

Clinical and Experimental Nephrology, the official journal of the Japanese Society of Nephrology, is an English-language bimonthly publishing review articles, original papers, case reports, images in nephrology, and letters to the editor. Contributions from all parts of the world are welcomed.

Manuscripts should be submitted online to:

<http://cen.edmgr.com>

All correspondence should be sent to:

The Editor-in-Chief, Clinical and Experimental Nephrology
Editorial Office, c/o Springer Japan, No. 2 Funato Bldg. 1-11-11 Kudan-Kita, Chiyoda-ku, Tokyo 102-0073, Japan
E-mail: cen@springer.jp
Tel.: +81-3-6831-7009
Fax: +81-3-6831-7010

Authorship: Only those who have made a substantial contribution to the work should be designated as authors.

Covering letter: Manuscripts should be accompanied by a covering letter. The letter should include a statement that the manuscript, in whole or in part, is not under consideration by any other journal and has not been published before. Resubmissions must be accompanied by a letter stating how the text has been revised in accordance with the referees' comments.

Suggested referees: In the covering letter, authors may suggest referees with appropriate expertise. Authors may provide names, addresses, phone numbers, fax numbers, and e-mail addresses of up to three potential referees. These individuals should not be recent collaborators or coauthors (within the last three years), nor should they have provided substantial advice or critique of the submitted manuscript. Authors should note any referees they may wish to exclude and reason(s) for exclusion. The associate editor will make every effort to take these suggestions into account when assigning referees; however, the editor's decision in this matter is final.

Types of articles:

Original articles An original article should not exceed 3000 words and should be arranged as follows: Abstract, Introduction, Materials and methods, Results, Discussion, Conclusion(s) (optional), Acknowledgment(s), References.

Case reports A case report should be arranged as follows: Abstract (which should be a brief summary of the contents without any subheadings); Introduction; Case report; Discussion; References (which should be kept to a minimum). Case reports should be relevant to practical and scientific aspects of nephrology and be presented as concisely as possible.

Review articles Review articles may be considered for publication by invitation. Articles submitted without invitation may also be considered by the Editorial Board.

Images in nephrology Classic or novel images of kidney and urinary tract diseases will be published at the discretion of the editor. Follow the instructions described in the "Figures" section for the preparation of images. No more than three authors can be included. The title should contain no more than eight words. The legend for the image should concisely present relevant clinical information and should not exceed 150 words.

Letters to the editor Letters to the Editor will be published at the discretion of the Editor. Length must not exceed 500 words, only one table or figure is permitted, and there should be no more than five references. No more than five authors can be included.

Manuscript submission via Editorial Manager

Authors should submit their manuscripts and a covering letter to *Clinical and Experimental Nephrology* online. Please log in directly at <http://cen.edmgr.com> and upload your manuscript following the instructions given. In case you encounter any difficulties while submitting your manuscript online, click on Help in the upper left corner.

Editorial Manager Requirements:

Windows computers
Windows: 2000, 2003, XP, Vista
Internet Explorer 6.0 or later
Firefox 0.9 or later
Macintosh computers
Macintosh: OSX
Firefox 1.0 or later
Safari 3.0 or later
Linux computers
Ubuntu Linux 6.06 and later
Firefox 2.0 and later
Other supported specifications
Adobe Acrobat Reader 6.0 or later
Electronic files of the manuscript text, figures, and tables

Author accounts: Authors entering the journal's Editorial Manager site can either create a new account or use an existing one. When you have an existing account, use it for all your submissions; you can track their status on the same page.

If you have forgotten your username and password, please click the link "Send Username/Password" and enter your e-mail address. You will then receive an automatic e-mail with your user name and password..

Getting started: Once you have logged into your account, Editorial Manager will lead you through the submission process in an orderly, step-by-step process. If you cannot finish your submission in one visit, you can save a draft and re-enter

the process later at the same point for that manuscript.

While submitting your electronic manuscript, you will be required to enter data about your manuscript in the system. These include full title, author names and affiliations, and so forth, as listed below under Preparation of Manuscript. Support for special characters is available. At any point during this process, there are Help buttons available for frequently asked questions.

