

INSTRUCTIONS FOR AUTHORS

AFINIDAD accepts review articles, original papers (experimental reports as well as theoretical studies) and short communications on all aspects of chemical engineering, process engineering, chemistry and biotechnology.

Types of paper

- 1- Full Papers should include a *summary of 100-200 words and 3-6 key words*. They should be divided into sections and should normally *not exceed 10 printed pages*. Each manuscript should have less than 10 original figures and tables.
- 2- Review Papers and articles of general interest related to chemistry are written and presented by scientists invited by the Editorial Board. The length of this type of article will depend upon the subject.
- 3- Short Communications should provide a concise statement of a preliminary report or significant research contribution, should include a summary of *not more than 50 words* and should normally not exceed 4 printed pages, containing no more than 2 figures or tables. They will have publication priority.
- 4- Letters to the editor should either be on a topic of scientific concern or give comment upon recently published articles and should not exceed 2 printed pages.

Submission of manuscript

The original manuscript should be sent to the Editor of AFINIDAD by e-mail: afin@iqs.es

The postal address is:

AFINIDAD
Asociación de Químicos e Ingenieros del Instituto Químico de Sarriá
Vía Augusta, 390
08017 Barcelona, Spain

Authors will receive, by e-mail, an immediate acknowledgement of receipt of their paper, followed within 6 months by notification of acceptance or rejection after peer evaluation. Authors will be informed of the reasons should an article be turned down, but not be given the referee's name.

Gallery proofs will be sent to the author to whom correspondence is to be directed (marked on the manuscript with an asterisk) by e-mail. These should be returned within the dates specified, otherwise publication might be delayed.

Offprints are sent to authors by email in PDF format.

Guidelines for manuscript preparation

Articles must be in English, Spanish or Catalan typed double-spaced throughout on pages of DIN A-4 size leaving a margin of 2.5 cm. on each side. All pages must be numbered. Authors who are less familiar with the English language should seek assistance from proficient colleagues in order to produce manuscripts that are grammatically and linguistically correct.

Full Papers and Short Communications should conform to the format found in international chemistry journals and include: Title and authors, Abstract, Key words, Description, Results, Acknowledgements and References.

Title and authors: The title should head the manuscript and should be concise and carefully formulated. Abbreviations and trade names should be avoided. The title should be followed by the first names and surnames of the authors, and address(es) of the laboratory where the work was carried out. Mark with an asterisk (*) the author to whom correspondence should be addressed.

Abstract and key words: The abstract should summarize the contents of the paper and should state the major findings and conclusions of the article. Any of the three official languages can be used. A list of key words in alphabetical order should be added in order to assist in abstract listing and index production.

Description: The main text should contain the following items in the sequence given:

Introduction: This brief statement should describe the importance of the work in relation to the field, remaining problems, your hypothesis and the objective of the study. Indicate what has been achieved.

Materials and Methods: This section should provide sufficient information to enable other investigators to repeat the work.

Results and Discussion: This section should include all tables, graphs and illustrations necessary to understand the study. Results should be presented as concisely as possible.

Conclusion: Authors must state the main conclusions of the research and give a clear explanation of their importance and relevance.

References: References should be listed, in the order in which they are cited in the text, at the end of the article. Abbreviations should conform to the Chemical Abstracts Source Index (CASSI). Papers that are unpublished but have been accepted by a journal may be cited with the journal's name followed by "in press". In all other cases reference must be made to "unpublished work" or "personal communication".

Acknowledgements: Acknowledgements of financial support, advice or other kinds of assistance should be made at the end of the paper. Acknowledgements should be kept to a minimum.

Units, nomenclature, formulae, graphs and mathematical equations: The use of Système International d'Unités (SI) is recommended. IUPAC standards should be observed. Known and accepted scientific abbreviations may be used, and special abbreviations should be defined when first mentioned. Equations, formulae and graphs may be marked with Arabic numerals in parentheses.

Figures and tables: Figures should be submitted on disc and hard copy, printed in black and white, and drawn in indian ink on good quality paper. Black and white photographs are accepted. Coloured photographs will be considered in exceptional cases. The numbers and letters should be legible after the reduction of the original paper. The figure legends and table footnotes should be typewritten on a separate sheet.

Authors should take care to assure the illustrations are received in good condition.
