

1 Legal requirements

The author(s) guarantee(s) that the manuscript will not be published elsewhere in any language without the consent of the copyright holders, that the rights of third parties will not be violated, and that the publisher will not be held legally responsible should there be any claims for compensation.

Authors wishing to include figures or text passages that have already been published elsewhere are required to obtain permission from the copyright holder(s) and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the authors.

Manuscripts must be accompanied by the "Copyright Transfer Statement". The form is regularly published in this journal or can be obtained from springeronline.com. Please see page A2 for details relating to copyright.

2 Editorial procedure

Papers must present scientific results that are essentially new. All manuscripts are subject to peer review.

The journal publishes peer reviewed short original articles and invited reviews. Authors intending to write a review should contact the Reviews Editor first.

Manuscripts must be written in English and sent in triplicate to an appropriate editor (addresses on page A3, A4 of each issue). Please be sure to include your e-mail address and your fax number. Papers are published in the following sections:

1. Cell Biology and Morphogenesis
2. Genetic Transformation and Hybridization
3. Genetics and Genomics
4. Physiology and Biochemistry
5. Biotic and Abiotic Stress

To help authors to identify an appropriate editor, numbers corresponding to those in front of the topics listed above appear next to the editors' names in the journal. When submitting a manuscript to an editor, please state the section in which you would prefer to have your paper published (the editors' addresses and fields of expertise can be found in every issue of the journal, and are available on its web pages at: springeronline.com).

Detailed instructions for authors can be obtained from: Springer-Verlag GmbH, Journal Produktion Life Sciences Tiergartenstr. 17, 69121 Heidelberg, Fax +49-6221-487-8298, e-mail: a.koenig@springer.de, or from the journal's web page at: springeronline.com.

Manuscripts must be accompanied by a signed Copyright Transfer Statement. The form is regularly published in the journal or can be obtained from the web page at the URL given above.

Papers sent to the authors for revision should be returned within 60 days; otherwise they will be treated as new submissions.

Please submit one original manuscript typed on one side of the sheet in double-line spacing with wide margins (3.0 cm). The lines on each page of the text should be numbered to aid the reviewers. Additional copies can be photocopied on both sides. Three sets of original figures must be submitted with the manuscript. Rejected manuscripts will only be returned to the authors when they contain important original comments from the referees. Original illustrations will always be returned.

The pages should be numbered consecutively, starting with the title page.

The desired position of figures and tables should be marked in the margin. Form and content should be checked carefully to minimize the need for corrections in the proofs.

When extensive corrections are necessary, authors are responsible for having manuscripts retyped.

All manuscripts are subject to copy editing and will, if necessary, be returned to the author(s) for questions to be answered or for missing information to be supplied before being sent to the typesetter.

The publisher reserves the right to charge the author for any corrections in the proof that are made for purely stylistic reasons, as well as for any changes that alter the page make-up.

3 Manuscript preparation

General remarks

To help you prepare your manuscript, Springer offers a template that can be used with Winword 7 (Windows 95), Winword 6 and Word for Macintosh. For details see point 4.

Papers up to 6 printed pages are published free of charge. There will be a charge of € 100 or US \$ 110, plus 16% VAT, for each page exceeding this limit. 3 manuscript pages equal approximately one printed page. The space required for the figures and tables should be calculated on the basis of their final printed size.

SI units should be used throughout except where non-SI units are more common [e.g. litre (l) for volume].

Title page

- The name(s) of the author(s)
- A concise and informative title
- The affiliation(s) and address(es) of the author(s)
- The e-mail address, telephone and fax numbers of the communicating author

Abstract. Each paper must be preceded by an abstract presenting the most important results and conclusions in no more than 120 words.

Three to five keywords should be supplied after the Abstracts for indexing purposes.

Abbreviations should be defined at first mention in the abstract and again in the main body of the text and used consistently thereafter.

The **Introduction** should state the purpose of the investigation and give a short review of the pertinent literature.

The **Materials and methods** section should follow the Introduction and should provide enough information to permit repetition of the experimental work.

The **Results** section should describe the outcome of the study. Data should be presented as concisely as possible, where appropriate in the form of tables or figures. However, very large tables should be avoided.

The **Discussion** should be an interpretation of the results and their significance with reference to work by other authors.

References

The list of references should only include works that are cited in the text and that have been published or accepted for publication. Personal communications should only be mentioned in the text.

Journal titles should be abbreviated in accordance with international standards.

In the text, references should be cited by author and year (e.g. Hammer 1994; Hammer and Sjöqvist 1995; Hammer et al. 1993) and listed in alphabetical order in the reference list.

If available, the Digital Object Identifier (DOI) of the cited literature should be added at the end of the reference in question.

Examples:

** Journal articles:*

Christey MC, Sinclair BK, Braun RH, Wyke L (1997) Regeneration of transgenic vegetable brassicas (*Brassica oleracea* and *B. campestris*) via Ri-mediated transformation. *Plant Cell Rep* 16:587-593

Sarasan V, Roberts AV, Rout GR (2001). Methyl laurate and 6-benzyladenine promote the germination of somatic embryos of a hybrid rose. *Plant Cell Rep* 20:183-186. DOI 10.1007/s002990000303

** Books:*

Larcher W (1995) *Physiological plant ecology*, 3rd edn. Springer, Berlin Heidelberg New York

** Multiauthor books:*

Hovind HJ (1986) *Traumatic birth injuries. In: Raimondi AJ, Choux M, Di Rocco C (eds) Head injuries in the newborn and infant. (Principles of pediatric neurosurgery) Springer, Berlin Heidelberg New York, pp 87-109*

Illustrations and Tables

All figures (photographs, graphs or diagrams) and tables should be cited in the text, and each numbered consecutively throughout. Figure parts should be identified by lower-case roman letters. The placement of figures and tables should be indicated in the left margin. For submission of figures in electronic form see below.

