

REVISTA DE BIOLOGIA MARINA Y OCEANOGRAFIA  
**INSTRUCTIONS TO AUTHORS**

**Submission.** Manuscripts should be submitted by e-mail (revbiolmar@gmail.com) in electronic format, addressed to the Editor of Revista de Biología Marina y Oceanografía (RBMO).

Manuscripts are considered with the understanding that they have not been published previously in print or electronic format and are not under consideration by another publication or electronic medium.

Manuscripts should be accompanied by a cover letter addressed to the Editor including the following statements: a) the name, professional affiliation and e-mail address of the corresponding author, b) a declaration that the manuscript has been approved by all authors, c) names of specialists who eventually could act as referees, e-mail addresses included; d) previous submission of the manuscript to another journal, e) acceptance of terms for publishing charges and fine in the case of manuscript withdrawal before the publishing process is finished.

**Publishing charges.** Authors are required to pay US \$20.00 or its equivalence in Chilean pesos per printed page once the manuscript has been accepted for publication and prepared for printing. Color illustrations imply additional costs to authors. Publishing charges may change without notice. Special cases are resolved by the Editor.

If a manuscript is withdrawn before the publishing process is finished, authors must pay US \$500.00 or its equivalence in Chilean pesos.

**Reception of manuscripts.** Corresponding authors are notified by e-mail, within 48 hours about the manuscript reception.

**Editorial and Peer review.** Manuscripts submitted for publication are treated confidentially by all participants in the review process. All submitted manuscript are reviewed initially by one of the editors. Only those manuscripts that seem most likely to meet the journal editorial criteria are sent for formal review. Those manuscripts judged to be inappropriate for the journal are rejected promptly without external review.

Our peer review process establishes that authors and referees remain anonymous to each other.

When an author is directly related to the journal in any way, is automatically excluded from the review process of that manuscript.

Acceptance of manuscript is decided by the Editor based on the recommendation of two or more independent referees and the Associates Editors. A manuscript acceptance requires at least the recommendation for approval of two referees. The Editor formally informs the corresponding author the acceptance or rejection of the manuscript. The accepted manuscripts are published in strict chronological order according to the final acceptance date.

Unauthorized prepublication release of accepted manuscript may result in rescinding the acceptance and rejecting the paper.

**Editing.** Accepted manuscripts are edited and returned to the corresponding author for revision and approval. Authors are responsible for all statements made in their work, including changes made during editing and production that are authorized by the corresponding author.

The latest edition of the Diccionario de la Lengua Española, of the Real Academia Española and its electronic version (www.rae.es) is used as guide for Spanish and the Simon & Schuster International English-Spanish Dictionary is used as guide for English. The International System of Units (SI) and its symbols should be used wherever possible. The CBE Manual for Authors, Editors, and Publishers (6<sup>th</sup> ed, 1994), together with the Chilean Standards (Normas Chilenas) of the Instituto Nacional de Normalización for documentation and bibliographic references (NCh 1143.Of.1999 ISO 690) and for electronic documents or parts of them (NCh 1143/2 Of. 2003 / ISO 690-2) are used as guides for format aspects of the journal.

**MS preparation.** Instructions for the presentation of a manuscript are found in [www.revbiolmar.cl](http://www.revbiolmar.cl) and [www.scielo.cl](http://www.scielo.cl).

Manuscripts can be written in Spanish or in English. Authors whose native language is not English are recommended to have their manuscript reviewed by a professional scientific translator or by a native English speaking colleague before submitting to the journal.

MS can be prepared as Reviews, Research articles or Research notes. Reviews, Research articles can be as long as 20 printed pages (ca. 80,000 characters) and Research notes should not exceed 9 printed pages (ca. 35,000 characters), including a maximum of three Tables or Figures.

In general, Reviews and Research articles should be organized in the following order: Title, Short Title, Author (s) name, Affiliation and postal address of each author, E-mail address of the corresponding author, Resumen, Palabras clave, Abstract, Key words, Introduction, Materials and Methods, Results, Discussion and/or Conclusions, Acknowledgments, Literature cited, Tables, Figures. Research notes should begin with a Resumen in Spanish if the text is in English, or with an Abstract if the text is in Spanish, of no more than 100 words. Their organization may or may not be divided into sections as already indicated for full articles.

