

## Information for Authors

The *Journal of Toxicologic Pathology* (JTP) is an official periodical journal of the Japanese Society of Toxicologic Pathology (JSTP), published 1 volume each year being composed of 4 numbers; an international journal published in English and welcoming papers from all over the world; and a globally open-access journal by the aid of the Journal@rchive and the Japan Science and Technology Information Aggregator, Electronic (J-STAGE), both managed by the Japan Science and Technology Agency (JST). All papers on JTP are capable of free downloading as PDF-formatted files from the URLs of <[http://www.journalarchive.jst.go.jp/japanese/jnltop\\_ja.php?cdjournal=tox1988](http://www.journalarchive.jst.go.jp/japanese/jnltop_ja.php?cdjournal=tox1988)> for volumes 1 (year 1988) to 10 (year 1997) and of <<http://www.jstage.jst.go.jp/browse/tox/-char/en>> for volumes 11 (year 1998) or later.

JTP has been selected for coverage in Thomson Reuters products and services. Beginning with volume 21, number 1 (year 2008), the journal is indexed and abstracted in Science Citation Index Expanded (also known as SciSearch®), Journal Citation Reports/Science Edition, Biological Abstracts and BIOSIS Previews. Furthermore, papers on JTP are capable of being referred by a variety of international search engines including Google, Scopus, ChemPort, CrossRef, Directory of Open Access Journals, NDL-OPAC (National Diet Library of Japan) and SwetWise Online Contents as well as Medical Online and EBSCO (commercial services with charge).

JTP publishes review articles, original papers, case reports and short communications; describing research and development advances in the field of toxicologic pathology and related fields in a wide sense, as well as administrative opinions of policymakers and regulatory agencies. Review articles are principally published upon invitation, but the society and the editors do not hesitate to accept non-invited review articles, if they deserve to be done so. Nevertheless, those who wish to submit review articles without invitation are requested to contact with Editor-in-Chief (through the Editorial Office by e-mail) and obtain his/her agreement beforehand. It should be emphasized that the society and the editors are willing to accept papers with so-called negative results or those making chemicals anonymous, when such chemicals are under development or have dropped out from the development.

Submitted papers will be considered for publication on the condition that they are contributed solely to JTP, have not been already published and are not under consideration for publication elsewhere.

All articles published in JTP represent the opinion of the authors and should not be construed to reflect the opinion of the society.

### Preparation of Manuscript

**General format:** Manuscripts should be prepared in English. Recommended digital formats of documents, tables and illustrations for final publication-ready materials requested to submit after the acceptance are described later in the Editorial Process section. Those who cannot produce files of such formats are suggested to contact with the Editorial Office by e-mail before preparing manuscripts. With the exceptions of tables and illustrations, authors should comply with the following general format.

1. Page setting as conventional A4 (approximately 21 × 30 cm) or US letter (8.5 × 11 inches) with ample margins.
2. Double-spacing.
3. Popular serif or sans-serif fonts such as Times and Arial and, for Greek characters, Symbol fonts with 10 points.
4. Setting the title page as page 1 and paging in the lower right-hand corner ending at the end of the figure legends pages.
5. Arranging the order as follows.
  - a. Title page(s).
  - b. Abstract and then key words page(s) (after page-breaking).
  - c. Text and then acknowledgment pages (after page-breaking).
  - d. References pages (after page-breaking).
  - e. Figure legends page (s) (after page-breaking).
  - f. Tables.
  - g. Illustrations.

Authors are strongly recommended to refer papers already published in JTP to understand formatting rules including those not specified above or below.

After completing the preparation, authors are requested to convert all relating materials into single PDF-formatted files in order to submit manuscripts online. Those who cannot do this PDF conversion, please contact with the Editorial Office by e-mail.

Those who are not native English users should have appropriate language editing of the manuscripts by native English speakers prior to the submission. The Editorial Office is willing to provide a list of recommended services to check and improve the English of the manuscript upon request.

**Nomenclature and unit:** Every chemical used should be identified by a generic name, and at its first appearance the name and place (city and country, including Japan) of its manufacturer should be presented. Abbreviations should be defined

within parentheses when first used in the text. Units are in general accordance with the International System of Units (SI units).

