

## Instructions for Authors

**Analytical and Bioanalytical Chemistry** is partly owned by the German Chemical Society (Gesellschaft Deutscher Chemiker, GDCh), the French Chemical Society (Société Française de Chimie, SFC), the Spanish Society for Analytical Chemistry (Sociedad Española de Química Analítica, SEQA) and the Royal Spanish Society of Chemistry (Real Sociedad Española de Química, RSEQ) and is published by Springer-Verlag Heidelberg. The central editorial office of **Analytical and Bioanalytical Chemistry** is located at Springer-Verlag Heidelberg.

Manuscripts should be sent preferably and in electronic form to the following address:

**Analytical and Bioanalytical Chemistry**  
Springer-Verlag  
Tiergartenstrasse 17  
69121 Heidelberg, Germany  
Tel.: +49-6221-4878377  
Fax: +49-6221-4878629  
e-mail: abc@springer.de

**Analytical and Bioanalytical Chemistry** is published as a Springer-Online-first publication. **Online First** articles are published within the Springer service in a temporary directory. For the publication in the printed version, only the final page numbers, the citation line and the online publication date will be added.

To allow speedy publication manuscripts should be prepared carefully in accordance with the following points.

1. **Electronic submission:** Authors are encouraged to submit their articles online. Please log directly onto the site <http://abc.manuscriptcentral.com> and upload your manuscripts following the instructions given on the screen. Please note: if you have submitted to or reviewed for **Analytical and Bioanalytical Chemistry** before, please hit the "check for existing account" button. You will then receive an automatic e-mail with your user id and password. Otherwise please create a new account and then follow the instructions given on the screen.
2. Manuscripts submitted by regular mail should be accompanied by the electronic version on disk (saved in one file including text and figures), preferably in Word or rtf format. E-mail and fax numbers should be given together with the address.
3. Manuscripts must be in the English language. With their submission, authors may suggest potential reviewers for their work.
4. Manuscripts must be accompanied by the *Copyright Transfer Statement* (the form is regularly published in this journal).
5. Only *new*, previously unpublished results given in concise form, will be accepted. Known facts should only be briefly mentioned, with appropriate literature citations.
6. Every manuscript should be preceded by an *abstract* and up to six *keywords*. The abstract should be suitable for direct publication in current awareness publications or information retrieval systems, and should include the main points of the paper.
7. Citations in the text should be by numbers in square brackets.
8. *References* should be numbered in the order of appearance in the text.  
*Examples:*
  1. Saito Y, Jinno K (2002) *Anal Bioanal Chem* 373:325–331
  2. Manz A, Becker H (1999) (eds) *Microsystem technology in chemistry and life sciences*. Springer, Berlin Heidelberg New York
9. IUPAC rules must be used for designating chemical compounds. In some fields, e.g. pharmacology, generic or INN names may be used. The use of tradenames alone to identify such compounds as medicines or pesticides is not allowed.

10. Quantities and units must be designated using SI units whenever possible (e.g. Pa instead of bar). The metric system is to be used. Concentrations should be given exclusively as mass or amount-of-substance concentrations. The use of ppm, ppb, ppt, volume and weight percentages etc. is to be avoided.
11. *Figures and tables.* All figures (photographs, graphs or diagrams) and tables should be cited in the text, and each numbered consecutively throughout. Figure parts and footnotes to tables should be identified by lower-case roman letters. The same data should not be given in both tables and graphs. *Color illustrations* will be printed at no extra charge to the author if approved by the editor. *Captions to the figures* should be given in a separate list.
12. *Line drawings.* Inscriptions should be clearly legible. *Half-tone illustrations* should be well contrasted in the desired final size.
13. *Electronic Supplementary Material.* Extended tables, color figures, 3-d data sets, molecular structures, video clips, multimedia, audio recordings, etc., that are not essential for the understanding of a printed article but yet of interest can be put on Springer-Verlag's server. Such material has to be submitted in electronic form and will also be reviewed. Reference to this material will be given with the printed article.
14. Authors should make their proof corrections on a printout of the pdf file supplied, checking that the text is complete and that all figures and tables are included. After online publication, further changes can only be made in the form of an Erratum, which will be hyperlinked to the article. Corrected *proofs* should be returned to the production editor without delay.
15. After print publication authors receive two copies of the issue free of charge. Orders for *offprints* can be placed by returning the order form with the corrected proofs. When you order offprints, you are entitled to receive in addition a pdf file of your article for your own personal use.
16. The author(s) transfer(s) the copyright to an article to Springer-Verlag effective if and when the article is accepted for publication. The copyright covers the exclusive and unlimited rights to reproduce and distribute the article in any form of reproduction (printing, electronic media or any other form); it also covers translation rights for all languages and countries. For U.S. authors the copyright is transferred to the extent transferable.
