

The author(s) transfer(s) the copyright to his/her article to Springer-Verlag effective if and when the article is accepted for publication. The copyright covers the exclusive and unlimited rights to reproduce and distribute the article in any form of reproduction (printing, electronic media or any other form); it also covers translation rights for all languages and countries. For U.S. authors the copyright is transferred to the extent transferable.

Submission: Please submit manuscripts to one of the editors, one original manuscript typed on one side of the sheet only plus two copies. Authors submitting diskettes are requested to follow the technical instructions for manuscripts and illustrations in electronic form printed in each issue of the journal. Please do not transmit any such data to the publisher until your manuscript has been reviewed and accepted for publication.

In order to reduce mailing costs, manuscripts will not normally be returned.

Please include at the end of the acknowledgements a declaration that the experiments comply with the current laws of the country in which the experiments were performed.

Manuscripts must be accompanied by the "Copyright Transfer Statement" (the form is regularly published in this journal).

Language: Preferably English.

Length of articles:

a) **Original articles: These must not exceed 8 printed pages** including tables and figures. As a rule one printed page equals 3 typewritten pages with 28 lines per page and 60 strokes per line.

b) **Short communications: These must not exceed two printed pages** including tables and figures.

Authors and their institutions will be asked to contribute to the printing costs (EUR 100.00 per page) if the paper exceeds the limits as stated above.

The **title page** should include:

- name(s) of author(s)
- title of paper
- affiliation(s)
- any footnotes referring to the title
- address for correspondence

To facilitate communication between the authors, editors and publisher, the author(s) should also furnish a FAX number and E-mail address on this page.

Abstract: This should not be longer than 150 words. When papers are written in French or German, a summary in English must be provided, preceded by an English translation of the title.

Elements of the manuscript: Please arrange the elements in this order:

- *Abstract*
- *Introduction*
- *Materials and methods*
- *Results*
- *Discussion, Results and Discussion may be combined in one section*
- *Acknowledgements, References, Tables, Legends, Illustrations*

Latin genus and species names should be underlined in the manuscript for italics.

Units of length: Those under 1 cm should be expressed in mm; those under 1 mm in μm or as a power.

Footnotes to the text should be numbered consecutively and typed on the bottom of the page to which they pertain.

References: In original articles the list of references should include all publications cited in the text. The entries in the list should be built up by analogy with the following examples:

- Franklin RM, Brun R, Grieder A (1986) Microscopic and flow cytophotometric analysis of parasitemia in cultures of *Plasmodium falciparum* vitally stained with Hoechst 33342 application to studies of antimalarial agents. *Z Parasitenkd* 72:201–212
- Mehlhorn H (1987) *Parasitology in focus*. Springer, Berlin Heidelberg New York

Please list references at the end of the paper in **alphabetical order** under the first author's name. If an author who is cited also co-authored additional papers that are cited, and if he is the first author listed, the order should be as follows:

Hutchinson and one coauthor – list alphabetically by coauthor, and then chronologically.

Hutchinson and more than one coauthor – list chronologically, *not* alphabetically by the second author (because only the first author's name followed by "et al". will be used in the text).

If more than one paper by the same author or team of authors was published in the same year, the letters a, b, c, etc., should follow the year, e.g., Hutchinson (1986a) both in text citations and in the list of references. Journals should be abbreviated according to *Index Medicus* (see *Parasitol Res* last issue of each volume).

Legends: The legend to each illustration should allow it to be understood without reference to the text and should consist of a title followed by a brief description and an explanation of any abbreviations and sym-

bols appearing in the illustration. Such explanations should not be repeated in the text.

Illustrations (photographs, graphs, diagrams). Required size for:

a) **single figures:** up to 86 mm (column width) or 176 mm (page width) but no higher than 236 mm (including legends).

b) **plates with several figures:** a maximum of 176 mm wide and 236 mm high (including legends).

For plates, the figures must be mounted on regular bond paper, not on cardboard.

Line drawings: Please submit good-quality prints. The inscriptions should be clearly legible. Letters 2 mm high are recommended.

Computer drawings are acceptable provided they are of comparable quality to line drawings. Computer-drawn curves and lines must be smooth.

Halftone illustrations: Please submit well-contrasted photographic prints, trimmed at right angles. Inscriptions should be about 2 mm high.

Color illustrations For color illustrations the authors will be expected to make a contribution (EUR 485.00 (US \$ 435.00 plus 16% VAT) per article) towards the extra costs.

Illustrations prepared in digital form must be in accordance with the technical instructions for manuscripts and illustrations in electronic form that are published in this journal.

Figure parts should be identified by lowercase roman letters

Tables: Each table should be submitted on a separate sheet and have a descriptive heading. Tables should not be crammed with too many data.

Electronic Supplementary Material. Data such as black and white or colour illustrations, large tables, animations, video clips, or sound recordings, that are not essential for the understanding of a printed article but yet of interest can be put on Springer-Verlag's server and will be accessible free of charge on the contents site of this journal. Such material has to be submitted in electronic form (see the special instructions that are regularly published in this journal) and will also be reviewed. Reference to this material will be given with the printed article.

Offprints. One complimentary copy is supplied. Orders for offprints can be placed by returning the order form with the corrected proofs. When you order offprints, you are entitled to receive in addition a pdf file of your article for your own personal use.
