development of the Circadian Molecular Clock 436
17.2.4 Physiological Function of the Circadian Clock in Stem Cells 439
17.3 The Circadian Clock and Cancer Cells 443
17.3.1 Dysregulation of the Circadian Clock in Cancer 443
17.3.2 Dedifferentiation- and Misdifferentiation-related Circadian Disruption in Cancer Development 444
17.3.3 Impact of Circadian Clock Disruption on Cancer Development 446
17.4 Future Perspectives 447
Acknowledgements 447
References 447

Chapter 18 Disease Conditions 455
Germaine Cornelissen, Denis Gubin and Kuniaki Otsuka

18.1 Introduction 455
18.2 Sleep Disorders 456
18.3 Mental Disorders 458
18.4 Neurodegenerative Conditions 459
18.5 Cancer 462
18.6 Role of the 12-hour Component in Various Disease Conditions 464
18.7 Concluding Remarks 465
References 466

Chapter 19 Circadian Clocks and Metabolism 476
Etienne Challet and Patrick Vuillez

19.1 The Circadian Timing System 476
19.2 Clock Genes and Nutrient-sensing Pathways 480
19.3 Circadian Function of Mitochondria 482
19.4 Microbiome 483
19.5 Circadian Disruption and Metabolic Disorders 485
19.5.1 Circadian Alterations Affect Metabolism 485
19.5.2 Metabolic Disorders Affect Circadian Rhythms 487
19.6 Time-restricted Feeding 488
19.6.1 Synchronising Effects of Time-restricted Feeding on Circadian Clocks Outside the SCN 488
19.6.2 Physiological Transducers of Synchronising Effects of Time-restricted Feeding 489
19.7 Caloric Restriction 490
19.8 High-fat Feeding 491
19.9 Exercise 492
Abbreviations 493
Acknowledgements 494
References 494

Chapter 20 Circadian Clocks in Ageing 505
Pei Zhu and Clara B. Peek

20.1 Introduction 505
20.2 Circadian Function During Ageing in Humans 506
20.3 Molecular Circadian Clock Function During Ageing 506
20.3.1 Central Clocks 506
20.3.2 Peripheral Clocks 508
20.4 Circadian Control of Metabolism During Ageing 510
20.5 Circadian Regulation of Stem Cells During Ageing 512
20.6 Perspective 517
References 518

Chapter 21 Chronotherapeutic Approaches 536
Denis Gubin

21.1 Introduction 536
21.1.1 Chronodiagnosis from Human Samples 537

21.1.2 Toward Personalized Chronotherapy 537
21.1.3 Chronodiagnostics as the Foundation for Chronotherapy 540
21.2 Circadian Clock Drug Targets 541
21.2.1 Molecular and Cellular Clock Machinery 544
21.2.2 Cell-to-cell Communication 546
21.2.3 Laboratory *vs.* Field (Daily Routine) 547
21.2.4 Animal Models *vs.* Humans 548
21.3 Pharmacological Approaches 552
21.3.1 Chronopharmacokinetics and Chronopharmacodynamics 552
21.3.2 Chronotherapeutic Approaches 554
21.4 Non-pharmacological Approaches 555
21.4.1 Light 555
21.4.2 Melatonin 557
21.4.3 Sleep Scheduling 559
21.4.4 Time-restricted Feeding 559
21.4.5 Exercise 560
21.5 Conclusion 562
References 562

Part IV: Methodological Aspects

Chapter 22 Chronobiological Study Designs 581
Dietmar Weinert and Denis Gubin

22.1 Introduction 581
22.2 Data Collection: Longitudinal, Transverse, and Hybrid Sampling 582
22.3 Marker Rhythms 585
22.3.1 Melatonin 586
22.3.2 Body Temperature 589
22.3.3 Cortisol 591
22.3.4 Physical Activity 592
22.3.5 Sleep–Wake Pattern 593
22.3.6 Chronotype 593
22.3.7 Gene Expression 594
22.3.8 Cell and Tissue Cultures 594

22.4 Experimental Approaches to Estimate the Endogenous Component of Overt Rhythms 596
22.4.1 Constant Routine Protocol 597
22.4.2 Forced Desynchronization 599
22.5 Conclusions 602
References 603

Chapter 23 Identifying and Interpreting Rhythms in Biological Data 610
Alexander Yoo and Ron C. Anafi

23.1 Introduction 610
23.2 Errors and Biases in Molecular Measures 612
23.3 Methods for Identifying Rhythms in Time Course Data 613
23.3.1 Describing Rhythms 613
23.3.2 Finding Rhythms – A Generic Recipe 615
23.3.3 Autocorrelation – Looking for Repeating Signals 615
23.3.4 Cosinor Regression – Looking for Sinusoidal Waves 619
23.3.5 Lomb–Scargle and Fourier Type Methods – Looking for Repeating Signals with More complicated Shapes 621
23.3.6 Non-parametric Methods (JTK and RAIN) – Looking for Blocks of Increasing and Decreasing Abundance 623
23.3.7 Metacycle – Putting it all Together 624
23.4 General Comments and Recommendations for Identifying Rhythms 625
23.5 Detecting Changes in Rhythms 628
23.6 Interpreting Omics Scale Rhythm Data 630
23.6.1 Overrepresentation Methods 630
23.6.2 Aggregate Score Methods 631
23.7 Characterizing Biological Rhythms Without Time Course Data 633
23.7.1 Supervised Time Stamping 634
23.7.2 Unsupervised Ordering 636
23.7.3 Organization Assessment Methods 639
23.8 Conclusions 643
Acknowledgements 643
References 643

Chapter 24 ***Quo Vadis*** **648**
Germaine Cornelissen and Tsuyoshi Hirota

24.1 Introduction 648
24.2 Interdigitating Networks 648
24.3 Multi-frequency Rhythms 650
24.3.1 A 12-hour Clock? 650
24.3.2 An About-weekly Clock? 650
24.4 Translational Research 653
24.4.1 Bench Work 653
24.4.2 Human Studies 653
24.4.3 Medications Affecting Circadian Rhythms 653
24.4.4 Drug Development Targeting the Circadian Clock 654
24.5 Concluding Remarks 656
References 657

Subject Index **665**
