

Instructions to authors

Authors should submit their manuscripts to **Molecular Genetics and Genomics** online to facilitate even quicker and more efficient processing. Electronic submission substantially reduces the editorial processing and reviewing times and shortens overall publication times.

Please log directly onto the site

<http://mgg.manuscriptcentral.com>

and upload your manuscript following the onscreen instructions.

Molecular Genetics and Genomics has one central editorial office which deals with all manuscripts. After submission, manuscripts are allocated to one of the Associate Editors. If you wish a special handling editor to handle your manuscript, please specify the name in your „comments“ field during online manuscript submission.

Contact:

Institut für Mikrobiologie
Heinrich-Heine-Universität Düsseldorf
Universitätsstraße 1
40225 Düsseldorf, Germany
FAX: + 49-211-811-5370
Email: phardy@uni-duesseldorf.de (Assistant Editor)
Email: cornelis.hollenberg@uni-duesseldorf.de (Managing Editor)

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication anywhere else; that its publication has been approved by all co-authors, if any, as well as by the responsible authorities – tacitly or explicitly – at the institute where the work has been carried out. The author(s) transfer(s) the copyright to his/her article to Springer-Verlag effective if and when the article is accepted for publication. The copyright covers the exclusive and unlimited rights to reproduce and distribute the article in any form of reproduction (printing, electronic media or any other form); it also covers translation rights for all languages and countries. For U.S. authors the copyright is transferred to the extent transferable. The author(s) guarantee(s) that the manuscript will not be published elsewhere in any other language without the consent of the copyright holders. Please send a **Copyright Transfer Statement** (see printed journal of the electronic version on <http://springeronline.com>), completed and signed by the corresponding author, by normal mail or FAX to the journal office.

Original papers and **minireviews** are published. Papers should present substantial original work and should be structured as indicated below. Minireviews are normally commissioned by the Managing Editor, but prospective authors are welcome to propose topics.

Excess charges. There is a charge of Euro 76 or US\$ 83,60 plus 16% VAT, for each page **exceeding six printed pages** (18 manuscript pages including figures and tables) in length.

Manuscripts should be written double-spaced throughout, with a margin of at least 3 cm on either side. Springer offers a user-friendly word document template for writing your manuscript

which can be downloaded at <http://ftp.springer.de>. For further details of this template and for information on compiling a manuscript, consult the technical instructions for manuscripts and illustrations in electronic form (see printed journal or the electronic version on <http://www.springeronline.com/sgw/cda/frontpage/0,10735,5-111-2-68421-0,00.html>). Form and content should be carefully checked to exclude the need for corrections in proof. A charge will be made for changes introduced after the manuscript has been set in type. In view of the international readership of the journal, papers must be written in standard grammatical English; this is the responsibility of the author. Springer-Verlag will have papers language-edited if necessary.

Manuscripts should be organized in the following sequence:

The **title page** should include: the name(s) of the author(s), a concise and informative title (of 20 words at most), the affiliations and addresses of the authors, and FAX and e-mail addresses for the corresponding author:

The text should be preceded by a short **Abstract**, describing the principal results and conclusions. The Abstract should not contain any citations.

Immediately following the Abstract a set of not more than five **key words** should be provided.

Genus or species names, gene symbols and mathematical formulae should be written in *italics*.

Abbreviations should be defined when first mentioned in the text. Abbreviations should follow the rules and recommendations of the IUPAC-IUB Commission on Biochemical Nomenclature (CBN) and of the IUB Commission of Editors of Biochemical Journals (CEBJ).

The **Introduction** should be **brief** and outline the purpose of the work in the context of previous work in the field.

The **Materials and methods** section should follow the Introduction and provide enough information to permit repetition of the experimental work.

The **Results** should be presented concisely, avoiding, as far as possible, repetition of information presented in the Tables and Figures.

The **Discussion** should interpret the results and not repeat them. In short manuscripts it may be advantageous to combine Results and Discussion into one section.

The list of **References** should include **only** published work and work that is in press. **Citations** in the text should be by author and year (Game 1983; Carlson and Chorey 1996; Röder et al. 1997). Works by two authors should be listed alphabetically according to co-author. Works by more than two authors should be listed chronologically. Where several works by the same author(s) have appeared in the same year, a, b, c, etc. should be added as necessary, both in the text and in the list. As a rule, all authors should be listed; punctuation marks should be restricted to parentheses (year), commas (author lists) and colons (vol:page numbers).

Examples:

Röder MS, Sorrells ME, Tanksley SD (1992) 5S ribosomal gene clusters in wheat: Pulsed field gel electrophoresis reveals a high degree of polymorphism. *Mol Gen Genet* 232:215–220

Game JC (1983) Radiation-sensitive mutants and repair in yeast. In: Spencer JFT, Spencer DM, Smith ARW (eds) *Yeast genetics: Fundamental and applied aspects*. Springer-Verlag, New York, pp 109–137

Where necessary, **unpublished results** obtained by any of the paper's authors may be cited as such in the text, listing all the authors involved. The unpublished results of others may be cited as personal communications. However, in this case the final version must be accompanied by a note of consent, signed by each author cited.

Acknowledgements should include a declaration that the work has been carried out in compliance with the current laws governing genetic experimentation in the country concerned.

