Guide for Authors

ÖKOLOGISCHE PERSPEKTIVEN FÜR WISSENSCHAFT UND GESELLSCHAFT ECOLOGICAL PERSPECTIVES FOR SCIENCE AND SOCIETY

June 2013

is an inter- and transdisciplinary journal for scientists and other interested parties concerned with the causes and analyses of environmental and sustainability problems and their solutions.

In detail, GAIA's transdisciplinary focus implies that:

- Original papers begin with an introduction suitable for non-specialists.
- The significance of the topic in the environmental context is emphasised.
- The style is discursive, short and precise.
- Papers end with practical conclusions.

GAIA appeals to a heterogeneous and critical audience. Articles published in *GAIA* are chosen for their scientific content as well as their ease of comprehension and significance to readers of various scientific disciplines. Accepted papers are edited in agreement with the authors.

Papers submitted to *GAIA* are peer-reviewed. Details of the reviewing process are outlined in the sections that follow. Invited papers are subjected to the same reviewing process and an invitation is no guarantee of publication. Currently, the rejection rate is more than 50 percent.

GAIA is comprised of three primary sections. The authors should identify to which section they plan to submit their paper and read the appropriate guidelines for submission below.

With *GAIA* Hybrid Open Access, we offer our authors to have their article made publicly available against a basic charge.

Submission of Papers to the Following Sections

Forum

In the *Forum* section, original papers are published including essays, pointed expressions of opinion and reactions to articles that have appeared in recent *GAIA* issues.

As such, the *Forum* aims to challenge current understandings by providing a "forum" to articulate substantiated opinions and controversial issues, to identify new problems, and to establish actual contexts. Generally, articles are double-blind peer reviewed.

Articles – including references – should not exceed the length of 22,000 characters (including spaces).

Research

Original scientific articles of environmental and sustainability research are published in the *Research* section. Additionally, *Research* contains review articles that place environmental problems and development in a broader context. Articles are subjected to a double-blind peer review and cross-read by at least one person foreign to the subject. Expert opinions are based on the article's scientific quality (e.g., theory, methods, literature relevant to the subject), on the quality of presentation (e.g., length, conciseness, style), on the novelty of empirical data, methods, theoretical analyses, interpretation and approaches to problem-solving besides the article's relevance for environmental sciences.

The non-expert reviewer will determine the transdisciplinarity of the synthesis, relevance in terms of action and comprehensibility of the manuscript.

General review papers are usually written upon invitation and in agreement with the editorial office. Authors who wish to submit review papers on their own initiative are advised to contact the editorial office in advance.

Research papers and review papers should not – including references – exceed the length of 32,000 and 40,000 characters, respectively (including spaces).

>

Design Reports

Design Reports focus on a challenge unique to inter- and transdisciplinary research projects: They deal with the configuration of a project in terms of its research and communication design. They are by no means reprints of the proposal but discuss the decisions and design principles critically. Design Reports are peer reviewed.

Design Reports can include photographs, charts, tables, and other visual material. They should not exceed 25,000 characters (including spaces and references).

Books

The *Books* section is dedicated to the presentation, discussion and review of new publications relevant to *GAIA*'s subject matter. Contributions to the *Books* section are usually written upon invitation and in agreement with the editorial office. Authors intending to write a book review on their own initiative are advised to contact the editorial office in advance.

Articles are examined by at least one of the editors of *GAIA*. If required, further expertise is requested.

Articles should not exceed the length of *3,800 characters* (including spaces).

Manuscript Preparation

Upon submission of an article to *GAIA* you enter into the following arrangements and you warrant on behalf of yourself and your co-authors:

- The article is *original*, has not been published in any other peer-reviewed journal, is not under consideration for publication by any other journal and does not infringe any existing copyright or any other third party rights.
- Articles in GAIA are being published under the Creative-Commons-License "CC 3.0 Attribution Unported":

http://creativecommons.org/licenses/by/3.0. The license permits unrestricted use, distribution, and reproduction in any medium, provided the original work is properly cited. By sending your article to *GAIA*, you agree to the publication of your article under this license. Please contact us if you do not want to have your article be published under CC 3.0.

If you consider submitting an article to *GAIA*, please proceed to our journal management system *www.oekom.de/ojs* (mailing addresses of the editorial offices can be found at the bottom of this document).

