

Preparation of your paper

We welcome manuscripts written in **LaTeX**, particularly if the **Springer macropackage SVJour** has been used (further details below). For papers written in TeX or LaTeX without Springer macros, the source files can in many cases be used, but Springer will decide on a case-by-case basis whether it is more economical to work from the author's files or to typeset.

You may obtain the Springer macropackage *SVJour* from our ftp server (<ftp.springer.de>), in the directory: `/pub/tex/latex/svjour/cal`

Specific problems concerning the macro package or suggestions should be transmitted by e-mail to texhelp@springer.de

For any other information concerning the journal, please contact lemer@springer.de

For the review process please submit your manuscript in duplicate to the Editor who, in your opinion, is most closely concerned with the subject matter of the paper.

To facilitate communication between authors, editors and publisher, the author should furnish a fax number and/or e-mail address on the title page of the manuscript.

Papers may be written in English, French, or German, preferably in English.

For style matters please consult previous issues of the journal.

The **list of references** at the end of the paper should always be in alphabetical order and include the names and initials of all authors and the year of publication. Titles of journals and book series should be abbreviated in accordance with *Zentralblatt für Mathematik / Compact MATH* (Index volumes).

Please fill out the copyright transfer statement overleaf and enclose it with your manuscript.

After you have carried out all final revisions and have been notified of acceptance, please send the electronic version of your paper via e-mail to: lemer@springer.de or on diskette to:

Calculus of Variations
Journal Production Mathematics
Springer-Verlag
Tiergartenstrasse 17
D-69121 Heidelberg, Germany

Please do not forget to include the important identification requested overleaf (☐). Make sure that the final printed version of your paper is identical in content to the electronic version sent. Normally only typesetting errors should be corrected in the page proofs. **A charge is made for extensive changes** introduced after the paper has been typeset. No later corrections will be accepted electronically.

Fifty (50) **offprints** of each paper will be supplied free of charge. Additional offprints are available in lots of 100, provided the order form is received with the corrected proofs.

Final check

- ✓ All formula characters unambiguous?
- ✓ Names and complete affiliations of all authors provided on title page?
- ✓ Summary enclosed?
- ✓ Running head provided?
- ✓ Beginning and end of theorem, lemma, etc. clearly identified?
- ✓ All figures enclosed on separate sheet?
- ✓ References styled consistently?

- Please make sure that this information
- appears on the label of your diskette
 - is sent to the publisher together with your electronic manuscript

Copyright Transfer Statement

Calculus of Variations

The copyright to this article is transferred to Springer-Verlag (for U.S. government employees: to the extent transferable) effective if and when the article is accepted for publication. The copyright transfer covers the exclusive right to reproduce and distribute the article, including reprints, translations, photographic reproductions, microform, electronic form (offline, online) or any other reproductions of similar nature.

The author warrants that this contribution is original and that he/she has full power to make this grant. The author signs for and accepts responsibility for releasing this material on behalf of any and all co-authors.

An author may make his/her article published by Springer-Verlag available on his/her personal home page provided the source of the published article is cited and Springer-Verlag is mentioned as copyright holder. Authors are requested to create a link to the published article in Springer's internet service. The link must be accompanied by the following text: The original publication is available at <http://www.springerlink.com>. Please use the appropriate URL and/or DOI for the article. Articles disseminated via SpringerLink are indexed, abstracted and referenced by many abstracting and information services, bibliographic networks, subscription agencies, library networks, and consortia.
