

Manuscripts

Organization of the paper and style of presentation

All contributions are to be prepared in a style which maximizes information content, usefulness and relevance to a wide spectrum of readers. Papers should not require from the reader too specialized a background and should be generally understandable. In case supporting details of greater interest to the specialist are needed to complete the paper, these should be prepared in the form of an appendix. Authors are encouraged to make maximum use of figures, drawings, photographs and tabular presentations. It is a basic policy of this journal to let the content of the material covered establish the maximum length allowed for papers. Prospective authors should, however, make every effort to write concisely and succinctly, avoiding unnecessary detail.

It is recognized that there may be some situations where exceptions to the requested uniformity in style are appropriate, and the editors and publisher are ready to work with the author on any special problems. It is, however, in the best interests of producing a good journal in a timely manner to require adherence to certain standards of style for the preparation of typescripts as well as published papers.

Manuscripts should be written in impeccable English or French.

Submit the original and three copies of your manuscript. Enclose the original illustrations and two sets of photocopies (three prints of any photographs).

Manuscripts should be typed on one side of the paper, with wide margins and double spacing throughout, i.e., also for the abstract, footnotes and references. Every page of the manuscript, including the title page, references, tables, etc., should be numbered in the upper right-hand corner. However, in the text no reference should be made to page numbers; if necessary, one may refer to sections. Underline words that should be in italics, and do not underline any other words. Avoid the excessive use of italics as well as bold typeface to emphasize parts of the text.

SI (Système International) metric units should be used.

If a special instruction to the copy editor or typesetter is written on the copy it should be encircled. The typesetter will then know that the instruction is not to be set in type. When a typewritten character might have more than one meaning (e.g. the lowercase letter l may be confused with the numeral 1), a note should be inserted in a circle in the margin to make the meaning clear to the typesetter. If Greek letters or uncommon symbols are used in the manuscript, they should be written very clearly, and if necessary a note such as ‘Greek lowercase chi’ should be put in the margin and encircled.

Manuscripts should be organized in the following order:

- Title
- Name(s) of author(s)
- Complete address of affiliation(s)
- Correspondence address
- Abstract
- Introduction
- Main body of text subdivided by subheadings
- Conclusion
- Appendix (if there is one)
- Acknowledgements
- References
- Tables
- Illustrations and figure captions

Kluwer reserves the right to return to the author for revision accepted manuscripts and illustrations which are not in the proper form given in this guide.

Title page

The first page should include:

- Title (clear, descriptive and not too long)
- Name(s) of author(s)
- Complete address of affiliation(s) – including a direct telephone/fax number if possible
- Correspondence address, if different from affiliation
- Abstract (complete, self-explanatory and preferably not longer than 100 words)
- Any short information concerning research grants, etc., may be included at the bottom of the title page but if this information is long, please include it in the ‘Acknowledgements’ section preceding the references.

Abstract

1. The abstract should be clear, descriptive, self-explanatory and not longer than 100 words. It should also be suitable for publication elsewhere.
2. At the beginning of each abstract provide the bibliographic entry by which the paper will be referenced, as follows: [name, initials], [year], [title paper], European Journal of Population.

Main body of text

Indicate headings and subheadings as follows: 1, 1.2, 1.3.1 etc. This makes it easier for the typesetter to set the headings, avoid misunderstandings about their relative importance and also has the advantage that you can easily refer to a section in other parts of the paper (‘... as discussed in section 2.2 ...’ etc.).

Tables

1. Authors should take notice of the limitations set by the size and layout of the journal. Large tables should be avoided. Reversing columns and rows will often reduce the dimensions of a table.
2. If a table fits on one page portrait layout instead of landscape will be used.
3. If many data are to be presented, an attempt should be made to divide them over two or more tables.

