

Papers submitted for publication in ZOOLOGISCHER ANZEIGER should deal with real taxa (be it at the species or at a higher systematic level) and should include comparative aspects. Exclusively descriptive and/or taxonomic works are not considered for publication in this journal. Papers may appear as original scientific articles, as reviews, as Short Communications or as Opinion articles. All manuscripts will be peer refereed. Final acceptance of items for publication is the responsibility of the corresponding Editor dealing with the respective phylum (see list of Editors). Manuscripts not compatible with the following guidelines will not be sent to reviewers.

Manuscripts should be submitted electronically in final form via internet through Elsevier Editorial System (EES) which can be accessed at <http://ees.elsevier.com/jcz>.

Manuscript preparation

Manuscripts should be written in English, double-spaced, font: Times, with a surrounding margin of 2,5 cm and not exceed 20 printed pages (approx. 60 manuscript pages). Electronic submission of manuscripts via email is encouraged. Submit the text and tables of each manuscript as a single file. Submit illustration files separately from text files. For the peer review process submission of electronic pdf-files of texts and figures is preferred. After acceptance of a manuscript, the author(s) will be asked to provide a CD with texts as WORD-files (.doc) and high resolution figures in TIFF or EPS formats (see below).

Manuscripts should be organised as follows: Title, Author(s), Address(es), Abstract (in English), Key words, Text, Acknowledgements, References, Appendix, Tables (each with an Arabic numeral and with a heading), Figure captions, Figures (separately numbered and identified). All pages should be numbered consecutively. Footnotes should be avoided. Do not for any reason use upper case letters for entire words. You may use italics in the text (see below). Measurements should always be given in the metric system and carried out to the same decimal, i.e. 5.3 mm–6.0 mm (not: 5.3 mm–6 mm). All illustrations must be referred to in the text.

Scientific names

The systematic position of taxa listed in the title must be indicated (Lepidoptera: Zygaenidae), except where only family group level taxa are treated, in which case only the order is required. Binominal taxon names in the title should be accompanied by author and date of publication. The first mention of a genus group and/or species group name in the text should appear as the full scientific name, complete with author and date (e.g. *Oulema (Oulema) melanopus* (Linnaeus, 1758)). Thereafter a binominal name should be abbreviated with the first letter of the generic name, accompanied by the abbreviation of the subgeneric name, if necessary (e.g. *O. (O.) melanopus*). All species group names have to be preceded by the name of the genus or its initial. All genus and species group names have to be formatted in italics.

References

Cited works should be referred to as follows: Schrimpler (1993) or (Schrimpler 1993), Schmidt and Meier (1991), and Tremewan et al. (1977) for three or more authors. If more than one publication per author is cited, please separate the years of publication with comma, e.g. Blochmann (1898, 1900). If publications of more than one author are cited in parentheses, please separate different authors by semicolon and list the citations chronologically, e.g. (Hyman 1959; James et al. 1991, 1992). All authors of a paper should be cited in the list of references. References "in press" shall only be cited when they have been accepted for publication. Use the

expected year of publication and the citation with the remark "(in press)". The editor should be notified if a paper has been published before the publication of the original work. Names of persons who provide unpublished information should include initials in the text, e.g. (W. F. Miller, pers. comm. 1967 [for information obtained orally]) or (J. J. Jacobs, in litt. 1993) [for information obtained in writing]). List references alphabetically by author under References. Do not italicize or underline words in titles other than genus group and species group names. The World List of Scientific Periodicals should be strictly followed for abbreviations of names of the periodicals.

Examples

Maschwitz, U., Dumpert, K., Sebatian, P., 1985. Morphological and behavioural adaptations of homopterophagous Blues (Lepidoptera: Lycaenidae). *Entomologia gen.* 11, 95–90.

Wright, C.A., Southgate, V.R., 1981. Coevolution of digeneans and molluscs, with special reference to schistosomes and their intermediate hosts. In: Forey, P.L. (Ed), *The Evolving Biosphere*. Cambridge University Press, Cambridge, pp. 191–205.

Minelli, A., 1993. *Biological Systematics — The State of the Art*. Chapman&Hall, London.

Taxonomy

Taxonomic information must conform to the requirements of the International Code of Zoological Nomenclature, newest edition. Type specimens must be designated and type depositories must be clearly indicated for new species group taxa. Type specimens should be deposited in recognised institutions. Specimens belonging to the type material must be indicated in the text and labelled appropriately. List names in synonymies as follows: *Sphinx flaveola* Esper, 1786: 229, pl. 36, fig. 1., and list the reference under References.

Illustrations

After acceptance of a manuscript, all illustration files provided should be in TIF or EPS formats. Files should be given the 2- or 3-letter extension that identifies the file format used (i.e., .tif, .eps). Journal quality reproduction will require greyscale and colour files at resolutions yielding approximately 300 dpi. Bitmapped line art should be submitted at resolutions yielding 600–1200 dpi. These resolutions refer to the output size of the file; if you anticipate that your images will be enlarged or reduced, resolutions should be adjusted accordingly. For further information on the preparation of electronic artwork, please see <http://www.elsevier.com/artworkinstructions>.

If a figure contains more than one illustration, use neat and uniform upper case letters A, B, C etc., scaled to 4–6 mm after reduction, to clearly identify each illustration of the figure. Always indicate the absolute size by a scale bar with the length stated and not by magnifications. Do not mix drawings and halftones on the same plate.

Figure captions

Figure captions should be typed on a separate page following the References section of the manuscript. They should be concise, precise guides to the interpretation of each figure.

Free colour reproduction

If, together with your accepted article, you submit usable colour figures then Elsevier will ensure, at no additional charge that these figures will appear in colour on the web (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are

reproduced in colour in the printed version. Colour prints will only be printed free of charge if the Editor-in-Chief acknowledges that they are essential to the scientific presentation of the paper. Otherwise the publisher and author will each bear part of the extra costs involved. The charge to be passed on to authors of articles containing colour figures is EUR 250.00 for the first figure containing colour and EUR 200.00 for each additional figure containing colour. Authors who agreed to pay the production costs for figures to be published in colour will automatically receive 50 additional free offprints.

Short communications

These are used as fillers. They should not exceed one printed page (including illustrations). Organise manuscripts for Scientific Notes as follows: Title, Author Name(s), Text, Acknowledgements, References, Address(es), Tables, Figure captions, Figures.

Reprints

There are no page charges. The corresponding author, at no cost, will be provided with a PDF file of the article via e-mail or, alternatively, 30 free paper offprints. The PDF file is a watermarked

version of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use. Additional reprints may be purchased. Until publication of the print edition, corrected proofs will be available at online first (www.sciencedirect.com).

Copyright

Once a paper is accepted, authors will be asked to transfer copyright (for more information on copyright, see <http://www.elsevier.com/authorsrights>). A form facilitating transfer of copyright will be provided after acceptance. If material from other copyrighted works is included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article.

Funding body agreements and policies

Elsevier has established agreements and developed policies to allow authors who publish in Elsevier journals to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit: <http://www.elsevier.com/fundingbodies>.
