

CANCER

INSTRUCTIONS FOR AUTHORS

For a more updated version of this document, please visit the *CANCER* website at <http://www.interscience.wiley.com/cancer>.

Mission and Scope of the American Cancer Society and *CANCER*: The National Board of Directors of the American Cancer Society adopted the following mission statement November 9, 1994: "The American Cancer Society is the nationwide community-based voluntary health organization dedicated to eliminating cancer as a major health problem by preventing cancer, saving lives and diminishing suffering from cancer through research, education, advocacy, and service."

CANCER is a peer-reviewed publication of the American Cancer Society integrating scientific information from worldwide sources for all oncologic specialties. The objective of *CANCER* is to provide an interdisciplinary forum for the exchange of clinically applicable information among oncologic disciplines concerned with the etiology and course of human cancer. *CANCER* accomplishes this objective by publishing original articles, as well as other scientific and educational documents, that support the mission of the American Cancer Society by facilitating the transfer of knowledge from the laboratory to the bedside; contributing to cancer prevention, early detection, diagnosis, cure, and rehabilitation; and diminishing suffering from cancer.

Manuscript Types that may be submitted include:

- **Original Articles:** scientific reports of the results of original clinical research. **The text is usually limited to 6000 words (25 double-spaced pages); including the abstract, references, figures, and tables. Abstracts are limited to 250 words.**
- **Accelerated Publications:** A concise and timely presentation of significant data, The text should not exceed more 2,400 words, and no more than 20 references, and a total of 4 figures and tables should be included. A manuscript submitted as an Accelerated Publication will receive expedited peer review and publication. **The Editor-in-Chief must approve the expedited review.**
- **Book Reviews:** Reviews of selected books in oncologic medicine and surgery. Book reviews are generally solicited by the Editor.
- **Review Articles:** Review articles are generally solicited by the editors, but we will consider unsolicited mate-

rials. A review article must be a timely, in-depth treatment of an issue. In light of the limitation of space in the journal, these articles must be no longer than 35 double-spaced typewritten pages, or 8000 words, including all elements.

- **Editorials:** Editorials are generally solicited by the Editor and related to a manuscript in the same issue. They represent opinions of recognized leaders in oncologic specialties. Length should not exceed 2400 words and no more than 20 references should be cited.
- **Commentary:** Presents a point of view of general interest not related to an article in the same issue of *CANCER*.
- **Communications:** Are published on selected topics from organizations such as the American Cancer Society, the Commission on Cancer of the American College of Surgeons, and the American Joint Committee on Cancer.
- **In Memoriam:** Highlight the accomplishments of distinguished individuals for their contributions to oncology.
- **Letters to the Editor:** Letters to the editor referring to a manuscript published in *CANCER* within the previous three months will be considered. The authors of the original publication will be given the opportunity to respond in the same issue of *CANCER*. They must not exceed 400 words in length and must be limited to three authors and five references. They should not have tables or figures. Financial associations or other potential conflicts of interest must be disclosed.
- **Case reports of single cases will not be considered.** Authors may submit a mini-review of the literature that includes illustrative cases.

MANUSCRIPT SUBMISSION REQUIREMENTS

Submit manuscripts according to the following reference, International Committee of Medical Journal Editors. Uniform requirements for manuscripts submitted to biomedical journals. *Ann Intern Med* 1997;126:36-47. The complete document can be found at <http://www.icmje.org>.

Style: Prepare manuscript using American spelling and grammar. Use the following source as a guideline for manuscript preparation and style: *American Medical Association Manual of Style, 9th ed.*²

Electronic Submission

PLEASE NOTE: Authors must submit *corresponding author's* contact information, manuscript title, abstract, and cover letter electronically using the **Cadmus Rapid Review System available at <http://www.rapidreview.com>**. Authors must also submit 2 hard copies to the Editorial Office.

When submitting using Rapid Review, authors have two options:

- 1) Submit the *entire* manuscript (text, figures, tables, references, etc.) online via the website, allowing the sys-

tem to generate a review quality PDF for use by the Editorial Office. Additionally, authors must send two hard copies of the entire manuscript, along with publication quality figures, copyright transfer form, and a disk to the Editorial Office directly.

