**American
Society of
Echocardiography**

EDITOR

Harvey Feigenbaum, MD
Krannert Institute of Cardiology
MPC II, Suite D4080
1801 N Senate Blvd
Indianapolis, IN 46202

INFORMATION FOR AUTHORS

The Journal will consider for publication suitable articles on topics pertaining to ultrasonic examination of the cardiovascular system or echocardiography. All communications relating to the editorial management of the Journal should be sent to Harvey Feigenbaum, MD, at the above address.

Editorial Policies. Statements and opinions expressed in the articles and communications herein are those of the author(s) and not necessarily those of the Editor or publisher, and the Editor and publisher disclaim any responsibility or liability for such material. Neither the Editor nor the publisher guarantees, warrants, or endorses any product or service advertised in this publication. Neither do they guarantee any claim made by the manufacturer of such product or service.

In accordance with the Copyright Act of 1976, which became effective Jan 1, 1978, **the following statement signed by all authors must accompany each manuscript submitted for possible publication:** "The undersigned author(s) transfer all copyright ownership of the manuscript (title of article) to the American Society of Echocardiography, in the event the work is published. The undersigned warrant(s) that the article is original, does not infringe upon any copyright or other proprietary right of any third party, is not under consideration by another journal, and has not been previously published." Authors will be consulted, when possible, regarding republication of their material.

Business Communications. Communications of a business nature should be addressed to Periodical Publisher, Mosby, Inc, 11830 Westline Industrial Drive, St Louis, MO 63146-3318. All advertising communications should be directed to Advertising Sales Services at (314)453-4689 or (800)325-4177, ext 4689. To order reprints, contact Journal Reprints at (800)325-4177, ext 4350, or (314)453-4350 (fax: 314-579-3358).

Review. All articles are reviewed by 2 or more referees. Acceptance is based on significance, originality, and validity of the material presented. If the article is accepted for publication, editorial revisions may be made to aid clarity and understanding without altering the meaning.

Sections. The following sections are established features of the Journal.

Original investigation. Original, in-depth investigations, related experimental research articles. (See "Preparation of Manuscripts.")

Review articles. Concise and comprehensive articles devoted to reviewing a certain area or topic.

Brief communications. Brief commentary and/or selected patient reports of special interest. Articles in this section are limited to 500 words (without a beginning abstract), 1 or 2 illustrations, and 6 carefully selected references.

Forum: Letters to the editor. Brief letters or notes to the Editor regarding published material or information of timely interest.

Editorials. Brief, substantiated commentary on special subjects.

Special Reports. This section will appear periodically when pertinent and will include items of special interest on a particular subject.

Preparation of Manuscripts. Only original manuscripts will be considered for publication. Correct preparation of the manuscript by the author will expedite the reviewing and publication procedures. Please note the following requirements.

The original copy of the manuscript and all supporting material plus 2 photocopies (not carbon copies) must be submitted to the Editor. The article must be typed double-spaced on one side of 22 × 28 cm (8½ × 11 inch) paper with adequate margins. The use of appropriate subheadings throughout the body of the text (Methods, Results, and Discussion sections) is required.

Once a manuscript is accepted, the final version of the manuscript may be submitted on diskette along with 2 copies of the printout. The author accepts responsibility for the submitted diskette exactly matching the printout of the final version of the manuscript. Guidelines for submission of accepted manuscript on diskette will be sent to the author by the editorial office.

Style. Manuscripts must conform to acceptable English usage. Standard abbreviations should be used consistently throughout the article. Unusual or coined abbreviations should be spelled out the first time they appear in the text and followed in parentheses by the abbreviation. Consult the latest editions of the *Council of Biology Editors Style Manual*, *The Chicago Manual of Style* by The University of Chicago Press, or the *Manual of Style* by the AMA for current usage.

Pagination. Begin numbering with the title page as page 1, the summary page as page 2, and continue throughout the text, references, figure legends, and tables. Page numbers should appear in the upper right-hand corner of the pages.

Title page. The title page should include the title, authors' full names, highest earned academic degrees, and institutional affiliations and locations. If the title is exceedingly long, a shortened title for the running head (no longer than 42 characters) should be included. Designate one author as correspondent (provide address and business and home telephone numbers) to receive correspondence, galley proofs, and reprint requests.

Summary. Each article should be accompanied by an abstract/summary not to exceed 150 words, typed double-spaced on a separate sheet of paper.

References. References must be numbered serially in the order in which they appear in the text and typed double-spaced on a separate sheet. Reference list format should conform to "Uniform Requirements

for Manuscripts Submitted to Biomedical Journals" (Ann Intern Med 1997;126:36-47). Abbreviations for journal names should conform to those in *Cumulated Index Medicus*.

