

### 1 Legal requirements

The author(s) guarantee(s) that the manuscript will not be published elsewhere in any language without the consent of the copyright holders, that the rights of third parties will not be violated, and that the publisher will not be held legally responsible should there be any claims for compensation.

Authors wishing to include figures or text passages that have already been published elsewhere are required to obtain permission from the copyright holder(s) and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the authors.

Manuscripts must be accompanied by the "Copyright Transfer Statement". The form is regularly published in this journal or can be obtained from <http://link.springer.de>.

Please include at the end of the acknowledgements a declaration that the experiments comply with the current laws of the country in which they were performed.

The editors reserve the right to reject manuscripts that do not comply with the above-mentioned requirements. The author(s) will be held responsible for false statements or failure to fulfill the above-mentioned requirements.

### 2 Editorial procedure

Three hard copies of the manuscript including all figures and tables clearly labelled should be submitted to one of the following editors:

Ulrich Müller  
Institut für Humangenetik  
der Justus-Liebig-Universität  
Schlangenzahl 14  
35392 Giessen, Germany  
Fax: +49 6419941609  
e-mail: [ulrich.mueller@humangenetik.med.uni-giessen.de](mailto:ulrich.mueller@humangenetik.med.uni-giessen.de)

Manuel B. Graeber  
Department of Neuropathology  
Faculty of Medicine  
Imperial College of Science, Technology  
and Medicine  
Charing Cross Campus,  
Fulham Palace Road,  
London, W6 8RF, UK  
Fax: +44-208-8467794;  
e-mail: [m.graeber@ic.ac.uk](mailto:m.graeber@ic.ac.uk)

James R. Lupski  
Baylor College of Medicine  
One Baylor Plaza  
Texas Medical Center  
Houston, TX 77030-3498, USA  
Fax: +1-713-798-5073;  
e-mail: [jlupski@bcm.tmc.edu](mailto:jlupski@bcm.tmc.edu)

Please do not transmit electronic data to the publisher until your manuscript has been reviewed and accepted for publication. Please follow the instructions below.

It is understood that by publishing a paper in *Neurogenetics*, the authors agree to make available to colleagues in academic (nonprofit) research any of the cells, nucleic acids, antibodies etc. that are not available from commercial suppliers and are required to substantiate the scientific conclusions of the paper.

### 3 Manuscript preparation

The original text should be typed on one side of the sheet only using doubleline spacing and margins of at least 3.5 cm. Each manuscript will be reviewed by 2–3 qualified peers who will make suggestions as to acceptance, revision or rejection of the article. If accepted, or accepted after revision, a final version in electronic form will be requested.

#### Short communications

Short communications of up to two printed pages should be submitted in the format of a short paper i.e. including an abstract (up to 100 words in length) so that this information may be included in abstracting and indexing services.

#### Letters to the editors

*Neurogenetics* publishes negative findings only if they contribute to the clarification of an important controversial issue. Such findings should be published as Letters to the editors. They should have no more than 500 words, a maximum of six references and one table or figure.

To help you prepare your manuscript, Springer offers a template. For details see point 4.

All manuscripts are subject to copy editing.

#### Accession numbers and gene symbols.

Authors should be aware that all the new sequence information, including that which extends a previously determined sequence already present in the database (and which already has an accession number) must be submitted to any of the three major collaborative databases (DDBJ/EMBL/GenBank) for a new accession number. It is only necessary to submit to one database, without regard to where the sequence data will be published. Data is exchanged between DDBJ, EMBL and GenBank on a daily basis. The accession number must be provided before acceptance of the manuscript.

New genes and gene loci need to be designated by symbols in accordance with the Guidelines for Human Gene Nomenclature (<http://www.gene.ucl.ac.uk/nomenclature/guidelines.html>). To guarantee the designation of universally acceptable symbols, authors should consult the nomenclature committee by writing to [nome@galton.ucl.ac.uk](mailto:nome@galton.ucl.ac.uk) to have new names and symbols "approved" before publication.

