General Policies and Instructions for Authors

The Journal of Pediatrics publishes original research articles, clinical and laboratory observations, and reviews of medical progress in pediatrics and related fields.

Articles are accepted for publication with the stipulation that they are submitted solely to *The Journal of Pediatrics*. The Journal will not consider for publication papers that have been published elsewhere, even if in another language, or papers that are being considered by another publication or are in press. If a paper by the same author or authors contains any data previously published, in press, or under consideration by another publication, a reprint of the previous article or a copy of the other manuscript should be submitted to the Editor, with an explanation by the authors of the overlap or duplication. If the Editor is made aware of such overlapping or duplicate papers that have not been disclosed by the authors, a written explanation will be requested. If, in the judgment of the Editor, the explanation is inadequate, an appropriate official of the primary author's academic institution will be notified.

As a condition of authorship, all authors must be willing to take responsibility for the entire manuscript. Multi-author manuscripts should have a declaration of each author's contributions in the submission cover letter. All authors of a submitted manuscript must sign a form transferring copyright ownership of the manuscript to Mosby, Inc. The form will be

sent to the corresponding author when the Editors reach a decision that the manuscript may be potentially publishable.

All accepted manuscripts are subject to editorial revision and shortening. The Editors may recommend that appendices and tables containing extensive data be published in the electronic version of *The Journal of Pediatrics* only and referenced in a footnote in the print edition. Statements and opinions expressed in the articles and communications therein are those of the authors and not necessarily those of the Editor or publisher; the Editor and publisher disclaim any responsibility or liability for such material. Neither the Editor nor the publisher guarantees, warrants, or endorses any product or service advertised in this publication; neither do they guarantee any claim made by the manufacturer of such product or service.

Research manuscripts should include a statement that institutional review board approval was received for the study design. Papers describing research involving human subjects should indicate that informed consent was obtained from the parents or guardians of the children who served as subjects of the investigation and, when appropriate, from the subjects themselves. In the event that either the Editor or the referees question the propriety of the human investigation with respect to the risk to the subjects or to the means of obtaining informed consent, The Journal may request more detailed information about the safeguards employed and the procedures used to obtain informed consent. Copies of the minutes of the committees that reviewed and approved the research may also be requested.

Conflict of Interest

Authors should disclose on the title page of the manuscript any potential, perceived, or real conflict of interest, especially any financial arrangement (eg, grants received, advisory board memberships, share holdings) with a company whose product is discussed in the manuscript. If the article is accepted for publication, the disclosure statement may be published.

Trade names of drugs and other products must not appear in the article title. The trade name may appear once in the abstract and once in the introduction or methods section; all other mentions of the product must be in the form of a generic description.

Release to Media

It is a violation of the copyright agreement to disclose the findings of an accepted manuscript to the media or the public before publication in *The Journal of Pediatrics*. Information in

the manuscript may be announced when it is published on The Journal Web site.

Return of Manuscripts

Manuscripts are not returned to authors. Reviewers are instructed to destroy manuscripts after review. Original illustrations are returned if requested by the authors.

Preparation of Manuscripts

All manuscripts and editorial correspondence should be submitted by first-class (not registered) mail to Dr William F. Balistreri, Editor, at the above address.

Format. Submit 4 copies (letter-quality computer printout or clean, sharp photocopy) printed on one side of white 8½ × 11 inch (22 × 28 cm) paper, sequentially numbered, double-spaced (including references), with liberal margins, approximately 25 lines to a page. We expect that original articles will not exceed 6 published pages; therefore, please do not exceed 18 manuscript pages, including the title page, references, and tables. Figures are calculated at 3 per printed page. Please enclose an exactly matching version of the manuscript on a diskette with the software identified on the label.

To assist with a prompt, fair review process, authors are requested to provide the *names, complete addresses, and fax numbers* of 3 to 5 potential reviewers with the appropriate expertise to evaluate the manuscript.

Once a manuscript is accepted, the final version should be submitted on diskette along with 3 copies of the printout. The authors accept responsibility for the submitted diskette exactly matching the printout of the final version of the manuscript. Guidelines for submission of accepted manuscripts on diskette will be sent to the author by the editorial office.

Title page. The title page should include authors' full names and academic degrees; departmental and institutional affiliations of each author; and sources of financial assistance, if any. Listed authors should include only those individuals who have made a significant, creative contribution to the manuscript; a list of more than 6 authors should be justified to the Editors. Designate one author as the correspondent, and provide complete address, business telephone number, and, if available, fax number and e-mail address. For cross-referencing purposes, include a list of key words not in the title. Galley proofs and order forms for reprints will be sent to the corresponding author at a date close to publication.

