Contents

Preface xi

CHAPTER 1 Introduction 1
1.1 Nature of Physical Chemistry 1
1.2 Units 2
1.3 Atomic Mass, Molecular Mass, and the Chemical Mole 5

CHAPTER 2 Properties of Gases 9
2.1 Some Basic Definitions 9
2.2 An Operational Definition of Temperature 10
2.3 Ideal Gases 10
2.4 Real Gases 16
2.5 Condensation of Gases and the Critical State 20
2.6 Kinetic Theory of Gases 23
2.7 The Maxwell Distribution Laws 27
2.8 Molecular Collisions and the Mean Free Path 30
2.9 Graham's Laws of Diffusion and Effusion 32
Problems 34

CHAPTER 3 Intermolecular Forces 41
3.1 Intermolecular Interactions 41
3.2 The Ionic Bond 42
3.3 Types of Intermolecular Forces 44
3.4 Hydrogen Bonding 52
3.5 The Structure and Properties of Water 54
3.6 Hydrophobic Interaction 59
Problems 62

CHAPTER 4 Biological Macromolecules 65
4.1 Structure of Proteins 65
4.2 Protein Stability 72
4.3 Protein Folding 74
4.4 Protein Misfolding Diseases 76
4.5 Structure of Nucleic Acids 78
4.6 Nucleic Acid Stability 81
4.7 The Ribosome 82
4.8 Methods for Determining Size, Shape, and Mass of Macromolecules 84
Problems 104

CHAPTER 5 The First Law of Thermodynamics 107
5.1 Work and Heat 107
5.2 The First Law of Thermodynamics 112
5.3 Heat Capacities 117
5.4 Gas Expansions 123

5.5 Calorimetry 128
5.6 Thermochemistry 134
5.7 Bond Energies and Bond Enthalpies 140
Problems 145

CHAPTER 6 The Second Law of Thermodynamics 153
6.1 Spontaneous Processes 153
6.2 Entropy 155
6.3 The Second Law of Thermodynamics 160
6.4 Entropy Changes 162
6.5 The Third Law of Thermodynamics 172
6.6 Gibbs Energy 174
6.7 Standard Molar Gibbs Energy of Formation ($\Delta_f G^\circ_m$) 178
6.8 Dependence of Gibbs Energy on Temperature and Pressure 180
6.9 Phase Equilibria 183
6.10 Thermodynamics of Rubber Elasticity 190
6.11 Hydrophobic Interactions and the Entropy of Water 192
6.12 Thermodynamics of Protein Folding 194
Problems 202

CHAPTER 7 Solutions 209
7.1 Concentration Units 209
7.2 Partial Molar Quantities 210
7.3 The Thermodynamics of Mixing 213
7.4 Binary Mixtures of Volatile Liquids 216
7.5 Real Solutions 221
7.6 Colligative Properties 223
7.7 Electrolyte Solutions 236
7.8 Ionic Activity 242
7.9 Colligative Properties of Electrolyte Solutions 251
7.10 Biological Membranes 255
Appendix 7.1 Notes on Electrostatics 264
Problems 268

CHAPTER 8 Chemical Equilibrium 275
8.1 Chemical Equilibrium in Gaseous Systems 275
8.2 Reactions in Solutions 283
8.3 Heterogeneous Equilibria 284
8.4 Acid Base Equilibrium 286
8.5 The Influence of Temperature, Pressure, and Catalysts on the Equilibrium Constant 298
8.6 Binding of Ligands to Proteins 302
8.7 Bioenergetics 318
Appendix 8.1 Maintaining the pH of blood 329
Problems 335

CHAPTER 9 Electrochemistry 343
9.1 Electrochemical Cells 343
9.2 Single Electrode Potentials 344
9.3 Thermodynamics of Electrochemical Cells 346
9.4 Types of Electrochemical Cells 353

9.5 Applications of EMF Measurements 354
9.6 Biological Oxidation 356
9.7 ATP Synthase 362
9.8 Membrane Potential 366
Problems 375

CHAPTER 10 Chemical Kinetics 381
10.1 Reaction Rates 381
10.2 Reaction Order 382
10.3 Molecularity of a Reaction 394
10.4 More Complex Reactions 397
10.5 The Effect of Temperature on Reaction Rate 402
10.6 Potential-Energy Surfaces 404
10.7 Theories of Reaction Rates 406
10.8 Isotope Effects in Chemical Reactions 412
10.9 Reactions in Solution 415
10.10 Fast Reactions in Solution 417
10.11 Oscillating Solutions 421
Problems 424

CHAPTER 11 Enzyme Kinetics 431
11.1 General Principles of Catalysis 431
11.2 The Equations of Enzyme Kinetics 436
11.3 Chymotrypsin: A Case Study 442
11.4 Multisubstrate Systems 445
11.5 Enzyme Inhibition 447
11.6 pH Effects on Enzyme Kinetics 456
11.7 Ribonuclease A: A Case Study 460
Problems 462

CHAPTER 12 Quantum Mechanics and Atomic Structure 467
12.1 The Wave Theory of Light 467
12.2 Planck's Quantum Theory 469
12.3 The Photoelectric Effect 471
12.4 Bohr's Theory of the Hydrogen Emission Spectrum 473
12.5 de Broglie's Postulate 475
12.6 The Heisenberg Uncertainty Principle 479
12.7 The Schrödinger Wave Equation 482
12.8 Particle in a One-Dimensional Box 483
12.9 Quantum Mechanical Tunneling 489
12.10 The Schrödinger Wave Equation for the Hydrogen Atom 491
12.11 Many-Electron Atoms and the Periodic Table 497
Problems 506

CHAPTER 13 The Chemical Bond 511
13.1 Lewis Structures 511
13.2 Valence Bond Theory 512
13.3 Hybridization of Atomic Orbitals 514
13.4 Electronegativity and Dipole Moment 519
13.5 Molecular Orbital Theory 522
13.6 Diatomic Molecules 524

13.7 Resonance and Electron Delocalization 529
13.8 Coordination Compounds 532
13.9 Coordination Compounds in Biological Systems 541
Problems 552

CHAPTER **14** Spectroscopy 555

14.1 Vocabulary 555
14.2 Microwave Spectroscopy 564
14.3 Infrared Spectroscopy 568
14.4 Electronic Spectroscopy 576
14.5 Nuclear Magnetic Resonance Spectroscopy 581
14.6 Electron Spin Resonance Spectroscopy 593
14.7 Fluorescence 596
14.8 Phosphorescence 601
14.9 Lasers 602
14.10 Optical Rotatory Dispersion and Circular Dichroism 607
Problems 615

CHAPTER **15** Photochemistry and Photobiology 621

15.1 Introduction 621
15.2 Photosynthesis 626
15.3 Vision 636
15.4 Biological Effects of Radiation 641
Problems 646

Appendix 1. Review of Mathematics 649
Appendix 2. Thermodynamic Data 659
Glossary 663
Index 673