#### Title page

- The name(s) of the author(s)
- A concise and informative title
- The affiliation(s) and address(es) of the author(s)
- The e-mail address, telephone and fax numbers of the communicating author

■ **Abstract.** Each paper must be preceded by an abstract presenting the most important results and conclusions in no more than 250 words.

■ **Five key words** taken from Index Medicus (Medical Subject Headings) should be supplied after the Abstract for indexing purposes.

■ **Essential footnotes** to the text should be numbered consecutively and placed at the bottom of the page to which they refer.

■ **The Introduction** should state the purpose of the investigation and give a short review of the pertinent literature.

■ **Acknowledgements.** These should be as brief as possible. Any grant that requires acknowledgement should be mentioned. The names of funding organizations should be written in full.

■ The list of **References** should only include works that are cited in the text and that have been published or accepted for publication.

References should be numbered in the order in which they appear in the text and listed in numerical order. Journal titles should be abbreviated according to *Index Medicus*. References should be styled as follows:

#### Books

Vogel F, Motulsky AG (1996) Human genetics – problems and approaches, 3rd edn. Springer, Berlin Heidelberg New York

#### Multiauthor books

Shepherd GM (1997) Synaptic circuits and physiological operations in the central nervous system. In: Greger R, Windhorst U (eds) Comprehensive human physiology. From cellular mechanism to integration. Vol 1. Springer, Berlin Heidelberg New York, pp 497–508.

#### Journals

Graeber MB, Kösel S, Egensperger R, Banati RB, Müller U, Bise K, Hoff P, Möller HJ, Fujisawa K, Mehraein P (1997) Rediscovery of the case described by Alois Alzheimer in 1911: historical, histological and molecular genetic analysis. *Neurogenetics* 1:73–80.

References such as "personal communications" or "unpublished data" cannot be included in the reference list, but should be mentioned in the text in parentheses: this also applies to papers presented at meetings but not yet published or accepted for publication. A date should be given for both "personal communications" and "unpublished data".

If available the Digital Object Identifier (DOI) of the cited literature should be added at the end of the reference in question.

■ **Illustrations and Tables.** All figures (photographs, graphs or diagrams) and tables should be cited in the text, and each numbered consecutively throughout. For submission of figures in electronic form see below. Figure parts should be identified by lower-case roman letters.

■ **Line drawings.** Please submit good-quality prints. The inscriptions should be clearly legible.

■ **Half-tone illustrations** (black and white and color). Please submit well-contrasted photographic prints with the top indicated on the back. *Magnification* should be indicated by *scale bars*.

■ **Size of figures:** The figures should either match the width of the column (86 mm) or be 131 mm or 176 mm wide. The maximum length is 241 mm.

■ **Figure legends** must be brief, self-sufficient explanations of the illustrations. The legends should be placed at the end of the text.

■ **Tables** should have a title and a legend explaining any abbreviation used in that table. Footnotes to tables should be indicated by superscript lower-case letters (or asterisks for significance values and other statistical data).

For **color illustrations** the authors will be expected to make a contribution (€ 485 or US \$ 435, plus 16% VAT) towards the extra costs irrespective of the number of color figures.

#### 4 Electronic submission of final version

Please send only the final version of the article, as accepted by the editors.

#### Preparing your manuscript

##### ■ Text

The Word template is available:

##### → via ftp

Address: ftp.springer.de/  
User ID: ftp  
Password: your own e-mail address  
– Directory: /pub/word/journals  
– file names: sv-journ.zip or sv-journ.doc and sv-journ.dot

##### → via browser

– <http://www.springer.de/author/index/html>

The zip file should be sent uuencoded.

