

Urban Forestry & Urban Greening is a refereed, international journal aimed at presenting high-quality research with urban and peri-urban woody and nonwoody vegetation as its main topics. Urban Forestry & Urban Greening concentrates on all tree-dominated (as joint together in the urban forest) as well as other green resources in and around urban areas, such as woodlands, public and private urban parks and gardens, urban nature areas, street tree and square plantations, botanical gardens and cemeteries. The journal welcomes fundamental and applied research papers, as well as review papers and short communications.

Copyright. Submission of a manuscript implies that the submitted work has not been published before (except as part of a thesis or lecture note or report, or in the form of an abstract); that it is not under consideration for publication elsewhere; that its publication has been approved by all co-authors as well as by the authorities at the institute where the work has been carried out; that written permission of copyright holders is obtained by the authors for material used from other copyrighted sources; that, if and when the manuscript is accepted for publication, the authors hand over the transferable copyrights of the accepted manuscript to the publisher; and that the manuscript or parts thereof will thus not be published elsewhere in any language without the consent of the copyright holder. Copyrights include, without spatial or timely limitation, the mechanical, electronic and visual reproduction and distribution; electronic storage and retrieval; and all other forms of electronic publication or any other types of publication including all subsidiary rights.

Funding body agreements and policies

Elsevier has established agreements and developed policies to allow authors who publish in Elsevier journals to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit <http://www.elsevier.com/fundingbodies>.

Manuscript submission

All manuscripts should be submitted online by using the Elsevier Editorial System (EES). You can access this system at <http://ees.elsevier.com/ufug>

For questions about manuscript submission, please contact the Editorial Office at ufug@woodscape-consult.com

Correspondence

Receipt of manuscripts will always be confirmed by e-mail and a manuscript number will be assigned. The name, e-mail-address, full postal address and telephone/fax number of the corresponding author needs to be clearly stated in the covering e-mail or letter. All correspondence concerning submitted manuscripts should refer to the manuscript number and should be sent to the Editorial Office. If the corresponding author's address changes, the Editorial Office should be notified immediately. Names, addresses, and telephone and fax numbers of potential referees for a manuscript may also be submitted in the cover e-mail or letter. The Editors are under no obligation, however, to use a recommended referee.

Review process

Manuscripts are reviewed in a 'double blind' process by two anonymous reviewers, who are leading experts from around the world in the field of study presented. The final decision to accept or reject a manuscript is made by the Editors-in-Chief. The Editorial Office will inform the authors on acceptance, revision, or rejection of manuscripts. The average turn around time from submission of a manuscript until publication is 6 months.

Manuscript format

The maximum length of research and review papers, including references and tables, is 7,500 words. The manuscript should be submitted as MS-word or Rich Text Format (rtf) file. Figures, other than MS-word or MS-excel tables or graphs, should be submitted as separate image files; see 'Figures' section for more details. The layout for the manuscript should include double line-spacing and preferably also line numbering. All pages including tables and figures should be numbered.

Manuscripts should be written in concise and grammatically correct English. Either British or American English is accepted, but should be used consistently. Authors who do not have English as a native language are asked to have their manuscript checked by colleagues whose mother tongue is English.

The title of the manuscript and name(s), affiliation(s), and address(es) of the author(s) should be placed in a separate file or on the first page of the manuscript, this information will not be included in the review process. The title should be informative and brief, usually no more than 15 words. Subtitles should be avoided.

Abstract. For research papers, an Abstract must be included. It should be factual and not exceed 300 words.

Key words. Up to six Key words, excluding words from the title, should be provided in alphabetical order below the Abstract.

Main text. For research papers, the text should normally consist of five sections:

Introduction, Methods, Results, Discussion and References. Primary headings are left justified and in bold, secondary headings are left justified and in italics. Footnotes should be avoided. The International System of Units (SI) should be used for all measurements. Monetary values should be presented either in USD (US Dollar) or in EUR (Euro). Scientific names of genera and species should be given in full with authority when they are cited for the first time. If species names occur repeatedly in the text the genus name may be abbreviated. Common names should be avoided. Italics should be used for secondary headings, scientific names of taxa (genus and lower) and syntaxa, and symbols in formulae.

Formulae should be presented in the text. Complicated formulae should be collected and presented as a figure in camera-ready appearance.

