

European Journal of Clinical Microbiology & Infectious Diseases

Instructions for Authors

Legal Requirements

The author(s) guarantee(s) that the manuscript will not be published elsewhere in any language without the consent of the copyright holders, that the rights of third parties will not be violated, and that the publisher will not be held legally responsible should there be any claims for compensation.

Authors wishing to include figures or text passages that have already been published elsewhere are required to obtain permission from the copyright holder(s) and to include evidence that such permission has been granted when submitting their manuscripts. Any material received without such evidence will be assumed to originate from the authors.

Manuscripts must be accompanied by the "Copyright Transfer Statement". The form can be obtained from springeronline.com/journal/10096.

Please include at the end of the acknowledgements a declaration that the experiments comply with the current laws of the country in which they were performed.

The editors reserve the right to reject manuscripts that do not comply with the above-mentioned requirements. The author(s) will be held responsible for false statements or failure to fulfill the above-mentioned requirements.

Open Choice Publication

In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer now provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular 'subscription-based' article, but in addition is made available publicly through Springer's online platform SpringerLink. To publish via Springer Open Choice, upon acceptance please visit www.springeronline.com/openchoice to complete the relevant order form and provide the required payment information. Payment must be received in full before publication or articles will be published as regular subscription-model articles. We regret that Springer Open Choice cannot be ordered for published articles.

Editorial Policy

The *European Journal of Clinical Microbiology & Infectious Diseases* (EJCMID) is an interdisciplinary journal devoted to the publication of communications on infectious diseases of bacterial, viral, fungal or parasitic origin. The scope of EJCMID covers the pathogenesis, diagnosis, epidemiology, therapy and prevention of infectious diseases.

EJCMID publishes communications in the form of articles, concise articles, editorials, reviews, brief reports or letters to the editor. Articles serve to present results of original research in the form of a full-length study, whereas concise articles serve to present such results in condensed form, or to present preliminary findings or case reports of truly exceptional interest. Brief reports present findings of interest in a condensed format. Letters to the editor comment on publications in EJCMID.

The language of EJCMID is English. Authors whose native language is not English must ensure that the language in the manuscript is checked before submission for correctness of grammar, syntax and usage. This must be done by a native speaker of English who has knowledge of the subject matter.

Manuscripts from all countries will be considered for publication. EJCMID will only consider original manuscripts that have not been published previously or been submitted simultaneously for consideration elsewhere in the same or substantially the same form in English or in any other language. As a rule, the opinion of at least two reviewers will be sought before determining whether a manuscript should be accepted, rejected or returned to the authors for revision.

Authors submitting a manuscript may suggest four or five potential reviewers who are acknowledged to have expertise in the subject of the work. These persons must not be or have been members of the institution(s) of the authors or have been associated with them. The address, fax number, e-mail address and area of expertise must be provided for each person suggested. EJCMID will use such recommended reviewers at its own discretion.

Authors are advised to prepare manuscripts in exact accordance with the instructions given here. Properly prepared manuscripts will be given priority in all stages of processing. EJCMID reserves the right to make any formal changes and/or language corrections necessary in a manuscript accepted for publication to ensure that it conforms with EJCMID's requirements. Authors have the opportunity to review any such changes in the proofs.

Unless otherwise stipulated, manuscripts submitted for a *Current Topic* section are treated as regularly submitted manuscripts, i.e. they are subject to all of the conditions mentioned herein.

Authorship

EJCMID has adopted the following guidelines on authorship drawn up by the International Committee of Medical Journal Editors. Each author should have participated sufficiently in the study to take public responsibility for the content. This participation must include conception and design, or analysis and interpretation of data, or both; drafting the article or revising it for critically important intellectual content; and final approval of the version to be published. Participation solely in the collection of data does not justify authorship.

Submission of Manuscripts

Manuscripts should be submitted via e-mail to ejcmid@compuserve.com along with the following attachments: one copy of the manuscript (including all tables and figures) saved as a PDF file for reviewing purposes, the cover letter, and a statement declaring that all authors have seen and approved the version of the manuscript being submitted.

If there is more than one author, the letter should specify which author is responsible for correspondence and proofs. Receipt of manuscripts is acknowledged automatically by the editorial office. Certain categories of manuscripts may go directly to print without further communication to the authors.

Format and Style

All sections of all categories of manuscripts must be prepared electronically and formatted on A4 (or 8 1/2 x 11") paper with double-line spacing. Twelve point Times New Roman typeface should be used. Each section of all categories of manuscripts must start on a new page. Pages should be numbered consecutively beginning with the title page. Paragraphs should not be indented. Text following headings and subheadings should begin with a new paragraph. Taxonomic

names of organisms should be spelled out and italicized on each use.

