

Instructions to authors

Authors transfer the copyright on their articles to Springer-Verlag effective if and when each article is accepted for publication. The copyright covers the exclusive and unlimited rights to reproduce and distribute the article in any form (printing, electronic media or any other form); it also covers translation rights for all languages and countries. For U.S. authors the copyright is transferred to the extent transferable.

Manuscripts are to be submitted to either

1. General

Manuscripts should be typewritten (12 pt throughout) with double spacing and wide margins. Authors are encouraged to submit manuscripts electronically in PDF form, instead of paper submission. Electronic submission of manuscripts will substantially reduce the editorial processing and reviewing time and will accelerate publication. Alternatively, manuscripts should be submitted in triplicate (original typed on one side of the paper only, plus two double-sided copies). Manuscript length should not normally exceed five printed pages (approx. 3,500 words) excluding tables and figures.

Manuscripts must be accompanied by the Copyright Transfer Statement (the form is regularly published in this journal).

Papers should be clearly and concisely written in correct English; this is the responsibility of the authors. Authors are strongly encouraged to send the final version of their manuscript – after acceptance for publication – in electronic form. Please follow the special technical instructions as printed in most issues of this journal.

Papers sent to the authors for revision should be returned within 45 days; otherwise they will be treated as new submissions. Rejected manuscripts will only be returned to the authors when they contain important comments from the referees. Original illustrations will always be returned.

It is essential that manuscripts be submitted in their final form ready for printing, with the approximate desired position of all figures and tables marked in the margins. Corrections in proofs should be limited to typographical errors.

To facilitate communication between authors, editors and publisher, the telephone and Fax numbers and e-mail address of the corresponding author should be provided on the title page of each manuscript.

Short papers making a single point can be published as Rapid communications. Maximum length for Rapid communications is three printed pages (approx. 2,200 words) including tables, etc. To facilitate rapid publication, proofs of these papers will not be sent to the authors. The decision as to whether a paper qualifies as a Rapid communication rests with the editors.

2. Text

Abstract. All papers, including Rapid communications, should be preceded by an abstract in which the plant material (binomial including authority) and EC numbers are given.

Key words. Authors should suggest key words (not more than six in alphabetical order) characterizing the scope of the paper, the principal plant materials (scientific generic names only) and the main topics treated.

Headings. Main headings (Introduction, Materials and methods, etc.) should be placed on separate lines.

Small print. Footnotes, Material and methods sections, Acknowledgements, References, Tables, and figure legends should be marked for small print.

Genus and species names and words to be emphasized should be typed in italic script or, if this is not available, underlined.

Units and symbols. Temperatures may be expressed in degrees Celsius, time in seconds (s), minutes (min), hours (h), days, etc. Otherwise, the International System of Units (SI, *Système International d'Unités*) should be used wherever possible. (Consult, e.g., U.S. Department of Commerce, National Bureau of Standards, Special Publication 330, The International System of Units, latest edition, or Rottler F (1979) Das internationale Einheitensystem in der Praxis. Physik in unserer Zeit 10: 23–51).

Abbreviations. For correct usage of abbreviations authors should consult the list of Units, symbols and abbreviations printed in the first issue of each volume and the instructions given in Eur J Biochem (1993) 213: 1–3.

Footnotes to the text should be numbered consecutively. **Literature citations** in the text should be by author(s) and year. Where there are more than two author(s), only the first should be named, followed by “et al.”

Examples: Manning (1994) has shown that... Experiments in this laboratory (Radetzky and Langheinrich 1994) have shown that ... Liu et al. (1994) have shown that ...

The list of **References** should include only publications cited in the text. They should be in alphabetical order by name of the first author with all authors and the complete title of each work cited. The second and subsequent lines are indented.

Examples are:

a) Articles from journals and other serial publications (e.g. Annual Reviews):

Webb MC, Gunning BES (1994) Embryo sac development in *Arabidopsis thaliana*. II. The cytoskeleton during megagametogenesis. Sex Plant Reprod 7: 153–162

b) Articles from non-serial collective publications (symposia volumes, encyclopedias, etc.) and books: Rincón M, Boss WF (1990) Second-messenger role of phosphoinositides. In: Morrè DJ, Boss WF, Loewus FA (eds) Inositol metabolism in plants. Wiley, New York, pp 173–200

3. Tables

Tables should be numbered consecutively with arabic numbers. Footnotes to tables should be indicated by lower-case superscript letters, beginning with ^a in each table.

4. Illustrations

The number of illustrations should be limited to the minimum needed to clarify the text. Double documentation of the same points in figures and tables is not acceptable.

All figures (photographs, graphs, diagrams) should be numbered consecutively. Figure parts should be identified by lower-case Roman letters (a, b, etc.). Half-tone illustrations should be submitted as sharp, glossy, high-quality photographic prints. Line drawings (graphs and diagrams) should be supplied as black-and-white drawings suitable for reproduction. Figures that are to appear together should be either photographed as a group, or mounted together on flexible white drawing paper (0.4 mm thick, about 300 g/m²). All figures should be trimmed at right angles and be of a size permitting direct printing: no more than 8.6 cm across for column width, no more than 17.8 cm for page width, no higher than 24 cm. (The publisher reserves the right to reduce illustrations.)

Illustrations prepared in digital form must be in accordance with the technical instructions for manuscripts and illustrations in electronic form that are published in this journal.

For one page of color illustrations there is no charge. However, for two or more pages, authors are expected to make a contribution (€ 485, US \$ 534, plus 16% VAT, per article) towards the extra costs.

In line drawings, all lines should be of uniform thickness; letters and numbers should be of professional quality and proper dimensions (approx. 2 mm high after reproduction). Computer drawings are acceptable provided they are of comparable quality to line drawings.

Photographs should exhibit high contrast. Arrows, letters and numbers should be inserted with template rub-on letters. If this is not possible, inscriptions should be made on a transparent overlay (not on the actual photograph). **Micrographs should have an internal magnification marker.**

Legends. Each illustration should be provided with a concise, descriptive legend. Legends are part of the text and should be listed after the references and any tables at the end of the typescript.

5. Electronic Supplementary

Material

Data such as black-and-white or colour illustrations, large tables, animations, video clips, or sound recordings, that are not essential for the understanding of a printed article but yet of interest can be put on Springer-Verlag's server and will be accessible free of charge on the contents site of this journal. Such material has to be submitted in electronic form (see the special instructions that are regularly published in this journal) and will also be reviewed. Reference to this material will be given with the printed article.

6. Offprints

25 offprints of each contribution are supplied free of charge. If you wish to order additional offprints you must return the order form with the corrected proofs. You are then entitled to receive a pdf file of your article for your own personal use.
