

PREPARING ACCEPTED MANUSCRIPTS FOR PUBLICATION

Chinese Sociological Review uses the in-text author-date citation system and other style conventions presented in the American Sociological Association's Quick Style Guide (www.asanet.org/Quick%20Style%20Guide.pdf). Numbered explanatory notes (if any) and a list of references alphabetized by first authors' surnames should be grouped at the end of the paper.

Do not use automatic annotation systems and do not embed graphics in the text.

All figures and tables to be included in a paper must be specifically referred to in the text and should have brief, descriptive captions. For optimal reproduction, figures or photos should be submitted as TIFF (300 dpi), high quality jpeg or EPS (800 dpi), black and white, with all fonts embedded. Lettering and other elements in figures should be large enough to be readable when the figure has been reduced to fit the journal page.

Accepted papers must be prepared according to the above guidelines prior to publication. Authors will be required to complete and sign the form "Consent to Publish/Transfer of English-language Rights," and provide it to the Editor with the final copy of the accepted paper. Each author will receive a published copy of the issue in which his or her article appears.
