

Contents

Preface	v
Introduction	vi

PART 1

Microscopy

1. Brightfield Microscopy 3
2. Darkfield Microscopy 9
3. Phase-Contrast Microscopy 11
4. Fluorescence Microscopy 17
5. Microscopic Measurements 22

PART 2

Survey of Microorganisms

6. Protozoa, Algae, and Cyanobacteria 28
7. Microscopic Invertebrates 37
8. Fungi: Yeasts and Molds 40
9. Bacteria 46

PART 3

Microscope Slide Techniques

10. Negative Staining 50
11. Smear Preparation 52
12. Simple Staining 56
13. Capsular Staining 57
14. Gram Staining 58
15. Spore Staining: Two Methods 61
16. Acid-Fast Staining: Ziehl-Neelsen Method 63
17. Acid-Fast Staining: Fluorescence Method 64
18. Flagellar Staining: Leifson's Method 66
19. Motility Determination 68

PART 4

Culture Methods

20. Culture Media Preparation 72
21. Pure Culture Techniques 78
22. Cultivation of Anaerobes 85
23. Bacterial Population Counts 89
24. Slide Culture: Molds 95
25. Slide Culture: Autotrophs 98
26. Slime Mold Culture 99
27. Photosynthetic Bacteria:
Isolation and Culture 102

PART 5

Bacterial Viruses

28. Isolation of Phage from Sewage 107
29. Isolation of Phage from Flies 110
30. Burst Size Determination:
A One-Step Growth Curve 114

PART 6

Microbial Interrelationships

31. Bacterial Commensalism 120
32. Bacterial Synergism 121
33. Microbial Antagonism 122

PART 7

Environmental Influences and Control of Microbial Growth

34. Temperature: Effects on Growth 124
35. Temperature: Lethal Effects 126
36. pH and Microbial Growth 128
37. Osmotic Pressure and Bacterial Growth 129
38. Oligodynamic Action 130
39. Ultraviolet Light: Lethal Effects 131
40. Evaluation of Disinfectants:
The Use-Dilution Method 133
41. Evaluation of Alcohol:
Its Effectiveness as a Skin Degerming Agent 135
42. Evaluation of Antiseptics:
The Filter Paper Disk Method 137
43. Antimicrobial Sensitivity Testing:
The Kirby-Bauer Method 139
44. Effectiveness of Hand Scrubbing 142

PART 8

Identification of Unknown Bacteria

45. Preparation and Care of Stock Cultures 146
46. Morphological Study of Unknown 148
47. Cultural Characteristics 151
48. Physiological Characteristics: Biooxidations 155
49. Physiological Characteristics: Hydrolysis 164
50. Physiological Characteristics:
Miscellaneous Tests 168
51. Use of *Bergey's Manual* and
Identibacter Interactus 171

PART 9

Miniaturized Multitest Systems

- 52. Enterobacteriaceae Identification:
The API 20E System 179
- 53. Enterobacteriaceae Identification:
The Enterotube II System 183
- 54. O/F Gram-Negative Rods Identification:
The Oxi/Ferm Tube II System 188
- 55. Staphylococcus Identification:
The API Staph-Ident System 192

PART 10

Microbiology of Soil

- 56. Microbial Population Counts of Soil 196
- 57. Ammonification in Soil 197
- 58. Nitrification in Soil 198
- 59. Nitrogen-Fixing Bacteria 200
- 60. Isolation of an Antibiotic Producer from Soil 204

PART 11

Microbiology of Water

- 61. Bacteriological Examination of Water:
Qualitative Tests 208
- 62. Membrane Filter Method 212
- 63. Standard Plate Count: A Quantitative Test 214

PART 12

Microbiology of Milk and Food Products

- 64. Standard Plate Count of Milk 216
- 65. Direct Microscopic Count of Organisms in Milk:
The Breed Count 217
- 66. Reductase Test 220
- 67. Bacterial Counts of Foods 222
- 68. Microbial Spoilage of Canned Food 223
- 69. Microbial Spoilage of Refrigerated Meat 225
- 70. Microbiology of Fermented Beverages 227
- 71. Microbiology of Fermented Milk Products
(Yogurt) 229

PART 13

Bacterial Genetic Variations

- 72. Mutant Isolation by Gradient Plate Method 232
- 73. Mutant Isolation by Replica Plating 234
- 74. Bacterial Mutagenicity and Carcinogenesis:
The Ames Test 236
- 75. Bacterial Conjugation 239

PART 14

Medical Microbiology and Immunology

- 76. A Synthetic Epidemic 244
- 77. The Staphylococci:
Isolation and Identification 247
- 78. The Streptococci:
Isolation and Identification 252
- 79. Gram-Negative Intestinal Pathogens 260
- 80. Urinary Tract Pathogens 264
- 81. Slide Agglutination Test: Serological Typing 269
- 82. Slide Agglutination (Latex) Test:
For *S. aureus* Identification 271
- 83. Tube Agglutination Test:
The Heterophile Antibody Test 273
- 84. Tube Agglutination Test:
The Widal Test 275
- 85. Phage Typing 277
- 86. White Blood Cell Study:
The Differential WBC Count 278
- 87. Total WBC Count 282
- 88. Blood Grouping 284
- 89. The Snyder Caries Susceptibility Test 287

- Laboratory Reports 289
- Descriptive Charts 405
- Appendix A Tables 413
- Appendix B Indicators, Stains, Reagents 423
- Appendix C Media 427
- Appendix D Identification Charts 433
- Appendix E The Streptococci 443
- Appendix F *Identibacter Interactus* 447
- Reading References 461
- Index 463