The title page should contain the following items in the order shown: the full title (sentence format and abbreviations should be avoided); the first initials and last names of all authors (without titles or degrees); the respective first initials and last names of authors directly above each complete address including the department, institution, street name and number or post box, postal code, city and country (without abbreviations). An envelope symbol should be placed beside the name of the author responsible for inquiries and reprints, and this author's telephone, fax and e-mail details should be provided.

With the exception of standard abbreviations, abbreviations should be kept to a minimum in all sections of a manuscript and be shown in parentheses alongside the unabbreviated expression on first use. Abbreviations may only be used to replace terms that are used more than five times in a manuscript; they may not be used in the title, abstract or subheadings. Numbers from one to nine should be spelled out unless in a series, in parentheses or followed by a unit of measurement. Numbers starting a sentence must be spelled out.

The commercial names of drugs must not be used. Commercial names of other products should only be used if there is no other suitable term for the products, and they should be followed by the name, city and country of the manufacturer.

Categories of Manuscripts

The following details pertain to the format and style of individual categories of manuscripts. Authors are also encouraged to refer to published examples in EJCMID.

Editorials should consist of the title page, text, references, tables and/or figures (if any). Headed subdivisions within the text are desirable but at the discretion of the author.

Reviews should consist of the title page, abstract, text, references, tables and/or figures (if any). Headed subdivisions within the text are desirable but at the discretion of the author. The abstract should summarize in no more than 15 to 20 lines the contents of the review and state any conclusions drawn.

Articles should contain the following sections in the order shown: title page, abstract, introduction, materials and methods, results, discussion, acknowledgement (if any), references, tables and/or figures (if any). The abstract should state in no more than 15 to 20 lines the purpose(s) of the study, basic procedures and main findings and conclusions. Subheadings personal pronouns, abbreviations and references should not be used in the abstract. The introduction should outline the purpose of the study, providing adequate background information. In the section on materials and methods, sufficient detail should be given so that experiments can be repeated; a reference suffices for commonly used materials and methods. The authors' results only, without interpretation, should be presented in the results section; results presented in the tables and figures should not be repeated unnecessarily in the text. The discussion section should provide an interpretation of the results in relation to findings of other investigators; conclusions should be stated clearly.

Concise articles should contain the following sections: title page, abstract, introduction, materials and methods, results and discussion, references, tables and/or figures (if any). The abstract should be no more than 5 to 10 lines in length and present only the aim of the study, the main findings and conclusions. The text should

have a maximum length of five typewritten pages. There should be no more than 10 authors, 15 references and two illustrations (2 tables or 2 figures, or 1 table plus 1 figure).

Brief reports should not exceed three typewritten pages in length. A title page should be provided. Headings and subheadings should not be used. There should generally be no more than five authors, 10 references and one table or figure.

Manuscripts on new antimicrobial agents should generally be in the form of a concise article; however, the text should be brief and the emphasis placed on tabular presentation of data. No limitations are set on the number of tables or figures. Only submissions that present a complete microbiological or pharmacokinetic characterization of an agent should be in the form of an article.

Case reports should only be submitted to describe cases of exceptional interest that represent new and important findings. Straightforward case reports should be prepared in the format of a brief report, as outlined above. Case reports followed by a literature review should be in the form of a concise article using the headings abstract, introduction, case report and discussion; a maximum of 20 references is permitted.

References

The list of references should only include works that are cited in the text and that have been published or accepted for publication. Personal communications should only be mentioned in the text. References cited in the text should appear in normal typeface, separated by commas, within squared brackets. In the reference list, references should be *numbered in the order in which they appear* in the text and listed in *numerical order*. Journal titles should be abbreviated according to *Index Medicus*. References should be styled as follows with careful attention being paid to the correct punctuation:

Journals

Thys JP, Jacobs F, Motte S (1989) Quinolones in the treatment of lower respiratory tract infections. *Rev Infect Dis* 11 (Suppl 5):1212–1219

Books

Fenner FJ, White DO (1976) *Medical virology*. Academic Press, New York, p 443

Multiauthor Books

Barry AL, Thornsberry C (1980) Susceptibility testing: diffusion test procedures. In: Lenette EH, Balows A, Hausler WJ, Truant JP (eds) *Manual of clinical microbiology*. American Society for Microbiology, Washington, DC, pp 463–474

Internet

Healthwise Knowledgebase (1998)
US Pharmacopeia, Rockville,
<http://www.healthwise.org>.
Cited 21 Sept 1988

Abstracts

Olivier C, Doit C, Moniot-Ville N, Bensalah A, Laurent C, Birgen B, The French Study Group (2001) Community – acquired bacteremia in children: a one-year survey in France. In: Program and abstracts of the 41st Interscience Conference on Antimicrobial Agents and Chemotherapy. Abstract no. G-1525

References such as “personal communications” or “unpublished data” cannot be included in the reference list, but should be mentioned in the text in parentheses: this also applies to papers presented at meetings but not yet published or accepted for publication. A date should be given for both “personal communications” and “unpublished data”.