EXAMPLES (list all authors when 6 or fewer; when 7 or more, list first 6 and add "et al"):

Format for journals:

Oleske J, Minnefor A, Cooper R Jr, Smith PB, Oswald BR, Atkinson J, et al. Immune deficiency syndrome in children. JAMA 1983;249:2345-9.

Format for books:

Eisen HN. Immunology: an introduction to molecular and cellular principles of the immune response. 5th ed. New York: Harper & Row; 1974. p. 406.

Format for chapters:

Fromer PL. Workshop on congestive heart failure. In: Braunwald E, Mock MB, editors. Congestive heart failure. New York: Grune & Stratton; 1982. p. 1-2.

Unpublished data and personal communications may be cited in the text but should not be listed as references. Authors are responsible for the accuracy of their references.

Illustrations. Illustrations (glossy) should be numbered in the order of their mention in the text and should be marked lightly on the back with the author's last name and an arrow to indicate the top edge. Special arrangements for 4-color illustrations must be made with the Editor. The Publisher will invoice the author for the final costs for color separation and printing of 4-color illustrations after the manuscript is accepted. For color photographs, submit 3 sets of unmounted prints on glossy (smooth surface) paper. Polaroid prints are not acceptable. If it is important to deviate from this standard, please indicate when the material is submitted. **Top for each print must be indicated.** For black and white illustrations, send 3 sets of glossy prints. Black and white photographs should not be made from color slides because they do not reproduce well. Typewritten or freehand lettering is unacceptable. All lettering must be done professionally and should be in proportion to the drawing, graph, or photograph. Do not send original art work, x-ray films, or electrocardiographic strips. Glossy print photographs, 3 × 4 inches (minimum) to 5 × 7 inches (maximum), with good black-and-white contrast or color balance are preferred. Special arrangements must be made with the Editor for color plates or numerous illustrations. Consistency in size within the article is strongly preferred. Any special instructions regarding sizing should be clearly noted.

Illustrations will not be returned unless specifically requested by the author.

Figures may be submitted in electronic format. All images should be at least 5 inches wide. Images

should be provided in EPS or TIF format on Zip disk, CD, floppy, Jaz, or 3.5 MO. Macintosh or PC is acceptable. Graphics software such as Photoshop and Illustrator, not presentation software such as PowerPoint, CorelDraw, or Harvard Graphics, should be used in the creation of the art. Color images need to be CMYK, at least 300 DPI, and be accompanied by a digital color proof, not a color laser print or color photocopy. Note: This proof will be used at press for color reproduction. Gray scale images should be at least 300 DPI accompanied by a proof. Combinations of gray scale and line art should be at least 500 DPI with a proof. Line art (black and white or color) should be at least 1000 DPI with a proof. Please include hardware and software information, in addition to the file names, with the disk.

Figure legends. The legends should be typed double-spaced on a separate sheet of paper and numbered to correspond with the figure. If an illustration has been previously published, the legend must give full credit to the original source.

Tables. Tables should be double-spaced throughout, including column heads, data, and footnotes. Each table must be submitted on a separate sheet of paper. A concise title describing the table's content should be supplied for each table. All columns must carry concise headings describing the data in the column. If a table or any data therein have been previously published, a footnote to the table must give full credit to the original source. Tables should be self-explanatory and should supplement, not duplicate, the text. Type all footnotes immediately below the table and define abbreviations.

Human research. Authors should identify that informed consent was obtained when applicable. Thereby the manuscript should also include the notation that the study was approved by the institutional committee on human research.

Permissions. Direct quotations, tables, or illustrations that have appeared in copyrighted material must be accompanied by *written permission* for their use

from the copyright owner and original author along with complete information as to source. Photographs of identifiable persons must be accompanied by signed releases showing informed consent. Articles appear in both the print and online versions of the journal, and wording of the letter should specify permission in all forms and media. Failure to get electronic permission rights may result in the images not appearing in the online version.

Reprints. Single reprints may be obtained from the author. Reprint order forms will be sent to authors as articles are published.

CHECKLIST

- Letter of submission
- Copyright transfer letter
- Original and 2 copies of article
- Title page
 - Title of article
 - Full name(s), academic degrees, and affiliations of author(s)
 - Name, address, and business and home telephone and fax numbers of author to whom correspondence should be sent
 - Reprint request line
- Abstract (double-spaced)
- Article proper (double-spaced)
- References (double-spaced) on a separate sheet
- Legends (double-spaced) on a separate sheet
- Tables (double-spaced) on a separate sheet
- Illustrations, properly labeled (3 sets of glossy prints)
- Permission to reproduce published material in all forms and media
- Informed consent to publish recognizable likenesses
- Statement of humane animal care