#### Layout guidelines

1. Use a normal, plain font (e.g., Times Roman) for text.  
Other style options:  
– for textual emphasis use italic types.  
– for special purposes, such as for mathematical vectors, use boldface type.
2. Use the automatic page numbering function to number the pages.
3. Do not use field functions.
4. For indents use tab stops or other commands, not the space bar.
5. Use the table functions of your word processing program, not spreadsheets, to make tables.
6. Use the equation editor of your word processing program or MathType for equations.
7. Place any figure legends or tables at the end of the manuscript.
8. Submit all figures as separate files and do not integrate them within the text.

#### Data formats

Save your work in two versions:

1. Word compatible Word 95/97
2. In RTF (Rich Text Format).

#### ■ Illustrations

The preferred figure formats are EPS for vector graphics exported from a drawing program and TIFF for halftone illustrations. EPS files must always contain a preview in TIFF of the figure. The file name (one file for each figure) should include the figure number. Figure legends should be included in the text and not in the figure file.

**Scan resolution:** Scanned line drawings should be digitized with a minimum resolution of 800 dpi relative to the final figure size. For digital halftones, 300 dpi is usually sufficient.

**Color illustrations:** Store color illustrations as RGB (8 bits per channel) in TIFF format.

#### ■ General information on data delivery

Please send us a zip file (text and illustrations in separate files) either:

→ Via ftp. springer.de (to our ftp.server; log-in "anonymous"; password: your e-mail address; further information in the readme file on the server)

→ By e-mail. (only suitable for small volumes of data)

→ or on any of the following media

- On a diskette [you may use .tar, .zip, .gzip (.gz), .sit, and compress (.Z)]
- On a ZIP cartridge
- On a CD-ROM

Please always supply the following information with your data: journal title, operating system, word processing program, drawing program, image processing program, compression program.

The file name should be memorable (e.g., author name), have no more than 8 characters, and include no accents or special symbols. Use only the extensions that the program assigns automatically.

#### 5 Electronic supplementary material

Electronic supplementary material (ESM) for an article printed in this journal will be published free of charge to subscribers on Springer's server <http://link.springer.de>. After acceptance by the journal's editors the data will be supplied as received from the author.

In the printed article, full reference will be given to the ESM and vice versa.

ESM may consist of:

- Original data that relate to the paper, e.g. tables, additional illustrations (color and black/white), etc.
- Information that is more convenient in electronic form.
- Information that cannot be printed: animations, video clips, sound recordings.

For details of acceptable formats, consult <http://link.springer.de/link/service/journals/10048/instr.htm>

#### 6 Proofreading

Authors should make their proof corrections on a printout of the pdf file supplied, checking that the text is complete and that all figures and tables are included. After online publication, further changes can only be made in the form of an Erratum, which will be hyperlinked to the article.

#### 7 Offprints

30 offprints of each contribution are supplied free of charge. Additional offprints are available at cost price, provided the order form is returned together with the corrected page proofs.

When you order offprints at cost price, you are entitled to receive in addition a pdf file of your article for your own personal use.

## Copyright Transfer Statement

The copyright to this article is transferred to Springer-Verlag (for U.S. government employees: to the extent transferable) effective if and when the article is accepted for publication. The copyright transfer covers the exclusive right to reproduce and distribute the article, including reprints, translations, photographic reproductions, microform, electronic form (offline, online) or any other reproductions of similar nature.

An author may make an article published by Springer-Verlag available on a personal home page provided the source of the published article is cited and Springer-Verlag is mentioned as copyright owner. Authors are requested to create a link to the published article in Springer's internet service. The link must be accompanied by the following text: The original publication is available at <http://link.springer.de>. Please use the appropriate URL and/or DOI for the article. Articles disseminated via SpringerLink are indexed, abstracted and referenced by many ab-

stracting and information services, bibliographic networks, subscription agencies, library networks, and consortia.

The author warrants that this contribution is original and that he/she has full power to make this grant. The author signs for and accepts responsibility for releasing this material on behalf of any and all co-authors.

The author's name and address will be added to Springer-Verlag's address pool.
