

Preparation of your paper

We welcome manuscripts written in **TeX**, particularly if the **Springer macro packages** have been used (further details below). For papers written in TeX or LaTeX without Springer macros, the source files can in many cases be used, but Springer will decide on a case-by-case basis whether it is more economical to work from the author's files or to typeset.

Authors who prepare their papers with TeX are encouraged to ask for Springer-Verlag's TeX macro packages, either by e-mail to Daniela.Rothenhaeusler@springer.de or via the URL:

<http://www.springer.de/author/tex/help-journals.html>
or directly via ftp to

- [ftp.springer.de](ftp://ftp.springer.de)

User ID: ftp or anonymous

Password: your e-mail address

The files reside in

`/pub/tex/latex/svjour/nummat`

For any other information concerning the journal, please contact

Daniela.Rothenhaeusler@springer.de

For TeXnical support, please contact texhelp@springer.de

For the review process please submit your manuscript online via the new website <http://nm.iam.uni-bonn.de>. This major new effort is aimed to expedite NM's publication process and to allow for a timely dissemination of mathematical research. Note that starting on September 2002 this is the only accepted submission procedure. All manuscripts must be submitted via this website. A direct submission to one of the editors is no longer supported.

To facilitate communication between authors, editors and publisher, the

author should furnish a fax number and/or e-mail address on the title page of the manuscript.

Papers may be written in English, French, or German.

For style matters please consult previous issues of the journal.

The **list of references** at the end of the paper should always be in alphabetical order and include the names and initials of all authors and the year of publication. Titles of journals and book series should be abbreviated in accordance with *Zentralblatt für Mathematik / Compact MATH* (Index volumes).

Please fill out the copyright transfer statement overleaf and enclose it with your manuscript.

After you have carried out all final revisions and have been notified of acceptance, please send the electronic version of your paper via e-mail to: Daniela.Rothenhaeusler@springer.de or on diskette to:

Springer-Verlag
Journal Production Mathematics
Daniela Rothenhaeusler
Tiergartenstrasse 17
69121 Heidelberg, Germany

Please do not forget to include the important identification requested overleaf (☐). Make sure that the final printed version of your paper is identical in content to the electronic version sent.

Normally only typesetting errors should be corrected in the page proofs. A **charge is made for extensive changes** introduced after the paper has been typeset. No later corrections will be accepted electronically.

Twenty-five (25) **offprints** of each paper will be supplied free of charge. Additional offprints are available, provided the order form is received with the corrected proofs.
