

Full papers (preferably 8 printed pages), short communications (3 pages), reviews (8-10 pages), or letters to the Editor-in-Chief (0.5-1 page) will be published. One printed page comprises approximately 500 words, and/or equivalent space for figures, tables, etc. Send full papers and short communications to the regional editor of your choice (or Editor-in-Chief). Indicate in your covering letter the names of two members of the editorial board in two fields of expertise as suggested reviewers.

Manuscript Preparation

All manuscripts, including references, should be submitted in English (original and 3 copies), and typed double-spaced on 22 x 29 cm (8 1/2 x 11") white bond paper. Liberal margins (2.5 cm) should be left at the top and bottom of each page as well as on the sides.

Electronic Delivery

Please send only the electronic version (of ACCEPTED paper) via one of the methods listed below. Note, in the event of minor discrepancies between the electronic version and hard copy, the electronic file will be used as the final version.

Via electronic mail

1. Please e-mail ACCEPTED, FINAL paper to: KAPfiles@wkap.com
2. Recommended formats for sending files via e-mail:
 - Binary files - uuencode or binhex
 - Compressing files - compress, pkzip, or gzip
 - Collecting files - tar
3. The e-mail message should include the author's last name, the name of the journal to which the paper has been accepted, and the type of file (e.g., LaTeX or ASCII).

Via anonymous FTP

ftp: ftp.wkap.com

cd:/incoming/production

Send email to KAPfiles@wkap.com to inform Kluwer that electronic version is at this FTP site.

Via disk

1. Label a 3.5 inch floppy disk with the operating system and word processing program along with the authors' names, manuscript title, and name of journal to which the paper has been accepted.

2. Mail disk to:
Kluwer Academic Publisher
Desktop Department
101 Philip Drive
Assinippi Park
Norwell, MA 02061, USA

Any questions about the above procedures please send e-mail to dthelp@wkap.com

Full papers and review articles:

Title page

1. Title of paper should concisely present the major finding of the study.
2. Full names of authors (not initials) with mailing and e-mail addresses. Indicate submitting author with an asterisk.
3. Running title of three to six words.
4. Six key words.
5. Indicate to whom proofs should be sent.

Abstract page

Provide information on major accomplishments.

1. Introduction, materials and methods, experimental approach, results, discussion and interpretation of results, conclusions, acknowledgments, references.
2. The text should follow the abstract and begin on a new page, as should references, tables, and legends.
3. Metric units and Celsius temperatures should be used throughout.
4. Abbreviations should be defined in the abstract and again when they first appear in the text.
5. References should be cited in numerical order, the numbers being placed in parentheses. Citations of personal communications and unpublished data should be avoided unless absolutely necessary. When used, such citations should appear with initials in the text only, e.g., ("E.D. Smith, personal communication"), and not in the reference list.

References

1. Number in the order in which they appear in the text.

2. Abbreviate titles of periodicals according to the style of the Index Medicus.
3. Follow the format (arrangement, punctuation) shown below: Journal Articles:
Geysen H.M., Barteling S.J., and Melloen R.H., Proc Natl Acad Sci USA 82, 178-182, 1985.
(Please list all authors, do not use "et al."; do not add extraneous punctuation.)
Chapter in a Book:
Davidson A. and Rixon F. in Becker Y. (ed). Recombinant DNA Research and Viruses. Martinus Nijhoff Publishing, Boston, 1985, pp. 103-124.
Book:
Becker Y., Molecular Virology. Martinus Nijhoff Publishing, Boston, 1983, p. 26.

Tables

1. Tables should supplement, not duplicate, the text.
2. Tables should be numbered consecutively in arabic numerals in order of appearance in the text, and typed on separate pages.
3. Abbreviations used in a table should be footnoted (use lowercase letters in italics) and explained below the table in the order in which they appear in the table, if they have not been previously used. Any material that is not self-explanatory should also be footnoted and explained.

Figure legends

1. Be sure that legends and figures correspond.
2. Identify all abbreviations used in a figure at the end of each legend, if the abbreviation has not been used in the text.

Figures

1. Submit one glossy print 13 cm x 18 cm (5 x 7") and three photocopies of each figure. If the photocopies are not adequate for evaluation, as may be the case for photomicrographs, submit three glossy prints.
2. On the back of each print, indicate figure number, senior author's surname, and top of illustration; all of this should be written lightly with soft, black pencil.
3. Submit written permission from author(s) and publisher for any figure which has been published previously.
4. Do not use clips on prints; submit them in an envelope backed by cardboard.
5. Any lettering or scale of measurement used in an illustration must be large enough to be legible in the event of half-size reduction.

6. Do not send original art-work.
7. Computer generated data (sequences, computer graphics) must be printed with a quality printer and a new ribbon, and should be camera-ready.
8. Color illustrations are costly and will be charged to the author. Authors should inquire about cost from the publisher before submitting a color illustration.

Short Communications (3 pages)

Letters to the Editor (1/2-1 page); Follow the general rules laid down above. A separate title page and abstract page are required. One table or figure may be included if required; if references are needed, they should follow the format given above. The full names and full addresses of the writers should be on the title page.

Submission of sequence data to GenBank: When submitted manuscripts include or describe original nucleotide or amino acid sequence data, the sequence should be submitted to GenBank and an accession number obtained from GenBank to be included at the proof stage.

Instructions on how to submit data may be found in the printed data submission form made available by our editorial offices or the staff at GenBank (see address below), and in an on-line version of the form available via electronic mail from gb-sub%life@lanl.gov or as an editable ASCII file on 5 1/4" or 3 1/2" DOS and Apple Macintosh floppy diskette.

