

European Journal of Wildlife Research" publishes review articles, original contributions, and short communications focusing on all aspects of wildlife:

Reviews

should cover a topic of current interest and present novel insights or conclusions.

Reviews should include at least the following sections: Abstract, Introduction, Discussion / Conclusions, and References.

Original papers

must present scientific results that are essentially new and that have not been published or are not being considered for publication elsewhere.

Short Communications

should also report novel results. Their length is limited to 15 000 characters including spaces and 2 figures or tables.

Authors are requested to submit three hardcopies of the manuscript; a further copy should be submitted in electronic form (3.5" diskette, zip, CD-ROM, or attached to an e-mail, see "General information on data delivery" below). Authors should retain an additional copy. The editorial decision about acceptance, revision or rejection of a manuscript is based on the reviewers' reports. Manuscripts must be submitted to the Editorial Office:

Editorial office

Dr. Walburga Lutz
Institute for Wildlife Research
Pützchens Chaussee 228
53229 Bonn
Germany
e-mail: walburga.lutz@loebf.nrw.de

Legal requirements

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract, or as part of a published lecture, or thesis); that it is not under consideration for publication anywhere else; that its publication has been approved by all co-authors, if any, as well as by the responsible authorities - tacitly or explicitly - at the institute where the work has been carried out. The publisher will not be held legally responsible should there be any claims for compensation.

The "Copyright Transfer Statement" has to be signed and faxed to the publisher together with the corrected proofs (see below) with which it will be provided by the publisher shortly after the manuscript has been accepted for publication.

Manuscript preparation

All manuscripts are subject to peer review and copy editing.

Manuscripts must be written in English and should be typed in double-line spacing throughout with at least 2.5 cm (1 inch) margins.

Use a normal, plain font (e.g., Times New Roman) for text.

Use the automatic page numbering function to number the pages.

For indents use tab stops or other commands, not the space bar.

Use the equation editor of your word processing program or MathType for equations.

Abbreviations should be defined at first mention in the abstract and again in the main body of the

text and used consistently thereafter.

Essential footnotes to the text should be numbered consecutively and placed at the bottom of the page to which they refer.

Lines should be numbered consecutively throughout the text.

Please arrange your manuscript as follows:

Title page

Including name(s) of author(s), a concise and informative title, affiliation(s) of the author(s), e-mail address, telephone and fax numbers of the corresponding author. The title of papers focusing on a particular species should include both the genus/species name and the common name.

Abstract

Each paper must be preceded by an abstract presenting the most important results and conclusions in no more than 250 words. Please add 3-5 key words that do not appear in the title.

Introduction

Materials and methods

Results

Discussion

Acknowledgements (if applicable)

Please include, at the end of the acknowledgements, a declaration that the experiments comply with the current laws of the country in which they were performed. The Chief Editor reserves the right to reject manuscripts that do not comply with the above-mentioned requirement. The author will be held responsible for false statements or for failure to fulfil the above-mentioned requirements.

References

Literature citations in the text should indicate the author's surname with the year of publication in parentheses, e.g. Carlin (1992); Brooks and Carlin (1992). If there are more than two authors, only the first should be named, followed by "et al."

References at the end of the paper should be listed in alphabetical order by the first author's name. If there is more than one work by the same author or team of authors in the same year, a, b, etc. is added to the year both in the text and in the list of references.

*Journal papers: name(s) and initial(s) of all authors; year; full title; journal title abbreviated in accordance with international practice; volume number; first and last page numbers

Example:

Rivals F, Kacimi S, Moutoussamy J (2004) Artiodactyls, favourite game of prehistoric hunters at the Caune de l'Arago Cave (Tautavel, France). Opportunistic or selective hunting strategies? *E J Wildl Res* 50:25-32

If available, the Digital Object Identifier (DOI) of the cited literature should be added at the end of the reference in question.

Example:

Russell AJM, Storch I (2004) Summer food of sympatric red fox and pine marten in the German Alps. *E J Wildl Res* DOI 10.1007/s10344-004-0041-4

*Single contributions in a book:

name(s) and initial(s) of all authors; year; title of article; editor(s); title of book; edition; volume number; publisher; place of publication; page numbers

Example:

Schams D, Barth B, Heintze-Mutz EM, Pflaum G, Karg H (1991) Antler growth in roe deer: Effects of casting and correlations with growth hormone and insulin like growth factor I. In: Brown, RD (ed.) *The biology of deer*. Springer, New York: pp. 505-510

***Book:**

name and initial(s) of all authors; year; title; publisher; place of publication

Example:

McGarigal K, Cushman S, Stafford S (2000) *Multivariate Statistics for Wildlife and Ecology Research*. Springer, Berlin Heidelberg New York

Tables and figures

Tables must be numbered consecutively with arabic numerals and submitted separately from the text. They should have a heading explaining any abbreviation used in that table. Footnotes to tables should be indicated by superscript lower-case letters.

Illustrations must be restricted to the minimum needed to clarify the text. All figures (photographs, graphs or diagrams) should be cited in the text, and numbered consecutively throughout. Figure parts should be identified by lower-case roman letters (a, b, etc.). If illustrations are supplied with uppercase labeling, lower-case letters will still be used in the figure legends and citations.

