

Submission of Manuscripts

Manuscripts (1 original and 5 copies) should be typewritten on A4 or US Letter bond paper, one side only, leaving enough margin on all sides to permit remarks by the reviewers. Please double-space all materials, including footnotes, endnotes, and references. Number the pages consecutively with the first page containing the title, the authors, the affiliation, a complete address of the corresponding author, a short and informative **abstract** of 100 to 200 words, and five to ten **key words** in alphabetical order, suitable for indexing. Quoted passages of more than 40 words should be set off from the text by indenting the left-hand margin, as a block quotation. **Abbreviations**, if any, should be listed on a separate line after the key words.

Submission of manuscripts (and figures) in their electronic form will ensure more rapid publication. The 3.5 inch diskette in MS DOS format, is preferred, although other systems (e.g. Apple Macintosh) can be used. Please label your diskette properly, giving exact details on the name of the file(s), the operating system and software used. For the purpose of refereeing, the final (revised) diskette version should be accompanied by 6 hard copies.

If you submit your electronic manuscript in a wordprocessor format, it is important that you save it in the wordprocessor format that you use. Please mention the name of the wordprocessor on the label of the diskette. Manuscripts should be sent to: Editorial Office, *Environmental & Resource Economics* P.O. Box 990, 3300 AZ Dordrecht, The Netherlands. Tel: +31 (0)78-6576000 Fax: +31 (0)78-6576555 E-mail: Editdept@springer-sbm.com

Formulas

Formulas should be legible. It is extremely important that all symbols and letters are identified and that the required style of appearance of such symbols is indicated, e.g., bold face, italics, script, outline, fracture, etc. Sub- and-superscripts should be clearly marked wherever confusion might arise. Identify in the margin any symbols that might be confused with similar symbols.

Illustrations

Original ink drawings or laserprinter output reproduce best, but if they are not available, same-sized glossies or matt photostats are acceptable. Photographs should be in black and white on glossy paper. Computer prints are acceptable for figures only if they are done on a high quality laserprinter. All figures must be in a form suitable for reproduction (reduction). Springer accept electronic submission of figures. Preferred file formats are TIFF (Tagged Image File Format) and Encapsulated PostScript (resolution between 300 and 600 dpi), but figures in other electronic formats may also be used. File names should not be longer than 8 characters. A

printout of *all* figures should be supplied with the hardcopy manuscript.

Figures and Tables

Each figure and table should be mentioned in the text and should be numbered consecutively using *Arabic* numbers in order of appearance in the text for Figures and *Roman* numbers for Tables. On the reverse side of each figure, write in pencil the name of the (first) author and the figure number. Figures and tables should be placed at the end of the manuscript, each on a separate page, and accompanied by a legend. Their proper location in the text should be indicated.

Headings and Subheads

A clear distinction into main headings and sub–(sub)heads is requested throughout the text, if more than one degree (level) occurs. First level headings: roman bold, one line of extra space above and below. Second level: italics, one line of space above and below; Third level: italics, 1 line of space above, no space below; Fourth level: italics, text runs on after the full stop.

Notes and References

Notes should be indicated by consecutive superscript numbers in the text and grouped in Notes section, and placed before References. References should be listed in alphabetical order in the References section, and follow the Notes. Examples:

- Haaland, J.I., V.D. Norman, T. Wergeland, and T. Rutherford (1987), ‘VEMOD: A Ricardo–Heckscher–Ohlin–Jones Model of World Trade’, *Scandinavian Journal of Economics* **89** (3), 251–270.
- Hollander, M. and D. Wolfe (1973) *Nonparametric Statistical Methods*. New York: Wiley & Sons.
- Bergman, L. (1986), ‘ELIAS — A Model of Multisectoral Economic Growth in a Small Open Economy’, in B. Ysander, ed., *Two Models of an Open Economy*. Stockholm: The Industrial Institute for Economic and Social Research.

Text references should take a form of authors –date system. Examples:

- (Smith 1978) (Pratt 1975 a, b; Flores et al. 1992).

Cross Referencing

Cross references may also be used to shorten repeated listing of the same book, such as a multiauthor book from which several authors’ contributions are cited.

Appendix

Any supplementary material (e.g. mathematical proofs or description of experimental procedures) can be attached to an Appendix, and placed after Notes and before References. Excessively long Appendices should be revised by the author and reduced to a more condensed form. When more than one appendix appears in the paper, they should be numbered or designated by letters and each should be given a title as well. The text of appendices should be set in smaller type than the text proper.

Copyright

Authors will be asked, upon acceptance of an article, to transfer copyright of the article to the publisher. This will ensure the widest possible dissemination of information under copyright laws.

Permissions

It is the responsibility of the author to obtain written permission for quotations from unpublished material, and for the reprinting of illustrations or tables from unpublished or copyrighted material.

Statement of exclusive submission

The first page should include the following statement: ‘‘This paper has not been submitted elsewhere in identical or similar form, nor will it be during the first three months after its submission to the Publisher.

Proofs

Proofs will be sent to the corresponding author by e-mail (if no e-mail address is available or appears to be out of order, proofs will be sent by regular mail).

Your response, with or without corrections, should be sent within 72 hours. Please do not make any changes to the PDF file. Minor corrections (+/– 10) should be sent as an e-mail attachment to: proofscorrection@springer-sbm.com. Always quote the four-letter journal code and article number and the PIPS No. from your proof in the subject field of your e-mail. Extensive corrections must be clearly marked on a printout of the PDF file and should be sent by first-class mail (airmail overseas).

Offprints

Fifty offprints of each article will be provided free of charge. Additional offprints (both hard copies and PDF files) can be ordered when proofs are returned to the Publisher.

Page charges and color illustrations

No page charges are levied on authors or their institutions. Color illustrations are published at the author’s expense only.

Springer Open Choice

In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer now provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular subscription-based article, but in addition is made available publicly through Springer’s online platform SpringerLink. To publish via Springer Open Choice, upon acceptance please visit www.springeronline.com/openchoice to complete the relevant order form and provide the required payment information. Payment must be received in full before publication or articles will publish as regular subscription-model articles. We regret that Springer Open Choice cannot be ordered for published articles.