**Ethical considerations:** Submission of manuscripts reporting experimental research on human materials or animals implies that authors have obtained approval for their research from the appropriate ethics committee or governmental bodies regulating animal or human research. Such approval must ensure that the experiments are planned and conducted strictly in accordance with all domestic and international declarations, treaties, laws, regulations, guidelines, rules and so on. These ethical considerations should be clearly stated in the manuscript, usually in the Materials and Methods section. Authors should also mention measures taken to protect animals from pain or discomfort.

**Copyright considerations:** Any materials published elsewhere beforehand are not allowed to be included in any parts of the manuscripts, unless written consents are obtained beforehand from their copyright owners. Those who wish to include such materials in their manuscripts should then contact with Editor-in-Chief (through the Editorial Office by e-mail), present him/her the documents describing the copyright owners' approval and obtain his/her agreement to refer the materials as well as guidance for the way of their referring, prior to the submission of the manuscripts.

**Title page:** The title page should contain (1) a concise title; (2) full names of all authors with the official names and full addresses, including zip codes and countries, of their institutions; (3) a short running head; and (4) name, address, phone and facsimile numbers and e-mail address of the corresponding author. In the title page, the declaration should also be made for any financial support or relationships that may pose conflict of interest, if applicable.

**Abstract:** An abstract should be prepared to state the study's purpose, procedures, main findings, and conclusion. Abbreviations should be avoided. Abstracts for original papers and review articles should not exceed 250 words, and those for case reports and short communications are limited to 150 words.

**Key words:** A maximum of 6 key words should be provided for the subject indexing (following Medical Subject Headings of Index Medicus).

**Text:** In original papers, a text usually contains Introduction, Materials and Methods, Results and Discussion sections as this order. Subheadings can be used in the Materials and Methods, and Results sections. Case reports and short communications should not adopt such sectioning. The text format of review articles can be flexible to depend upon the nature of the article.

**Acknowledgment:** Personal acknowledgments should precede those for financial supports. All sources of grants and other funding should be acknowledged in a concrete manner (including numbers, if applicable).

**References:** References should be numbered in the order of citation in the text using superscripts. The style to list references is exemplified as follows.

[Journal] Mahler JF, Davis BJ, Morham SG, and Langerbach R. Spontaneous lesions in aging FVB/N mice. *Toxicol Pathol.* **24:** 717–719. 1996.

[Book] Bannasch P and Gosner W. *Pathology of Neoplasia and Preneoplasia in Rodents.* EULEP Color Atlas. Shattauer, New York. 1994.

[Part of book] Williams WJ. Secondary thrombocytosis. In: Williams Hematology, 5th ed. E Beutler, MA Lichtman, BB Coller, and TJ Kippa (eds). McGraw Hill, New York. 1361–1363. 1995.

[Periodical] IARC. Post-menopausal Oestrogen Therapy. IARC Monographs on the Evaluation of Carcinogenic Risks to Humans, Vol. 72. Lyon. 399–530. 1995.

[Electronic documents on government, university program or department website <Transient documents, such as those on newspaper websites, and documents with low reliability, such as those on Wikipedia, should be avoided.>] Chou L, McClintoch R, and Moretti F. Technology and education: New wine in bottles: Choosing pasts and imagining educational futures. 2000, from Columbia University, Institute for Learning Technologies website: <http://www.ilt.columbia.edu/publications/papers/newwine.html>

**Figure legends:** Legends for illustrations should be with figure numbers in Arabic numerals (such as Fig. 1) and brief titles. The title and footnotes should contain all information necessary to understand and interpret the figure without reference to the text. For photomicrographs, authors should note the staining method and indicate the magnification at the end of each legend, or include an appropriately sized bar in the photograph with giving its equivalent size in the legend.

**Tables:** Tables should be prepared preferably each on separate page, with table numbers in Arabic numerals (such as Table 1) and brief titles. The title and footnotes should contain all information necessary to understand and interpret the table without reference to the text. It should be avoided that similar data is presented both in figures and tables in order to strengthen such data.