The manuscript format should be in Microsoft® Office Word compatible with Windows XP. Do not submit the manuscript in PDF format.

Manuscripts should be prepared in letter size format, double-spaced with a 2.5 cm margin at each side and typed in Times New Roman, 12 pt. font size and with the right margin justified.

All pages should be correlatively numbered in the upper right-hand corner together with the short title of no more than 50 characters must be provided.

Headings and subheadings should be in separate rows in capital and lower case letters without indentation.

Scientific names only at the levels of genus, species, and subspecies should be italicized. When first cited in the text, scientific names of species should be followed by the authority.

**Cover page.** The manuscript must include the title of the paper in Spanish and English, name of the author(s), institution of affiliation, complete postal address of each author and e-mail of the corresponding author. The author's first and last (surname) names should be included; the middle-name's initial may be included if necessary (eg., José M. Pérez).

**Abstract and Resumen.** They should include the description of the problem, objectives, results and main conclusions with a maximum of 250 words.

**Key words and Palabras clave.** Three to five terms that are **not** in the title should be included.

**Text.** Introduction should be concise and the literature analysis should not exceed what is necessary to explain the thematic background and purpose of the paper. Materials and methods must be described briefly or referred to authors when these are not original. New techniques should be described in detail for their complete understanding. Results and Discussion are preferred to be presented separated than together in a single chapter. Conclusions may be placed in a separate chapter as long as they have not been included in the Discussion. Acknowledgments must be brief.

**References in the text.** Must be cited with the author's last name followed by the year of publication. When the reference includes two authors, their names should be separated by an ampersand (&). If there are three or more authors, the first author's name should be followed by *et al.* References should be ordered chronologically when cited in groups. When the same author has more than one paper in the same year, they should be indicated by a, b, c, etc., after the year. Examples:

According to Riley & Chester (1971), Menzel (1974), Braun *et al.* (1977) and (Caperon 1986, Ibáñez 1990, González *et al.* 1994a,b)....

Electronic references can be included in the text. References such as «results to be published», «personal communication», meetings abstracts or institutional private reports, etc. , must be included if only they are relevant to the manuscript, cited always as footnotes, indicating as appropriate: author (s), title, editorial information, availability, institutional address, net access (URL), etc. Footnotes must be numbered sequentially throughout the manuscript. Free access texts should be included in Literature cited.

**Literature cited.** Only references mentioned in the text must be included, organized by strict alphabetic order, beginning

by the author's last name, followed by the initials of the first and middle names **without dots and/or commas**. If a reference has coauthors, the second and following authors' initials should precede their last names and to separate the authors' names with comma except the last coauthors that separate with ampersand (&). References should be listed by the same first author in the following order: one author, chronologically; two authors must be listed first alphabetically and later chronologically, three and more authors must be listed chronologically.

In each reference, the authors and the year must be in boldface but not the dot after the year. The names of publications should be cited in full, not abbreviated, underline and not in italics. The following examples will serve as a reference, including symbols and punctuation:

**Bayne BL. 1976.** Aspects of reproduction in bivalve molluscs. In: Wiley M (ed). Estuarine processes 1: 432-448. Academic Press, New York.

**Fretter V & A Graham. 1962.** British prosobranch molluscs, 775 pp. Ray Society, London.

**Icochea L & R Rojas. 2001.** La corriente Cromwell y sus variaciones en los 0°N, 110°W. In: Espino M, M Samamé & C Castillo (eds). La merluza peruana (*Merluccius gayi peruanus*): biología y pesquería, pp. 20-28. Instituto del Mar del Perú, Callao.

**Magnum C & K Johansen. 1982.** The influence of symbiotic dinoflagellates on respiratory processes in the giant clam *Tridacna squamosa*. Pacific Science 36: 395-401.

**Merino A. 2000.** Estados de madurez en *Durvillaea antarctica* (Chamisso) Hariot, (Phaeophyta, Durvillaeales). Tesis de Biología Marina, Facultad de Ciencias del Mar, Universidad de Valparaíso, Valparaíso, 63 pp.

**Nagasawa K, J Mori & H Okamura. 1998.** Parasites as biological tags of stocks of neon flying squid (*Ommastrephes bartramii*) in the North Pacific Ocean. In: Okutani T (ed). Contributed papers to international symposium on large pelagic squids, pp. 49-64. Japan Marine Fishery Resources Research Center, Tokyo.

