

AUTHOR GUIDELINES FOR *AMERICAN JOURNAL OF CRITICAL CARE*

The Editors of the *American Journal of Critical Care* invite authors to submit original manuscripts describing investigations, advances, or observations from all specialties related to the care of critically ill patients. Papers promoting collaborative practice and research are encouraged. Manuscripts will be considered on the understanding that they have not been published elsewhere and have been submitted solely to the *American Journal of Critical Care*. (This restriction does not apply to abstracts.)

Authors from **west of the Mississippi River** should send an original and 3 copies of the manuscript to:

Kathleen Dracup, RN, DNSc
School of Nursing, University of California, Los Angeles
Factor Building, Box 956918, Los Angeles, CA 90095-6918
Phone: (310) 206-2644
Fax: (310) 794-7482
E-mail: AJCC@sonnet.ucla.edu

Authors from **east of the Mississippi River** should send an original and 3 copies of the manuscript to:

Christopher W. Bryan-Brown, MD
Dept of Anesthesiology, Montefiore Medical Center
111 E 210th Street, Bronx, NY 10467-2490
Phone: (718) 920-4175
Fax: (718) 881-2245
E-mail: cbbajcc@aol.com

The Journal cannot accept responsibility for mislaid manuscripts; please keep a copy.

The following types of manuscripts are published:

- **Clinical studies (1500-4000 words)**
- **Basic research studies (1500-4000 words)**
- **Preliminary/short communications (500-1500 words)**
- **Case reports (500-1500 words)**
- **Reports on new apparatus and techniques**
- **Clinical/basic science reviews, including historical material (1500-4000 words)**
- **Guest editorials**
- **Letters to the Editors (250-500 words)**

Peer review—All submissions are subject to peer review. **To ensure a blinded review, do not include the author's name or institution in the running head or anywhere in the manuscript. This includes references in the first person to the author's own work. Manuscripts that do not meet this requirement will not be reviewed.** Two or more authorities will judge the validity, originality, and significance of the work presented. This process takes approximately 4 months, but delays are sometimes unavoidable. After the manuscript has been reviewed, the author will be informed whether the manuscript has been accepted for publication, rejected, or whether it requires revision.

Accepted manuscripts become the property of the American Association of Critical-Care Nurses (AACN) and may not be published without the written permission of AACN. Accepted manuscripts are subject to editing to conform to the *American Medical Association Manual of Style, 9th edition, 1998*. Authors will be asked to review galley proofs prior to publication.

Electronic Manuscripts—Once accepted, the manuscript must be submitted on an IBM- or Macintosh-compatible diskette. Microsoft Word is the preferred format.

Manuscript Content—Manuscript content should be laid out in accordance with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (*N Engl J Med.* 1991;324:424-428).

Authorship, Financial Disclosure, Copyright Transfer, and Acknowledgment Form—Please include a cover letter with the *American Journal of Critical Care's* Authorship, Financial Disclosure, Copyright Transfer, and Acknowledgment Form, signed and dated by **each** author. Be sure to **fill in the title of your manuscript** on the Authorship, Financial Disclosure, Copyright Transfer, and Acknowledgment Form.

Title Page—This is page 1 and should contain the following:

- **Title** (should be concise yet informative)
- **Running title** (usually 2 to 5 words)
- **The authors' full names in preferred publishing order, with degrees, credentials, ranks, and affiliations**
- **The name, address, e-mail address, and telephone (home and office) and fax numbers of the author to whom all correspondence and reprint requests should be addressed**
- **The institution(s) at which the work was performed**
- **Key words**
- **Grant or other financial support used in the study**

Abstract—Abstract format varies depending on the nature of the manuscript as follows:

Review articles - abstracts need not be structured.

Clinical and basic research studies - must have structured abstracts of no more than 250 words. (Haynes RB, Mulrow CD, Huth EJ, Altman DG, Gardner MJ. More informative abstracts revisited. *Ann Intern Med.* 1990;113:69-76.) Abstracts must be written in the 3rd person. Abstracts for clinical studies should have the following subheadings: Background, Objectives, Methods, Results, and Conclusions.

Laboratory studies and new apparatus and techniques - a shorter form is requested (Relman AS. New "information for authors"—and readers. *N Engl J Med.* 1990;323:356). These abstracts should have the following subheadings: Background, Methods, Results, and Conclusions.

Preliminary/short communications and case reports - abstracts are not required.