An accession number will be sent to you by GenBank within seven days (48 hours, if received via electronic mail) once a submitted sequence has been received, processed, and the annotation accompanying it deemed complete and internally consistent with the sequence data. The sequence data should be submitted in computer readable form. Submitted manuscripts containing sequence data should include the footnote: "The nucleotide sequence data reported in this paper have been submitted to the GenBank nucleotide sequence database and have been assigned the accession number XNNNNN." This footnote should appear on the title page of the manuscript.

You may contact GenBank for further information, help or submissions at:

genbank@lanl.gov (electronic mail)

gb-sub@lanl.gov (electronic mail, submissions only)

(505) 665-2177 (U.S.A. Telephone number)

GenBank (postal service)

Mail Stop K710

Los Alamos National Laboratory

Los Alamos, NM 87545

U.S.A.

All non-electronic mail submissions (floppy disk, tapes and printed copy) should be sent to the above address. If you encounter problems with any aspect of the sequence submission process, the staff at GenBank will be happy to assist you or identify someone in your locale who has agreed to facilitate sequence submission to GenBank.

Style Manuals

The following two books are recommended as guides in writing scientific papers; they are particularly useful in providing standard abbreviations for measurements and other scientific terms:

1. CBE Style Manual: prepared by the Committee on Form and Style of the Council of Biology Editors, published by the American Institute of Biological Sciences, Arlington, Virginia, 1978.
2. Writing Scientific Papers in English; O'Connor M., Woodford F.P. (eds.). Elsevier, Amsterdam/Oxford/New York, 1976.

The following book is an extremely valuable general, nonscientific style manual:
The Elements of Style. Strunk W. Jr., White EB, MacMillan, New York, 1972.

Offprints

Authors will receive fifty offprints free of charge. Ordering information for additional offprints will accompany authors' proofs.

Submission of Manuscripts

Authors are encouraged to submit high quality, original works to the Editor-in-Chief or to the Regional Editor of their choice. Full papers, short communications, reviews, and letters to the Editor-in-Chief, will be published. Authors should indicate in their covering letters the names of two members of the Editorial Board in two fields of expertise as suggested reviewers.

Editor-in-Chief: Yechiel Becker
Editor, America: E.K. Wagner, Irvine, CA
Editor, Europe: G. Darai, Heidelberg
Editor, Asia/Pacific: N. Yamamoto, Tokyo
Editor, Australia/Pacific: J.S. MacKenzie, Brisbane

Editorial Advisory Board:

W. Doerfler, FRG
Y. Hinuma, Japan
W.K. Joklik, USA
G. Klein, Sweden
J. Subak-Sharpe, UK

Editorial Board:

C.D. Atreya	USA	Virus-host molecular interactions
M. Bar-Joseph	Israel	Plant Viruses
K. Berns	USA	Parvo, DNA replication, Gene regulation
N. Chejanovsky	Israel	Insect viruses
Y-c Cheng	USA	Viral enzymes, Antivirals, Cancer
G. Darai	FRG	Herpesviruses, Iridoviruses
I. Davidson	Israel	Poultry viruses
W. Doerfler	FRG	Adeno, Baculo
J.J. Esposito	USA	Pox
H. Fan	USA	Retroviruses and AIDS

W. Piers	Belgium	Mol. biol. and immunology of influenza
M. Girard	France	Picorna; DNA recombinants
E. Gowans	Australia	Rhabdovirus genomic strategies and new vector
Y. Hinuma	Japan	Human retroviruses
J.M. Hogle	USA	Picorna, Virus structure, X-ray crystallog.
T. Hohn	Switzerland	Plant, Retroid, Caulimo
W.K. Joklik	USA	Reo, Pox
S. Karlin	USA	DNA sequencing
G. Klein	Sweden	Viruses & cancer
D. Kolakofsky	Switzerland	Bunya
T.E. Lane	USA	Mammalian Neurotropic RNA Viruses
M. Levine	USA	Herpesviruses
I. Lipkin	USA	Bornadisease virus, negative strand neurotropic viruses
A. Nomoto	Japan	Poliovirus, Enteroviruses
R.A. Owens	USA	Viroids, Plant vir., In vitro mutagen.
R.F. Pettersson	Sweden	Bunya, Neg-strand viruses, Membrane-protein genes
W.E. Robinson	USA	HIV and Human Retroviruses
G.F. Rohrmann	USA	Insect viruses
R. Sandri-Goldin	USA	Herpesvirus regulation, viral vectors
E. Scolnick	USA	Retroviruses, Tumor
B. Semler	USA	Positive strand RNA viruses
K. Shimotohno	Japan	Human retroviruses, HCV
Y. Shtram	Israel	Veterinary important viruses
R. Silva	USA	Herpesvirus regulation, viral vectors
P.J. Southern	USA	Arena, Papova, Neg. strand viruses
M.J.E. Sternberg	UK	Theor. and computer anal, of vir. proteins
J. Subak-Sharpe	UK	Herpes
K. Takada	Japan	Herpesvirus, HIV
C.T. Tiemessen	South Africa	HIV and AIDS
D.W. Trent	USA	Flavivirus
L. Villarreal	USA	Papova and adeno viruses, pathogenesis, vectors
E.K. Wagner	USA	DNA viruses, Herpes
P. Walker	Australia	Rhabdovirus genomic strategies, development of new vectors and vector delivery systems
R. Weir	Australia	Molecular aspects of alphavirus and flavivirus genomes