**Pequeño G. 1989.** Peces de Chile. Lista sistemática revisada y comentada. Revista de Biología Marina 24(2): 1-132.

**Pequeño G. 2000a.** Delimitaciones y relaciones biogeográficas de los peces del Pacifico Suroriental. Estudios Oceanológicos 19: 53-76.

**Pequeño G. 2000b.** Peces del crucero CIMAR-FIORDO 3, a los canales del Sur de Magallanes (CA. 55°S), Chile. Ciencia y Tecnología del Mar 23: 83-94.

**Pequeño G & J Lamilla. 1985.** Estudio sobre una colección de rayas del sur de Chile (Chondrichthyes: Rajidae). Revista de Biología Marina 21(2): 225-271.

**Pequeño G, J Lamilla & A Crovetto. 1991.** Captura de *Somniosus cf. pacificus* Bigelow & Schroeder, 1944, frente a Valdivia, Chile, con notas sobre su contenido gástrico (Chondrichthyes, Squalidae). Estudios Oceanológicos 10: 117-122.

**Pequeño G, J Lamilla, D Lloris & J Rucabado. 1995.** Comparación entre las ictiofaunas intermareales de los extremos austral y boreal de los canales patagónicos. *Revista de Biología Marina* 30(2): 155-177.

**Pequeño G, D Fariás, M Thiel & I Hinojosa. 2004.** Peces asociados con la deriva de macroalgas en Aysén, Chile. *Revista de Biología Marina y Oceanografía* 39(2): 93-99.

**Swofford D. 2002.** PAUP\*: Phylogenetic Analysis using Parsimony (and other methods), Version 4.0 Sinauer. [CD-ROM].

**SAGARPA. 2007.** Avance agrícola, información del sector. Avances concentrados por ciclo: 2005-2007. [on-line] <www.sin.sagarpa.gob.mx/agricultura/archivos>

**Viúdez Á & M Claret. 2009.** Numerical simulations of submesoscale balanced vertical velocity forcing unsteady nutrient phytoplankton-zooplankton distributions. *Journal of Geophysical Research, Oceans* 114: C04023 <doi:10.1029/2008JC005172>

**Tables.** Should have the fewest possible number of columns, considering the size of printed page and typography used by this journal (Times New Roman, 9 pt). Use horizontal rules only: one above and below the headings and one below the last line of data. Tables should be correlatively numbered. Use Arabic numerals for table and figure number, with its corresponding legend in Spanish and English. They should be prepared in Microsoft® Office Word. **Do not send tables in image format.**

**Figures.** Graphs, diagrams, and photographs are considered Figures and abbreviated as Fig. in the text. They should be prepared in digital **editable** format (JPG, with a minimum resolution of 300 dpi), with Times New Roman typography and in the **final printing coloring**. A figure should be adjusted to a width of 8 cm if it fits in a column or to 17 cm if it fits the full width format. Maximum length must not be greater than 23 cm, including space for the legend. Lettering, numerals and symbols should be between 9 and 14 pt in font size. Figures showing study sites must include a map of the country with a cardinal orientation and the respective latitudes and longitudes. In the case of Chile, the Chilean Antarctic region should be included in the map. In the event that figures require downsizing, the appropriate proportions and measurements need to be considered on the original. Each figure must be presented with its number. Figure captions must be presented together on a separate page, appropriately numbered, in Spanish and English.

Authors must provide documentation demonstrating that a previous publisher or copyright holder has given permission to reproduce copyrighted material in their manuscripts.

Manuscripts that do not follow these instructions will be returned to the authors without review.

#### **Book comments**

A book comment should be no more than two formatted pages. An image of the book cover should be included in digital, editable format of high resolution.

#### **Copyright ©**

Universidad de Valparaíso

Authors who publish their articles in the **Revista de Biología Marina y Oceanografía** automatically transfer their copyright to Universidad de Valparaíso. This enables full copyright protection and wide dissemination of the articles and the journal in any format

The **Revista de Biología Marina y Oceanografía** grants permission to use figures, tables and brief excerpts from its collection of articles in scientific and educational works provided that the source is acknowledged