Ethics—When human experimentation is being reported, a statement must be included confirming that the work was done in accordance with the appropriate institutional review body and carried out with the ethical standards set forth in the Helsinki Declaration of 1975. When laboratory animals are used, provide a statement that the work was carried out according to the National Research Council's protocol for, or any national law on, the care and use of laboratory animals.

Releases—If any material in the manuscript is from a prior copyrighted publication, the manuscript **must** be accompanied by a letter of permission from the copyright holder. However, we **prefer not to publish** figures that have been published elsewhere. If applicable, permission to use unpublished data and personal communications must be included.

Patient Descriptions, Photographs, and Pedigrees—Include a signed statement of informed consent to publish (in print and online) patient descriptions, photographs, and pedigrees from all persons (parents or legal guardians for minors) who can be identified in such written descriptions, photographs, or pedigrees. Such persons should be shown the manuscript before its submission.

References—These should start on a separate page following the text. They must be numbered consecutively by their order of appearance in the text. References cited in figures and tables must be numbered sequentially as if they are cited where the figure or title is first cited in the text. In the text, designate reference numbers either as superscripts or on the line in parentheses. Do not use your word processor's footnote or endnote function. Check all references for accuracy and completeness. Abbreviate journal titles as found in *Index Medicus*. If in doubt as to the correct abbreviation, cite the complete journal name. Please follow the format and punctuation shown in the following examples. Do not use periods in abbreviations of journal titles. List all authors, but if the number exceeds 6, list only the first 3 authors followed by et al.

Journal Article

Mihn F, Halperin B. Noninvasive detection of profound arterial desaturation using a pulse oximetry device. *Anesthesiology*. 1985;62:85-87.

Book Chapter

Schiffman JD. Immunology of influenza. In: Cane MB, ed. *Viruses and Influenza*. Orlando, Fla: Academic Press; 1990:191-196.

Book

Avery GB. *Neonatology: Pathophysiology and Management of the Neonate*. 3rd ed. Philadelphia, Pa: JB Lippincott; 1987:77-80.

Drug Names—Use complete generic names only. The trade name of a drug may be cited in parentheses the first time the generic name appears.

Units of Measurement—Measurements of length, height, weight, and volume should be reported in metric units or their decimal multiples. Temperatures should be given in degrees Celsius. Physiologic measurements should be reported in metric units (International System of Units, SI); conventional units must be placed in parentheses after the SI units.

Abbreviations and Symbols—Avoid nonstandard abbreviations. Do not use abbreviations in the title or abstract. The full term for which an abbreviation or symbol is being used should precede its first use, unless it is a standard unit of measurement. When many abbreviations are being used, they should be listed in table form for insertion into a box at the beginning of the text.

Letters to the Editors—Letters to the Editors raising points of current interest or commenting on articles published in the *American Journal of Critical Care* are welcome. The Editors reserve the right to accept, reject, or excerpt letters without changing the views expressed by the writer. The author of an original article will be given the opportunity to respond to published comments. Letters should be sent to Dr Dracup.

Figures and Tables

Figures—Submit original, untrimmed black-and-white or color glossy prints. The back of each print should note the figure number and orientation of the figure (top/left/right). Write this information on an adhesive label and place the label on the back of the print. Include the name of the photographer, if applicable. In clinical photographs in which the patient could be recognized, the manuscript must be accompanied by a statement signed by the patient or the patient's guardian granting permission to publish the photograph for educational purposes. If permission is not obtained, the photograph will be cropped accordingly to ensure that the patient's identity is not disclosed. All photographs should be glossy prints or digital files of at least 300 dpi. Do not submit files downloaded from the Internet, as these are of low resolution and reproduce poorly in print. The preferred file formats are TIFF and EPS. Although JPG and BMP are also acceptable, these formats are not the best to use, as they are of low resolution. We can scan crisp, clean photographs if they contain no writing. Do not submit any art or photographs in Microsoft applications; this means no PowerPoint, Word, or Excel files as art. For printing purposes, the original art that was placed into these applications is required. For figures such as graphs, data points should be provided in a **separate text file** (eg, as a Microsoft Word text file).

Legends for Illustrations—Figure legends should begin on a new manuscript page, after the tables. They should be typed double-spaced in consecutive order.

Tables—Each table must be numbered (consecutively in the order mentioned in the text) and titled. Each column within a table should have a heading. Abbreviations must be explained in a footnote. Please do not type more than 1 table on a page.

