

Information for Authors

SCIENCE CHINA Information Sciences (Sci China Inf Sci) is a monthly peer-reviewed academic journal supervised by the Chinese Academy of Sciences, and co-sponsored by the Chinese Academy of Sciences and National Natural Science Foundation of China. Its primary mission is to encourage communication of basic and innovative research results of high quality in the fields of information sciences. The subject areas featured include computer science and technology, System Sciences, control science and engineering, information and communication engineering, electronic science and technology, etc. All papers should be intelligible for a broad scientific audience.

Contributions are invited from researchers all over the world.

Sci China Inf Sci is indexed by SCIE, MR, etc.

Papers published in *Sci China Inf Sci* include:

Review (20 printed pages on average) summarize representative results and achievements in a particular topic or an area, comment on the current state of research, and advise on the research directions. The author's own opinion and related discussion are requested. Most reviews are solicited by the editors. Unsolicited submissions may also be considered.

Research Papers (no more than 10 printed pages) report on important original results in all areas of information sciences.

Brief Report (no more than 4 printed pages) present short reports in a timely manner of the latest important results, and will enjoy quick publication.

How to submit

To submit a manuscript, please visit the website of Science China Press at www.scichina.com, click the button "submission", and use the Academic Journal Management System. For a new user, please register an "Author Account", and then submit a manuscript following the guidance.

Please introduce the research background, innovation and scientific value of your work, as well as your latest publications in a cover letter when submitting. The detailed contact information of the first author and corresponding author is required (please promptly inform the editorial office of any change of contacting addresses). The authors may recommend 3–8 qualified reviewers and/or request the exclusion of specific reviewers. An informative cover letter is considered helpful for editors and reviewers to make evaluation of your paper.

Duplicate submission is forbidden. In this case, we will inform the author's institution and the relevant journal.

Poor English expression of a submitted manuscript may lead to the final rejection.

File format: single columned, A4 size, 10 pt, single spaced, word or pdf file, with figures and tables inserted in the text.

Reviewing policy

All submissions will be reviewed by referees selected by the editorial board. The decision of acceptance or rejection of a manuscript is made by the editorial board based on the referees' reports. The entire review pro-

cess may take 60 to 90 days, and the editorial office will inform the author of the decision as soon as the process is completed. If the editorial board fails to make a decision within 90 days, it is up to the authors to decide whether they would withdraw their paper or submit it elsewhere.

Authorship

Authorship should be limited to those who have contributed substantially to the work, and every author has responsibility for the data and argument mentioned in the paper. The corresponding author must have obtained permission from all authors for the submission of each version of the paper and for any change in authorship.

Copyright

A completed form assigning copyright to Science China Press must be returned to the Sci China Inf Sci office when the paper is accepted for publication. The copyright covers the exclusive right to reproduce and distribute the article (in various languages), including offprints and reprints, translations, photographic reproductions, microform, electronic form (offline, online) or other reproductions of similar nature. The Copyright Transfer Statement is available at www.scichina.com

After acceptance

For the paper with a great breakthrough result, quick publication will be arranged. After typesetting, page proof is usually sent electronically as email attachments to the corresponding author. The proof plus any minor corrections must be returned to the managing editor within 3 days. Failure to do this will result in delays in publication. Corrections can be noticed in different ways: 1) highlight the corrections and send us the print proof pages; 2) fax us the corrections; 3) highlight the corrections and send us the corrected page proof as email attachment.

After publication

Authors of one published paper will be presented one sample copy and 30 offprints. If more offprints and sample copies are required, please contact the managing editor and pay the extra fee. The full text in Chinese and in English opens free to the readers in China at www.scichina.com, and the full text in English is available to overseas readers at www.springerlink.com. The reprinted version will be collected by the world-famous universities, institutions and libraries.

Publication charge

The color page charge and the page fee will be required.

Manuscript format

Contributions are required of a concise, focused account of the findings and reliable essential data. They should be well organized and written clearly and simply, avoiding exhaustive tables and figures. Authors are advised to use internationally agreed nomenclature, express all measurements in SI units, and quote all the relevant references.

Title: Titles must be limited to no more than 20 words, and should be concise, indexable, and informative for a broad scientific audience. Authors should avoid using colons, questions, nonstandard abbreviations, etc. in titles.

Author(s): Authorship should be limited to those who have contributed substantially to the work.

The order of the authors listed should be agreed by all the coauthors, and every author should have the responsibility for the published content.

Family names are written in upper case. The email address of the corresponding author is required.

Author affiliation: The affiliation should be the institution where the work was done. Complete addresses are required with post codes.

Abstract: An abstract is a summary of the content of the manuscript. It should briefly describe the research purpose, method, result and conclusion. The extremely professional terms, special signals, figures, tables, chemical structural formula, and equations should be avoided here, and citation of references is not allowed.

Keywords: A list of three to eight keywords should follow the abstract. The chosen keywords are required to reflect the theme of a manuscript.

Financial support: Financial support appears in Acknowledgements, with grant number(s) following. The full title of each fund is required.

Text: A paper should begin with a brief introduction of the significance of the author's research. Nomenclature, signal and abbreviation should be defined at their initial appearance. All the figures and tables should be numbered in numerical order.

Introduction: Being the most important part of an article, the introduction introduces the relevant research background and the progress in 2 or 3 years, with references cited in numerical order, then presents the problem to be solved in this article, and finally briefly describes the method adopted in this work. Before the end, the aim of the research should be mentioned. Subtitle is forbidden in this part, and introduction of the article structure is considered unnecessary.

Materials and method: This part introduces the materials, method and experimental procedure of the author's work, so as to allow others to repeat the work published based on this clear description.

Discussion and conclusions: Conclusions should be derived from the observation and experimental results, and comparison with other relevant results is considered helpful to further proving the results. Repeated data should be avoided, and conclusions and sugges-

tions are required to be clearly expressed. New hypotheses and recommendations may be proposed when warranted.

Figures and tables: Figures and tables should be numerically numbered, inserted in the text, and cited in order within the text. The figures should have resolution not lower than 600 dpi and clear lines of 5 px, with signals and letters in Times New Roman at 8 pt. A space should always be maintained between the variable and the unit.

Equations: An equation is numerically numbered (Arabic numeral), and has the number put on its right side.

Acknowledgements: The author expresses his/her thanks to the people helping with this work, and acknowledges the valuable suggestions from the peer reviewers.

References: Reference citation is regarded as an important indicator of the paper quality. If the relevant references, especially the results published in 2 to 3 years are not cited in the paper, or most citations are from the author's publications, the editor will consider this paper unattractive. References should be numerically numbered and cited in order within the text, with the numbers expressed in square brackets. The author should carefully check the author names, article title, journal title, year, volume number of references, and create the listing according to the format of *Sci China Inf Sci*.

Reference format

1. For an author's name, full spelling of family name appears before abbreviation of given name, with a spacing in the middle.
2. If there are more than 3 authors, the first 3 names are followed by et al.
3. The article title should be identified by an initial capital letter with the remainder of the title in lower case.
4. For correct abbreviations of journal titles, refer to ISO, e.g., *Chinese Sci Bull* for *Chinese Science Bulletin*, *Sci China Inf Sci* for *SCIENCE CHINA Information Sciences*.
5. For books and proceedings, the initial letter is capitalized for all the notional words and for function words with more than 4 letters.
6. Do not forget to list the editor names of the proceedings, the publisher, the publishing address, and the beginning and terminating pages.
7. Accepted but unpublished papers should be followed by "in press".
8. Websites or homepages cannot be cited as references.