- 2) Submit contact information only online and send two hard copies of the entire manuscript, along with publication quality figures, and a diskette to the Editorial Office directly.

Manuscripts may not be submitted by email.

The **Checklist for Authors** must be completed, signed by the corresponding author, and submitted with the hard

INCOMPLETE SUBMISSIONS MAY BE DELAYED

CANCER

Checklist for Authors

This checklist must be completed, signed by the corresponding author, and submitted with the manuscript. Please see Instructions to Authors for details related to this checklist.

Please check each item that has been completed.

- Submit electronically via Rapid Review
- Two copies of the manuscript (Manuscripts must be no longer than 25 pages or 6000 words including all elements) by mail.
- 2. Diskette containing electronic version of manuscript
- 3. Cover letter, including the submission statement, "All authors have read and approved this manuscript."
- 4. Two sets of tables
- 5. Two sets of figures
- 6. Title page, including name of each author, academic degree, affiliation, mailing address, telephone number, and if available, facsimile number, and email address. Shortened title of no more than 40 characters, including spaces.
- 7. Category (circle category): Original Article (specify an anatomic site or a general topic), Editorial, Commentary, Review Article, Communication, In Memoriam, or Correspondence.
- 8. Type is double-spaced throughout, ragged right margin, 10- or 12-pitch.
- 9. Shortened Abstract of approximately two concise sentences summarizing the significant findings of the manuscript. Required for all submissions except Tribute, Editorial, or Correspondence.
- 10. Abstract with four specified subtitles. Required for all submissions except Editorial, Commentary, Communication, In Memoriam, or Correspondence. (Must also be entered in Rapid Review). Key words/terms (4 to 10)
- 11. Reference in proper format, numbered in order cited in text. All references listed in the reference section are cited in the text and vice versa.
- 12. Figures and tables in the required format. No more than 10 figures and 6 tables.
- 13. "Authorship Responsibility, Financial Disclosure, and Copyright Transfer" form, signed by each author. (1 original and 1 copy).
- 14. A statement detailing any potential conflict of interest, and source of funding.
 - Not applicable
- Each necessary permission statement signed by the appropriate source.
 - Not applicable
- A statement confirming that informed consent was obtained from patient(s).
 - Not applicable

I verify that the above information is correct and that all required information has been included in the manuscript submission package.

Signature of Corresponding Author Date

copies of the manuscript along with the manuscript number.

Submit manuscript hard copies to:

CANCER Editorial Office
7707 Fannin Street
Suite 202
Houston, TX 77054.
Phone: (713) 558-8056
Fax: (713) 558-8069

MANUSCRIPT COMPONENTS

Manuscript Format: Two complete copies, including cover letter, title page, abstract, text, references, figure legends, publication quality figures, tables and a diskette are required. The text is usually limited to 6000 words (25 double-spaced pages), including all elements. Print the manuscript double-spaced on "8½ × 11" or ISO A4 paper, on one side of the page only, using standard 10- or 12- size font. Include page numbers, beginning with the title page as number 1.

Title Page:

- manuscript title
- running title: a short version of the title (up to 40 characters)
- each author's name, academic degrees and affiliation.
- complete mailing address, telephone, facsimile, and e-mail for correspondence and reprints
- total number of each: (1) text pages, including title page, references, and figure legends; (2) tables; and (3) illustrations.
- Sources of support that require acknowledgment

Condensed Abstract: for use in the Table of Contents.

In approximately two concise sentences, state the significant conclusion(s) or message the manuscript brings to the reader. A condensed abstract must be provided for each type of submission except a Tribute or Correspondence.

Abstract: Original and Review Articles must contain an abstract of approximately 250 words with four specified subtitles: Background, Methods, Results, and Conclusion(s). Abstracts are not required for Tributes, Editorials, Commentaries, Communications, or Correspondence.

Abstracts published in **CANCER** are submitted to the International Cancer Research Data Bank (ICRDB), supported by the National Cancer Institute. This facilitates broad circulation of cancer-related abstracts. If the ICRDB edits an abstract significantly, it is indicated by a notation: "modified." Authors are hereby made aware of this procedure in advance of submitting a manuscript to **CANCER**.

