

Journal of Functional Programming

1. Scope
2. Book reviews
3. Submission of manuscripts
4. Electronic manuscripts
5. Layout of manuscripts
6. Illustrations
7. References
8. Capsule reviews
9. Proofreading
10. Offprints

Scope

Papers may describe original technical work, survey an area, or present a tutorial; and may be either short or long. Anything related to functional programming is of interest, including: foundations (semantics, abstract interpretation, lambda calculi, rewriting, logic, type theory, category theory); implementation (compilation, architectures, parallelism, garbage collection, I/O, debugging, profiling); linguistics (pure and impure language features, non-determinism, side effects, logical variables, relation to other programming paradigms, proofs about programs, program transformation, program synthesis, partial evaluation); applications (applications programs, practical experience, programming techniques, prototyping).

Book reviews

Books for review, or suggestions for reviews, should be sent to the reviews editor Simon Thompson.

Submission of manuscripts

Papers may be submitted to the Editor-in-Chief, or any of the Editors. Please choose an Editor whose research interests most closely match your paper; if in doubt, send your paper to the Editor-in-Chief. The guidelines we offer to JFP referees are available at <http://www.dcs.gla.ac.uk/jfp/refereeing.html>. Authors may want to consult them to get an idea of the criteria that will be applied by referees. Electronic submission is encouraged: send e-mail containing a copy of the paper in PDF or Postscript form. Any method of producing PDF or Postscript is fine, but LaTeX is recommended as it can also be used for typesetting the final paper; see below. Alternatively, post four hard copies of the paper. Submissions should be accompanied by the author's mailing address, telephone and fax number, and, if possible, an electronic mailing address. Electronic submissions should also be accompanied by a separate e-mail including the title of the paper, the authors, its length in pages, and a clear-text copy of the abstract. Submission of a paper is taken to imply that it has not been previously published and that it is not being considered for publication elsewhere. Authors should inform the Editor of any related papers submitted or published elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

Journal of Functional Programming encourages authors of workshop and conference papers to submit enhanced versions of the same work to JFP. Typically, the version submitted to JFP should contain additional discussion, examples, or proofs. Only if a workshop or conference paper is exceptionally well presented and complete is it suitable for journal publication without significant revision. If another publisher holds copyright on an earlier version of an article, the enhanced version must differ sufficiently so that the author can assign copyright to Cambridge University Press.

Electronic manuscripts

The publisher encourages submission of manuscripts written in LaTeX which can be used for direct typesetting. Details are available at <http://www.dcs.gla.ac.uk/jfp/submission.html#electronic>.

Web-accessible accompanying material for your paper

You are encouraged to supply supporting material for your paper, which JFP will make permanently accessible over the Web. See <http://www.dcs.gla.ac.uk/jfp/submission.html#web>.

Layout of manuscripts

Manuscripts should begin with an abstract of not more than 300 words. Please avoid footnotes whenever possible. Papers should conform to a good standard of English prose; please consult a style guide such as 'The Elements of Style' by Strunk and White, Macmillan, New York. It is encouraged to present programs in one of two styles: either with identifiers in italic and keywords in bold, or entirely in a fixed-width teletype font. Do not begin a sentence with a symbol or identifier name. Please supply Web URLs for the home page of each of the authors of the paper. These are used when generating the JFP bibliography and author index. People searching the JFP indexes will then be able to find their way to your home page easily.

References

The Harvard system of references should be used. Citations are by author's surname and year of publication, and may stand either as a noun phrase (e.g., "Curry (1933)") or as a parenthetical note (e.g., "(Curry 1933)"). List references at the end of the text in alphabetical order. A typical entry is: Curry, H. B. (1933) Apparent variables from the standpoint of mathematical logic, *Ann. of Math.*, 34 (2): 381-404.

Illustrations

Figures should be drawn in indian ink on good quality white paper or produced by computer to comparable quality. Wherever possible they will be reproduced with the author's original lettering. Originals of figures should not be sent until the paper has been accepted. A list of captions for figures should be attached separately.

Proofreading

Typographical or factual errors only may be changed at the proof stage. The publisher reserves the right to charge for correction of non-typographical errors. No page charge is made. JFP's policy is to follow the spelling convention (American or British) of the author(s).

Capsule reviews

Every published paper is accompanied by a capsule review written by one of the referees. A capsule review differs from an abstract in that it is freer to reflect value judgements, helping to set the context or emphasise the importance of a contribution.

Offprints

25 offprints of each article will be supplied free to each first named author. Extra offprints may be purchased from the publisher if ordered at proof stage.