Nomenclature. The basis for the Nomenclature of taxa and syntaxa used should be indicated in the Methods section, as should the latitude and longitude of the study site(s), if appropriate.

Acknowledgements and dedications are to be placed after the Main text and before the References.

References to articles and books should be limited to published work, work in press, or theses and dissertations. Citations in the text should be in the following forms: Johnson (1995), Harms and Johnson (1992), or (Johnson, 1995), (Johnson et al., 1998), or (Miller, 1988; Johnston, 1998, 1999).

References in the text should be listed in chronological order. References in the list at the end of the article should be listed in alphabetical order. Names of journals should not be abbreviated. Please make sure before submission of the manuscript that all references are cited, that all citations in the text are included in the References, and that all citations have the correct format.

Formats for citations

Holm, S., 2000. Anvendelse og betydning af byens parker og grønne områder (Use and importance of urban parks). *Forest & Landscape Research No 28-2000*, Danish Forest and Landscape Research Institute, Hoersholm. (In Danish, with English summary)

Rydberg, D. 1998. Urban forestry in Sweden -Silvicultural aspects focusing on young forests. Ph.D. Thesis, Swedish University of Agricultural Sciences, Umeå.

FAO, 2007. State of the World's Forests 2007. Retrieved July 22nd, 2008 from <http://www.fao.org/docrep/009/a0773e/a0773e00.htm>.

Appendices. Information too detailed to be included in the main text, for instance a list of areas sampled, may be presented in appendices which are to be placed before the References. Appendices should be as short and succinct as possible.

Figures

The maximum type area is 17 cm (6.7 inch) width and 22.5 cm (8.9 inch) height.

Figures must be clearly lettered and suitable for reproduction to fit either one column width (8.2 cm or 3.2 inch) or two-columns width (17 cm or 6.7 inch).

In addition to the printed version figures can be supplied in digital format (EPS or TIFF format, final resolution 300 dpi for halftones, 1270 dpi for black/white line drawings). If, together with your accepted article, you submit usable colour figures, then Elsevier will ensure, at no additional charge that these figures will appear in colour on the web (e.g., Science Direct and other sites) regardless of whether or not these illustrations are reproduced in colour in the print version. Colour figures can be printed only if the costs are covered by the author (EURO 250.00 for the first colour figure, EURO 200.00 for every following colour figure). For further information on the preparation of electronic artwork, please see our artwork instruction pages at <http://www.elsevier.com/artworkinstructions>.

Label each figure with authors' names and figure number. Figures should be cited in the text as Fig. 1 or Figs. 1 and 2. Figures should be placed after the References (and Appendices, if any) in the manuscript. They should be preceded by the figure legends on a separate page.

Indicate in the margins of the manuscript where figures should be placed.

Tables should be prepared so that they can be printed in one column or full page width (see above). Tables should be submitted at the end of the manuscript, placed on separate pages, double spaced and numbered sequentially. Indicate in the margins of the manuscript where tables should be placed. Tables should be cited in the text as Table 1 or Table 1 and 2.

Page proofs. One set of proofs is sent to the corresponding author as a PDF document, together with instructions for proof corrections. Authors are asked to return corrected proofs without delay.

Offprints. The corresponding author, at no cost, will be provided with a PDF file of the article via e-mail. The PDF file is a watermarked version of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use. Additional paper offprints can be ordered by the authors. An order form with prices will be sent to the corresponding author.

Page charges. There are no page charge for published papers. Until publication of the print edition, corrected proofs will be available as Article in Press at www.sciencedirect.com.

Book reviews. Books and monographs for review are welcome and should be sent to the Editorial Office (see address above). Anyone who wishes to review books for Urban Forestry & Urban Greening should send a curriculum vitae and brief description of their area of expertise to the Editorial Office.

Review papers. Review articles present a comprehensive overview of the state-of-art and international literature within a specific area of urban forestry and urban greening. Generally the Editors will invite leading experts to prepare review papers on selected topics, but suggestions for review papers accompanied by a detailed outline can be submitted to the Editorial Office.

Short communications. Short communications are brief presentations of innovative research, highly original findings, or novel ideas. They should consist of not more than 4000 words, including references. No more than three figures and/or tables should be used, while references should respect the general guidelines of the journal. Although each short communication should have an abstract, the remainder of the text does not need to be divided into sections as for Research Papers.