Key words: Include 4 to 10 key words or terms to be used

as index terms. Use terms from the medical subject headings list of *Index Medicus*.¹¹

Text: Drugs: use generic name (or state generic name followed in parentheses by trade name), name of manufacturer, city, and country of manufacturer.

Abbreviations: Use only standard abbreviations.² A subject that is to be abbreviated must be spelled in full for its first use in the text, followed by the abbreviation in parentheses.

AJCC/UICC TNM Classification and Stage grouping are to be used. If another staging system is stated, the AJCC/UICC TNM equivalent must also be given.^{3,4} The stage grouping is a combination of the individual T, N, M classifications (e.g., Breast Carcinoma Stage IIA is T2 N0 M0. Please note IIA is the stage. T2 N0 M0 is a combination of T, N, M classifications that satisfy the criteria for Stage IIA.). Reference to any T, N, M component is a *classification* and not a stage (e.g., the T2 classification); it is not correct to state the classification as a stage (e.g., the T2 stage). When a stage or classification is used in the manuscript, a reference citing the staging system must be provided. The first time a stage is used it must be accompanied by the T, N, M and the verbal translation of the numerical identifier (e.g., Breast Carcinoma Stage IIA [T2 N0 M0]): tumor more than 2 cm but not more than 5 cm in greatest dimension [T2], no regional lymph node metastasis [N0], no distant metastasis [M0]).

References: **Wiley's Journal Styles Are Now in EndNote:**

EndNote is a software product that we recommend to our journal authors to help simplify and streamline the research process. Using EndNote's bibliographic management tools, you can search bibliographic databases, build and organize your reference collection, and then instantly output your bibliography in any Wiley journal style. To download the reference style for this journal, or to purchase a copy of EndNote, go to the following URL: **www.interscience.wiley.com/jendnote**

Technical Support: If you need assistance using EndNote, contact endnote@isiresearchsoft.com, or visit www.endnote.com/support

List references double-spaced in a separate reference section immediately following the text. All references must be verified by the corresponding author who submits the manuscript to **CANCER**. Follow the style of the *American Medical Association Manual of Style, 9th ed.*² for reference format and *Index Medicus*¹¹ for standard journal abbreviations (please see examples below). Number references sequentially in the order cited in the text; do not alphabetize.

Personal communication, unpublished observations, and submitted manuscripts should not be cited. Reference to a paper accepted but not yet published is listed in the reference section as “in press.” “In press” references must be updated by the authors as soon as publication data are available.

Provide names of all authors in a reference when there are six or fewer; if there are seven or more authors, list only the first three, followed by “et al.”

Journal references shall include the specified information listed in the following order: authors, article title and subtitle, journal abbreviation, year, volume number in Arabic numerals, and inclusive pages.

1. Cohn KH, Ornstein DL, Wang F, et al. The significance of allelic deletions and aneuploidy in colorectal carcinoma: results of a 5-year follow-up study. *Cancer*. 1997;79:233-244.

Book references are listed as follows: authors, title, edition (if other than the first), volume (if more than one), city, publisher, year.

2. Givan AL. *Flow cytometry: first principles* (2nd edition). New York: John Wiley & Sons, Inc., 2001.

When referencing a **book chapter**, the order changes as follows: authors of the chapter, title of the chapter, “In:” editors/authors of the book, title of the book, edition (if there are more than one), volume (if there are more than one), city, publisher, year, and inclusive pages of the chapter.

3. Luketich JD, Ginsberg RJ. Diagnosis and staging of lung cancer. In: Johnson BE, Johnson DH. Lung cancer. New York: Wiley-Liss, Inc., 1995:161-73.

References to a source in an electronic format should include the type of medium (such as “computer program” or “monograph on CD-ROM”), the version used, and the supplier. References to **online sources** should include the type of medium (such as “serial online” or “monograph online”), the date of that specific reference (if applicable), the uniform resource locator (URL), and the date that the source was accessed. A source accessed online should always be referenced accordingly, even if it is also published in printed form.

4. Nakamura S, Yao T, Aoyagi K, Ikeda M, Fujishima M, Tsuneyoshi M. *Helicobacter pylori* and primary gastric lymphoma: a histopathologic and immunochemical analysis of 237 patients. *Cancer* [serial online] 1997;79:3-11. Available from URL: <http://www.interscience.wiley.com/cancer> [accessed Dec 1, 1998].