Figure legends should be brief self-sufficient explanations of the illustrations and should not repeat passages from the Materials and methods. The legends should be placed at the end of the manuscript following the References. For graphs, include a symbol legend within the figure rather than in the text of the legend.

Tables should be printed on separate pages at the end of the manuscript, and should be numbered with Arabic numerals in the order of their occurrence in the text (Table 1, Table 2 etc.). Each Table should be given a brief title, indicating the contents. Tables should be clearly structured. Explanatory matter should be kept to a minimum and included as footnotes, keyed to the contents by superscripts.

Figures should not be regarded as mere illustrations, and their number and size should be kept to a minimum. All figures should be numbered in the order of their first mention in the text.

Line drawings: Please submit good-quality prints. The inscriptions should be clearly legible.

Half-tone illustrations (black and white and colour): Please submit well-contrasted photographic prints with the top indicated on the back. Scale bars should indicate magnification.

Size of figures: The figures should match the width of either the column (86 mm) or the type area (178 mm). The maximum length is 241 mm.

For **color illustrations** the authors will be expected to make a contribution of (Euro 485, US\$ 574, plus 16% VAT) towards the extra costs, irrespective of the number of color figures.

Tables should have a title and a legend explaining any abbreviations used. Footnotes to tables should be indicated by superscript lower-case letters (or asterisks for significance values and other statistical data).

Digital images should be compiled in accordance with the technical instructions for manuscripts and illustrations.

Sequences: Papers referring to sequence data can only be accepted when an accession number has been obtained from a database such as EMBL or Genbank. Detailed instructions for sequence submissions can be obtained from the corresponding databases. The accession number may be cited in the Materials and methods section, or as a footnote. Nucleotide sequences will not usually be published, unless their presentation is required to clarify particular points of biological interest. Sequence alignments should not take up more than 1 printed page.

Electronic submission of final version

Please send only the final version of the article, as accepted by the editors.

Preparing your manuscript

Text

The template is available:

* via ftp:

Address: ftp.springer.de/

User ID: ftp

Password: your own e-mail address

– Directory: /pub/Word/journals

– File names: sv-journ.zip or sv-journ.doc and sv-journ.dot

* via browser:

– ftp://ftp.springer.de/pub/Word/journals

The zip file should be sent uuencoded.

Layout guidelines

1. Use a normal, plain font (e.g., Times Roman) for text.

Other style options:

– for textual emphasis use *italic* types.

– for special purposes, such as for mathematical vectors, use **boldface** type.

2. Use the automatic page numbering function to number the pages.

3. Do not use field functions.

4. For indents use tab stops or other commands, not the space bar.

5. Use the table functions of your word processing program, not spreadsheets, to make tables.

6. Use the equation editor of your word processing program or MathType for equations.

7. Place any figure legends or tables at the end of the manuscript.

8. Submit all figures as separate files and do not integrate them within the text.

Data formats

Save your file in two formats:

1. RTF (Rich Text Format) or Microsoft Word compatible formats

2. pdf (a single pdf file including text, tables and figures)

Illustrations

The preferred figure formats are EPS for vector graphics exported from a drawing program and TIFF for halftone illustrations. EPS files must always contain a preview in TIFF of the figure. The file name (one file for each figure) should include the figure number. Figure legends should be included in the text and not in the figure file.

• *Scan resolution*: Scanned line drawings should be digitized with a minimum resolution of 800 dpi relative to the final figure size. For digital halftones, 300 dpi is usually sufficient.

• *Color illustrations*: Store color illustrations as RGB (8 bits per channel) in TIFF format.

• *Vector graphics*: Fonts used in the vector graphics must be included. Please do not draw with hairlines. The minimum line width is 0.2 mm (i.e., 0.567 pt) relative to the final size.

General information on data delivery

Please send a zip file (text and illustrations in separate files) either:

* via ftp.springer.de (to our ftp.server; log-in “anonymous”; password: your e-mail address; further information in the readme file on the server)

* by e-mail (only suitable for small file sizes)

* or on any of the following media:

– On a diskette [you may use .tar, .zip, .gzip (.gz),

.sit, and compress (.Z)]

– On a ZIP cartridge

– On a CD-ROM

Please always supply the following information with your data: journal title, operating system, word processing program, drawing program, image proces-

sing program, compression program. The file name should be memorable (e.g., author name), have no more than 8 characters, and include no accents or special symbols. Use only the extensions that the program assigns automatically.

Electronic supplementary material (ESM) for an article in the journal will be published in SpringerLink provided the material is:

– submitted to the Editor(s) in electronic form together with the paper and is subject to peer review.

– accepted by the journals Editor(s)

ESM may consist of

– Informations that cannot be printed: animations, video clips, sound recordings

– information that is more convenient in electronic form: sequences, spectral data etc.

– large original data that relate to the paper, e.g. additional tables, illustrations (color and black & white), etc.

After acceptance by the journals Editor(s) ESM will be published as received from the author in the online version only. Reference will be given in the printed version.

Availability of materials. It is understood that by publishing a paper in Molecular Genetics and Genomics the authors agree to make available to colleagues in academic research any genetic lines (organisms or cells), nucleic acids, antibodies etc. that were used in the research reported and are not available from commercial suppliers.

25 offprints of each contribution are supplied free of charge. If you wish to order additional offprints you must return the order form with the corrected proofs. You are then entitled to receive a pdf file of your article for your own personal use.
