Each manuscript should include from three to five key words. Enclose originals for the illustrations in the style described below for one copy of the manuscript. Photocopies of the figures may accompany the remaining copies of the manuscript. Alternatively, you may send good quality copies with the manuscript, and send the originals immediately upon acceptance of the paper.

Enclose a separate page giving the preferred address of the contact author for correspondence and return of proofs. Please include a telephone number, fax number and e-mail address, if available.

The refereeing is done by anonymous reviewers.

Manuscript Style

1. Typeset, double or 1 1/2 space; use one side of sheet only.
2. The affiliation and e-mail address should be given for each author.
3. Use an informative title for the paper and include an abstract of 100 to 250 words at the head of the manuscript. The abstract should be a carefully worded description of the problem addressed, the key ideas introduced, and the results. Abstracts will be printed with the article.
4. Provide a separate double-space sheet listing all footnotes, beginning with "affiliation of author" and continuing with numbered footnotes. Alternatively, this may be submitted after the paper has been accepted.
5. Acknowledgment of financial support may be given if appropriate.

Author Instructions Methodology and Computing In Applied Probability

6. References should appear in a separate bibliography at the end of the paper with items referred to by numerals and put in alphabetical order. References in the text should be written in the following style: Gumbel (1958). References should be complete, in the following style:

Style for papers: Author(s) initials followed by last name for each author, paper title, publication name, volume, inclusive page numbers, month and year.

Style for books: Author(s), title, publisher, location, year, chapter or page numbers (if desired).

Examples as follows:

(Journal article) R.A. Fisher and L.H.C. Tippett, "Limiting forms of the frequency distribution of the largest and smallest member of a sample," *Proc. Cambridge Phil. Soc.* 24, 180–190, 1928.

(Book) E.J. Gumbel, *Statistics of extremes*, Columbia University Press, New York, 1958.

(Conference proceedings) H.P. Nachtnebel and F. Konecny, "Risk estimation in partial duration series of seasonal floods" in *Stochastic and statistical methods in hydrological and environmental engineering, vol. 1, Extreme values: floods and droughts* (K.W. Hipel, ed), Springer, 73–83, 1994.

7. Type mathematical copy exactly as it should appear in print. Mark copy if it is not completely clear which style is intended. Journal style for letter symbols is as follows: variables, italic type (indicated by underline); constants, roman text type; matrices and vectors, boldface type (indicated by wavy underline). Use appropriate typeface. It will be assumed that letters in displayed equations are to be set in italic type unless you mark them otherwise. All letter symbols in text discussion must be marked if they should be italic or boldface. Indicate best breaks for equations in case they will not fit on one line.

Illustration Style

1. Originals for illustrations should be sharp, noise-free, and of good contrast. We regret that we cannot provide drafting or art service.
2. Each figure should be mentioned in the text and numbered consecutively using Arabic numerals. Define any acronyms used in the figure. Specify the desired location of each figure in the text. Each figure must have a caption. Proper style for captions, e.g., "Figure 1. Probability of first maximum depth region being the optimum."
3. Number each table consecutively using Arabic numerals. Please label any material that can be typeset as a table, reserving the term "figure" for material that has been drawn. Specify the desired location of each table in the text. Type a brief title above each table.
4. All lettering should be large enough to permit legible reduction.
5. Suggested figure formats: TIFF, GIF, EPS, PPT, and Postscript. Files should be at least 300 dpi.

Springer Open Choice

In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer now provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular subscription-based article, but in addition is made available publicly through Springers online platform SpringerLink. To publish via Springer Open Choice, upon acceptance please visit www.springeronline.com/openchoice to complete the relevant order form and provide the required payment information. Payment must be received in full before publication or articles will publish as regular subscription-model articles. We regret that Springer Open Choice cannot be ordered for published articles.
