

Oecologia

INSTRUCTIONS FOR AUTHORS

The author(s) transfer(s) the copyright to his/their article to Springer-Verlag effective if and when the article is accepted for publication. The copyright covers the exclusive and unlimited rights to reproduce and distribute the article in any form of reproduction (printing, electronic media or any other form); it also covers translation rights for all languages and countries. For U.S. authors the copyright is transferred to the extent transferable.

Manuscripts should be written in **English**. They should present new scientific findings that have not been previously published. *Oecologia* publishes ecological research of international interest.

- Ecophysiology
- Population ecology
- Plant animal interactions
- Ecosystem ecology
- Community ecology
- Global change and conservation ecology
- Behavioural Ecology

In general, studies that are purely theoretical and/or modeling, microbial, and/or natural history will not be considered. We also offer a rapid communications option for short manuscripts of unusually broad interest to the ecological community.

Manuscripts should be addressed to one of the Editors in Chief:

Outside the Americas:

Roland Brandl (Animals)
Philipps-Universität Marburg
Fachbereich Biologie

AG Allgemeine Ökologie und Tierökologie
Karl-von-Frisch-Strasse 1, D-35032 Marburg
e-mail: oecologi@staff.uni-marburg.de

Christian Körner (Plants)
Botanisches Institut der Universität Basel
Schönbeinstrasse 6, CH-4056 Basel,
Switzerland

e-mail: oecologia@unibas.ch

For the Americas:

Craig W. Osenberg (Animals)
University of Florida, Department of Zoology
P.O. Box 118525, Gainesville,
FL 32611-8525, USA

e-mail: oecologia@zoology.ufl.edu

James R. Ehleringer (Plants)
University of Utah, Department of Biology
257 South 1400 East

Salt Lake City, UT 84112-0840, USA
e-mail: ehleringer@biology.utah.edu

Manuscript length and excess page charges.

Manuscripts should not exceed ten printed pages. On average, ten printed pages correspond to ~30 manuscript pages (including all text, tables and figures). Editors will return manuscripts without review that are likely to exceed this page limit. Given the difficulty in estimating manuscript length, papers close to this limit will only be accepted for publication if the author agrees to pay excess page charges (€ 100 or US \$ 90 plus 16% VAT, for each page in excess of that limit).

Manuscripts should be **submitted in triplicate** (printed on only one side of the sheet) to the appropriate Editorial Office (see inside cover).

Manuscripts in electronic form. Authors are strongly encouraged to send the final version of their manuscript – after acceptance for publication – in electronic form. Please follow the spe-

cial technical instructions as printed in most issues of this journal.

Manuscripts must be accompanied by the “Copyright Transfer Statement” (the form is regularly published in this journal).

Rejected manuscripts will only be returned to the authors when they contain important original comments from the referees. Original illustrations will always be returned.

Authors are encouraged to suggest the name(s) of any *Oecologia* Editorial Board members appropriate to oversee their manuscript during the review process.

Manuscripts should be submitted in final form. They should be prepared in accordance with the journal's accepted practice, form and content; manuscripts should be checked carefully to exclude the need for corrections in proof. A charge will be made for changes introduced after the manuscript has been typeset. Manuscripts should be typed double-spaced throughout on one side of the paper only and with wide margins. The author should mark in the margin **where figures and tables are to be inserted**. Lines should be numbered consecutively through the entire text.

The **title page** should include:

- name(s) of author(s)
- title of paper
- affiliation(s)
- any footnotes referring to the title
- address for correspondence
- e-mail and fax number of the corresponding author

Each paper should be preceded by an **abstract** of the main points.

Immediately following the summary, up to five **key words** should be supplied, indicating the scope of the paper and **not** repeating terms already used in the title.

Genus and species names should be italics.

Footnotes other than those referring to the title should be numbered consecutively.

Reference to the literature in the text should be by author's surname with the year in parentheses: for more than two authors, e.g., Remane et al. (1932).

The **bibliography** at the end of the paper should list in alphabetical order under the first author's name only works referred to in the text. They should be cited as follows: *Journal papers* – surnames and initials of all authors, year, full title, abbreviated journal title (according to *Chemical Abstracts*), volume number, first and last page numbers.

Books – author(s), year, full title, edition, publishers and place.

Examples:

Lundgren BO, Kiessling KH (1985) Seasonal variation in catabolic enzyme activities in breast muscle of some migratory birds. *Oecologia* 66:468–471

Bewley JD, Krochko JE (1982) Desiccation tolerance. In: Lange OL, Nobel PS, Osmond CB, Ziegler H (eds) *Physiological plant ecology II*. (Encyclopedia in plant physiology, NS, vol 12B) Springer, Berlin Heidelberg New York, pp 325–378

Huey RB (1982) Temperature, physiology, and ecology of reptiles. In: Gans C, Pough FH (eds) *Biology of the reptilia*, vol 12. Academic Press, London, pp 25–91

Figures are costly and should be used with discretion. An illustration is only justified if it clarifies or reduces the text. The same data should not be presented in both graph and table form. Information given in captions should not be repeated in the text. For **color illustrations** the authors will be expected to make a contribution (€ 485 or US \$ 534, plus 16% VAT per article) towards the extra costs.

Figures, graphs and tables should always be mentioned in the text and numbered with arabic numerals. A brief descriptive legend should be provided for each figure; legends are part of the text and should be appended on a separate page. Original figures in a form suitable for reproduction should be submitted separately from the text. On the front of each figure, the name of the author, the figure number and the top of the figure should be indicated. Copies of the figures should be supplied with each copy of the manuscript.

Good-quality **prints** should be submitted for **line drawings**. Inscriptions should be legible, with initial capital letters and appropriately scaled to the size of the drawing. Submission of digital images line drawings and half-tones, black and white and colour on diskette or some other storage medium can mean more efficient production.

Computer drawings are acceptable provided they are of comparable quality to line drawings (minimum resolution of 300 dpi). Computer-drawn curves and lines must be smooth. Lettering must be of high quality; Helvetica is the preferred font. Lettering fonts must be consistent within and among all figures.

For **halftone illustrations** well-contrasted photographic prints (not photocopies) should be submitted; they should be trimmed at right angles and in the desired final size. Inscriptions should be about 2 mm high.

In case reduction is absolutely necessary, please state the alternative scale desired. The publisher reserves the right to reduce or enlarge illustrations.

The figures, including legends, should not exceed the print area of 176×236 mm. Several figures should be grouped into a plate on one page.

Illustrations prepared in digital form must be in accordance with the special instructions that are published in this journal.

Electronic supplementary material. Data such as black and white or colour illustrations, large tables, animations, video clips, or sound recordings, that are not essential for the understanding of a printed article but yet of interest can be put on Springer-Verlag's server and will be accessible free of charge on the contents site of this journal. Such material has to be submitted in electronic form (see the special instructions that are regularly published in this journal) and will also be reviewed. Reference to this material will be given with the printed article.

Twentyfive offprints of each contribution are supplied free of charge. If you wish to order additional offprints you must return the order form with the corrected proofs. You are then entitled to receive a pdf file of your article for your own personal use.