Abstract. Full-length papers for the Original Articles section of The Journal must include a structured abstract of 200 words or less, to appear after the title page, in the general outline described by the Ad Hoc Working Group for Critical Appraisal of the Medical Literature (Ann Intern Med 1987;106:598-604 and 1990;113:69-76). The abstract must contain the following headings: Objective(s), Study design, Results, and Conclusion(s). The objective(s) reflects the purpose of the study, that is, the hypothesis that is being

tested. The study design should include the type of study, the setting for the study, the subjects (number and type), the treatment or intervention, principal outcomes measured, and the type of statistical analysis. The results include the outcome of the study and statistical significance if appropriate. The conclusion(s) states the significance of the results.

In lieu of the structured abstract, Clinical and Laboratory Observations manuscripts should include a brief summation of ≤50 words, without headings.

Laboratory Values. Laboratory values should be described in both the International System of Units (SI units) and in metric mass units. The SI units should be stated first and the metric units in parentheses immediately thereafter. Conversion tables are available (see JAMA 1986;255:2329-39 or Ann Intern Med 1987;106:114-29).

Drug Nomenclature. Drugs should be described in both the United States Adopted Name (USAN) and International Nonproprietary Name (INN) nomenclature. At first usage cite the USAN with the INN in parentheses; subsequent appearances should use the USAN only.

References. Number references according to order of appearance in the text. For reference style, follow the format set forth in "Uniform Requirements for Manuscripts Submitted to Biomedical Journals" (Ann Intern Med 1997;126:36-47), with journal abbreviations according to Cumulated Index Medicus. If reference is to an abstract, letter, or editorial, place the appropriate term in brackets after the title.

Examples of references (if 6 or fewer authors or editors, list all; if 7 or more, list first 6 and add et al):

For journal articles:

Kramarz P, DeStefano F, Gargiullo PM, Chen RT, Lieu TA, Davis RL, et al. Does influenza vaccination prevent asthma exacerbations in children? J Pediatr 2001;138:306-10.

Cozzi F, Morini F. Possible mechanisms of pacifier protection against SIDS [letter]. J Pediatr 2001;138:783.

For books:

Rosenstein BJ, Fosarelli PD. Pediatric pearls: the handbook of practical pediatrics. 3rd ed. St Louis: Mosby; 1997.

Virginia Law Foundation. The medical and legal implications of AIDS. Charlottesville (VA):The Foundation; 1987.

For chapters in books:

Treem WR. Hepatic failure. In: Walker WA, Durie PR, Hamilton JR, Walker-Smith JA, Watkins JB, editors. Pediatric gastrointestinal disease: pathophysiology, diagnosis, management. 2nd ed. St Louis: Mosby; 1996. p. 343-93.

Tables. Each table must be printed double-spaced on a separate sheet of paper. A concise title should be supplied for each. Tables should be self-explanatory and should supplement, not

duplicate, the text. If a table or any data therein have been previously published, a footnote must give full credit to the original source.

Figure Legends. Each illustration must be provided with a legend. Type legends double-spaced on a separate sheet of paper. If an illustration has been previously published, the legend must give full credit to the original source.

Illustrations. A reasonable number of black-and-white illustrations will be reproduced at no cost to the authors, but the Editors retain the right to edit or delete illustrations and tables for the sake of brevity. Authors are expected to pay the extra cost associated with reproduction of color illustrations. Figure legends must be printed on separate pages from the figures. Figures will not be returned unless specifically requested by the authors.

All black and white photographs must be glossy prints, with good light-to-dark contrast or digitized laser prints with an accompanying diskette (see Illustrations in Electronic Format). The minimum size is 3 × 4 inches and the maximum is 5 × 7 inches; consistency of size within the article is preferred. Histologic figures must have a size bar and indication of magnification. Submit 4 sets of glossy prints, unmounted, numbered, and marked lightly on the back with author's name, top designated.

Computer-generated illustrations must be legible and laser-printed with resolution of ≥300 dots per inch. Dot matrix prints and photographic halftones are not acceptable. Patterns or shadings must be distinguishable from each other and dark enough for reproduction. Lines, symbols, and letters must be smooth and complete. Each figure must be on a separate page. Submit 4 laser-printed originals; photocopies are unacceptable. **Illustrations** may also be original drawings in black ink with typographic lettering; typewritten or freehand lettering is unacceptable. Four sets of originals are required; for freehand drawings, send glossy photographic prints. Do not send original artwork, x-ray film, or ECG strips.

Color illustrations are acceptable, but the colors must be dark enough and of sufficient contrast for reproduction. Note that fluorescent colors do not reproduce well.

Illustrations in Electronic Format. For figures submitted in electronic format, including color illustrations, all images should be at least 5 inches wide and be accompanied by a hard copy (eg, glossy or laser print, not a photocopy). Images should be provided in EPS or TIF format on Zip disk, CD, floppy, Jaz, or 3.5 MO. Either the Macintosh or PC platform is acceptable. Graphics software such as Photoshop and Illustrator, not presentation software such as PowerPoint, CorelDraw, or Harvard Graphics or word processors such as Microsoft Word, should be used in the creation of the art.

