

Dendrochronologia is an international scholarly journal in tree-ring research. It publishes high quality original research dealing with growth rings of woody plants and the application of tree-ring studies to problems in a wide variety of fields including, but not limited to archaeology, botany, climatology, ecology, forestry, geology and hydrology. Original articles, reviews, short articles, technical notes and personal notes are considered for publication.

Copyright

Submission of a manuscript implies that the submitted work has not been published before (except as part of a thesis or lecture note or report or in the form of an abstract); that it is not under consideration for publication elsewhere; that its publication has been approved by all co-authors as well as by the authorities at the institute where the work has been carried out; that written permission of copyright holders is obtained by the authors for material used from other copyrighted sources; that, if and when the manuscript is accepted for publication, the authors hand over the transferable copyright of the accepted manuscript to the publisher; and that the manuscript or parts thereof will therefore not be published elsewhere in any language without the consent of the copyright holder. Copyright includes, without spatial or time limitations, mechanical, electronic or visual reproduction and distribution, electronic storage and retrieval, and all other forms of electronic publication or any other types of publication including all subsidiary rights.

Types of contributions

1. *Original articles* report the results of original research. The material should not have been previously published elsewhere, except in a preliminary form. The manuscripts submitted undergo peer reviews by at least two independent referees under the coordination of the Editors and the Associate Editors.

2. *Review articles* are organised critical syntheses of information on important topics. They may be submitted or invited. The manuscripts submitted undergo peer reviews by at least two independent referees under the coordination of the Editors and the Associate Editors.

3. *Short articles* are concise, but complete descriptions of limited investigations or preliminary research reports. The references should be as complete as those for an original article, both in reference to the literature and description of the experimental procedures employed. The manuscripts submitted undergo peer review by at least one independent referee under the coordination of the Editors and the Associate Editors.

4. *Technical notes* are related to software, measuring devices, or any tools or methods that relate to dendrochronology. The manuscripts submitted undergo peer review by at least one independent referee under the coordination of the Editors and the Associate Editors.

5. *Personal notes*. They include honours, obituaries; book reviews (see below), letters, readers' comments on papers published in the journal and other issues related to dendrochronology. They are submitted directly to the Editors and the Associate Editors.

Book reviews

Books and monographs for review are welcome and should be sent to the Editorial Office (see address above). Anyone who wishes to review books for *Dendrochronologia* should send a curriculum vitae and a brief description of their area of expertise to the Editorial Office.

Submission of manuscripts

From now on, all manuscripts should be submitted electronically through the **Elsevier Editorial System (EES)** which can be accessed at: <http://ees.elsevier.com/dendro>. Alternatively, manuscripts can be sent by e-mail to: dendro@elsevier.de.

All parts of the manuscript should be typewritten (Times New Roman, font size 12) on one side of the paper with wide margins, double-spaced and with numbered lines. Each page of the manuscript, including the title page, references, tables, etc. should be numbered. Italics should be used where necessary.

The corresponding author's telephone, fax, and e-mail address should be listed on the manuscript and on all correspondence. Address changes need to be notified immediately. Manuscripts should be written in concise and grammatically correct English. British and American English is accepted, but should be used consistently. Non native English speaking authors should have their manuscripts checked by English speaking colleagues.

In general manuscripts should be organised as follows:

- Title (should be clear, descriptive and concise)
- Name(s) of author(s)
- Complete postal address(es) of all author(s) affiliations
- Telephone and fax numbers, e-mail address of the corresponding author
- Present address(es) of author(s) if applicable
- Complete correspondence address to which the proofs should be sent
- Summary (clear summary of the paper and including the main results. It should not be longer than 500 words)
- Key words (indexing terms), normally 3-6 items (not included in the title if possible)
- Introduction
- Materials and Methods (study area descriptions, methods, techniques, etc.)
- Results
- Discussion
- Conclusion
- Acknowledgements and any additional information concerning research grants, etc.
- References
- Tables
- Figure captions

When a species is first mentioned, the common name (if any) and the scientific name (in italics) should be given. Units of measurement must follow the International System of Units. When one unit appears in the denominator, use the solids (e.g. g/m²) for two or more units in the denominator, use negative exponents (e.g. gm⁻² yr⁻¹).

Artwork

The maximum type area is 17 cm (6.7 inches) in width and 22.5 cm (8.9 inch) in height. All artwork, i.e. tables, diagrams, figures and photos, must be consecutively numbered and adjusted to fit either one column width (8.2 cm or 3.2 inches) or two-column width (17 cm or 6.7 inches). Artwork should be black and white, referred to in the text, and self-explanatory. The captions should be listed on a separate sheet.