Authors are responsible for the accuracy and completeness of their references and for correct text citation.

Tables:

- Authors should limit tables to those that adequately and concisely present their findings without redundancy.

- Tables are numbered consecutively, using Arabic numerals, in the order cited in the text. The table number is followed by a brief descriptive title. Table should be double-spaced.
- Horizontal rules are used only to separate headings; vertical rules are not used. number and “continued,” and repeat table subheadings.
- Abbreviations used in the table must be defined in a footnote to the table. Permission must be obtained to reproduce previously published tabular material.

Figures and Figure Legends:

- Publication quality figures should be submitted
- Number all illustrations sequentially with Arabic numerals in pencil on the back of each figure of every set, in the order cited in the text
- On a separate page, all legends are double-spaced and include the figure number and a brief description of the illustration.
- *Submitted illustrations are returned to the corresponding author only if accompanied by a postage paid, self-addressed envelope.*
- Color or black-and-white photographic prints must be glossy and provide sharp contrast,
- Color illustrations are printed and published online free of charge at the discretion of the editor.
- Patient identification must be masked in photographs; otherwise, a signed permission statement is required (please see Permissions section).
- Permission must be obtained to reproduce previously published illustrative material. Credits for the reproduced work are included in the figure legend and must include author(s), title, either publisher and city (and country, if other than US) or periodical name, volume, page, and year.
- For information on preparing figures for Cadmus Rapid Review electronic submission, please go to: <http://cjs.cadmus.com/da>

AUTHORS' PROFESSIONAL AND ETHICAL RESPONSIBILITIES

Should possible scientific misconduct or dishonesty in research submitted for review by the journal be suspected or alleged, CANCER reserves the right to forward any submitted manuscript to the sponsoring or funding institution or to other appropriate authorities for investigation. CANCER recognizes the responsibility to ensure that the question is appropriately pursued, but does not undertake the actual investigation or make determinations of misconduct. The author will be notified if CANCER forwards any manuscript or materials to the sponsoring or funding institution.

Authorship:

Authorship Responsibility, Financial Disclosure, Copyright Transfer: Each author should have participated

sufficiently in the work to take public responsibility for the content. Authorship credit should be based only on substantial contributions to (a) conception and design, or analysis and interpretation of data; and to (b) drafting the article or revising it critically for important intellectual content; and on (c) final approval of the version to be published. Conditions (a), (b), and (c) must all be met.

Each author must read and sign the statements on I. Authorship Responsibility, Criteria, and Contributions, II. Financial Disclosure, and III. either Copyright Transfer or Federal Employment. In addition, the corresponding author must sign (IV) the Acknowledgment statement. If necessary, photocopy this document to distribute to co-authors.

The number of authors should not exceed 10. However, group authorship may be used in any of the following three formats as appropriate: (1) Authorship may be attributed to an entire group (e.g., Pediatric Oncology Group) when all members of the group meet the criteria for authorship outlined below. In this case, the name of the group is located with the manuscript title in the place of authors; the name of each member of the group is listed in a footnote and his/her authorship acknowledged. Each member of the group must sign the "Authorship Responsibility, Financial Disclosure, and Copyright Transfer" form. Each of the authors and each member of the group must sign the "Authorship Responsibility, Financial Disclosure, and Copyright Transfer" form. (2) When specified authors assume responsibility for an entire group (e.g., Jane E. Doe, John L. Smith, Mark F. Jones for the Pediatric Oncology Group), only the specified authors must meet the criteria for authorship outlined below, and they are listed with the manuscript title. All members of the group may be listed in a footnote but are not acknowledged as authors. In this case, the corresponding author must state in the cover letter that she/he has written permission from each group member to list her/his name as a member of the group.

CANCER's "Authorship Responsibility, Financial Disclosure, and Copyright Transfer" form is in every January 1 and July 1 issue, and is available online at <http://www.interscience.wiley.com/cancer>. Authors should use the online or the most current publication. Each author is required to read and sign the form. The **CANCER** Editorial Office must receive an original signature of each author.