Permissions. Direct quotations, tables, or illustrations that have appeared in copyrighted material must be accompanied by

written permission for their use from the copyright owner and original authors along with complete information as to source.

Written permission from the patient, or parent or guardian of a minor child, is required for publication of photographs that include the upper portion of the face; black bars over the eyes are not sufficient. Patient initials should not be used anywhere in the text, tables, or figures.

Articles appear in both the print and online versions of The Journal, and wording of the letter should specify permission in all forms and media. Failure to get electronic permission rights may result in the images not appearing in the online version.

Abbreviations. Complex terms used frequently in the manuscript may be abbreviated. The manuscript should include a list of all abbreviations used. Abbreviations are placed in parentheses at first use in the abstract, and again at first use in the text.

Medical Progress

Authors considering preparation of a review article for the Medical Progress section should submit a proposal letter and outline to the Editors for approval before submitting the full manuscript.

Clinical and Laboratory Observations

Articles in this format should fill 3 journal pages or less, the text 1000 words or less with a brief abstract of 50 words or less. A combined total of 2 illustrations and tables, and approximately 10 references, is recommended.

Insights

Submissions to the Insights section of The Journal should succinctly illuminate clinical problems or solutions of interest to our readers and must fit on one published page. Captioned photographs, brief anecdotes or analyses, or even cartoons are welcome; however, a fresh, useful clinical insight must be offered. All material must be original. Text must not exceed 300 words and is subject to shortening if the text and figure(s) do not fit on one published page. Figure(s) and references may be placed in the Online only version of The Journal if the piece exceeds one published page. Photograph(s) must be original glossy prints, and artwork must be in the original form (see "Illustrations" above). Original, signed, written permission from the patient, or parent or guardian of a minor child, is required for publication of recognizable photographs in all forms and media. (See "Permissions" above.) Contributors will be required to sign a standard copyright transfer agreement; therefore, all submissions must have a title. Submissions will undergo review by the Editors, and their decision to accept or reject will be final (figures from rejected contributions will be returned).

Grand Rounds

Manuscripts for the Grand Rounds section should be prepared in traditional clinicopathologic conference (CPC)

style. Authors for Grand Rounds should send a proposal letter before submission to ensure that their topic is not covered by a manuscript already in process.

Editorial Correspondence

Letters pertaining to articles published in The Journal within the past year or to related topics should not exceed 300 words. Letters must be double-spaced. References, including reference to the pertinent article in The Journal, should conform to style for manuscripts (see previous page). We welcome an exactly matching version of the letter on diskette.

Inquiries Regarding Decisions

Because The Journal is a written medium, all inquiries concerning manuscript decisions should be in writing. The complete manuscript file will be forwarded to the appropriate Associate Editor for prompt response to the inquiry. The Editors are not generally available for telephone calls regarding decisions.

AMSPDC Section

Two pages of The Journal are reserved for the Association of Medical School Pediatric Department Chairs, Inc, which is solely responsible for the content. Authors interested in this section should contact AMSPDC directly:

Dr Aaron Friedman, AMSPDC Editor
The Journal of Pediatrics
Department of Pediatrics
University of Wisconsin
Box 4108, 600 Highland Ave
Madison, WI 53792
Phone: 608-263-8558

News Items. Announcements of scheduled meetings, symposia, or postgraduate courses of interest to the pediatric readership may be sent to the publisher for consideration at least 5 months in advance of the meeting date. News items of general interest to pediatricians and related specialists will also be considered.

Books for Review. *The Journal of Pediatrics* does not publish book reviews. Books sent to the Editor cannot be returned.

Checklist

- Letter of submission, including names and complete contact information for 3-5 suggested reviewers
 - Four copies of article
 - Title page
 - Title of article
 - Full name(s), academic degrees, and affiliations of authors
 - Name, address, e-mail address, telephone and fax numbers of corresponding author
 - Name of reprint request author or notice of no reprints
 - List of key words not in the title
 - Source of funding and conflict of interest statement, if applicable
 - Abstract (double-spaced), *structured*, ≤ 200 words for Original Article or *unstructured*, ≤ 50 words for Clinical and Laboratory Observations
 - List of abbreviations (double-spaced)
 - Article proper (double-spaced)
 - References (double-spaced), on a separate page
 - Tables (double-spaced), each on a separate page
 - Legends (double-spaced), on a separate page
 - Illustrations, properly labeled (4 sets of glossy prints)
 - Letter(s) of permission to reproduce previously published material *in all forms and media*
 - Letters of permission to publish patient photographs *in all forms and media*
-