Photographs should be referred to in the text as figures. Folded tables are not accepted as a rule. For electronic submission figures should be supplied in EPS or TIFF Format, final resolution 300 dpi for halftones, 1270 dpi for black/white line drawings. Colour: If you submit usable colour figures with your accepted article, Elsevier will ensure that these figures will appear in colour on the web at no additional charge (e.g., Science Direct and other sites) regardless of whether or not these illustrations are reproduced in colour in the print version. Colour figures can be printed only if the costs are covered by the author (EURO 450.00 for one colour plate, EUR 350.00 for every following colour plate/for more than one plate ask for a cost estimate). Authors who agree to pay the production costs for figures to be published in colour will automatically receive 50 additional free offprints.

For further information on the preparation of electronic artwork, please see <http://www.elsevier.com/artworkinstructions>.

References

The author must verify each reference against the original. Each reference must be cited in the text, using the surname of the authors (if one or two) and the year, e.g. (Eckstein, 1980) or Eckstein (1980); (Baillie and Pilcher, 1983) or Baillie and Pilcher (1983). The names may or may not be in parentheses, depending on the sentence construction, but the year always is. If there are three or more authors, only the first author is cited followed by et al. (Tessier et al., 1992).

Papers are listed in chronological order, beginning with the earliest paper (Aniol and Eckstein, 1984; Lorimer and Frehlich, 1989; Baisan and Swetnam, 1990; Briffa et al., 1998).

If references occur that are not uniquely identified by the authors' names and year, use a, b, c, etc., after the year, e.g., Schweingruber 1990a, 1990b for the text citation and in the reference list.

The reference list must be listed in alphabetical order according to the name of the first author. References with the same first author are listed in chronological order. References should follow the form used in current issues of the Journal, as in the following examples.

Journal article:

Biondi, F., 2000. Are climate-tree growth relationships changing in North-Central Idaho, USA? *Arctic, Antarctic, and Alpine Research* 32, 111-16.

Jacoby, G.C., D'Arrigo, R.D., 1995. Tree-ring width and density evidence of climatic and potential forest change in Alaska. *Global Biogeochemical Cycles* 9, 227-34.

Book:

Schweingruber, F.H., 1996. *Tree Rings and Environment. Dendroecology*. Paul Haupt Verlag, Berne, 609 pp.

Edited book:

Markgraf, V. (Ed.), 2001. *Interhemispheric Climate Linkages*. Academic Press, San Diego, 848 pp.

Cook, E., 1980. A conceptual linear aggregate model for tree rings, in: Cook, E., Kairiukstis, A. (Eds.), *Methods of dendrochronology: Applications in the environmental sciences*. Kluwer Academic Publ., Dordrecht, pp. 98-103.

Paper in conference proceedings:

Tessier, L., Belingard, C., 1993. Dendrochronology at the upper forest limit, in: Anfodillo, T., Urbinati, C. (Eds.), *Ecologia delle foreste di alta quota. Proc. XXX Corso di Cultura in Ecologia*. Università di Padova, pp. 205-17.

Report:

Barrett, S.W., Arno, S.F., 1988. Increment-borer methods for determining fire history in coniferous forests. US Department of Agriculture, Forest Service, General Technical Report INT- 44, 15 pp.

Thesis:

Sthale, D.W., 1980. *The tree-ring record of false spring in the south-central USA*. Dissertation, Arizona State University.

The titles of periodicals mentioned in the list of references should not be abbreviated. The titles of publications in non-Latin alphabets should be translated, and a notation such as "(in Russian)" or "(in Greek, with English abstract)" should be added. Work accepted for publication, but not yet published, should be referred to as "in press". References concerning unpublished data and "personal communications" should not be cited in the reference list but may be mentioned in the text.

Processing of accepted manuscripts

The author will receive galley proofs for correction and is obliged to return the corrected version within the time indicated by the Publishers. Only typesetter's errors may be corrected; no changes in, or additions to, the edited manuscript will be allowed. If the submission deadline for the corrected proofs is not complied with, the Editorial Office will be responsible for the final corrections.

Reprints

The corresponding author, at no cost, will be provided with a PDF file of the article via e-mail or, alternatively, 25 free paper offprints. The PDF file is a watermarked version of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use. Additional paper offprints can be ordered by the authors. An order form with prices will be sent to the corresponding author. Until publication of the print edition, corrected proofs will first be available online (www.sciencedirect.com).

Funding body agreements and policies

Elsevier has established agreements and developed policies to allow authors who publish in Elsevier journals to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit <http://www.elsevier.com/fundingbodies>.