Figure legends must be brief, self-sufficient explanations of the illustrations. The legends should be placed at the end of the text. Submit all figures as separate files and do not integrate them within the text.

Line drawings

Inscriptions should be legible, with initial capital letters and appropriately scaled to the size of the drawing. Letters 2 mm high are recommended. Scanned line drawings should be digitized with a resolution of 800 dpi relative to the final figure size.

Computer drawings

Computer drawings are acceptable provided they are of comparable quality to line drawings (minimum resolution of 300 dpi). Computer-drawn curves and lines must be smooth. Lettering must be of high quality; Helvetica is the preferred font. Lettering fonts must be consistent within and among all figures.

Halftone illustrations (black and white and color)

Sharp, well-contrasted photographic prints trimmed at right angles and in the desired final size

should be submitted. Please indicate the top on the back. Magnification should be indicated by scale bars. For scanned halftone illustrations, a resolution of 300 dpi is usually sufficient, TIFF is the preferred file format.

Color illustrations

Color figures will always be published in color in the online version. In print, however, they will only appear in color if the author agrees to make a contribution of Euro 950/US \$ 1,150 (plus VAT) per article. Otherwise the figures will be printed in black and white.

Save color illustrations as RGB (8 bits per channel) in TIFF format.

Plates

Several figures or figure parts should be grouped in a plate on one page.

Vector graphics

Fonts used in the vector graphics must be included. Please do not draw with hairlines. The minimum line width is 0.2 mm (i.e., 0.567 pt) relative to the final size. EPS is the preferred file format. EPS files must always contain a preview in TIFF of the figure.

Size of figures

The figures, including legends, should either match the column width (86 mm) or the print area of 176 x 236 mm. In case reduction is absolutely necessary, please state the alternative scale desired. The publisher reserves the right to reduce or enlarge illustrations.

General information on data delivery

Please send your data, preferably a zip file (text and illustrations in separate files, unencoded) to the Chief Editor either:

by e-mail (only suitable for small file sizes)

or on any of the following media:

- On a diskette [you may use .tar, .zip, .gzip (.gz), .sit, and compress (.Z)]
- On a ZIP cartridge
- On a CD-ROM

Please save your file in two different formats:

RTF (Rich Text Format) or Microsoft Word compatible formats

PDF (a single PDF file including text, tables and figures)

In case you have not sent electronic files of your manuscript together with the accepted version, you should send your data, preferably a zip file (text and illustrations in separate files, unencoded) to Springer-Verlag either:

Via [ftp.springer.de](ftp://ftp.springer.de) (to our ftp.server; log-in "anonymous"; password: your e-mail address; further information in the readme file on the server)

or by e-mail (only suitable for small volumes of data)

Please always supply the following information with your data: journal title, manuscript number, operating system, word processing program, drawing program, image processing program, compression program.

The file name should be memorable (e.g., author name), have no more than 8 characters, and include no accents or special symbols. Use only the extensions that the program assigns automatically.

Electronic Supplementary Material

Electronic Supplementary Material (ESM) for a paper will be published in the electronic edition of this journal provided the material is:

submitted in electronic form together with the manuscript

accepted after peer review

ESM may consist of:

information that cannot be printed: animations, video clips, sound recordings (use QuickTime, .avi, .mpeg, animated GIFs, or any other common file format)

information that is more convenient in electronic form: sequences, spectral data, etc.

large quantities of original data that relate to the paper, e.g. additional tables, large numbers of illustrations (color and black & white), etc.

Legends must be brief, self-sufficient explanations of the ESM. ESM is to be numbered and referred to as S1, S2, etc.

After acceptance for publication, ESM will be published as received from the author in the online version only. Reference will be given in the printed version.

Proofreading

Authors are informed by e-mail that a temporary URL has been created from which they can obtain their proofs. Proofreading is the responsibility of the author. Authors should make their proof corrections (formal corrections only) on a printout of the pdf file supplied, checking that the text is complete and that all figures and tables are included. Substantial changes in content, e.g. new results, corrected values, title and authorship are not allowed without the approval of the responsible editor. In such a case please contact the Editorial Office before returning the proofs to the publisher. After online publication, corrections can only be made in exceptional cases and in

the form of an Erratum, which will be hyperlinked to the paper.

Online First

Papers will be published online about one week after receipt of the corrected proofs. Papers published online can already be cited by their DOI. After release of the printed version, the paper can also be cited by issue and page numbers.

Offprints

Thirty offprints of each contribution are supplied free of charge. If you wish to order additional offprints you must return the order form which is provided with the proofs and return it together with the corrected proofs.

Springer Open Choice

In addition to the traditional publication process, Springer now provides an alternative publishing option: Springer Open Choice (Springer's open access model). A Springer Open Choice article receives all the benefits of a regular article, but in addition is made freely available through Springer's online platform SpringerLink. To publish via Springer Open Choice upon acceptance of your manuscript, please click on the link below to complete the relevant order form and provide the required payment information. Payment must be received in full before free access publication.