4. Drawn tables intended for direct reproduction should not be folded.
5. Tables should be numbered according to their sequence in the text. The text should include references to all tables.
6. Each table should be typewritten on a separate page of the manuscript. Tables should never be included in the text.
7. Each table should have a brief and self-explanatory title.
8. Column headings should be brief, but sufficiently explanatory. Standard abbreviations of units of measurement should be added between parentheses.
9. Vertical lines should not be used to separate columns. Leave some extra space between the columns instead.
10. Any explanations essential to the understanding of the table should be given in footnotes at the bottom of the table.

Illustrations

1. Illustrations (line drawings and photographs) should be on separate sheets of paper, not pasted on pages and not folded.
2. Illustrations should be numbered according to their sequence in the text, and labelled fig. 1, fig. 2, etc. References should be made in the text to each illustration.
3. Each illustration should be identified on the reverse side (or, in the case of line drawings, on the lower front side) by its number and the name of the author. An indication of the top of the illustrations is required in those cases where doubts may arise.
4. Illustrations should be designed with the format of the page of the journal in mind. Illustrations should be of such a size as to allow a reduction of 50%.
5. Lettering should be done using transfer letters or Indian ink. Make sure that the size of the lettering is big enough to allow a reduction of 50% without becoming illegible. The text in the illustration should be in English or in French. Use the same kind of lettering on every illustration.
6. On maps and other illustrations where a scale is needed, use bar scales rather than numerical ones, i.e., do not use scales of the type 1:10,000. This avoids problems if the illustration needs to be reduced.
7. Each illustration should have a self-explanatory caption. The captions to all illustrations should be typed on a separate sheet of the manuscript.
8. Explanations should be given in the typewritten legend. The text in the illustration itself should be kept to a minimum.
9. Photographs are only acceptable if they have good contrast and intensity. Only sharp and glossy original photographs without screen can be satisfactorily reproduced. Reproductions of photographs which have already appeared in print cannot be accepted.
10. Colour illustrations cannot usually be included, unless the cost of their reproduction is paid for by the author.
11. Gray shades in maps and graphs should be avoided. Use dots or stripes to represent different countries or different values in graphs.

Computer output

Computer-produced output is only acceptable for photographic reproduction if the original copies, on unruled paper in black ink, are produced by high-quality (carbon ribbon) typewriters or other comparable impact-type devices. Photo-composition output is normally acceptable.

Mathematical expressions

All formulae in a manuscript should be presented in a consistent and clear way, with respect to the meaning of each symbol and its correct position. Please type formulae throughout. Only if unavoidable should symbols be put in by hand, but be careful that everything is clear and unambiguous.

All handwritten and unusual symbols must be collected in a separate list giving a clear explanation of each symbol and identified in the manuscript at its first occurrence.

Do not use special typefaces if there is no need to. Do not use complicated juxtapositions of symbols, especially in the text. Also try to avoid complicated subscripts and superscripts; second-order indices especially may present difficulties and third-order indices are taboo.

All formulae which are to be referred to later on must be displayed and numbered consecutively (1), (2) etc. on the right-hand side of the page.

References

In the text, refer to the author's name (without initial, unless more than one author has the same surname) and year of publication; if it is considered helpful, a short reference may be made to the appropriate pages. Examples: ' [name] ([year]) suggested that... ' ; ' ...as was clearly the case ([name], [year], pp. [first page]–[last page]). ' ;

Refer to a personal communication as follows: ([name], personal communication, [year]).

If reference is made in the text to a publication written by more than two authors, the name of the first author should be used followed by 'et al.' This indication, however, should never be used in the list of references: in this list the names of the first author and all co-authors should be mentioned.

References cited together in the text should be arranged chronologically.

All publications cited in the text should be presented in a list of references following the text of the manuscript. The manuscript should be carefully checked to ensure that the spelling of the author's names and the dates are exactly the same in the text as in the reference list, and that the reference list is complete.

