

## CELL TRANSPLANTATION

### Instructions to Authors

**Submission Requirements:** Submit the original manuscript with two copies, as well as one original and two photocopies of each figure (two originals plus color transparency or negative for color photographs), to either of the Co-Editors-in-Chief at the following addresses: Prof. Paul R. Sanberg, Department of Neurosurgery, University of South Florida College of Medicine, MDC 16, Tampa, FL 33612. Tel: (813) 974-3154, Fax: (813) 974-3078; or Prof. Camillo Ricordi, Professor of Surgery, Chief, Cellular Transplantation Ctr., University of Miami School of Medicine, Diabetes Research Institute, Division of Cellular Transplantation, NW 10 Avenue #R134, Miami, FL, 33136. Tel: (305) 243-6657, Fax: (305) 243-4404.

Manuscripts are accepted for consideration with the understanding that they have not been published elsewhere except in abstract form and are not concurrently under review elsewhere. Material accepted for publication will not be released publicly prior to its appearance in the journal.

**General Form:** Papers should be typed in English, double spaced throughout with at least 3-cm margins on paper approximately 22 x 28 cm (8 1/2 x 11 in.) in size. Please consult the most recent issue of the journal for style and format. Number all pages consecutively, beginning with the title page. Use metric units of measure; other units may be given in parentheses. Typically, only three levels of headings are recognized. The paper should be organized as follows.

**Title Page:** The title should be brief and specific. The title page should contain in the following order: title, name(s) and affiliation(s) of author(s) including city, state, postal code, and country, and a suggested running head of not more than 50 characters and spaces. Also indicate the author to whom correspondence should be addressed, with complete mailing address, telephone and fax numbers, and e-mail (if available). Recognition of support can be provided as an unnumbered footnote.

**Abstract:** An abstract of 300 words or less should begin on page 2. It should contain a concise summary of the results, conclusions, and other significant points in the review.

**Key words:** For the purpose of subject indexing, provide four to six key words immediately following the abstract.

**Text:** Every effort should be made to avoid jargon, to spell out all nonstandard abbreviations the first time they are used, and to present the contents of the study as clearly and concisely as possible. References should be given for all discussions and conclusions of previous studies. Trade names may appear in parentheses and should be capitalized. Critical discussions of the literature are preferred more than historically oriented information.

Computer Disks: Authors are required to submit a 3.5 in. HD/DD computer disk to the editorial office: 5.25 in. HD/DD disks are acceptable if 3.5 in. disks are unavailable. Please observe the following criteria: 1. Send only hard copy when first submitting your paper. 2. When your paper has been refereed, revised if necessary, and accepted, send a disk containing the final version with the final hard copy. Make sure that the disk and the hard copy match exactly. 3. Specify what software was used, including which release (e.g., Word Perfect 6.0). 4. Specify what computer was used (IBM-compatible PC, Apple Macintosh, etc.). 5. The article file should include all textual material (text, references, tables, figure captions, etc.) and separate illustration files, if available. 6. The file should follow the general instructions in style/arrangement and, in particular, the reference style of this journal as given in the Instructions to Contributors. 7. The file should be single spaced and should use the wrap-around end of line feature (i.e., returns at the end of paragraphs only). Place two returns after every element such as title, headings, paragraphs, figure and table call-outs. 8. Keep a backup disk for reference and safety.

References: Literature cited should be prepared according to the Numbered/Alphabetized style of the Council of Biology Editors. Where possible, please cite related Cell Transplantation articles in order to enhance continuity of topics within the Journal. References should be cited by number, in parentheses, within the text (only one reference to a number) and listed in alphabetical order (double spaced) on a separate sheet at the end of the manuscript. Journal citations in the reference list should contain the following: (a) surnames and initials of all authors (surnames precede initials); (b) title of article; (c) journal title abbreviated as listed in the List of Journals Indexed in Index Medicus; (d) volume, inclusive pages, and year.

Journal Article: Johnson, P. R. V.; White, S. A.; London, N. J. Collegenase and human islet isolation. *Cell Transplant.* 5:437-52; 1996.

Book Article/Chapter: Rajotte, R. V.; Lakey, J. R. T.; Warnock, G. L. Adult islet cryopreservation. In: Ricordi, C., ed. *Methods in cell transplantation.* Austin, TX: R. G. Landes Co.; 1995:517-24.

Book: Jarrell, B. E.; Carabasi, R. A. *Surgery*, 2nd ed. Baltimore, MD: Williams & Wilkins; 1991.

Tables: Each table should be on a separate sheet. If the table must be submitted on several pages, duplicate all headings on the additional sheet(s). Very wide tables should be avoided by dividing the data into smaller tables. Number tables in the order mentioned in text. Every table should have a title, and every column in the table should have a heading. Define all abbreviations. If data from any other source, published or unpublished, are used, obtain permission for their use and cite the source in the legend. Table footnotes should be indicated in the body of the table in order of their appearance with the following symbols: \*, ? ? ? ? #.

Figures: All figures should be identified on the reverse side with the figure number, author's name, and indication of the top clearly marked. Figures should be left unmounted. List all figure legends sequentially on one or more pages and identify all symbols used in the figures. The figure legend should be as clear as possible and should fully describe the contents of the figure. If the figure is from a previously published article, indicate that permission has been obtained from the original

publisher. Complex formulas should be prepared as illustrations. Specific information for the three basic types of figures is given below.

**Illustrations:** Illustrations should be prepared in India ink or printed using a laser printer with black toner and photographed. Figure dimensions and scaling should be suitable for reduction. Care must be taken that letters and other symbols do not become so small that they are illegible when the figure is reduced.

**Photomicrographs:** Special requirements and specifications for the printing of photomicrographs should be provided by the author. Scale bars should be used whenever possible. The original magnification of photomicrographs and the staining method (or stains used) should be given in the figure legend. Arrows should indicate pertinent features.

**Color Reproduction:** The author is required to bear the costs for the publication of color figures. The color transparency or negative should be supplied in addition to two copies and two original color prints. Authors may submit a color photograph for consideration as a cover picture for the issue in which their article appears.

**Page Proofs and Offprints:** All material accepted for publication is subject to copyediting. Authors will receive page proofs of articles before publication and should answer all queries and carefully check all editorial changes at this point. Any corrections to proofs must be restricted to printer's errors. Along with the page proofs, the corresponding author will receive a form for ordering reprints and full copies of the issue in which the article appears. All co-author reprint requirements should be included on the Offprint Order Form.
