

Manuscript Submission

Materials submitted for publication in *Reliable Computing* may represent original articles, reviews, presentations of new hardware and software tools, book reviews, information on scientific meetings on relevant topics which are scheduled or have recently been held, etc. Responses, amendments, and additions to published materials can be submitted as letters to the editor.

Springer prefer articles submitted in word processing packages such as MS Word, WordPerfect, etc. running under operating systems MS DOS, Windows and Apple Macintosh, or in the file format LaTeX. Articles submitted in other software programs can also be accepted.

For submission in LaTeX, *Springer* have developed a Kluwer LaTeX class file, which can be downloaded from: <http://www.springeronline.com/authors/jrnstylefiles>

Use of this class file is highly recommended. Do not use versions downloaded from other sites. Technical support is available at: texhelp@springer-sbm.com. If you are not familiar with TeX/LaTeX, the class file will be of no use to you. In that case, submit your article in a common word processor format.

For the refereeing purposes, papers for publication should be initially submitted in three hard copies (and, if possible, in electronic copy by e-mail) to the Editor-in-Chief at the following address:

V.M. Nesterov
Box 52
195256 St Petersburg
Russia
Email: slnest@mail.ru
Phone: +7 812 5344120

All papers submitted for publication are subject to review, and may be admitted, rejected, or sent to the author for revision.

Manuscript Presentation

The journal's language is English. British English or American English spelling and terminology may be used, but either one should be followed consistently throughout the article.

The first page of the manuscript should contain the article title, author's name, current postal and e-mail addresses, and, if necessary, a running head (condensed version of the title) which should not exceed 60 characters. There should be a brief abstract (no more than 12 lines long).

References

References should be numbered and listed at the end of the article. A journal reference should comprise name(s), initial(s), full title of the paper, name of the journal, volume number, year of publication, and first and last pages. A book reference should comprise name(s), initial(s), full title, publisher's name, place and year of publication.

Figures

Figures can be either placed in the body of the text or supplied on separate sheets. In the latter case, the author should mark in the margin of the manuscript where the figures are to be inserted. For figures submitted as

Reliable Computing

computer files, PostScript (preferably) as well as PCX or TIF formats (black-and-white line figures – 600 – 1200 dpi; line figures with some grey or coloured lines – 600 dpi; photographs – 300 dpi; screen dumps – leave as is) are allowed.

Colour figures are published at the author's expense only.

Offprints

The authors of every published paper will receive 50 free offprints of their paper.

Springer Open Choice

In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer now provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular subscription-based article, but in addition is made available publicly through Springer's online platform SpringerLink. To publish via Springer Open Choice, upon acceptance please visit www.springeronline.com/openchoice to complete the relevant order form and provide the required payment information. Payment must be received in full before publication or articles will publish as regular subscription-model articles. We regret that Springer Open Choice cannot be ordered for published articles.
