

# Contributions to Mineralogy and Petrology

## 1. Legal requirements

The author(s) guarantee(s) that the manuscript will not be published elsewhere in any language without the consent of the copyright holders, that the rights of third parties will not be violated, and that the publisher will not be held legally responsible should there be any claims for compensation.

Authors wishing to include figures or text passages that have already been published elsewhere are required to obtain permission from the copyright holder(s) and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the authors.

Manuscripts must be accompanied by the "Copyright Transfer Statement". The form can be obtained from <http://link.springer.de>.

## 2. Editorial procedure

Manuscripts should be submitted in English, in triplicate together with three sets of illustrations to either of the executive editors or to any member of the editorial board. Please be sure to include your e-mail address and your fax number.

Please do not transmit electronic data to the publisher until your manuscript has been reviewed and accepted for publication. Please follow the instructions below.

Papers should present scientific findings that are essentially new and have not been published elsewhere. They must be concise and informative with a minimum number of illustrations. Extensive tables listing data should be placed on file in the author's Institute, and directions for obtaining them given in a footnote. In general, a manuscript *should not exceed* 8500 words, including figures and tables.

## 3. Manuscript preparation

### General remarks

To help you prepare your manuscript, Springer offers a template that can be used with Winword 7 (Windows 95), Winword 6 and Word for Macintosh. For details see point 4.

All manuscripts are subject to copy editing.

### Title page

- A concise and informative title
- The name(s) of the author(s)
- The affiliation(s) and address(es) of the author(s)
- The e-mail address, telephone and fax numbers of the communicating author

### Abstract

Each paper must be preceded by an abstract presenting the most important results and conclusions in no more than 150 words.

### Footnotes

Essential footnotes to the text should be numbered consecutively and placed at the bottom of the page to which they refer.

### Acknowledgements

These should be as brief as possible. Any grant that requires acknowledgement should be mentioned. The names of funding organizations should be written in full.

### Appendices

If there is more than one appendix, they should be numbered consecutively. Equations in appendices should be designated differently from those in the main body of the paper, e.g. (A1), (A2) etc. In each appendix equations should be numbered separately.

### References

The list of References should only include works that are cited in the text and that have been published or

accepted for publication. Personal communications should only be mentioned in the text.

In the text, references should be cited by author and year (e.g. Hammer 1994; Hammer and Sjöqvist 1995; Hammer et al. 1993) and listed in alphabetical order in the reference list.

### Examples:

#### Journal articles:

Art JG, Hanson GL (1972) Quartz diorites derived by partial melting of eclogite or amphibolite at mantle depths. *Contrib Mineral Petrol* 37:161-174

#### Books:

Keil K (1969) Meteorite composition. In: Wedepohl KH (ed) *Handbook of geochemistry*, vol 1. Springer, Berlin Heidelberg New York, pp 78-115

If available the Digital Object Identifier (DOI) of the cited literature should be added at the end of the reference in question.

Example: Dyall KG (1998) Relative and non-relative finite nucleus optimized double zeta basis sets for the elements. *Theor Chem Acc* 99: 366-371 DOI 10.1007/s002149800025

## Illustrations and Tables

All figures (photographs, graphs or diagrams) and tables should be cited in the text, and each numbered consecutively throughout. The placement of figures and tables should be indicated in the left margin. Figures parts should be identified by lower-case roman letters.

For submission of figures in electronic form see below.

*Line drawings.* Please submit good-quality prints. The inscriptions should be clearly legible.

*Half-tone illustrations (black and white and color).*

Please submit well-contrasted photographic prints with the top indicated on the back. *Magnification* should be indicated by *scale bars*.

*Size of figures:* The figures should either match the width of the column (8.6 cm) or be 17.8 cm or 23.6 cm wide. The maximum length is 23.6 cm.

*Figure legends* must be brief, self-sufficient explanations of the illustrations. The legends should be placed at the end of the text.