Line drawings. Please submit good-quality prints. The inscriptions should be clearly legible.

Half-tone illustrations (*black and white and colour*). Please submit well-contrasted photographic prints with the top indicated on the back. *Magnification* should be indicated by scale bars.

Plates: Several figures or figure parts should be grouped in a plate on one page.

Size of figures: The figures should either match the width of the column (8.6 cm) or be 13.1 cm or 17.6 cm wide. The maximum length is 23.6 cm.

Figure legends must be brief, self-sufficient explanations of the illustrations. The legends should be placed at the end of the text.

For **colour illustrations** the authors will be expected to make a contribution (€ 485 or US \$ 534, plus 16% VAT) towards the extra costs, irrespective of the number of colour figures.

Tables should have a title and a legend explaining any abbreviation used in that table. Footnotes to tables should be indicated by superscript lower-case letters (or asterisks for significance values and other statistical data).

4 Electronic submission of final version

Please send only the final version of the article, as accepted by the editors.

Preparing your manuscript

Text

The template is available:

- * Via ftp:
 - Address: ftp.springer.de/
 - User ID: ftp
 - Password: your own e-mail address
 - Directory: /pub/Word/journals
 - file names: sv-journ.zip or sv-journ.doc and sv-journ.dot
- * Via browser:
 - ftp://ftp.springer.de/pub/word/journals
 - The zip file should be sent uuencoded.

Layout guidelines

1. Use a normal, plain font (e.g. Times Roman) for text.
 - Other style options:
 - for textual emphasis use *italic* types.
 - for special purposes, such as for mathematical vectors, use **boldface** type.

2. Use the automatic page numbering function to number the pages.
3. Do not use field functions.
4. For indents use tab stops or other commands, not the space bar.
5. Use the table functions of your word processing program, not spreadsheets, to make tables.
6. Use the equation editor of your word processing program or MathType for equations.
7. Place any figure legends or tables at the end of the manuscript.
8. Submit all figures as separate files and do not integrate them within the text.

Data formats

Save your file in two different formats:

1. RTF (Rich Text Format) or Microsoft Word compatible formats
2. pdf (a single pdf file including text, tables and figures)

Illustrations

The preferred figure formats are EPS for vector graphics exported from a drawing program and TIFF for halftone illustrations. EPS files must always contain a preview in TIFF of the figure. The file name (one file for each figure) should include the figure number. Figure legends should be included in the text and not in the figure file.

- *Scan resolution:* Scanned line drawings should be digitized with a minimum resolution of 800 dpi relative to the final figure size. For digital halftones, 300 dpi is usually sufficient.
- *Colour illustrations:* Store colour illustrations as RGB (8 bits per channel) in TIFF format.
- *Vector graphics:* Fonts used in the vector graphics must be included. Please do not draw with hairlines. The minimum line width is 0.2 mm (i.e. 0.567 pt) relative to the final size.

General information on data delivery

Please send us a zip file (text and illustrations in separate files) either:

- * Via ftp.springer.de (to our ftp.server; log-in "anonymous"; password: your e-mail address; further information in the readme file on the server)
- * By e-mail (only suitable for small file sizes)
- * or on any of the following media:
 - On a diskette [you may use .tar, .zip, .gzip (.gz), .sit, and compress (.Z)]
 - On a ZIP cartridge
 - On a CD-ROM

Please always supply the following information with your data: journal title, operating system, word processing program, drawing program, image processing program, compression program. The file name should be memorable (e.g., author name), have no more than 8 characters, and include no accents or special symbols. Use only

the extensions that the program assigns automatically.

5 Electronic supplementary material

Electronic supplementary material (ESM) for an article printed in this journal will be published free of charge to the subscribers on Springer's server <http://www.springerlink.com>. After acceptance by the journal's editors the data will be supplied as received from the author. In the printed article, full reference will be given to the ESM and vice versa.

ESM may consist of:

- Original data that relate to the paper, e.g. tables, additional illustrations (colour and black/white), etc.
- Information that is more convenient in electronic form.
- Information that cannot be printed: animations, video clips, sound recordings

For details of acceptable formats, consult springeronline.com

6 Proofreading

Authors should make their proof corrections on a printout of the pdf file supplied, checking that the text is complete and that all figures and tables are included. After online publication, further changes can only be made in the form of an Erratum, which will be hyperlinked to the article. **The author is entitled to formal corrections only. Substantial changes in content, e.g. new results, corrected values, title and authorship are not allowed without the approval of the responsible editor. In such a case please contact the responsible Managing Editor before returning the proofs to the publisher.**

7 Offprints

Twenty-five (25) offprints of each contribution are supplied free of charge. If you wish to order additional offprints you must return the order form with the corrected proofs. You are then entitled to receive a free pdf file of your article for your own personal use.
