

Physics and Chemistry of Minerals

Instructions for authors

Legal requirements

The author(s) guarantee(s) that the manuscript will not be published elsewhere in any language without the consent of the copyright owners, that the rights of third parties will not be violated, and that the publisher will not be held legally responsible should there be any claims for compensation.

Authors wishing to include figures or text passages that have already been published elsewhere are required to obtain permission from the copyright owner(s) and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the authors.

Manuscripts must be accompanied by the "Copyright Transfer Statement". The form is regularly published in this journal or can be obtained from <http://link.springer.de>.

Editorial procedure

Manuscripts should be submitted in English, in two copies together with two sets of illustrations to the editors. Please be sure to include your e-mail address and your fax number.

Please do not transmit electronic data to the publisher until your manuscript has been reviewed and accepted for publication. Please follow the instructions below.

Manuscript preparation

General remarks

To help you prepare your manuscript, Springer offers a template that can be used with Winword 7 (Windows 95), Winword 6 and Word for Macintosh. For details see **Electronic submission of final version**.

All manuscripts are subject to copy editing.

There are no page charges for authors although a charge will be made for changes introduced after the manuscript has been set in type.

Title page

- The name(s) of the author(s). Initial from first name(s).
- A concise and informative title
- The affiliation(s) and address(es) of the author(s)
- The e-mail address, telephone and fax numbers of the communicating author

Abstract. Each paper must be preceded by an abstract presenting the most important results and conclusions.

Keywords. 1 to 5 key words should be supplied after the Abstract for indexing purposes.

Footnotes. Essential footnotes to the text should be numbered consecutively and placed at the bottom of the page to which they refer.

Symbols. All symbols representing physically or mathematically variable scalars to be underlined in the manuscript to indicate printing in italic type. Vectors, tensors, and symbols representing matrices to be set in bold face type should be given a wavy underlining. All other symbols such as chemical symbols, units, and function symbols (e.g. Å, sin, cos) will be set in normal type.

Introduction. The *Introduction* should state the purpose of the investigation and give a short review of the pertinent literature.

Experimental. The *Experimental* section should follow the Introduction and should provide enough information to permit repetition of the experimental work.

Results. The *Results* section should describe the outcome of the study. Data should be presented as concisely as possible, if appropriate in the form of tables or figures, although very large tables should be avoided.

Discussion. The *Discussion* should be an interpretation of the results and their significance with reference to work by other authors.

Acknowledgements. These should be as brief as possible. Any grant that requires acknowledgement should be mentioned. The names of funding organizations should be written in full.

Appendices. If there is more than one appendix, they should be numbered consecutively. Equations in appendices should be designated differently from those in the main body of the paper, e.g. (A1), (A2) etc. In each appendix equations should be numbered separately.

References. The list of References should only include works that are cited in the text and that have been published or accepted for publication. Personal communications should only be mentioned in the text. In the text, references should be cited by author and year (e.g. Hammer 1994; Hammer and Sjöqvist 1995; Hammer et al. 1993) and listed in alphabetical order in the reference list.

Examples:

Journal articles:

Bosenick A, Dove MT, Geiger CA (2000) Simulation studies on the pyrope-grossular garnet solid solution. *Phys Chem Minerals* 27:398–418

Journals should be abbreviated in accordance with *Chemical Abstracts* or *Bibliographic Guide for Editors and Authors* (BGEA).

Books:

Larcher W (1995) *Physiological plant ecology*, 3rd edn. Springer, Berlin Heidelberg New York, pp 87–109

Multiauthor books:

Hovind HJ (1986) Traumatic birth injuries. In: Raimondi AJ, Choux M, Di Rocco C (eds) *Head injuries in the newborn and infant*. (Principles of pediatric neurosurgery) Springer, Berlin Heidelberg New York, pp 87–109

References such as "personal communications" or "unpublished data" cannot be included in the reference list, but should be mentioned in the text in parentheses: this also applies to papers presented at meetings but not yet published or accepted for publication. A date should be given for both "personal communications" and "unpublished data". Papers which have been accepted for publication should be included in the list of references with the name of the journal and "in press". Oral communications should only be mentioned in the acknowledgements.

Illustrations and Tables

All figures (photographs, graphs or diagrams) and tables should be cited in the text, and each numbered consecutively throughout. The placement of figures and tables should be indicated in the left margin. Figure parts should be identified by lower-case roman letters.

For submission of figures in electronic form see below.

Line drawings. Please submit good-quality prints. The inscriptions should be clearly legible.

Half-tone illustrations (black and white and color). Please submit well-contrasted photographic prints with the top indicated on the back. *Magnification* should be indicated by *scale bars*.

