

Instructions for Authors

DOI: 10.3103/S0891416809020104

The journal publishes original communications on experimental research in the fields of genetics, microbiology, and virology with emphasis on the molecular level of mechanisms determining the structure-functional organization of microorganisms and cells, as well as reviews on these problems.

Submission should be presented on a diskette accompanied by a hard copy. The text should be written in Microsoft Word without formatting. The hard copy of the article text and figures must be sent to the editorial board!

In sending an article to the editorial board, the following rules should be observed:

1. The article must be accompanied by an official request from the institution at which the work was performed and, if necessary, by an expert's report.

2. The article must be typed in standard script format with double spacing. Two copies of an article must be sent to the editorial board.

3. The initials and surnames of authors, title of the work, institution at which the work was carried, city, and the e-mail address of the first author should be indicated in entries.

4. An article should be signed by all authors on the last page of the text; the contact information of the designated corresponding author should be indicated.

5. The following sections should be distinguished in an original article:

—Abstract (typed right after the title of the article), key words;

—INTRODUCTION;

—MATERIALS AND METHODS;

—RESULTS AND DISCUSSION;

—TABLES (on a separate sheet);

—REFERENCES (on a separate sheet);

6. Abbreviations, except generally accepted ones, are not permitted. Only the SI system should be used in an article.

7. All Latin letters and letter combinations in the text should be underlined with a blue pencil, and all Greek letters should be encircled with a red pencil with indication of the complete name of the letter in the margins.

8. Figures should be attached to an article in two copies in separate envelopes. Text inscriptions should not be made in margins; they should be designated by numeric designations, the deciphering of which is given in figure captions. Figure captions should be given in a common list on a separate page. Symbols should not be used in figure captions, but their verbal descriptions should be given (for example, triangle, full circles, etc.). The surname of the first author, number of the figure, and its "top" should be indicated on the reverse side of each figure. A reference is made in the text to each figure.

9. The list of references should be typed on a separate page.

10. If an article is returned to authors for correction, it is necessary to send both the corrected and original versions to the editorial board.

Articles should be sent to the following address: 119435, Moscow, B. Pirogovskaya, 2, bldg. 5, Editorial Board of the journal *Molecular Genetics, Microbiology, and Virology*.