Uploading files:

Main documents Main documents of articles should be uploaded in rich text format (RTF) or as a Microsoft Word document (.doc).

Tables Use the table functions of your word-processing program, not spreadsheets, to make tables. Tables may be uploaded separately from the main document or inserted into the main document.

Figures Common graphic files such as GIF, JPEG, EPS, and TIFF are supported. Please upload figures that are satisfactory for the review process. If the figures are not satisfactory, you will be requested to send the figures via postal mail.

If your manuscript is accepted for publication, you will be required to provide figures/illustrations of sufficient quality for printing according to Requirements for Electronically Produced Illustrations for Accepted Papers toward the end of this document.

After uploading the parts of the article in this manner, the system will convert the files to Forms Data Format (FDF) format. You can view the result of the conversion with Adobe Acrobat Reader. You will also be notified by e-mail that your submission was successful.

At any point during this process, there are Help buttons available to see frequently asked questions.

If the total size of the files exceeds the file volume (20MB) for online submission, reduce the resolution of large files for initial submission.

Keeping track: After submission, you may return periodically and monitor the progress of your submission through the review process.

Preparation of manuscript

Manuscripts, including tables and figures, must be supplied; the abstract, text, references, tables, and figure legends must be typed double-spaced with wide margins. A separate title page should be provided. The abstract, text, acknowledgments, references, tables, legends, and figures should begin on separate sheets and follow in that order. All manuscripts must be written in English.

Title page: Titles should be brief, specific, and informative. Include the full names of authors; academic affiliation; address to which proofs are to be sent, including a fax number, telephone number, and e-mail address; and 3–6 key words or phrases for indexing.

Abstract: The abstract should not exceed 250 words, and should be arranged under the following subheadings for original articles and short communications: Background (the problem addressed and purpose of the study); Methods (study design and methods and materials); Results (research findings); and Conclusion(s).

References: References should be numbered consecutively in order of appearance in the text and cited in the text using superscript numbers. Names and initials of the first six authors, followed by "et al." if there are other coauthors, complete title, abbreviated journal name according to Index Medicus, year, volume, and beginning and end pages should be included. Examples of references are given below.

Journal Pignon T, Lacarelle B, Duffaud F, Guillet P, Catalin J, Durand A, et al. Pharmacokinetics of high-dose methotrexate in adult osteogenic sarcoma. *Cancer Chemother Pharmacol* 1994;33: 420–4.

Chapter in a book Adler SG, Cohen AH, Glassock RJ. Hereditary nephritis (Alport syndrome). In: Brenner BM, editor. *The kidney*. Philadelphia: WB Saunders, 1995; 1555–8.

Book Bergmeyer H. *Methods of enzymatic analysis*. 3rd ed. Weinheim: Verlag Chemie, 1984.

Tables: Tables should be cited in the text. Each table should be given an Arabic number and a brief informative title and should appear on a separate page. Explain in footnotes all abbreviations used. The information presented in tables should not be repeated in the text.

Figures: Figures should be used with discretion and are justified only if they clarify or reduce the text required. Information given in captions should not be repeated in the text.

Figures should be cited in the text and should be numbered sequentially with Arabic numerals. A brief descriptive legend should be provided for each figure; legends are part of the text and should be appended to it on a separate page. The figures should match the size of either the column width (8.4 cm) or the printing area (17.4 × 23.4 cm). Related figures should be grouped together as a plate on one page (17.4 × 23.4 cm). If plates are submitted, the figure numbers should appear on the artwork. The figures, including legends, should not exceed the printing area. Figure parts should be denoted by lowercase letters. If illustrations are supplied with uppercase labeling, lowercase letters will still be used in the figure legends and citations. In histological photographs, a bar should be used as a size reference, with the length of the bar indicated in the figure legend.

Colorinprint: Online publication of color illustrations is free of charge. For color in the print version, authors will be expected to make a contribution toward the extra costs (¥110 000 for the first and ¥60 000 for each additional page). Otherwise the figures will be printed in black and white. Please note that, in such cases, it is authors'

responsibility to prepare figures to be illustrative enough to convey the necessary information even after they are converted into black and white.