Technical Details

- GAIA is published in *colour print* and provides an exceptional opportunity to illustrate scientific work in the form of *pictures*, *charts*, *or maps*.
- Figures and tables must be numbered and should provide a short explanatory caption, which can be understood independent of the text. Figures and tables must be integrated into the text document. Additionally, all figures and tables should be submitted in separate files.
 - Diagrams, graphics and tables of the particular format must be saved in a graphic format (possible file extensions are .ai, .eps, .wmf or .cdr), or should be sent as original data (e.g., Microsoft Excel). Possible formats for photographs are a) glossy prints and b) files in TIFF or JPEG format (i.e., .tif or .jpg). All figures must have at least 300 dpi at desired size. Line drawings such as logos or graphs must have at least 900 dpi at the desired size.
- Papers for the *Research* and *Forum* sections should enclose a list of *keywords*; research papers additionally require an *abstract* (*max.* 1,100 characters including spaces). All articles should include a short *lead text* (research papers 250 characters including spaces, articles for *Forum* 600 characters including spaces and articles for *Books* 460 characters including spaces). Additionally, please include a selection of *suitable pictures/illustrations*, a short CV for each of the authors (i. e., first name, surname, date of birth, place of birth, university education, professional career, main field(s) of interest), and a *photograph* for each author (glossy prints or as file in TIFF or JPEG format with a resolution of at least 300 dpi at a size of 2 x 2.5 cm).
- The number of *references* should not exceed 40 (80 for review papers), the number of *footnotes* should not exceed *ten*. Quotations follow the *Author-Date System of the Chicago Manual of Style* (www.chicagomanualofstyle.org). Within the text, references appear in *brackets including name and date*. In case of more than three authors only the first author is indicated, followed by the addition "et al.".

The *complete list of references* appears at the end of the text. Please avoid the use of abbreviations of periodicals in the list of references. English titles of periodicals or books are written in small letters. In case of more than six authors only the first author is indicated followed by the addition "et al.". Further additions are translated according to the article's language (e.g., "Edited by" or "Herausgegeben von"; "accessed" or "abgerufen").

Please prepare your list of relevant references particularly with regard to *current, international* and *peer-reviewed literature,* where appropriate.

Examples for Quotation Form in the List of References and (in the Text)

If you are using the reference management software *EndNote*, you may use the *GAIA* EndNote Style for formatting your references (see www.oekom.de/zeitschriften/gaia/guide-for-authors.html).

(Tillmann forthcoming)

- The authors are responsible to obtain the necessary rights for quotations, pictures, etc.
- Charges for the acquisition of pictures as well as extraordinary expenditures for picture editing are borne by the authors.
- *GAIA* publication languages are *English* and *German*; submissions to the *Research* section are preferably in *English*. The authors are responsible for the linguistic quality. They are kindly asked to have their foreign-language articles corrected by a professional editing service. Manuscripts can be rejected due to inadequate linguistic quality.

What Happens when GAIA Receives an Article

- **1.** The editorial office confirms *receipt* of the manuscript. Within one month the authors will receive notification stating whether or not the article will be considered to be published.
- **2.** *Expertise*: If the article is under consideration for publication, the editorial office initiates a review process.
- **3.** Lectorate and revision:
 - a) *Research*: If the expert review is essentially positive, the *GAIA* editor will invite the authors to revise the article on the basis of the lectorate and the expert review. In the cases of acceptance, as well as rejection, the authors will receive the anonymous reviews.
 - b) *Forum* and *Books*: If the reviews, editorial and expert, prove to be essentially positive, the editorial office will invite the authors to revise the article on the basis of the reviews.

All authors are asked to indicate modifications within the revised version of the original text. Respectively, if a recommendation of a reviewer, an editor or the editorial office is not followed, the authors must provide an explanatory statement.

- **4.** *Open Access*: With *GAIA* Hybrid Open Access, we offer our authors to have their article made publicly available with full open access against a basic charge. Once your article is accepted for publication in *GAIA*, we will inform you about our option
- 5. Final revision: Fine adjustment in language, style and setting is completed by the authors in agreement with the editorial office. After final revision, the authors receive the galley proof of their paper. In the galley proof, only mistakes and printer's errors will be corrected. Any further changes will be charged to the authors.
- **6.** After publication, the first authors will be sent *five copies* of the respective *GAIA* issue as well as the electronic version of their article in PDF format.