If available the Digital Object Identifier (DOI) of the cited literature should be added at the end of the reference in question.

Example: Dyall KG (1998) Relative and non-relative finite nucleus optimized double zeta basis sets for the elements. *Theor Chem Acc* 99: 366–371 DOI 10.1007/s002149800025

Tables and Figures

Tables and figures should be numbered in Arabic numerals. The word “Table” should be spelled out in both the text and the legends, but the word “Figure” should be abbreviated to “Fig.”. Each table and figure must be referenced in the text and appear on a separate page at the end of the manuscript. The use of abbreviations in tables and figures should be kept to a minimum, and bold type should not be used.

Tables must be created using a computer; they may not be submitted as photographs or drawings. A legend must be provided above each table. All headings and data must be horizontal and justified to the left column margin. Numerical data within each column should be justified vertically to the decimal point. Capitalization should be limited to abbreviations and the first letter of the first word of the legend, the column headings and any text appearing in the far left column. All abbreviations should be spelled out at the end of the footnotes (see published examples).

Figures must be in the form of a black and white photographic print with the figure number, author’s name and an arrow indicating the top pencilled on the back. Each set of figures should be submitted in a protective envelope; figures must not be mounted. Line drawings and lettering must be of professional quality. Figures should not be three-dimensional. Figures should not exceed A4 in size, and items in a figure must be of such a size that they are still legible when reduced for publication. Lowercase letters (a, b etc.) should be used to identify figure parts. If illustrations are supplied with uppercase labeling, lowercase letters will still be used in the figure legends and citations. A list of figure legends should be typed on a separate page; symbol legends should be incorporated into the figures.

Color illustrations may only be included if authors agree to contribute to the cost of production. The fee for this service is € 485 or US \$ 534 plus 16% VAT irrespective of the number of illustrations.

Electronic Submission of the Final Version

Please send only the final version of the article, as accepted by the editors.

Text and figures must be sent as separate files.

Technical instructions for preparing your manuscript

Text

The Word template is available:

→ via ftp

Address: <ftp.springer.de/>
User ID: ftp
Password: your own e-mail address
– Directory: /pub/word/journals
– file names: sv-journ.zip or sv-journ.doc and sv-journ.dot

→ via browser

– <http://www.springer.de/author/index.htm>

The zip file should be sent unencoded.

Layout guidelines

1. Use a normal, plain font (e.g., Times Roman) for text.
Other style options:
 - for textual emphasis use *italic* types.
 - for special purposes, such as for mathematical vectors, use **boldface** type.

2. Use the automatic page numbering function to number the pages.
3. Do not use field functions.
4. For indents use tab stops or other commands, not the space bar.
5. Use the table functions of your word processing program, not spreadsheets, to make tables.
6. Use the equation editor of your word processing program or MathType for equations.
7. Place any figure legends or tables at the end of the manuscript.
8. Submit all figures as separate files and do not integrate them within the text.

Data formats

Save your work in two versions:

1. RTF (Rich Text Format) or Microsoft Word compatible formats
2. pdf (a single pdf file including text, tables and figures)

Illustrations

The preferred figure formats are EPS for vector graphics exported from a drawing program and TIFF for halftone illustrations. EPS files must always contain a preview in TIFF of the figure. The file name (one file for each figure) should include the figure number. Figure legends should be included in the text and not in the figure file.

Scan resolution: Scanned line drawings should be digitized with a minimum resolution of 800 dpi relative to the final figure size. For digital halftones, 300 dpi is usually sufficient.

Color illustrations: Store color illustrations as RGB (8 bits per channel) in TIFF format.

General information on data delivery

Please send us a zip file (text and illustrations in separate files) either:

- **Via ftp** <ftp.springer.de>
(to our ftp.server; log-in “anonymous”;
password: your e-mail address;
further information in the readme file on
the server)
- **By e-mail** (only suitable for small volumes
of data)
- **or on any of the following media**
 - On a diskette [you may use .tar, .zip, .gzip (.gz),
.sit, and compress (.Z)]
 - On a ZIP cartridge
 - On a CD-ROM

Please always supply the following information with your data: journal title, operating system, word processing program, drawing program, image processing program, compression program.

The file name should be memorable (e.g., author name), have no more than eight characters, and include no accents or special symbols. Use only the extensions that the program assigns automatically.

Proofreading

Authors should make their proof corrections on a printout of the PDF file supplied, checking that the text is complete and that all figures and tables are included. After online publication, further changes can only be made in the form of an erratum, which will be hyperlinked to the article.

Offprints

For all categories of manuscripts, the corresponding author receives one copy of the printed issue in which the manuscript appears. Offprints of all categories of manuscripts can be ordered at cost price, provided that the offprint order form is returned together with the corrected proof. When offprints are ordered at cost price, authors are entitled to receive, in addition, a pdf file of the work for personal use.
