The International Journal of Cardiovascular Imaging
X-Ray Imaging, Echocardiography, Nuclear Cardiology and
Magnetic Resonance

Editor-in-Chief: J.H.C. Reiber

ISSN: 1569-5794 (print version)

ISSN: 1573-0743 (electronic version)

Journal no. 10554

Springer Netherlands

Online Manuscript Submission

Springer now offers authors, editors and reviewers of *International Journal of Cardiovascular Imaging* the option of using our fully web-enabled online manuscript submission and review system. To keep the review time as short as possible (no postal delays!), we encourage authors to submit manuscripts online to the journal's editorial office. Our online manuscript submission and review system offers authors the option to track the progress of the review process of manuscripts in real time.

The online manuscript submission and review system for *International Journal of Cardiovascular Imaging* offers easy and straightforward log-in and submission procedures. This system supports a wide range of submission file formats: for manuscripts - Word, WordPerfect, RTF, TXT and LaTeX; for figures - TIFF, GIF, JPEG, EPS, PPT, and Postscript.

NOTE: By using the online manuscript submission and review system, it is NOT necessary to submit the manuscript also in printout + disk. In case you encounter any difficulties while submitting your manuscript on line, please get in touch with the responsible Editorial Assistant by clicking on "CONTACT US" from the tool bar.

Manuscripts should be submitted to: <http://caim.edmgr.com>

Manuscript requirements

Manuscripts should be written in standard English, in accordance with the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals" (for information about these requirements see: *New Engl J Med* 1991; 342(6)). Any effort you make to ensure that the language is corrected before submission is appreciated. This will greatly improve the legibility of your paper if English is not your first language. All pages (including the tables, figures, legends and references) should be numbered. The manuscript should be arranged in the following order:

Title page

- Title of the article, which should be concise but informative.
- Subtitle (this may be used to supplement and thereby shorten an excessively long main title).
- Full name of each author, with highest academic degree(s). (if more than one author, use '&' before the last name). (Authorship. All persons designated as authors should qualify for authorship. The order of authorship should be a joint decision of the coauthors. Each author should have participated sufficiently in the work to take public responsibility for the content.)
- Institutional affiliation(s) to which the work should be attributed.

Keywords/Abstracts/Abbreviations

Key words: 3 to 6 key words or short phrases, in alphabetical order, that will assist indexers in cross-indexing the article and may be published with the abstract. Use terms from the medical subject headings (MeSH) list of Index Medicus.

Abstracts: Of no more than 250 words.

Abbreviations: Arranged alphabetically, only those which are not familiar and/or commonly used.

Main text

The text of observational and experimental articles is usually - but not necessarily - divided into sections with the headings Introduction, Methods, Results, and Discussion.

Ethics

When reporting experiments on human subjects indicate whether the procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional or regional) or with the Declaration of Helsinki (1964) of the World Medical Association (amended in 1975 and 1983), published in 'Philosophy and practice of medical ethics', *British Medical*

Association, 1988. Do not use patients' names, initials, or hospital numbers, especially in any illustrative material. When reporting experiments on animals indicate whether the institution's or the National Research Council's guide for, or any national law on, the care and use of laboratory animals was followed.

Statistics

Describe statistical methods with enough detail to enable a knowledgeable reader with access to the original data to verify the reported results.

References

Number references consecutively in the order in which they are first mentioned in the text. Identify references in text, tables, and legends by Arabic numerals in parentheses. References cited only in tables or in legends to figures should be numbered in accordance with a sequence established by the first identification in the text of the particular table or illustration. Use the style of the examples, which are based with slight modifications on the formats used by the U.S. National Library of Medicine in Index Medicus. The titles of journals should be abbreviated according to the style used in Index Medicus. Consult List of Journals Indexed in Index Medicus, published annually as a separate publication by the library and as a list in the January issue of Index Medicus. Try to avoid using abstracts as references: "unpublished observations" and "personal communications" may not be used as references, although references to written, not oral, communications may be inserted (in parentheses) in the text. Include among the references papers accepted but not yet published; designate the journal and add "In press." Information from manuscripts submitted but not yet accepted should be cited in the text as "unpublished observations" (in parentheses). The references must be verified by the author(s) against the original documents.

Examples of correct forms of references

Articles in journals

(1) *Standard journal article (List all authors, but if the number exceeds six give six followed by et al.)*

You CH, Lee KY, Chey RY, Menguy R. Electrogastrographic study of patients with unexplained nausea, bloating and vomiting. *Gastroenterology* 1980 Aug;79(2):311-4.