Plates. Several figures or figure parts should be grouped in a plate on one page.

Size of figures. The figures should either match the width of the column (86 mm) or be 41 or 131 mm wide or 176 mm type area width. The maximum length is 236 mm.

Figure legends must be brief, self-sufficient explanations of the illustrations. The legends should be placed at the end of the text.

Tables should have a title and a legend explaining any abbreviation used in that table. Footnotes to tables should be indicated by superscript lower-case letters (or asterisks for significance values and other statistical data).

For *colour illustrations* the authors will be expected to make a contribution (€ 485.00 or US \$ 475.00, plus 16% VAT) towards the extra costs irrespective of the number of colour figures.

Electronic submission of final version

Please send only the final version of the article, as accepted by the editors.

Preparing your manuscript

Text

This journal accepts either LaTeX or Word documents.

LaTeX: The electronic version should include the original source (including all style files and figures) and a PostScript version of the compiled submission. Authors who prepare their papers with LaTeX are encouraged to use Springer-Verlag's macro package the *LJOUR2* macro package for LaTeX for this journal, available under <http://www.springer.de/author/index.html> Other formats like .doc, .rtf, or simply "Text only" can be accepted as well. In this case please follow the instructions under "Word".

The Word template is available:
via ftp:

- Address: [ftp.springer.de/](ftp://ftp.springer.de/)
- User ID: ftp
- Password: your own e-mail address
- Directory: /pub/word
- file names: sv-journ.zip or sv-journ.doc and sv-journ.doc

Physics and Chemistry of Minerals

Layout guidelines

1. Use a normal, plain font (e.g., Times Roman) for text. Other style options:
 - for textual emphasis use italic types.
 - for special purposes, such as for mathematical vectors, use boldface type.
2. Use the automatic page numbering function to number the pages.
3. Do not use field functions.
4. For indents use tab stops or other commands, not the space bar.
5. Use the table functions of your word processing program, not spreadsheets, to make tables.
6. Use the equation editor of your word processing program or MathType for equations.
7. Place any figure legends or tables at the end of the manuscript.
8. Submit all figures as separate files and do not integrate them within the text.

Data formats

Save your file in two different formats:

1. RTF (Rich Text Format) or Microsoft Word compatible formats
2. pdf (a single pdf file including text, tables and figures)

Illustrations

The preferred figure formats are EPS for vector graphics exported from a drawing program and TIFF for halftone illustrations. EPS files must always contain a preview in TIFF of the figure. The file name (one file for each figure) should include the figure number. Figure legends should be included in the text and not in the figure file.

- *Scan resolution:* Scanned line drawings should be digitized with a minimum resolution of 800 dpi relative to the final figure size. For digital halftones, 300 dpi is usually sufficient.
- *Color illustrations:* Store color illustrations as RGB (8 bits per channel) in TIFF format.

- *Vector graphics:* Fonts used in the vector graphics must be included. Please do not draw with hairlines. The minimum line width is 0.2 mm (i.e., 0.567 pt) relative to the final size.

General information on data delivery

Please send a zip file (text and illustrations in separate files) to editors on any of the following media:

- On a diskette [you may use .tar, .zip, .gzip (.gz), .sit, and compress (.Z)]
- On a ZIP cartridge
- On a CD-ROM

Please always supply the following information with your data: journal title, operating system, word processing program, drawing program, image processing program, compression program.

The file name should be memorable (e.g., author name), have no more than 8 characters, and include no accents or special symbols. Use only the extensions that the program assigns automatically.

Electronic supplementary material

Electronic supplementary material (ESM) for an article printed in this journal will be published free of charge to subscribers on Springer's server <http://link.springer.de>. After acceptance by the journal's Editors the data will be supplied as received from the author.

In the printed article, full reference will be given to the ESM and vice versa.

ESM may consist of:

- Original data that relate to the paper, e.g. tables, additional illustrations (color and black/white), etc.
- Information that is more convenient in electronic form.
- Information that cannot be printed: animations, video clips, sound recordings.

For details of acceptable formats, consult <http://link.springer.de/cgi/esupp.pl?00269>

Proofreading

Proofreading is the responsibility of the author. Corrections should be clear; standard correction marks should be used. Corrections that lead to a change in the page layout should be avoided.

The author is entitled to formal corrections only. Substantial changes in content, e.g. new results, corrected values, title and authorship are not allowed without the approval of the responsible editor. In such a case please contact the Editor before returning the proofs to the publisher.

Offprints, Free copy

1. complimentary copy is supplied. Offprints are available at cost price, provided the order form is returned together with the corrected page proofs.

When you order offprints, you are entitled to receive in addition a pdf file of your article for your own personal use.
