

S.N. Pandey, S.P. Misra and P.S. Trivedi
A TEXTBOOK OF BOTANY, VOL. II
(Bryophyta, Pteridophyta, Gymnosperms and Palaeobotany)
Eighth edition

This edition has been revised in the light of recent developments. It is organised into four parts—Bryophyta, Pteridophyta, Gymnosperms and Palaeobotany. It contains a comprehensive account of structure, reproduction and phylogenetic relationship. Enumeration of different forms is followed with comparative tables, affinities, inter-relationships and systematic positions. Meant for undergraduate students of Indian universities.

S.N. Pandey and B.K. Sinha
PLANT PHYSIOLOGY
Sixth edition

This edition has been thoroughly revised and up-dated in the light of recent studies and new researches. Some new chapters have also been added. Like the previous edition, it discusses all the important topics prescribed at undergraduate level. Besides theoretical part, physiological experiments have been incorporated at the end of each chapter. It is meant for undergraduate students of all Indian universities.

H.C. Dube
A TEXTBOOK OF FUNGI, BACTERIA AND VIRUSES
Sixth edition

The book studies the elementary facts about fungi, bacteria and viruses in the light of recent researches for undergraduate students of Indian universities. G.C. Ainsworth's classification of fungi has also been adopted. The glorious achievements which set in the biological revolution and placed these organisms on the pinnacle of biological research have been recorded herein. The subtle, friendly and unfriendly acts of fungi, bacteria and viruses, which made them famous or infamous, have been discussed.

K.S. Bilgrami, L.M. Srivastava and J.L. Shreemali
FUNDAMENTALS OF BOTANY
Fourth edition

The book provides an exhaustive and introductory text for the students of plant sciences. It has been written keeping in view the syllabi for intermediate, plus two and first year degree courses. It will be useful to the students of B.Sc. final also. The salient features of the book are that summary of each chapter and other points of use have been appended at the end of each chapter to enable the student to refurbish himself before the examination. A wide range of objective, short and descriptive types of questions have also been given.