CHECKLIST FOR AUTHORS

Send 4 copies (original plus 3 copies) of the following:

- Cover letter with Authorship, Financial Disclosure, Copyright Transfer, and Acknowledgment Form signed by each author. (Be sure to use the most up-to-date version of the form, which can be obtained at www.ajconline.org)**
- Title page**
 - Title of manuscript
 - Running title
 - Authors' full names in publishing order, with degrees, ranks, credentials, and affiliations
 - Name, address, e-mail address, and telephone (home and work) and fax numbers of author to whom correspondence should be addressed
 - Institution(s) at which the work was performed
 - Grant or other financial support used for the study
- Abstract (double-spaced on separate page)**
- Text (double-spaced starting on a new page)**
Do not include the authors' names or institutions in the running head or in the manuscript
- References (double-spaced starting on a new page)**
- Tables and Illustrations (original prints, properly labeled)**
- Permissions (eg, for personal communications)**
- Acknowledgments (including any written permissions)**

Authorship, Financial Disclosure, Copyright Transfer, and Acknowledgment Form

Each author must read and sign the statements on (1) Authorship, (2) Financial Disclosure, and (3) either Copyright Transfer or Federal Employment. The corresponding author must sign (4) the Acknowledgment statement. You may photocopy this document to distribute to coauthors.

Your name (print) _____
Phone _____ Fax _____
E-mail _____
Corresponding Author's Name _____
Manuscript Title _____

1. Authorship.

All persons listed as authors must meet all of the following criteria for authorship:

- I certify that I have participated sufficiently in the work to take public responsibility for the content.
- I certify that (1) I have made substantial contributions to the conception and design or analysis and interpretation of data; (2) I have made substantial contributions to drafting the article or revising it critically for important intellectual content; and (3) I have given final approval of the version of the article to be published.
- I certify that the manuscript represents valid work and that neither this manuscript nor one with substantially similar content under my authorship has been published or is being considered for publication elsewhere, except as described in an attachment.
- I certify that this manuscript consists entirely of an original work that, in whole or in part, does not copy or otherwise infringe upon the copyright or other proprietary rights of another party.
- I certify that I have obtained, and will deliver if requested, all necessary permissions in writing to use, include, reproduce, and distribute any and all portions of the manuscript owned by other parties in the manuscript, in the periodical, and in any format and/or medium now known or later conceived or developed.
- I certify that I have obtained, and will provide if requested, written authorization to disclose any identifiable or potentially identifiable private health information of patients discussed in my article.
- I attest that, if requested by the editors, I will provide the data or will cooperate fully in obtaining and providing the data on which the manuscript is based for examination by the editors or their assignees.

Your Signature Date Signed

2. Financial Disclosure.

Please check the appropriate box(es):

- I certify that all financial and material support for this research and work are clearly identified.
- I certify that all of my affiliations with or financial involvement (eg, grants or patents received or pending, royalties, employment, consultancies, honoraria, stock ownership or options, expert testimony) with any organization or entity with financial interest in or financial conflict with the subject matter or materials discussed in the manuscript are disclosed here: _____
- or are disclosed in an attachment
- I have no relevant financial interests in this manuscript

Your Signature Date Signed

3. Copyright Transfer. In reviewing and editing this manuscript (text, tables, and figures), I hereby transfer, assign, or otherwise convey all copyright rights and other rights incidental thereto, including reprints, electronic media, and audiovisual, exclusively to the American Association of Critical-Care Nurses, in the event that such work is published in the *American Journal of Critical Care*. The author(s) will have the right to use this material, provided permission is requested in writing in advance from the American Association of Critical-Care Nurses, so long as the author(s) include(s) the copyright notice that appears on the issue of the periodical in which the manuscript is first published and a full citation to the periodical on every such copy.

Your Signature Date Signed

Federal Employment. I was an employee of the US federal government when this work was conducted and prepared for publication; therefore, it is not protected by the Copyright Act, and copyright ownership cannot be transferred.

Your Signature Date Signed

4. Acknowledgment Statement. Authors should obtain written permission from all individuals named in an Acknowledgment, since readers may infer their endorsement of data and conclusions. The corresponding author must sign the following statement:

- I certify that all persons who have made substantial contributions to the work reported in this manuscript (eg, data collection, analysis, or writing or editing assistance) but who do not fulfill the authorship criteria are named in an Acknowledgment in the manuscript.
- I certify that all persons named in the Acknowledgment have provided me with written permission to be named.
- I certify that if an Acknowledgment section is not included, no other persons have made substantial contributions to this manuscript.

Corresponding Author Signature Date Signed
