

International Journal of Astrobiology

Editorial Policy

International Journal of Astrobiology publishes original papers and review articles on Astrobiology Science. News of interest to the astrobiology community and book reviews will also feature in each issue.

The fields covered include:

- Cosmic prebiotic chemistry
- Planetary evolution
- Search for planetary systems and habitable zones
- Origins, evolution and distribution of life
- Extremophile biology and experimental simulation of extraterrestrial environments
- Life Detection in our solar system and beyond
- Technologies and space missions for astrobiology, and planetary protection
- Human expansion, ecosystems beyond Earth and terraforming
- Intelligent life and societal aspects of astrobiology

There are no page charges or length restrictions. All articles are submitted to peer-review.

Submission of manuscripts

Contributions for consideration for publication, accompanied by a covering letter or email, should be submitted online at

http://mc.manuscriptcentral.com/submit_ija

Detailed instructions for submitting your manuscript online can be found at the submission website by clicking on the 'Instructions and Forms' link in the Resources section on the right hand side; and then clicking on the 'Online Submission Instructions for Authors' icon on the following page.

During the submission process authors will be asked to choose an appropriate Associate Editor for their paper. Areas of interest for the Associate Editors are as follows:

Dr. Simon Mitton – General Papers, Philosophy, Astronomy

Dr. Rocco Mancinelli – Extremophiles, Microbiology, Nitrogen Cycling

Professor Charles Cockell – Geomicrobiology, Microbial Mining, Characterisation Of Life In Impact And Volcanic Environments, Space Microbiology, Environmental And Space Exploration Ethics

Dr. Frances Westall – Origin Of Life In A Geological Context, Search For Life On Mars, Biosignatures Of Early Earth Sediments.

Submission of a paper to *International Journal of Astrobiology* implies that it represents an original contribution not previously published and that it is not currently being considered elsewhere; that the publication has been approved by all the authors and relevant authorities or institutions; and that the authors have been granted permission to reproduce any copyright material. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

Authors are invited to suggest up to three referees for their paper. However, the Editors reserve the right to select referees other than, or in addition to, those suggested.

On acceptance

After a paper has been accepted, authors should submit the final version electronically to facilitate typesetting, based on the guidelines for manuscript preparation detailed below.

Manuscript presentation

Manuscripts should be typed double spaced on one side of paper with a wide margin all round with all pages consecutively numbered. Papers should be in English. Either American or English conventions of spelling or grammar are acceptable as long as used consistently throughout except quotations and references. The typescript should follow the conventional form but must include: (a) A title page giving a concise but informative title; short running title for page headings; initial(s) and name(s) of the author(s); full institutional addresses for all the authors; and the name, address, telephone number, fax number, and e-mail address of the nominated Corresponding Author. (b) An Abstract (not more than 300 words) describing the main aims, results and conclusions of the work, and 5-10 keywords. The metric system must be used and SI units where appropriate. Unfamiliar abbreviations should be defined when first used.

Preparation of electronic manuscripts

Files should be prepared in Word. PC files should be named AB author surname.doc, with 8 characters only before the .doc. Mac files should be prepared as .rtf files and adopt the same sort of file name, Abauthorsurname.rtf. Any Maths expressed in Word will be reset.

If authors want to submit LaTeX2e papers, the standard article.cls class file should be used. When submitting LaTeX papers send a LaTeX printout, the TeX source file should be named IJAauthorsurname.tex, figure files should have a figure number in the file name IJAauthorsurname1.eps.

Preparation of electronic Tables and Figures

Unless tables are typed with tabs and without the use of the space bar the typesetter will reset these. Figure artwork should be submitted as eps files (with the same naming convention as above - ABauthor surname1.eps where the number is the figure number). For best results the originals should be scanned at 300dpi for halftones and 1200dpi for line artwork. Fine tints should be avoided as these close up in the reduction of the artwork. Artwork in colour should be left on the author's web site as a TIFF file, the url and a colour printout should be sent to the editor with the manuscript. All artwork files except colour can be emailed in the format above to the editor or sent on CD-ROM. The publisher cannot accept files in authors own graphics programmes.

References

In the text references should be made using the Harvard system (Author, date), with the full set of references grouped at the end of the paper in alphabetical order. Authors are responsible for the accuracy of their references. An abbreviated form of Harvard (without titles) can be used by those already familiar with this system.

References must be double-spaced.

Papers should be cited as: Burbidge, E.M., Burbidge, G. R., Fowler, W. A., Hoyle, F. 1957, *Rev. Mod. Phys.*, 29, pp. 547-650

Books should be cited as: Prialnik, D. 2000 *An Introduction to the Theory of Stellar Structure and Evolution*, Cambridge University Press, pp. 132-147.

Unpublished work should normally be referred to in the text in parentheses as, for example, 'private communication' or 'unpub. Ph.D. thesis, Univ. London, 1988', and not included in the reference list unless in the press.

Because the Journal is interdisciplinary, authors are requested not to use highly compact abbreviations for journal titles.

The inclusion of the title of the paper in the reference is optional.

Electronic Publication

Accepted papers will be published electronically at <http://journals.cambridge.org>. The electronic version may include features not found in the printed version, such as tabular matter and colour images.

Proofreading

First proofs may be read and corrected by contributors provided that they can guarantee to return the corrected proofs, by airmail or courier when appropriate, within four days of receipt. Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints

Corresponding authors will receive a PDF of their article upon publication. Print offprints may be purchased from the publisher if ordered at first proof stage.