**Illustrations:** Illustrations (drawings, photographs, photomicrographs, electron micrographs, and *etc*) should be of high quality and preferably prepared each on separate page. The sizes to be printed out as hardcopies should be estimated between 8.5 (single column) and 17.5 cm (double column) in the horizontal width. Computer-generated images with high quality and sufficient contrast are acceptable. Upon submission as parts of a single PDF file, please identify each

figure by inserting its figure number. It should be noted that color illustrations are reproduced only at the authors' expense.

### Submission of Manuscript

**Online Submission:** All manuscripts should be submitted online at the URL of <<http://ess.jstage.jst.go.jp/contrib/tox/initialsubmission/-char/en>> in English or <<http://ess.jstage.jst.go.jp/contrib/TOX/initialsubmission/-char/ja>> in Japanese. Upon submission, authors are requested to obey the step-by-step instructions described at the site. If authors encounter difficulties that cannot be figured out during the submission, please feel free to contact with the Editorial Office by e-mail.

**For those who are incapable of submitting manuscript online:** Whereas the submission of manuscripts to JTP is to be performed online in principle, those who are incapable of doing so by some inevitable reasons may be allowed to submit their manuscripts via a postal mail. In this case, please contact with the Editorial Office beforehand by e-mail.

**Submission fee:** Any submission fee is not charged, if a corresponding author is a JSTP member.

A non-member corresponding author is requested to pay ¥5,000 for each manuscript prior to the submission by a bank transfer to the account below.

Bank of Tokyo-Mitsubishi UFJ,  
Kojimachi-chuo Branch  
1442398  
Nihondokuseibyorigakkai

The non-member corresponding author should then contact with the Editorial Office by e-mail and present the certification of the bank transfer. As soon as the office gives the approval, the non-member corresponding author can thereafter submit his/her manuscript.

**Copyright:** The copyright of papers and any other materials published in JTP is held by JSTP. Upon the acceptance of the manuscript, the author is requested to transfer the copyright towards his/her manuscript to JSTP in writing.

After the publication, the copyright of papers and any other materials published in JTP are protected, and those who wish to get their photocopies are requested to obtain permission from the following organization to which licensing of copyright clearance is delegated by the copyright owner.

[All users except those in USA] Japan Academic Association for Copyright Clearance, Inc. (JAACC);  
9-6-41 Akasaka, Minato, Tokyo 107-0052, Japan;  
phone, +81-3-3475-5618; facsimile, +81-3-3475-5619; e-mail, <[info@jaacc.jp](mailto:info@jaacc.jp)>.

[Users in USA] Copyright Clearance Center, Inc.; 222 Rosewood Drive, Danvers, MA 01923, USA;  
phone, +1-978-750-8400; facsimile, +1-978-646-8600.

### Editorial Process

**Reviewing:** All manuscripts submitted will be critically reviewed by the members of the Editorial Board or by specialists of the same field of study.

**Proofreading:** Accepted manuscripts will be sent back to the corresponding author after English editing and checking of consistency by the Editorial Office for proofreading. It is the authors' responsibility to correct the alterations made by editors and then to submit source files of the final version by way of the online submission system upon the request from the Editorial Office. Document files are preferred saved as a Microsoft Word format. Tables are recommended saved as a Microsoft Word or Microsoft Excel format. Photographs can be submitted as either hardcopies or digital files, while drawings are accepted only as hardcopies. Digital files for images should be saved as an EPS, JPEG or TIFF format with the minimum image size of 300 dpi in a grayscale or full color RGB mode (more than 8 bits). If authors cannot save their materials as these formats, please contact with the Editorial Office by e-mail. In any case the Editorial Office will issue details concerning digital files, after a manuscript has been accepted.

**Ordering reprints:** An ordering form for reprints will be sent to authors with the proof. Reprints of each paper are supplied by authors' expense in multiples of 50.

### Miscellaneous

**Material archive policy:** Authors who wish to return any submitted materials (either hardcopies or digital files) regarding their accepted manuscript should contact with the Editorial Office by e-mail within 1 month of the acceptance. Otherwise, the society or the editors will dispose such materials.

**Correspondence:** All correspondences should be addressed to  
the Editorial Office of the Journal of Toxicologic Pathology, c/o Publication Center,  
IPEC, Inc., e-mail <[jtp@ipec-pub.co.jp](mailto:jtp@ipec-pub.co.jp)>.

This revision is valid from August 27, 2010.
