

These Guidelines are intended to be used by authors of CCOHTA health technology assessment (HTA) reports to provide:

a summary of how CCOHTA produces its HTA reports;

a standard CCOHTA Report Template to be used by authors

a bibliography of suggested HTA methodological guidelines and other resources

The aim of this document is not to develop a set of guidelines for the undertaking of HTA in general. Such guidelines already exist.

Author's Guidelines (MS Word)

Authors! This includes a template for writing your report.

Acknowledgments:

The Canadian Coordinating Office for Health Technology Assessment (CCOHTA) acknowledges Rod Taylor BSc MSc PhD, for his assistance in developing the original version of these guidelines. Dr. Taylor was at CCOHTA on secondment from the Department of Public Health & Epidemiology at the University of Birmingham in the United Kingdom in late 2000. He also reviewed the 2003 edition of the guidelines. CCOHTA acknowledges external experts across Canada who provided advice and comments on the 2000 edition of the guidelines and CCOHTA staff who contributed significantly to both editions.