Cover Letter to Accompany the Submitted Manuscript: A cover letter must accompany the manuscript and include the complete title and category (e.g., Accelerated Publication, Tribute, Editorial, Commentary, Review Article, Original Article, Communication, Correspondence). The designated corresponding author of an original article should suggest a specific anatomic site or general topic best suited for the original article. The state-

ment "All authors have read and approved the manuscript" must be included in the cover letter. Although reviewer selection is ultimately the decision of the Editor-in-Chief, authors are encouraged to provide the names, addresses, telephone numbers, facsimile numbers, and e-mail addresses of potential reviewers. The corresponding author provides the complete address, telephone and facsimile numbers, and e-mail address to which communications regarding the manuscript should be directed. Written notification of any change in the designated corresponding author, address, telephone or facsimile number, or E-mail address must be directed promptly to the **CANCER** Editorial Office. This information must also be provided online at <http://www.rapidreview.com>.

Informed consent: A statement, submitted with the cover letter, is required with any report of investigations involving human subjects confirming that informed consent was obtained from the subject(s) and/or guardian(s). Also state clearly in the manuscript that informed consent was obtained.

Style: Use the following sources as guidelines for manuscript preparation and style: *American Medical Association Manual of Style, 9th ed.*² for matters of spelling, capitalization, punctuation, hyphenation, and general style; "Uniform Requirements for Manuscripts Submitted to Biomedical Journals"¹ for the format of references; *American Joint Committee on Cancer Staging Manual, 5th ed.*³ or *UICC TNM Classification of Malignant Tumours*⁴ for citing the stage of a cancer; *World Health Organization International Histological Classification of Tumours*⁵ for histologic classification of tumors; *USP Dictionary of USAN and International Drug Names, 1997*⁶ for naming drugs; *Naming and Indexing of Chemical Substances for Chemical Abstracts*⁷ for uses of chemical terms; *ICD-O: International Classification of Diseases for Oncology, 2nd ed.*⁸ *Physicians' Current Procedural Terminology: CPT, 1995*⁹ and *SNOMED International*¹⁰ for terms relating to diseases, operations, and procedures; *Cancer Treatment Reports*¹¹ for presenting statistical material; and *Index Medicus*¹² for abbreviating journal titles in references. Système International (SI) or metric system of measure is acceptable.

Permissions for Use of Previously Published or Copyrighted Material or Photographs with Identifiable Patients: Information reproduced from another source must be properly cited. It is the responsibility of the corresponding author to obtain written permission from the appropriate authors and/or copyright holders to use previously published or copyrighted material. Signed permission statements from the copyright holder must be submitted to the Editorial Office with any manuscript containing reproduced materials. The corresponding author is requested to obtain permission for both print and electronic media. Permission statements also must be

obtained from at least one author when citing unpublished data, in press articles, and/or personal communications. Permission forms may be obtained by contacting the Editorial Office or online at www.interscience.wiley.com/cancer.

In photographs, sonograms, CT scans, etc., the physical identification of a patient should be masked whenever possible. However, if a patient is identifiable, written permission to use the photograph must be obtained from the patient or guardian and submitted with the manuscript. Clearly state in the manuscript that informed consent has been obtained.

Randomized Controlled Trials: Reports of Randomized Controlled Trials (RCTs) must state explicitly how the comparison groups were generated, so that readers will be able to assess the method of randomization; and in the title, précis, and abstract specify that the manuscript is a report of an RCT. When an RCT is submitted, the authors should refer to the "Checklist for Authors Submitting Randomized Controlled Trials to JAMA."¹³

Proofs to Author. Page proofs for accepted manuscripts are sent via email to the corresponding author from the Publisher, John Wiley & Sons, Inc. The corresponding author must return all proofs within 48 hours and limit changes to corrections of typographical errors and errors in the presentation of data. Correspondence regarding proofs should be directed to Adrienne Cook, **CANCER** Production Editor, John Wiley & Sons, Inc., 111 River St., Hoboken, NJ 07030, USA. Telephone: (201) 748-8870; Facsimile: (201) 748-6825; E-mail: acook@wiley.com.

Reprints. A form for ordering reprints is forwarded to the corresponding author with the page proofs. To request additional forms, contact the Reprints Department of the Publisher, John Wiley & Sons, Inc., 111 River St., Hoboken, NJ 07030, USA. Telephone: (201) 748-8771; Facsimile: (201) 748-6021; E-mail: cwoods@wiley.com.