As an option, if a journal carries continuous pagination throughout a volume the month and issue number may be omitted: You CH, Lee KY, Chey RY, Menguy R. Electrogastrographic study of patients with unexplained nausea, bloating and vomiting. *Gastroenterology* 1980;79:311-4.; Goate AM, Haynes AR, Owen MJ, Farrall M, James LA, Lai LY, et al. Predisposing locus for Alzheimer's disease on chromosome 21. *Lancet* 1989;1:352-5.

(2) *Organisation as author*

The Royal Marsden Hospital Bone-marrow Transplantation Team. Failure of syngeneic bone-marrow graft without preconditioning in post-hepatitis marrow aplasia. *Lancet* 1977;2:742-4.

(3) *No author given*

Coffee drinking and cancer of the pancreas [editorial]. *BMJ* 1981;283:628.

(4) *Article in a foreign language*

Unpublished material

(35) In press

Lillywhite HB, Donald JA. Pulmonary blood flow regulation in an aquatic snake. *Science*. In press.

Tables

Type each table double-spaced on a separate sheet. Do not submit tables as photographs. Number tables consecutively in the order of their first citation in the text and supply a brief title for each. Give each column a short or abbreviated heading. Place explanatory matter in footnotes, not in the heading. Explain in footnotes all nonstandard abbreviations that are used in each table. Identify statistical measures of variations such as standard deviation and standard error of the mean.

Illustrations

Electronic versions of your figures must be supplied. For vector graphics, EPS is the preferred format. For bitmapped graphics, TIFF is the preferred format. The following resolutions are optimal: line figures - 600 - 1200 dpi; photographs - 300 dpi; screen dumps - leave as is. Color figures can be submitted in the RGB color system. Font-related problems can be avoided by using standard fonts such as Times Roman, Courier and Helvetica. All photographs, graphs and diagrams should be referred to as a 'Figure' and they should be numbered consecutively (1, 2, etc.). Multi-part figures ought to be labeled with lower case letters (a, b, etc.). Please insert keys and scale bars directly in the figures. Relatively small text and great variation in text sizes within figures should be avoided as figures are often reduced in size. Figures may be sized to fit approximately within the column(s) of the journal.

If photographs of persons are used, either the subjects must be identifiable or their pictures must be accompanied by written permission to use the photograph. Figures should be numbered consecutively according to the order in which they have been first cited in the text. If a figure has been published acknowledge the original source and submit written permission from the copyright holder to reproduce the material. Permission is required irrespective of authorship or publisher, except for documents in the public domain.

Color figures may be printed at the author's expense. Please indicate at submission which figures should be printed in color, the number of color pages you prefer and to which address we can send the invoice. In addition, please specify if figures are to appear together on a color page.

Legends for Illustrations

Provide a detailed legend (without abbreviations) to each figure, refer to the figure in the text and note its approximate location in the margin. Please place the legends in the manuscript after the references, starting on a separate page with Arabic numerals corresponding to the illustrations. When symbols, arrows, numbers, or letters are used to identify parts of the illustrations, identify and explain each one clearly in the legend. Explain the internal scale and identify method of staining in photomicrographs.

Units of Measurement

Measurements of length, height, weight, and volume should be reported in metric units (meter, kilogram, or liter) or their decimal multiples. Temperatures should be given in degrees Celsius. Blood pressures should be given in millimeters of mercury. All hematologic and clinical-chemistry measurements should be reported in the metric system in terms of the international System of Units (SI). Editors may request that alternative or non-SI units be added by the authors before publication.

Expedited Review

Manuscripts reviewed and rejected by other journals can be considered on an expedited basis if: the original manuscript is provided together with a revised manuscript, the original reviews are provided, the authors submit a detailed cover letter discussing the original critiques and the way in which the revised manuscript has addressed the concerns.

Off prints

The authors will receive 50 off prints free of charge. Order information for additional off prints will be sent with the proofs.

Springer Open Choice

In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer now provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular subscription-based article, but in addition is made available publicly through Springer's online platform SpringerLink. To publish via Springer Open Choice, upon acceptance please visit www.springeronline.com/openchoice to complete the relevant order form and provide the required payment information. Payment must be received in full before publication or articles will publish as regular subscription-model articles. We regret that Springer Open Choice cannot be ordered for published articles.