*Tables* should have a title and a legend explaining any abbreviation used in that table. Footnotes to tables should be indicated by superscript lower-case letters (or asterisks for significance values and other statistical data).

For *color illustrations* the authors will be expected to make a contribution (€ 485, US\$ 475, plus 16% VAT) towards the extra costs, irrespective of the number of color figures.

## 4. Electronic submission of final version

Please send only the final version of the article, as accepted by the editors.

## Preparing your manuscript

### Text

The Word template is available:

via browser:

- <ftp://ftp.springer.de/pub/Word>
- file names: sv-journ.zip or sv-journ.doc and sv-journ.dot

The zip file should be sent unencoded.

### Layout guidelines

1. Use a normal, plain font (e.g., Times Roman) for text. Other style options:
  - for textual emphasis use italic types.
  - for special purposes, such as for mathematical vectors, use boldface type.
2. Use the automatic page numbering function to number the pages.
3. Do not use field functions.
4. For indents use tab stops or other commands, not the space bar.
5. Use the table functions of your word processing program, not spreadsheets, to make tables.
6. Use the equation editor of your word processing program or MathType for equations.

7. Place any figure legends or tables at the end of the manuscript.

8. Submit all figures as separate files and do not integrate them within the text.

### Data formats

Save your work in two versions:

1. RTF (Rich Text Format) or Word compatible Word 95/97
2. pdf (a single pdf file including text, tables and figures).

## Illustrations

The preferred figure formats are EPS for vector graphics exported from a drawing program and TIFF for halftone illustrations. EPS files must always contain a preview in TIFF of the figure. The file name (one file for each figure) should include the figure number. Figure legends should be included in the text and not in the figure file.

- *Scan resolution:* Scanned line drawings should be digitized with a minimum resolution of 800 dpi relative to the final figure size. For digital halftones, 300 dpi is usually sufficient.
- *Color illustrations:* Store color illustrations as RGB (8 bits per channel) in TIFF format.
- *Vector graphics:* Fonts used in the vector graphics must be included. Please do not draw with hairlines. The minimum line width is 0.2 mm (i.e., 0.567 pt) relative to the final size.

Please always supply the following information with your data: journal title, operating system, word processing program, drawing program, image processing program, compression program.

The file name should be memorable (e.g., author name), have no more than 8 characters, and include no accents or special symbols. Use only the extensions that the program assigns automatically.

## 5. Electronic supplementary material

Electronic supplementary material (ESM) for an article printed in this journal will be published free of charge to subscribers on Springer's server <http://link.springer.de>. After acceptance by the journal's Editors the data will be supplied as received from the author.

In the printed article, full reference will be given to the ESM and vice versa.

ESM may consist of:

- Original data that relate to the paper, e.g. tables, additional illustrations (color and black/white), etc.
- Information that is more convenient in electronic form.
- Information that cannot be printed: animations, video clips, sound recordings.

For details of acceptable formats, consult <http://link.springer.de/link/service/journals/00410/instr.htm>

Electronic supplementary materials should be numbered separately from figures and tables that appear in the manuscript and referred to as Fig. 1, eTable 1, etc. Executable computer code (eProgram 1), supplementary text (eText 1 or eAppendix 1) animations (eAnimation 1) may also be included as part of a manuscript.

Words to be emphasized, indicated by underlining, will be printed in *italics*.

## 6. Proofreading

Authors should make their proof corrections on a printout of the pdf file supplied, checking that the text is complete and that all figures and tables are included. After online publication, further changes can only be made in the form of an Erratum, which will be hyperlinked to the article. The author is entitled to formal corrections only. Substantial changes in content, e.g. new results, corrected values, title and authorship are not allowed without the approval of the responsible editor. In such case please contact the Editors-in-Chief before returning the proofs to the publishers.

## 7. Offprints, Free copy

25 offprints of each contribution are supplied free of charge. Additional offprints are available at cost price, provided the order form is returned together with the corrected page proofs. When you order offprints, you are entitled to receive in addition a pdf file of your article for your own personal use.