The list of references should be arranged alphabetically by authors' names, and chronologically per author. If an author's name is mentioned separately as well as with one or more co-authors, the following order should be used: publications of a single author, arranged in chronological order – publications of the author with one co-author – publications of the author with more than one co-author. Publications by the same author(s) in the same year should be listed as 1985a, 1985b, etc.

Use the following system for arranging your references:

For periodicals: [name, initials], [year], [title paper], [title periodical] [volume], [first page]–[last page].

For edited symposia, special issues, etc., published in a periodical: [name, initials], [year], [title paper], in: [title issue], special issue of [title periodical] [volume], [first page]–[last page].

For books: [name, initials], [year], [title book] ([publisher], [place of publication]).

For multi-author books: [name, initials], [year], [title paper], in: [initials + names of editors] [eds.], [title book] ([publisher], [place of publication]) [first page]–[last page].

For unpublished reports, departmental notes, etc.: [name, initials], [year], [title paper], Unpublished [description] ([name of institute, department, etc.]).

For papers not yet published: [name, initials], [year], [title paper], Submitted for publication in (or: Accepted for publication in) [title periodical].

Do not abbreviate the titles of periodicals in the list of references.

In the case of publications in any language other than English, the original title is to be retained. However, the titles of publications in non-Latin alphabets should be transliterated, and a notation such as ‘(in Russian)’ or ‘(in Greek, with English abstract)’ should be added.

Footnotes

Footnotes should only be used if absolutely essential. In most cases it will be possible to incorporate the information in the text. If used, they should be numbered in the text, indicated by superscript numbers and kept as short as possible.

Copyright

An author, when quoting from someone else’s work or when considering reproducing an illustration or table from a book or journal article, should make sure that he is not infringing a copyright.

Although in general an author may quote from other published works, he should obtain permission from the holder of the copyright if he wishes to make substantial extracts or to reproduce tables, plates or other illustrations. If the copyright-holder is not the author of the quoted or reproduced material, it is recommended that the permission of the author should also be sought.

Material in unpublished letters and manuscripts is also protected and must not be published unless permission has been obtained.

Submission of a paper will be interpreted as a statement that the author has obtained all necessary permissions.

A suitable acknowledgement of any borrowed material must always be made.

Upon acceptance of an article by the journal, the author(s) will be asked to transfer the copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Proofs

Proofs will be sent to the corresponding author by e-mail (if no e-mail address is available or appears to be out of order, proofs will be sent by regular mail).

Your response, with or without corrections, should be sent within 72 hours. Please do not make any corrections to the PDF file.

Minor corrections (+/– 10) should be sent as an e-mail attachment to: proofscorrection@springer-sbm.com.

Always quote the four-letter journal code and article number and the PIPS No. from your proof in the subject field of your e-mail.

Extensive corrections must be clearly marked on a printout of the PDF file and should be sent by first-class mail (airmail overseas).

Offprints

25 offprints of each article will be provided free of charge. Additional offprints (both hard copies and PDF files) can be ordered by means of an offprint order form supplied with the proofs.

Additional reprints can be ordered on a reprint order form, which is included with the proofs.

UNESCO coupons are acceptable as payment for extra reprints.

Submission of manuscripts

Submission of an article is understood to imply that the article is original and unpublished and is not being considered for publication elsewhere. Submission in electronic form of the final version of your manuscript is compulsory.

If the address to which proofs should be sent is different from the correspondence address, authors are kindly requested to indicate this.

Papers should be submitted to:

Journals Editorial Office
Mme Marie Digoix
Administrative Editor
Institut National d'Etudes Démographiques
125/133 Boulevard Davout
75980 Paris Cedex 20
France

Springer Open Choice

In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer now provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular subscription-based article, but in addition is made available publicly through Springer's online platform SpringerLink. To publish via Springer Open Choice, upon acceptance please visit www.springeronline.com/openchoice to complete the relevant order form and provide the required payment information. Payment must be received in full before publication or articles will publish as regular subscription-model articles. We regret that Springer Open Choice cannot be ordered for published articles.