Line drawings Line drawings should be in the desired final size. The inscriptions should be clearly legible. Computer-generated drawings are acceptable provided their quality is comparable to that of line drawings.

Computer-drawn curves and lines must be smooth. Helvetica 8 point (capitals: 2 mm high) is recommended.

Halftone illustrations Photomicrographs, photographs, and shaded drawings should be well-contrasted, trimmed at right angles and in the desired final size. Inscriptions should be about 3 mm high. If reduction is absolutely necessary, please state the alternative scale desired. The publisher reserves the right to reduce or enlarge illustrations.

Units, terminology, and abbreviations: All measurements should be expressed in SI units except for blood pressure, which is expressed in mmHg. Abbreviations should be spelled out at first usage and the abbreviated form used thereafter.

The nomenclature and abbreviations of the structures of the kidney should be followed according to the recommendations of the Renal Commission of the International Union of Physiological Sciences (*Am J Physiol* 1988;254:F1–F8, *Kidney Int* 1988;33:1–7, *Pflügers Arch* 1988;411:113–129).

Generic names should be used for drugs.

Page charges: Authors will be expected to assume the cost of page charges for all articles exceeding five printed pages for original articles, and for all pages exceeding three printed pages for case reports. Invited reviews and editorials are exempt from these charges.

Ethical considerations: All experimental studies using animals and clinical research using human subjects or materials should be conducted in accordance with "Recommendations on the Establishment of Animal Experimental Guidelines" approved at the 80th General Assembly of the Japanese Science Council in 1980, and the principles set out in the Declaration of Helsinki 1964 as modified by subsequent revisions.

Requirements for electronically produced illustrations for accepted papers After acceptance of the manuscript, the publisher requires figure files prepared according to the following specifications.

Illustrations: The preferred figure formats are EPS for vector graphics exported from a drawing program and TIFF for halftone illustrations. EPS files must always contain a preview of the figure in TIFF format.

The file name (one file for each figure) should include the figure number. Figure legends should be included in the text and not in the figure file.

To create an EPS or a TIFF file, please use graphic programs such as Adobe Illustrator, Adobe Photoshop, Macromedia Freehand, Corel Draw or Corel Photopaint.

Note: Almost all common graphic programs are capable of saving files in EPS and in TIFF format. This option can normally be found under the "Save As..." or "Export..." commands in the "File" menu.

Scan resolution Scanned line drawings should be digitized with a minimum resolution of 800 dpi relative to the final figure size. For digital halftones, 300 dpi is usually sufficient.

Color illustrations Store color illustrations as RGB (8 bits per channel) in TIFF format.

Vector graphics Fonts used in vector graphics must be included or outlined. Please do not use hairlines. The minimum line width is 0.2 mm (i.e., 0.567 pt) relative to the final size.

General information on data delivery: Please send us files by the following methods.

- Via ftp.springer.jp (log-in: z10157; password: spvz10157).
- If you are using Netscape or Internet Explorer to upload your files, please use this URL: ftp://z10157:spvz10157@ftp.springer.jp
- By e-mail: cen@springer.jp (suitable only for small volumes of data, up to 2 MB)
- Via postal mail on a CD-ROM or MO (230/640 MB)

Please always supply the journal title, operating system, drawing program, image-processing program, and compression program with your data. For the file name, please use the manuscript ID. Use only the extensions that the program assigns automatically.

Page proofs and offprints: Authors are informed by e-mail that a temporary URL has been created from which they can obtain their proofs. The purpose of the proof is to check for typesetting errors and the completeness and accuracy of the text, tables and figures. Substantial changes in content, e.g., new results, corrected values, title and authorship, are not allowed without the approval of the Editor. After online publication, further changes can be made only in the form of an Erratum, which will be hyperlinked to the article.

Offprints of each paper are available in lots of 100; to order these, fill out the order form received with the page proofs.

Online First: The article will be published online after receipt of the corrected proofs. This is the official first publication citable with the DOI. After release of the printed version, the paper can also be cited by issue and page numbers.
