

The scope of the journal

All types of basic, clinical and experimental investigation and observation concerning endocrine-related cancers in human and animal subjects.

Submission of papers

Reviews (and original research papers of exceptional quality) are considered.

Please submit online using the ESPERE system. Online submission and peer review can help to achieve more rapid publication than the paper-based system.

If you still wish to submit as hard copy, please send your manuscripts to:

Editor-in-Chief, Endocrine-Related Cancer, 22 Apex Court, Woodlands, Bradley Stoke, Bristol BS32 4JT, UK. Tel: +44 (0)1454 642220; Fax: +44 (0)1454 642201. There is no charge for submitting papers nor will there be any subsequent page charges.

Online submission

See our online submission guidelines. Please prepare the content of your article as described below.

General instructions

Five copies of the manuscript and five sets of halftone figures are required. Only one set of line drawings needs to be of publishable quality; the others may be photocopies.

When submitting a paper for consideration, authors must give written assurance that the work has not been, and will not be, submitted for publication elsewhere until the journal has reached a decision on whether to publish the paper. If rejected the authors are free to submit elsewhere; if accepted the assurance automatically extends indefinitely. It will be assumed that submitted manuscripts carry the approval of all the authors.

Authors are required to acknowledge all of the major sources of funding relevant to the research reported in the Acknowledgements section and to declare that either (a) there is no conflict of interest that would prejudice its impartiality or (b) there is a potential conflict of interest that is fully declared within the text of the article.

Manuscripts must be in English and spelling should follow The Shorter Oxford English Dictionary or Merriam-Webster's Collegiate Dictionary. All abbreviations must be defined. Manuscripts should be printed double-spaced, preferably in a Times font, and with a size of at least 10 point. Please number each line.

To expedite refereeing the author should provide duplicate copies of papers quoted as 'In Press', particularly those concerned with methodology.

Authors should also provide a fax number and an email address, where possible, to facilitate the rapid processing of their paper.

Use of computer disks/email

Copies of documents on computer disk/email should not be supplied when submitting manuscripts. However, a word processor file for your paper will be requested if the manuscript is accepted for publication or you are asked to revise your manuscript.

Please provide files via email to erc.espere@endocrinology.org, or on PC-formatted disks if possible (this option is now also available on many Macintosh systems). The preferred word-processing format is RTF, but files produced using other packages can be translated. Please provide printed copies of all files when supplying electronic versions.

The disk/email should carry the text, references, figure legends and tables. Diagrams and photographs should be supplied as separate hard copy (and electronic files if possible).

Reviews

Title page

This should contain the complete title, names of all authors, full addresses of all institutions (the address of the laboratory where the work was carried out should be given first) and a short title for page headings.

Abstract

The abstract (which should be no more than 5% of the length of the paper) should summarize the main findings of the paper and the conclusions reached.

References

In the text, references should be cited by giving the name of the first author et al. where there are more than two authors. In the reference list all authors should be given and the titles of the papers and the journals should be written in full. Examples of reference style are as follows:

Kenyon CJ, Fraser R, Birnie GG, Connell JMC & Lever AF 1986 Dose-related in vitro effects of ranitidine and cimetidine on basal and ACTH-stimulated steroidogenesis. *Gut* 27 1143-1146.

Harvey SS 1975 Hypnotics and sedatives. The barbiturates. In *The Pharmacological Basis of Therapeutics*, edn 5, pp 102-123. Eds LS Goodman & A Gilman. New York: Macmillan Publishing Co.

Tables

Tables should have full and informative headings and should be supplied electronically and as hard copy on separate pages. Table columns should be set up using simple tabs rather than specialised table layouts.

Figures

All illustrations should be numbered and on separate pages, bearing the first author's name. One set of line drawings should be good quality originals, e.g. from a laser printer (not photocopies). There is no need to photograph originals of line drawings and three-dimensional graphs to show two-dimensional data should be avoided. Photo- and electronmicrographs should contain scale bars. The cost of colour reproduction over and above that for black and white will be charged to the authors of all but invited manuscripts, but will be kept to a minimum. Please avoid grey or tinted areas in all figures, as these do not always reproduce well. EPS and TIF files can also be accepted provided they are accompanied by good quality paper copies. Legends should enable the reader to understand the information contained in figures without reference to the text.

Original research papers

The main emphasis of the journal is on review articles but original articles may occasionally be accepted if of exceptional quality. The paper should conform with the requirements for reviews and the text should generally follow the format: Abstract, Introduction, Materials and Methods, Results, Discussion and References.

Commentaries

The Editor-in-Chief reserves the right to invite commentaries or critiques on articles accepted for publication.

Ethics of experimental procedures on human subjects

Manuscripts must contain a statement that consent has been obtained from each patient or subject after full explanation of the purpose and nature of all procedures used. It must be stated that the investigation was approved by the local ethical committee, functioning according to the 3rd edition of the Guidelines on the Practice of Ethical Committees in Medical Research issued by the Royal College of Physicians of London (11 St Andrew's Place, London NW1 4LE, UK; Tel: +44 (0) 207 935 1174; Fax: +44 (0) 207 7486 4514; Email: publications@rcplondon.ac.uk; Web: www.rcplondon.ac.uk). Copies of the MRC recommendations can be obtained from the Medical Research Council, 20 Park Crescent, London W1B 1AL, UK (Tel: +44 (0) 20 7636 5422; Fax: +44 (0) 20 7636 6179) or at www.mrc.ac.uk

Use of living animals

All papers describing experiments on animals should conform with the following guidelines:

The UFAW Handbook on the Care and Management of Laboratory Animals published by the Universities Federation for Animal Welfare at The Old School, Brewhouse Hill, Wheathampstead, Herts AL4 8AN, UK (Tel: +44 (0) 1582 831818; Fax: +44 (0) 1582 831414; Web: <http://www.ufaw.org.uk/pubs.htm#Lab>).

FRAME's guidelines on papers involving the use of laboratory animals, at: <http://www.frame.org.uk/Guidelines.htm>

Papers which do not conform with these guidelines or with UK legal requirements cannot be accepted.

Copyright

Articles are considered on the understanding that if they are accepted for publication the entire copyright shall pass to the Society for Endocrinology. Authors will be asked to sign a copyright agreement to this effect. To facilitate the processing of your manuscript please print out the agreement, and submit the completed form and accompanying notes with your paper. Requests for permission to reproduce any part of papers published in Endocrine-Related Cancer should be addressed to the Editor-in-Chief (editorial@endocrinology.org).

Offprints

A free PDF will be emailed to the corresponding author. Offprints can be ordered on the form accompanying the proof.
